OAKBROOK TERRACE, IL (JAN. 11) PR NEWSWIRE - Telesphere Communications Inc.(AMEX: TSP) announced today the appointment of James G. Hertel Jr. as vice president of marketing for Information Services/900. Hertel will direct sales and marketing activities to attract corporate and institutional customers to Telesphere's 900 service.

Dennis Houlihan, senior vice president for Telesphere Information Services/900, pointed to Hertel's leading role in developing the 900 service industry: "Jim Hertel has created major voice response applications for consumer goods marketers which have become standards in the industry. Of particular interest are lead-qualification promotions he designed in the early '80s for Frito Lay and Brim Coffee. They were the first of their kind."

Telesphere Communications Inc. operates a nationwide state-of-the- art, digital fiber optic network and provides long distance network services, operator services, interactive 900 services and other enhanced communications services.

HIGH POINT, NC (JAN. 11) PR NEWSWIRE - Directors of LADD Furniture, Inc. (NASDAQ-NMS: LADF) today declared a regular quarterly cash dividend of $.07 per share on the corporation's common stock, the same amount as was paid in the previous quarter. The dividend is payable February 15, 1990 to stockholders of record February 1.

Chairman and chief executive officer Don A. Hunziker said that LADD's directors, after reviewing the continuing softness in U.S. furniture sales and LADD's recent earnings performance, did not feel it appropriate to increase the quarterly dividend at this time. Hunziker added that the directors also decided not to declare a year-end "extra" cash dividend of the type paid last year. The 1989 "extra" dividend, $.03 per share, was paid in February. LADD's indicated annual dividend rate is curretnly $.28 per share, Hunziker said, compared to $.31 paid in calendar 1989 -- including the $.03 "extra."

Headquartered in High Point, N.C., LADD is one of the largest U.S. manufacturers of residential furniture, marketing its broad range of wood, upholstered and metal furniture to both reesidential and contract customers under the major brand names American Drew, American of Martinsville, Barclay, Brown Jordan, Clayton-Marcus, Daystrom, Design Horizons, Kittinger, Lea Industries and Pennsylvania House. LADD also owns and operates Lea Lumber & Plywood Co. and LADD Transportation, Inc., and its stock is traded on the over-the-counter National Market System under the NASDAQ symbol LADF.

NEW YORK (JAN. 11) PR NEWSWIRE - AT&T (NYSE: T) today announced that Primerica Corporation (NYSE: PA) has awarded it a three-year contract to provide a custom voice and data network linking the firm's 1,100 U.S. locations.

The contract value is estimated at $51 million to $60 million, AT&T and Primerica said.

Primerica is a diversified financial services company engaged in insurance services, investment services and consumer finance.

The new corporate-wide network will integrate telephone and computer communications at all of Primerica's domestic locations in addition to handling the company's international traffic. It will incorporate new and existing AT&T services.

The network will serve Primerica's corporate headquarters in New York, as well as 23 subsidiaries, including Commercial Credit Corporation, based in Baltimore; Smith Barney, Harris Upham & Co., Incorporated, New York; A.L. Williams Corporation, Duluth, Ga.; Fingerhut, St. Cloud, Minn.; Gulf Insurance, Dallas; and Primerica Bank, Wilmington, Del.

"We selected AT&T because we were impressed by their network quality and performance, ability to manage the network and flexibility to meet our changing needs," said Edwin E. Sherin, chief information officer of Primerica. "The new network will enable us to improve efficiency and deliver the latest technology to our customers."

AT&T Sales Vice President Kenneth A. Foster commented, "We are happy that this prestigious client has chosen to partner with AT&T to gain an information edge in the competitive financial services marketplace."

HOUSTON (JAN. 11) PR NEWSWIRE - Continental Express today announced continuation of its commitment to the New Haven community by providing an increase in capacity and greater frequency to Newark International Airport from Tweed/New Haven Airport. The upgrade of equipment and additional flight to Newark became effective on January 8.

Continental Express will be increasing its capacity once again on Feb. 1 by operating additional larger aircraft in the market. With the new schedule, Continental Express will provide six flights between Tweed/New Haven Airport and Newark International Airport Monday thru Friday with similar weekend service.

Combining the additional flight in conjunction with the upgrade of equipment, Continental Express will have over 180 available seats per day, and over 200 after Feb. 1. This represents a 31 percent increase in daily capacity over the present schedule.

Continental Express currently operates between New Haven and Newark with the 35 passenger Saab 340 and the 19 passenger Beechcraft 1900 aircraft. By Feb. 1, all Saab 340's will be replaced by the 46 passenger Aerospatile/Aeritalia ATR-42. The ATR-42 is a new state-of- the-art aircraft with comfortable, four-across seating, stand up headroom, overhead storage and fold-down work tables. It is equipped with the newest in avionic systems featuring full weather radar.

Continental's terminal in Newark has been described as one of the nation's

best airport facilities, both in terms of design and convenience. Travelers passing through Terminal C to connect with Continental flights will experience new, easy-to-read color flight information displays, moving sidewalks, reasonably priced food and beverages, and clean spacious waiting areas. The terminal features high, vaulted ceilings with an indoor waterfall, gates that are easy to find, and Continental Service Centers that are strategically located nearby.

The schedule for Continental Express has been designed to allow passengers traveling from New Haven to connect quickly and conveniently to Continental Airlines.

DETROIT (JAN. 11) PR NEWSWIRE - Twin Cities-based Mesaba Aviation Inc. today announced that the airline has received preliminary approval for construction of a new aircraft maintenance facility at Detroit Metropolitan Airport. Officials from the airline and Wayne County Airport made that announcement today at an 11 a.m. airport press conference.

Construction on the 45,000-square-foot facility is scheduled to begin this spring and be completed by November, officials from Mesaba said. The new

facility will include an aircraft hangar and related maintenance shops. While the cost of the project has yet to be determined, Mesaba has applied for financing in the amount of $4.5 million from the Wayne County Commission.

Robert D. Swenson, president and chairman of Mesaba, said the airline's plans to build the facility reflects the airline's commitment to serve the region. "Our decision to invest in a major facility here reflects our long-term commitment to growth and service at this airport, the state of Michigan and this region," he told officials from Wayne County, the city of Romulus and members of the press present at the news conference.

The new facility at Detroit will be Mesaba'a fourth aircraft maintenance hangar. The company operates other maintenance facilities at Minneapolis/St. Paul International Airport, Central Wisconsin in Mosinee, Wis., and Gordy Newstrom Field in Grand Rapids, Minn. The Detroit facility will be second in size only to the company's 79,000-square-foot Twin Cities hangar where the company's corporate offices are located.

Mesaba Aviation began providing scheduled airline service at Detroit Metropolitan Airport in December of 1988. The airline operates as Northwest Airlink under a marketing agreement with Northwest Airlines, an arrangement the airline has had since 1984 at Minneapolis/St. Paul International Airport.

Originally founded in 1944 in Grand Rapids, Minn., Mesaba currently provides scheduled airline service to 34 cities in ten states. From Detroit, Mesaba provides service to 12 cities in Michigan, Ohio, Pennsylvania and Wisconsin.

The airline currently operates a fleet of 31 aircraft which includes 15 48-passenger Fokker F27 aircraft and 16 19-passenger Metro III aircraft. With 74 daily operations at Detroit Metropolitan Airport, Mesaba expects to carry over 400,000 passengers to and from the airport in 1990 making it the dominant regional carrier serving the airport. Mesaba is a wholly owned subsidiary of Twin Cities-based AirTran Corp.

NEW YORK (JAN. 11) PR NEWSWIRE - The American Stock Exchange announced that Resurgens Communications Group, Inc. of Atlanta, is the second company to list this year.

Resurges Communications Group is a long distance telephone service and telecommunications company. The company, which has 11,571,410 common shares issued and outstanding and $15,000,000 principal amount of 10 percent convertible subordinated debentures, due 2005, began trading common shares and debentures today.

Resurgens Communications Group previously traded in the over-the- counter market under the symbol RCGI.

Trading under ticker symbol RCG, the common stock opened on 6,400 shares at 4-3/8 and the debentures, trading under ticker symbol RCG.A., opened on a bid and offer of 100-105.

Resurgens Communications Group processes and transmits operator- assisted long distance telephone calls made from subscribers' multi- telephone facilities such as hotels, motels, hospitals, payphones and similar properties on a nationwide basis.

In July, Resurgens Communications Group acquired Southern Cellular Telecom Inc. This subsidiary operates a chain of 15 retail stores in ten Southeastern metropolitan areas that market and service cellular telephones, office and portable facsimile machines and related telecommunications products.

The company reported unaudited net income of $60,000, or $.01 per share, on revenues of $4,174,000 for the three months ended Sept. 30, 1989, compared with a loss of $2,132,000, or a $2.63 per share loss, on revenues of $7,005,000 for the comparable period ended Aug. 31, 1988. The company has changed its fiscal year to June 30.

#90011p0222 01/11/1990 ~PR Newswire

SANTA BARBARA, CA (JAN. 11) PR NEWSWIRE - Inamed Corp. (NASDAQ: IMDC), headquartered in Santa Barbara, today said that its wholly owned

subsidiary, Cox-Uphoff Corp. (now CUI Corp.), Carpinteria, Calif., will appeal the reversal of a decision entered by Judge Jesse W. Curtis in Feb. 28, 1989, granting Judgment N.O.V. (J.N.O.V.) in favor of Cox-Uphoff in a suit brought against the company by Mentor Corp., Goleta, Calif. The company has been notified by the United States District Court, Central District of California, that Judge Curtis has forwarded the decision of the United States Court of Appeals for the Federal Circuit stating that the J.N.O.V. be vacated and the jury's compensatory damage award of $690,000, entered Oct. 4, 1988, in favor of Mentor is reinstated.

The reinstatement includes a permanent injunction prohibiting Cox-Uphoff, which was acquired by Inamed Corp. in May 1989, from manufacturing and selling the company's reinforced backed Versafil tissue expanders and RDL X-pand mammary prosthesis. Further, Cox-Uphoff is to pay the plaintiffs additional damages at the rate of $156.00 per unit for each RDL x-pand mammary prosthesis and $132.25 per unit for each backed Versafil tissue expander sold from Sept. 9, 1988, to the date of compliance.

The judgment calls for awards to the plaintiffs of attorney fees, costs and trebled damages on the jury's compensatory damage award.

Clark L. Pool, president of Cox-Uphoff Corporation, said, "The company will appeal the damages and the awards of attorneys' fees through available court procedures." Pool further stated that the past sales of the affected products composed only a minor portion of Cox-Uphoff's total sales and the discontinuation of the named products will not have any major impact on the future performance and growth of the company.

DECATUR, GA. (JAN. 11) PR NEWSWIRE - DFSoutheastern Inc., (NASDAQ: DFSE) the Decatur, Ga.-based holding company for Decatur Federal Savings and Loan Association, today announced the results of operations for the year ended Dec. 31, 1989 and the fourth quarter ended Dec. 31, 1989.

Net earnings for the year ended Dec. 31 rose 17 percent to $11,378,000 or $2.45 per share from $9,714,000 for the year 1988. Net interest income before provision for possible loan losses for the year 1989 was $54,208,000, an increase of 15 percent, compared with $47,315,000 for 1988. The conversion of Decatur Federal Savings and Loan Association from a mutual thrift institution to a stock thrift institution was completed on Sept. 30, 1988. Therefore, no comparable earnings per share information is available for the year ended 1988.

Net earnings for the fourth quarter were $2,918,000, or 63 cents per share

down from $3,398,000, or 73 cents per share for the same period in 1988. Net interest income before provision for possible loan losses was $15,169,000, an increase of 4 percent compared with $14,620,000 for the same quarter last year. Earnings for the fourth quarter 1989 were impacted by managements' decision to increase reserves for possible loan losses by $2 million.

At Dec. 31, 1989, DFSoutheastern Inc. had consolidated assets of $2.3 billion and deposits of $1.7 billion. Decatur Federal Savings and Loan Association, the wholly owned subisidary of DFSoutheastern Inc. has 27 branch offices and five mortgage loan offices serving metropolitan Atlanta and North Georgia. Fairfield Financial Services Inc., a wholly owned mortgage subsidiary of Decatur Federal, operates 15 mortgage loan offices in Georgia, Tennessee, North Carolina, South Carolina, Alabama and north Florida. DFSoutheastern's common stock is traded in the NASDAQ over-the-counter Securities Exchange under the symbol "DFSE."

CEDAR RAPIDS, IA (JAN. 11) PR NEWSWIRE - Met-Coil Systems Corporation (NASDAQ: METS) one of the world's largest multinational suppliers of sheet metal processing equipment, announced lower revenues and earnings for its second quarter and first half ended Nov. 30, 1989; its outlook for fiscal 1990; and information about its regular quarterly dividend.

"Revenues for the current periods were down for two principal reasons," said Martin J. Huebschman, Met-Coil president and chief executive officer. "First, the Flexible Fabrication Systems Division substantially completed its major systems appliance orders during fiscal 1989. Second, we experienced lower volume at our Mark One subsidiary, primarily due to a slowdown in the automotive sector. Earnings for both periods were below the prior year's results due to a low beginning backlog, which resulted in decreased revenues and operating income, and additional interest expense. On a positive note, backlog increased 36 percent to $13.7 million since May 31, 1989, with customer quotation levels remaining high."

Revenues for the three months were $15.1 million, a 14 percent decrease from $17.4 million for the same period in fiscal 1989. Net income for the most recent quarter decreased 42 percent to $369,000, or 15 cents per

share, compared with $634,000, or 32 cents per share, for the prior year's period.

For the first half of fiscal 1990, revenues were $27.8 million compared with $31.6 million, a decrease of 12 percent. Net income for the period was 41 percent lower, at $436,000, or 18 cents per share, compared with $745,000, or 36 cents per share.

The weighted average common shares used in per-share calculations increased 23 percent for the second quarter and 20 percent for the six months. The rise in shares resulted primarily from the reissuance of 475,000 shares of treasury stock in connection with the company's investment in Scott Technology Ltd.

In discussing Met-Coil's outlook for the rest of fiscal 1990, Huebschman said, "given current economic forecasts, we expect revenues to be moderately below the record $69.6 million we saw in fiscal 1989, in the absence of any acquisitions. Earnings also will be lower, due to the smaller revenue base and increased interest expense from additional borrowing, including the company's private debt placement."

"We are focusing our attention on improving performance through cost reductions at our operating units," Huebschman added. "Our goals for the year are to maintain the gross profit percentage while decreasing operating expenses by 5-10 percent from the prior fiscal year, and building our backlog for fiscal 1991."

Huebschman also announced Met-Coil will pay a quarterly dividend of 3 cents per common share on Feb. 1, 1990, to shareholders of record on Jan. 24, 1990.

Met-Coil Systems Corporation and its operating units design, engineer, manufacture and market metal forming and fabricating machinery and computer-controlled fabrication systems, which produce a variety of products from metal coils and sheets. The company also manufactures high-speed automated material handling, assembly and press line automation equipment and systems.

Met-Coil's objective is to create a group of complementary companies to satisfy the wide-ranging needs of manufacturers and sheet metal fabricators worldwide. It expects to meet this objective through four strategies. First, strategic affiliations and acquisitions allow Met-coil to expand current product lines or diversify into new products or associated markets. Management recognizes that this may squeeze profits in the near term, but must be part of a long-term growth perspective.

Second, with a balanced product line, between standard and custom-made machinery and flexible fabricated systems, Met-Coil believes it can offset

some of the cyclical nature of its business and reach more customers. Third, the company is emphasizing new product development through research and development; each operating unit has a goal of introducing one new product each year. Fourth, serving markets worldwide will help the company take advantage of the growing receptivity of U.S. trade arrangements in foreign countries, specifically in Europe and the Far East.

Met-Coil is headquartered in Cedar Rapids, Iowa. Its operating units and affiliates include Flexible Fabrication Systems Division and Iowa Precision Industries, also in Cedar Rapids; The Lockformer Company in Lisle, Ill.; Mark One Corporation of Gaylord, Mich.; Roper Whitney Company in Rockford, Ill.; Rowe Machinery and Automation, Inc., Dallas; Advanced Assembly Automation, Inc., Dayton, Ohio; RWC Incorporated, Bay City, Mich.; and two international operations: Met-Coil Ltd., in Ayase, Japan; and Scott Technology Ltd., Dunedin, New Zealand.

PHILADELPHIA (JAN. 11) PR NEWSWIRE - Don Chesnut, the senior Boeing (NYSE: BA) executive in charge of the company's helicopter division, is retiring effective Feb. 1.

Succeeding Chesnut as executive vice president-Helicopters for the Boeing

Defense & Space Group, is long-time Boeing manager Ed Renouard, currently senior vice president-Helicopters. Renouard will report to B. Dan Pinick, president of Boeing Defense & Space Group.

Chesnut began working for Boeing in Wichita, Kan., in 1950, following his graduation from Kansas State University. During his nearly 40-year career with Boeing, Chesnut has held many key management positions in various Boeing defense and space programs. Chesnut joined Boeing's Philadelphia-based helicopter division in 1986 and is retiring to pursue other interests.

Renouard joined The Boeing Co. in Seattle in 1959 after graduation in mechanical engineering from Gonzaga University, Spokane, Wash. He has held a number of technical and management positions with Boeing, including: Air Launch Cruise Missile program manager; president of Boeing Aerospace Operations in Cocoa Beach, Fla., and director of Boeing's B-1B simulation and maintenance trainer programs in Huntsville, Ala.

Renouard has been at Boeing Helicopters since February 1989, where he has had day-to-day responsibility for all ongoing programs, including the Bell Boeing V-22 Osprey and the CH-47 Chinook.

Boeing Helicopters is one of the world's leading producers of military and civil rotorcraft and is based in suburban Philadelphia's Ridley Township, Delaware County, Pa. Boeing Helicopters is a division of the Boeing Defense & Space Group, which is a unit of The Boeing Co., headquartered in Seattle.

TULLAHOMA, TN. (JAN. 11) PR NEWSWIRE - FTS Bancorp, Inc. has filed an application with the Office of Thrift Supervision for permission to acquire control of First Federal Savings Bank of Tennessee (NASDAQ: FTSB). Shareholders of First Federal gave approval to reorganizing into a holding company this fall.

FTS Bancorp, Inc. was chartered by First Federal for the purpose of facilitating the reorganization. Upon consummation of the reorganization, the present stockholders of First Federal will become the stockholders of FTS Bancorp., Inc.

Murray Brown, president of First Federal, said the public is invited to comment on the proposed reorganization by writing the District Director, Cincinnati District Office, Office of Thrift Supervision, 2000 Atrium II, 221 East 4th Street, Cincinnati, Ohio, 45201, within 20 calendar days.

First Federal Savings Bank is the 13th largest thrift institution in Tennessee with operations in eight cities, including Nashville and Chattanooga, and full service offices in five cities.

The common stock of First Federal is traded in the over-the-counter market under the NASDAQ symbol FTSB.

CHICAGO (JAN. 11) PR NEWSWIRE - United States Cellular Corp. (AMEX: USM) more than doubled its subscriber base to 44,000 at the end of 1989, up 136 percent from 18,600 at the close of 1988. The number of markets served by the company's systems increased 14 percent to 32, H. Donald Nelson, president, said today.

At the same time, the number of population equivalents -- or pops -- that the company owns or has the right to acquire increased 16 percent to 8,980,000 from 7,769,000, including 934,000 pops in Rural Service Areas (RSAs) that can be acquired from the company's parent, Telephone and Data Systems (AMEX: TDS). Pops are an industry term describing the population included in areas where a cellular provider operates or holds an interest in a license.

Nelson said that the coming year should bring increasing market penetration throughout the cellular telephone industry. Effectively all metropolitan service areas currently have at least one cellular provider, consumer acceptance of cellular has increased sharply, and costs of equipment have declined dramatically.

Subscribers served by the nation's sixth-largest publicly held cellular telephone company increased 136 percent to 44,000 from 18,600 at the close of 1988. During the same period, subscribers in the company's consolidated systems -- those that are majority owned and managed by the company -- increased 164 percent to 36,000 from 13,600. Consolidated systems in operation increased to 25 from 15 at year end, while United States Cellular was the manager of systems serving 32 markets, up from 28 at the close of 1988.

Nelson indicated that the company's Customer Care program, emphasizing ongoing contact and support for existing customers, reduced turnover rates or churn, within the customer base.

United States Cellular currently owns or has the right to purchase

interests in cellular licenses in 74 Metropolitan Service Areas (MSAs) and 34 RSAs. All of the metropolitan areas were being served at the end of 1989, while one RSA system was already in operation at year end. Substantially all the rural systems should be in operation within the next 24 months, according to Nelson.

United States Cellular Corp. is 81-percent owned by Telephone and Data Systems.

JACKSON, MI (JAN. 11) PR NEWSWIRE - Consumers Power Company's long-term, fixed-price natural gas buying strategy has protected its customers from sharp price increases this winter, despite temperatures in December that averaged 29 percent below normal and 31 percent below December 1988.

"Natural gas costs for Consumers Power customers have dropped significantly in the past year. Our gas costs have decreased approximately 17 percent compared to 1988," said Michael G. Morris, the utility's executive vice president of natural gas and marketing. "Customers are protected from arbitrary, severe shifts in the weather by our long-term, fixed-price gas marketing strategy and by the fact that ours is a regulated industry," Morris said.

"People buying other fuels, such as propane, fuel oil and kerosene are not protected by these factors," added Morris. "Supplies and prices for these other fuels react to market demand. With December temperatures substantially colder than normal, suppliers of these fuels raised their prices to reflect the increase in demand," Morris noted. The 3.3 million Michigan residents served with gas by Consumers Power are paying between 40 percent and 62 percent less for December's home heating than what is being charged for other fuels.

Based on present market prices, a typical residential customer of Consumers Power is paying approximately $114 for the use of 27,000 cubic feet of gas in December, including a one-time refund averaging $6.30. To heat a similarly sized home, a user of propane would pay approximately $300, while a fuel oil consumer would pay $190. Comparable home heating costs for kerosene are about $250.

In the past five years, the cost of gas to Consumers Power customers has been reduced by approximately 25 percent. The utility's typical residential gas customer pays an estimated 13 percent less than a similar customer served by other major gas utilities in Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties. It is the nation's eighth-largest gas-distribution utility serving 215 cities and villages including suburban Detroit, Bay City, Flint, Jackson, Kalamazoo, Lansing, Pontiac and Saginaw in 40 of the 68 Lower Peninsula counties.

CLEVELAND (JAN. 11) PR NEWSWIRE - Wayne R. Embry, vice president and general manager of the Cleveland Cavaliers, has been elected to the Board of Directors of the M.A. Hanna Company (NYSE/MSE: MAH), it was announced today.

"We are delighted to have Mr. Embry join us. We feel his experience both in the National Basketball Association and in business and community circles will enhance the depth of Hanna's board," said Hanna Chairman Martin D. Walker.

Embry began his 32-year association with professional basketball following graduation from Miami University, Oxford, Ohio, in 1958, by joining the Cincinnati Royals. He went on to play for the Boston Celtics and ended his playing career with the Milwaukee Bucks in 1969. After serving as the

director of recreation for the city of Boston, Massachusetts, he returned to the Milwaukee organization in 1972 as general manager and in 1977 became vice president, consultant. In 1985, he joined the Indiana Pacers staff as vice president, consultant before joining the Cleveland Cavaliers in 1986 as vice president and general manager.

Embry also is chairman of the Michael Alan Lewis Company (M.A.L.CO.), Union, Illinois, served on the board of directors of the G. Heileman Brewing Company, LaCrosse, Wisconsin. He is a member of the USA Olympic Basketball Selection Committee and a trustee of the Professional Basketball Hall of Fame and Miami University.

Embry is a member of the boards of directors of the Greater Cleveland Growth Association, the Cleveland Roundtable and the New Cleveland Campaign.

M.A. Hanna Company is a leading international formulated polymers company with interests in natural resources.

WASHINGTON (JAN. 11) PR NEWSWIRE - The board of directors of James Madison Mortgage Company (JMMC), a subsidiary of the Washington-based bank holding company James Madison Limited (AMEX: JML), announced that Richard K. Manuel has been elected to the position of senior vice president.

Manuel has been employed with JMMC since May 1986. Most recently, he held the position of branch manager of the Silver Spring office of JMMC, and in May 1988, Manuel was elected regional vice president of Residential Lending for Maryland. As senior vice president, Manuel will be working in JMMC's corporate office location in Fairfax, Va., where he is responsible for the sale of loans to FNMA, FHLMC, private investors and the issuance of securities through GNMA and FHLMC.

Manuel has been in the mortgage banking and mortgage-related industry for over twenty years. Prior to joining JMMC, he held various positions of responsibility with the Department of Housing and Urban Development (HUD) in Washington.

The acquisition of JMMC (formerly A.E. Landvoigt, Inc.) in 1981 by Madison National Bank, gave rise to a new holding company structure -- James Madison Limited. This acquisition gave JML greater flexibility and increased its lending base for granting loans to residential and commercial developers as well as homeowners.

In addition to Madison National Bank, the James Madison Limited financial family of banking subsidiaries includes: Madison Bank of Maryland; Madison National Bank of Virginia; and United National Bank of Washington. In addition to James Madison Mortgage Company, non-banking subsidiaries include: James Madison Financial Corporation: JML Systems Management, Inc.; and JML Communications, Inc. James Madison Limited's Class A common stock is listed on the American Stock Exchange and its common stock is traded on the NASDAQ National Market System (JMLC).

HIGH POINT, NC (JAN. 11) PR NEWSWIRE - James Mueller has been appointed acting president of Brown Jordan Company, according to Richard R. Allen, vice chairman of LADD Furniture, Inc. (NASDAQ-NMS: LADF) -- Brown Jordan's parent company. In his new position, Mueller succeeds former Brown Jordan president Joseph Connaughton, who has resigned.

Commenting on the appointment, Allen said, "Jim Mueller's extensive knowledge of the Brown Jordan organization and his strong manufacturing credentials make him well qualified to assume the responsibilities of acting president." Allen said LADD wants a strong leader at Brown Jordan, and "will take as much time as required to select a permanent president for the company. Jim Mueller is one of the strong candidates for the position," Allen concluded.

Prior to being appointed acting Brown Jordan president, Jim Mueller served as vice president, manufacturing and engineering -- with responsibility for all of Brown Jordan's U.S. and Mexican manufacturing operations. Mueller joined Brown Jordan in 1985, following a 25-year career in operations and manufacturing with Black & Decker.

LADD acquired Brown Jordan, a premier manufacturer of high quality upper-end outdoor furniture, on July 7, 1989. "LADD is looking forward to a strong performance from Brown Jordan in 1990," Allen said. Brown Jordan is headquartered in El Monte, CA, and also operates manufacturing facilities in Newport, AR, and Juarez, Mexico.

CLEVELAND, OH (JAN. 11) PR NEWSWIRE - BP Oil is planning to build its first retail outlet in Dresden in the German Democratic Republic. Agreement to proceed on this DM3 million pilot project has been reached with the city of Dresden, VEB Minol Dresden and Deutsche BP following negotiations in Dresden this week.

The city will provide a suitable site on a long-term lease for a modern high-throughput retail outlet. The outlet will have extensive fueling facilities as well as an automatic car-wash, a service bay and an autoshop. The broad range of fuels to be provided is aimed at GDR vehicles but will also meet the needs of western vehicles using unleaded grades.

The service station, which will be built to BP's new design, will be operated by VEB Minol, the organization responsible for oil distribution in East Germany.

NEW YORK (JAN. 11) PR NEWSWIRE - Cellular Communications Inc. (CCI)

(NASDAQ: COMM) announced today that it had entered into an agreement with McCaw Cellular Communications, Inc. (NASDAQ: MCAWA), under which CCI would exchange the CCI subsidiary that owns a 5.56 percent interest in the Dallas non-wireline cellular partnership for 1,601,036 shares of CCI common stock that are owned by McCaw.

The closing of the transaction is subject to the filing of an application under the Hart-Scott-Rodino Antitrust Improvements Act and the expiration or acceleration of the required waiting period.

Following this closing, on a pro forma basis, CCI will have approximately 39,127,000 shares outstanding (approximately, 42,395,000 shares on a fully diluted basis). CCI's ownership interests will represent approximately 9,345,000 "pops" in cellular systems in Ohio and Puerto Rico (based upon recent census estimates).

#90011p0277 01/11/1990 ~PR Newswire

LOS ANGELES (JAN. 11) PR NEWSWIRE - Santa Fe Pacific Pipeline Partners L. P. (NYSE: SFL) completed its first full year of operations with financial results which significantly exceeded 1988 pro forma results for the fourth quarter and for the full year.

John DesBarres, chairman, president and chief executive officer of the general partner, reported that net income for the quarter was $14.8 million, or $.77 per unit, an increase of 42 percent compared with 1988 pro forma fourth quarter net income of $10.4 million, or $.54 per unit. Operating income for the quarter was $23.5 million versus $18.9 million in 1988.

For the full year, net income was $59.3 million, or $3.07 per unit, 40 percent higher than 1988 pro forma net income of $42.3 million, or $2.19 per unit. Operating income for the year increased $14.5 million to $93.0 million.

Revenues for the quarter of $47.8 million were 10 percent higher than the same period last year reflecting the February 1989 tariff increase from Los Angeles to Phoenix and a 3 percent increase in volume. Operating expenses of $24.3 million were 2 percent lower than fourth quarter 1988 due to lower power and facility costs partially offset by higher field operating expenses and depreciation.

DesBarres noted that revenues for the full year of $187.9 million were 8 percent greater than 1988 due to the previously described rate increase, increased product demand, and unrestrained capacity from Los Angeles to Phoenix. As a result of continued emphasis on cost control and productivity improvements, operating expenses of $94.9 million were slightly lower than 1988.

Capital expenditures for the quarter and the full year were $6.2 million and $35.7 million respectively.

Santa Fe Pacific Pipeline Partners is the largest independent refined petroleum products pipeline in the western United States. It serves six western states with approximately 3,300 miles of common carrier pipeline and 15 truck loading terminals.

#90011p0281 01/11/1990 ~PR Newswire

CHARLOTTE, NC (JAN. 11) PR NEWSWIRE - Piedmont Mining Company, Inc. (NASDAQ: PIED), today announced that gold production in 1989 exceeded 15,000 ounces, an increase of 30 percent compared to 1988. In addition, new drilling data and assays from several mineralized zones at the Haile property revealed a number of high grade intercepts.

"Our production in 1989 set a new record for the Company by a substantial margin," said Robert M. Shields, Jr., Chairman and C.E.O., "despite 56

inches of rainfall, Hurricane Hugo, and a record breaking cold spell in December." About 370,000 tons of ore were stacked during 1989 with an average grade of .052 ounces of gold per ton. This grade is a significant improvement over the average grade of .036 ounces per ton in 1987 and 1988.

Drilling at the Haile mine and new assay data resulted in additional high grade intercepts at the Red Hill, Snake and Champion zones. A number of these are detailed below:

Zone	Hole No.	(Angle) (degrees)	Distance From Start of Hole(b)	Interval	Average Grade(a) AA	Fire
Red Hill	1033	90	20-30'	10'	--	1.75
	1038	90	10-80'	70'	--	0.20
	1040	59	0-70'	70'	--	0.38
	"	"	50-70'	20'	--	1.05
	1041	45	0-120'	120'	--	0.23
	"	"	60-100'	40'	--	0.46
	1042	29	70-110'	40'	--	0.28
Champion	76	80	25-70'	45'	0.28	--
	"	"	250-255'	5'	0.21	--
	1138	90	145-175'	30'	0.23	--
Snake	996	90	135-150'	15'	--	0.18
	999	90	355-380'	25'	--	0.17

Fire Assay

(b) For Red Hill, distance beneath pit floor.

Exploration also continues at the Russell-Coggins property where drilling indicates that the mineralization widens with depth and is also open at depth. A number of intercepts graded between .1 and .2 ounces of gold per ton over distances of 40 to 110 feet. Lower grade intercepts were encountered over distances of up to 700 feet.

Piedmont is engaged in exploration, mining, and production of gold in the southeastern United States. The Company's Haile mine was the first to employ the heap leaching technology in this humid climate. The Company has eight other properties in the Carolinas in addition to the Haile. Piedmont was recently placed on NASDAQ's national list where its price quotes are now covered by approximately 110 newspapers across the country.

EAST HARTFORD, CT (JAN. 11) PR NEWSWIRE - Ansett World Aviation Services (AWAS) of Australia has ordered Pratt & Whitney PW4000 jet engines worth

$225 million to power up to 12 Airbus A300-600R aircraft.

AWAS has placed an order for six A300-600R twinjets and has taken options on six more. Deliveries of the aircraft are scheduled to begin in Aug. 1991.

Pratt & Whitney will supply AWAS with 14 PW4000 engines, including spares, for the six aircraft on firm order. If AWAS takes all six option aircraft Pratt & Whitney would supply 12 additional engines.

This is the second order for PW4000 engines by AWAS. Last year the leasing company ordered six Boeing 767-300ER twinjets powered by Pratt & Whitney's newest and most powerful engine.

The PW4000 is the most fuel-efficient, high-thrust engine ever developed. It also has the highest thrust-growth potential of any engine in its thrust class, and the greatest degree of commonality with all of the various wide-body aircraft models.

Pratt & Whitney is a unit of United Technologies Corp. (NYSE: UTX) of Hartford, Conn.

#90011p0284 01/11/1990 ~PR Newswire

NEWARK, NJ (JAN. 11) PR NEWSWIRE - In 1989, New Jersey Bell customers found many new services at their fingertips and enjoyed another year of basic residential rates that are the lowest of all the former Bell System companies, the company said today.

Customers applauded the continuing rollout of a variety of Bell Atlantic(R) I.Q.(SM) Services, including a new feature -- Caller ID -- that deters obscene and harassing calls. During 1989, as CLASS Calling Services became available to almost two-thirds of New Jersey Bell's customers, nearly 50,000 customers subscribed to one or more of the seven features.

More than 30,000 people opted for Caller ID, making it the most popular feature among the seven. Using a digital display unit, Caller ID allows customers to know who is calling before they answer the phone.

Identa Ring, also introduced in 1989, made call management easier for many customers. By listening to the pattern of the ring, customers are able to determine who should answer the phone.

The Identa Ring service allows up to three numbers to be shared on the

same household or business telephone line. The main number has a normal ringing pattern, while each of the other two "dependent" numbers has its own unique ring.

After a limited deployment in the Plainfield area during 1989, New Jersey Bell is preparing to roll out voice messaging services in many more areas. Answer Call and Voice Mail enable residential and small business customers to use their Touch-Tone telephones to cut down on telephone tag, move vital information faster and allow callers to leave messages even if the line being called is busy.

The demand for telecommunications services, coupled with New Jersey's healthy economic growth, led to the announcement of a new area code for the state. That new code, 908, is scheduled for implementation in 1991 in a portion of the northern part of the state now in the 201 area code.

Counties to be in the 908 code are Hunterdon, Middlesex, Monmouth, Somerset, Union, Warren, a portion of Morris and the part of Ocean County that now is 201. Rates charged to New Jersey Bell customers will not be affected by the change.

Residential customers are enjoying the lowest basic service rates when compared with the former Bell System companies throughout the country. Under New Jersey Bell's rate stability plan, residential customers are paying an average of $7.86 for basic service, the same rate they paid in 1985. The cost of living increased an average of 17 percent since then.

Prices decreased in 1989 for certain calls the company handles between northern New Jersey and New York City and southern New Jersey and the Philadelphia area. As a result, the new rates for New Jersey Bell's New York Link and Pennsy-Link services now are up to 30 percent lower than AT&T's regular long distance rates.

In July, customers also benefited when New Jersey Bell eliminated charges for certain toll calls within 70 municipalities in the state. The change affected some 1.3 million customers in 17 of the 21 counties within New Jersey.

Advances in technology allowed New Jersey Bell to eliminate these toll charges. Customer savings differ depending on individual calling patterns.

There was more good news for New Jersey Bell customers in 1989 as Governor Kean signed legislation authorizing a statewide 911 enhanced telephone system to be implemented by January 1992. The statewide 911 system will route police, fire and medical emergency calls automatically to an answering point that serves the caller's area.

Customers now are served by about 117,500 miles of fiber optic cable. New

Jersey Bell's network is nearly 100 percent electronic, with 211 or its 213 switches electronic or digital electronic. The remaining electromechanical switches will be replaced by March.

LOUISVILLE, KY (JAN. 11) PR NEWSWIRE - Humana's health plans have exceeded the 1-million-member milestone, David A. Jones, chairman and chief executive officer of Humana, Inc. (NYSE: HUM), told stockholders at the annual meeting today.

Mr. Jones said the membership total had reached 1,030,000, just six years to the month after the first member was enrolled in 1984.

Along with the membership of 1 million, Mr. Jones cited Humana health plans' contribution to patient days in Humana hospitals, which was 464,300 of the 2,990,300 total for fiscal 1989. In the first quarter of fiscal 1990, Humana health plans contributed 129,800 patient days to company hospitals, or more than 1400 Humana health plan members per day.

Mr. Jones also noted that 1989 revenues for Humana health plans grew to $1,088,000,000 in the sixth year of operating that business. Operating profits for the health plans were $6.3 million in the first quarter of fiscal 1990, compared with an operating loss of $4.2 million one year ago, and operating losses of $66 million or more in both 1986 and 1987.

Stockholders elected one new director, K. Frank Austen, M.D., chairman of the department of rheumatology and immunology at Brigham and Women's Hospital in Boston. Dr. Austen is a professor of medicine at Harvard Medical School and is a director of Abbott Laboratories.

Retiring from Humana's board of directors were Charles L. Weisberg, who had been a director since 1961, and Hilary J. Boone Jr., a director since 1964.

Stockholders approved new stock option plans for employees and for non-employee directors.

TALLAHASSEE, FL (JAN. 11) PR NEWSWIRE - State Treasurer and Insurance

Commissioner Tom Gallagher today announced that a Michigan-based insurance company has been found insolvent and its Florida holdings will soon be liquidated by the state.

Leon County Circuit Court Judge George Reynolds late Wednesday afternoon ordered Cadillac Insurance Co. into liquidation and appointed the Florida Department of Insurance as ancillary receiver. The order came after the company's home state found it insolvent on Jan. 2.

In December, Gallagher suspended Cadillac's license to sell insurance in Florida, after a Michigan court order placed the company in temporary conservatorship. According to figures furnished to the department as of March 31, 1989, Cadillac owed $1 million in unpaid losses to Florida policyholders. The company sold mostly property and casualty and health insurance in Florida.

According to Gallagher, the majority of the Florida claims will be honored by the state's guaranty associations. He said consumers with claims questions should call the Florida Department of Insurance at 904-488-7973 and ask for the Consumer Inquiries section in the Division of Rehabilitation and Liquidation.

Consumers may also write to: Florida Department of Insurance, Division of Rehabilitation and Liquidation, P.O. Box 110, Tallahasse, Fla. 32302.

CONTACT: Kathleen Snoeblen of the Florida Office of the Treasurer, Department of Insurance, 904-488-6085.

DENVER (JAN. 11) PR NEWSWIRE - Atlas Corporation (NYSE: AZ) today announced the appointment of Francis M. Ricci as Chief Financial Officer. Ricci assumed his new position on Jan. 8, 1990.

Ricci joins Atlas after a distinguished 22 year career at the accounting firm of Deloitte Haskins and Sells. For the past twelve years, he was a partner of that firm, advising clients in the mining and oil and gas business, among others. As a partner, he also directed business development, marketing and public relations programs and served on the management committee of the firm's Denver office.

"We are extremely pleased that Francis has joined Atlas. Establishing the position of CFO is the logical next step in our evolution from a small diversified company into a medium-sized gold producer. Francis brings to Atlas a pertinent and extensive background in both finance and the mining industry and will be a valuable resource for the company," said Richard R. Weaver, president and chief executive officer of Atlas.

Ricci, a resident of Denver, is an active or past member of several board committees including the Colorado Society of CPAs, the President's Leadership Institute at the University of Colorado, and the Cherry Hills Country Club.

Ricci, 46, holds a Masters in Business Administration and a BS in accounting from the University of Montana as well as a CPA certificate. He is married and has one daughter.

Atlas Corporation is a mining company whose primary business is gold exploration and production. The company has completed two full years of profitable gold mining operations. Atlas has operations in several western states, including Nevada and Oregon, and has total in-place gold reserves of approximately 2,600,000 ounces.

VAN NUYS, CA (JAN. 11) PR NEWSWIRE - Electro Rent Corp. (NASDAQ: ELRC) achieved increased rental and lease income in the second quarter of the current fiscal year; however, a sharp drop in the sales of used equipment more than offset this gain with the result that earnings per share were marginally lower for the period.

For the three months ended Nov. 30, 1989, net income amounted to $1,844,000, equal to 44 cents per share, as opposed to $2,215,000, or 46 cents, for the quarter in the preceding year. Average shares outstanding of 4,192,000 were 13 percent less than the 4,812,000 average shares outstanding in the corresponding quarter of the prior year. Second

quarter revenues were $27,252,000, compared with $28,880,000 in the same three months last year.

Net income for the first six months totaled $3,547,000, equal to 85 cents per share, compared with $4,388,000, or 89 cents per share, one year earlier. Average shares outstanding were 4,192,000 in the first six months of the current fiscal year and 4,958,000 in the prior year period. First half revenues dropped to $53,929,000 from $58,263,000, as a result of sharply lower sales of used equipment.

Daniel Greenberg, chairman and chief executive officer, said: "Equipment utilization this year continues to outpace that of last year by a respectable margin. In addition, we have continued to increase our equipment purchases, so that the equipment pool at Nov. 30, 1989, was $226 million, equal to the level a year earlier and $90 million higher than the beginning of this fiscal year on June 1, 1989. Equipment purchases for our leasing programs, including our new arrangement with Lockheed Missiles and Space Company, are expected to increase significantly from the prior fiscal year.

"Given the uncertain state of business in the markets the company serves, we consider our results for the second quarter to be quite satisfactory. Hopefully, we will find a way to increase sales activity during the second half of our fiscal year, so that we can achieve a more balanced performance."

Electro Rent Corp. is one of the largest nationwide organizations devoted to the short term rental and leasing of general purpose electronic test equipment, engineering work stations and small business computers.

VANCOUVER, BRITISH COLUMBIA (JAN. 11) PR NEWSWIRE - Murex Clinical Technologies Corporation (symbol V.MCI), a Canadian healthcare systems company, today announced the acquisition of Dominion Biologicals Limited of Dartmouth, Nova Scotia.

Murex Clinical views the acquisition of Dominion as an important strategic fit which will further the Corporation's objective to establish a complete line of diagnostic products and test systems for all markets, from blood screening at large clinics to individual tests done in the physician's office.

Dominion Biologicals is Canada's leading developer and producer of

diagnostic products utilized in blood transfusions. Dominion's advanced biotechnology manufacturing and research facility is dedicated to the development and production of innovative immunodiagnostic reagents. The acquisition will enhance the strong links which exist with academia in Canada, providing a unique source of new products and product materials for the Murex Group.

Murex Corporation, the Atlanta based subsidiary of Murex Clinical, is a rapidly emerging, international immunodiagnostics systems company which has focused on the development, manufacture and marketing of novel testing systems and products to diagnose and monitor human diseases, including AIDS.

Murex Corporation and Dominion complement each other in their product ranges, compatible technologies and research and development. They both will benefit from expanded bases of operations with manufacturing, marketing and distribution facilities, in the United States and Canada.

Sam Brushett, the former owner of Dominion, will continue as president and chief executive officer of that company and has been appointed to Murex Clinical's Executive Committee.

The Dominion purchase will be the first of several acquisitions which Murex Clinical intends to undertake to establish significant operations within Europe, the United States, Canada and the Far East. Dominion was acquired for U.S.$1.5 million cash, provided by Edward DeBartolo, Jr., and 468,000 Murex shares, of which 168,000 depend on Dominion achieving certain performance objectives.

LANSING, MI (JAN. 11) PR NEWSWIRE - Cade Industries, Inc. (NASDAQ: CADE), a major manufacturer of engine and aircraft structures, and nacelles and bellmouths used in testing large commercial jet engines, announced today a record sales backlog in excess of $43.2 million as of Jan. 1, 1990.

Richard A. Lund, president of the company's Auto-Air Composites subsidiary said "these figures, which include recent orders from several major aerospace/engine manufacturers, reflect a $7 million increase (20 percent) over the previously announced third-quarter backlog figures."

Additionally, Lund added, "substantial orders have been placed from several international airlines for the company's jet engine test nacelle

equipment. As a result, we look forward to significant growth in this specialized area in the years to come."

Cade Industries, through its Auto-Air Composites and Cade Composites subsidiaries, is a world supplier of molded composites, and adhesively bonded assemblies for the commercial and military aerospace industries.

LOUISVILLE, KY (JAN. 11) PR NEWSWIRE - Liberty National Bancorp, Inc. (NASDAQ: LNBC) announced today an increase in earnings of over 11 percent for both the fourth quarter ended December 31, 1989, and for the entire year.

In the fourth quarter, fully diluted net income per share increased 12.3 percent to $0.82 versus $0.73 reported for the same period of 1988. Primary net income per share for the fourth quarter of 1989 increased 10.4 percent to $0.85 from $0.77. Net income for the fourth quarter was $9.4 million, compared to $8.2 million for the same period in 1988.

For the full year, fully diluted net income per share increased 11.4 percent to $2.93, compared to $2.63 in 1988. Primary net income per share for 1989 increased 11.2 percent to $3.07 from $2.76 for 1988. Net income was $33.2 million, compared to $28.9 million for 1988, an increase of 14.8 percent.

As of December 31, 1989, Liberty's total assets were $3.5 billion and stockholders' equity exceeded $247 million.

Averages for the twelve months ended December 31, 1989, for selected balance sheet totals were as follows: total assets -- $3.2 billion, up 11.6 percent from $2.9 billion for 1988; total deposits -- $2.6 billion, up 16.3 percent from $2.2 billion in 1988; loans of $2.3 billion, up 16.2 percent compared to $1.9 billion in 1988; and stockholders' equity -- $229 million, up 13.4 percent compared to $202 million in 1988.

#90011p0321 01/11/1990 ~PR Newswire

PHOENIX, ARIZ. (JAN. 11) PR NEWSWIRE - First Interstate Bank of Arizona, N.A., said today that Robert H. Duckworth, chairman and chief executive officer, has advised the company that concern about his health has led him

to seek early retirement. Duckworth recently underwent a quadruple bypass heart operation. The bank said that William S. Randall has been elected chairman and chief executive officer to succeed Duckworth.

Randall has been chief executive of First Interstate Bank of Washington since December 1981 and chairman since June 1985. A veteran banker, he began his career in 1965 with U.S. National Bank of Oregon and later moved to the Federal Reserve Bank of San Francisco. He joined what is now First Interstate Bank of Arizona, N.A., in 1969.

During his association with First Interstate of Arizona, Randall had responsibility for Corporate Accounting, Financial Planning, the Bank Investment Division and the Trust Division. He was a member of the bank's Corporate Management Committee and Credit Policy Committee. He was executive vice president and chief financial officer of the bank in 1981, when he joined First Interstate Bank of Washington.

A native of Spokane, Randall is a graduate of the University of Oregon, the Pacific Coast Banking School and the Public Finance Institute.

On accepting his new assignment, Randall said: "While I will miss my many friends in Washington, I also look forward to returning to Arizona and to working with my old colleagues and customers."

In informing the board of his decision to retire, Duckworth said: "We all know the economy of Arizona is very difficult right now, and it has negatively impacted the banking industry here. First Interstate Bank is no exception and will need strong leadership immediately to reverse the negative trends. In view of my recent surgery, it is impossible at this time for me to devote the long days needed for that effort.

VOORHEES, NJ (JAN. 11) PR NEWSWIRE - Glendale Bancorporation (NASDAQ: GNBC), the holding company of Glendale National Bank of New Jersey and Glendale Bank of Pennsylvania, today reported 1989 net income of $1,411,000 as compared with $702,000 earned in 1988.

On a per-share basis, fully diluted net income was 71 cents as compared to 35 cents for 1988. Total consolidated assets of $228,528,000 at Dec. 31, 1989, increased approximately $35 million, or 18 percent, from 1988. Total consolidated deposits reached $200,733,000 at Dec. 31, 1989, as compared with $174,938,000 at Dec. 31, 1988. This growth in deposits funded a 26 percent increase in loans from $142,428,000 to $178,758,000 at respective year-ends.

DEARBORN, MI (JAN. 11) PR NEWSWIRE - Ford Motor Company (NYSE: F) has informed employees at its Edison (N.J.) assembly plant that the plant will be idled the (four day) week of Jan. 16.

The Lorain (Ohio) plant will idle its Econoline/Club Wagon system for the week of Jan. 29 and its Thunderbird/Cougar system for the weeks of Jan. 29 and Feb. 5.

The previously announced idling of the St. Louis (Mo.) assembly plant during the week of Jan. 8 will be extended an additional four days (week of Jan. 16).

The downtime, which is necessitated in each instance by a shortage of dealer orders, had been largely reflected in previously announced first-quarter production schedules.

The following table summarizes pertinent data for the Ford plants affected by the layoff notification:

Plant Name (Location)	Shifts	Hourly Employees	Product(s)	Down Week(s)	Weekly Output
Edison (N.J.)	2	1,600	Escort	Jan. 15	3,000

Lorain (Ohio)	2	2,900	Thunderbird Cougar	Jan. 29, Feb. 5	5,600
	2	2,700	Econoline Club Wagon	Jan. 29	4,000
St. Louis (Mo.)	2	2,500	Aerostar	Jan. 15	4,000

BUFFALO, NY (JAN. 11) PR NEWSWIRE - Computer Task Group, Inc. (NYSE: TSK) announced today that it has sold the Ottawa branch office of its Canadian subsidiary, Computer Task Group of Canada, Inc. to Systematix, a computer-related professional services firm headquartered in Ottawa, Ontario, Canada.

CTG will continue its operation in Toronto where its Canadian subsidiary is based.

Terms of the sale were not disclosed.

John P. Courtney, CTG's president and chief operating officer said the

sale follows earlier decisions to restructure the CTG organization.

"Part of our strategy has been to divest operational units that are different from our core operations," said Horgan. "Our main focus is on the commercial marketplace; the Ottawa business is primarily targeted toward government-related projects."

Acquisition activities were led by Robert Plamondon, president of Systematix, a company active in professional services for governmental agencies.

CTG is a $250 million company with 54 business locations in major cities of the United States as well as Toronto. The company also has offices in the United Kingdom and West Germany.

#90011p0361 01/11/1990 ~PR Newswire

TAMPA, FL (JAN. 11) PR NEWSWIRE - The U.S. Department of Energy has selected a project proposed by CRSS Capital, Inc. and TECO Power Services in the third round of its Clean Coal Technology Demonstration Program, the two companies jointly announced today.

The DOE is prepared to provide up to $121.1 million as its share of the estimated $400 million cost of the project, which is designed to employ the

latest and most advanced technology for generating electric power from coal.

The City of Tallahassee has agreed to negotiate for the purchase of the power and to provide a site at its Arvah B. Hopkins Power Station. When completed, the facility will supply electric power to the city's municipal power system. Project plans call for plant operations beginning in late 1994 or early 1995.

The plant will employ an Integrated Coal Gasification Combined Cycle (IGCC) process. The IGCC process, one of the most efficient and environmentally clean technologies for electric power production, first converts coal to a fuel gas. Then, after a gas cleaning state, it burns the gas in a gas turbine to drive a generator. Gases exiting the turbine remain hot enough to produce a steam for amore conventional steam-turbine power system.

The technology chosen for the project could lower sulfur emissions by more than 99 percent. Sulfur pollutants have been linked to acid rain.

The DOE's clean-coal program, an outgrowth of a 1985 U.S.-Canadian agreement to reduce pollutants causing acid rain, is a $5 billion government effort to advance clean coal-based technologies. Coal is the nation's most abundant energy source, with supplies expected to last more than 300 years.

The two companies and DOE will next work out a cooperative agreement that will define the scope and research objectives for the project. The department's Morgantown Energy Technology Center will manage the effort for DOE.

TECO Energy (NYSE: TE) is a diversified, energy-related holding company headquartered in Tampa, Fla. Its principal companies include Tampa Electric; TECO Diversified, which consists of transportation and storage, coal mining and real estate subsidiaries; TECO Power Services; TECO Finance; and TECO Investments. TECO Power Services currently is under contract to build a 440-megawatt combined cycle facility in central Florida, which is scheduled for completion in 1993.

CRSS (NYSE: CRX), headquartered in Houston, Texas, is one of the most diversified and largest design and construction services companies in the nation.

#90011p0363 01/11/1990 ~PR Newswire

BOISE, ID (JAN. 12) PR NEWSWIRE - Idaho Power Co.'s (NYSE: IDA) board of directors, at its regular meeting today, adopted a plan to protect its shareholders against any attempt to acquire control of the company that would deny shareholders a full and fair price.

Called a ''shareholder rights plan,'' it is similar to other plans that already have been adopted by more than 850 companies in the United States. It is just one of a series of measures Idaho Power's board has adopted over the past few years to protect its shareholders against takeover attempts that would deny them the full value of their investment.

In adopting the plan, the board emphasized it was doing so simply as a long-range protective measure. The board is unaware of any plan by other parties to mount an effort to gain control of the company.

Under the plan, shareholders of record on Jan. 29 will be issued one ''right'' for each share of common stock they hold.

Under normal conditions, the rights cannot be exercised and will automatically trade with the common stock when it is bought or sold. However, if an individual or group acquires 20 percent or more of the company's voting stock or at least 10 days after someone commences a tender offer that will result in 20 percent or more ownership, separate rights certificates will be issued to shareholders that in effect will entitle them to purchase additional common shares at approximately half price under a formula tied to an ''exercise price'' if regulators approve. The rights of the individual or group trying to gain control of the company would be voided.

Idaho Power's board set the exercise price at $85. As an example, here's how the plan might work: Assume Idaho Power's common stock is selling for $30 on the stock market when someone acquires 20 percent of the outstanding voting stock. For each share of stock a common shareholder owns, he or she would be entitled to purchase $170 worth of stock for the exercise price of $85. If you owned one share of stock, you would pay the company $85 and the company would issue you $170 worth of stock at the market price. The net effect, in this example, would be that the shareholder purchases 5.6 additional shares at a price of $15.18 per share. If you elected not to purchase additional shares you could instead sell your rights to a third party at a price established by the open market.

The rights plan does not in any way diminish the company's financial strength or interfere with its business plans. The issuing of rights also has no dilutive effect on shareholders, will not affect reported earnings per share, is not taxable to the company or its shareholders and will not change the way shares are traded.

ATLANTA (JAN. 11) PR NEWSWIRE - Graphic Industries Inc. (NASDAQ: GRPH), a leading full service printing and graphic communications company, today announced that Alvan A. Herring Jr., formerly president of Foote & Davies Inc. of Atlanta and Lincoln, Neb., has been appointed vice president of Graphic.

"Graphic is extremely pleased with the addition of a businessman of the high caliber and outstanding record of Alvan Herring," Mark C. Pope III, chairman and chief executive officer of Graphic, said in announcing the appointment.

Herring began his business career with Arthur Andersen & Co. as a certified public accountant in 1966 after receiving his M.A. in accountancy from the University of Georgia. In 1972 he joined the Omni Group as comptroller, establishing systems procedures for ticket sales, concessions and other operations of the organization which included the Atlanta Hawks, the Atlanta Flames and the Omni coliseum.

In November 1976, Herring became director of accounting at Foote & Davies Inc. advancing to comptroller in two years and to vice president of finance in 1981.

After moving up to senior vice president of finance and administration in 1985, Herring was promoted to president of Foote & Davies in January 1989.

During his tenure there, he directed the buyout of Foote & Davies by Prudential, the majority equity partner, along with the company management. When Foote & Davies was sold in December 1989 to another party, Herring resigned from the company.

Graphic ranks 22nd nationally among commercial printing companies with sales expected to exceed $300 million for the year ending Jan. 31.

DETROIT (JAN. 11) PR NEWSWIRE - Metro Detroit Ford dealers are promoting sound environmental practices as well as Ford cars and trucks.

Visitors to the Ford Division display at the North American International Auto Show are given free degradable bags made with cornstarch.

"We've had a tremendous turnout at the Auto Show and customer response to the degradable bags and to the Ford display has been great," said Ray Whitfield, chairman of the Metro Detroit Ford Dealer Advertising Association.

The Ford dealer group learned about the degradable plastic bags from Ford New Holland, the company's farm machinery subsidiary. Ford New Holland has teamed up with the National Corn Growers Association to raise public awareness of new products, such as the degradable bags, which use farm commodities.

Each bag carries the official degradable plastic seal that lets the public know corn was used in making it. Ford New Holland is the first major farm machinery company in the world to sign a legal agreement with a commodity association to use the official seal on its bags.

The Auto Show continues at Cobo Hall through Jan. 14.

CHESTERFIELD, MO (JAN. 11) PR NEWSWIRE - Comprehensive Care Corp. (NYSE: CMP) announced a loss of $4,015,000 or $.39 per share for its second quarter ended Nov. 30, 1989.

Earnings for the comparable period last year were $3,093,000 or $.30 per share. Operating revenues for the second quarter of fiscal 1990 were $37,401,000 compared to $54,745,000 last year.

For the six months ended Nov. 30, 1989, the company reported operating revenues of $81,418,000 and a net loss of $8,687,000 or $.85 per share.

For the six months ended Nov. 30, 1988, operating revenues were $107,972,000 and net earnings were $4,701,000 or $.48 per share.

The company's pretax loss increased rom $6.4 million in the first quarter of fiscal 1990 to $8.3 million in the second quarter.

Pretax loss from operations increased approximately $2.4 million from the first quarter of fiscal 1990 principally due to a decline in occupancy in the company's freestanding facilities and contract programs.

Patient days in the company's freestanding facilities declined approximately 18 percent from 71,693 in the first quarter of fiscal 1990 to 58,906 in the second quarter; patient days in the company's contracts declined from 118,205 to 112,839 or approximately 5 percent from the first quarter; and patient days in the RehabCare units increased slightly from 55,561 in the first quarter to to 56,189.

ST. PAUL, MN (JAN. 12) PR NEWSWIRE - Northwest Airlines said today that it has nearly completed inspection of the forward lavatory systems on its 71 Boeing 727-100s and 727-200s, and has stepped up routine inspection procedures.

The action is in response to an engine separation that occurred Jan. 4 on Northwest Flight 5. The plane landed safely in Tampa while enroute from Miami to Minneapolis/St. Paul.

The National Transportation Safety Board has not concluded its investigation of the incident, but preliminary evidence suggests a forward lavatory mechanical problem could have caused lavatory fluid to escape, freeze and be ingested into the engine, which then separated as designed to prevent further aircraft damage.

Northwest will complete lavatory inspections by Saturday. All 727 lavatory tank valves, drain pipe shutoff mechanisms and servicing doors are being inspected.

Northwest also has reduced the normal maintenance inspection interval period on the lavatories to every 100 operational hours from 300 hours, more often than Federal Aviation Administration requirements.

In addition, Northwest has sent a bulletin to all its equipment service employees, instructing them to monitor with greater frequency the forward lavatory mechanisms of 727s.

Northwest engineers are holding discussions with Boeing representatives on options for enhancing the safety of lavatory mechanisms on 727 aircraft.

NEW YORK (JAN. 12) PR NEWSWIRE - American Consulting Corporation (ACC), the leading integrated marketing services firm in the United States, is announcing the addition of three senior executives, creating a strengthened management team to continue the success of the agency in the new decade. All three executives report to ACC's President, Debra Campbell, and all are members of the executive committee.

ACC is a subsidiary of FKB Group, the world's largest independent sales promotion and direct marketing firm.

Robert J. Neely has joined ACC as president, promotion marketing and member of the executive committee. Neely's extensive experience in sales promotion includes establishing and developing his own successful agency, Robert J. Neely and Associates. He has also worked with such prestigious companies as Product Movers FSI, Shulton Toiletries, Johnson & Johnson and Procter and Gamble. Neely received his B.S. degree in marketing from the University of Kansas in 1968.

Mike Maynard has joined ACC as executive vice president and member of the executive committee. He brings with him a long and distinguished career in sales promotion, trade consulting, and field marketing. Most recently head of a new business unit at Arbitron/SAMI, Maynard has also worked with Nielson's Summa Group, The Majers Corporation, Tambrands and Procter and Gamble. Maynard received his B.A. in finance from Presbyterian University Clinton, S.C., and his business degree from Mercer University in Georgia.

The third new member of the strengthened management team at ACC is Steve Cook. He joins ACC as executive vice president and member of the executive committee. Cook is a founding member of Francis, Killingbeck, Bain, the original United Kingdom sales promotion arm of FKB Group. He has worked principally in this agency in London heading up a number of multinational accounts such as The Coca-Cola Company, Elizabeth Arden, Coca-Cola and Schweppes Beverages (the U.K.'s largest bottler) and Unilever, a subsidiary of Brooke Bond Foods. In addition to his account work, he has been instrumental in group new business and has been a director of the agency.

Debra Campbell, president of ACC, stated, "We are pleased that Messrs.

Neely, Maynard and Cook will be joining ACC, and look forward to their contribution to our growing business."

BUTTE, MT (JAN. 12) PR NEWSWIRE - The Montana Power Co. (NYSE: MTP) (MPC) today announced plans to borrow up to $40 million in long-term debt, with the proceeds earmarked for the purchase of shares of MPC common stock on the open market.

The transaction marks the first time MPC has used the leverage capability of its established Deferred Savings and Employee Stock Ownership Plan (ESOP).

MPC has filed an application with the Montana Public Service Commission (PSC) for authorization to incur up to $40 million in long-term debt. PSC action on the request is expected by Jan. 22. The company then would enter into a privately placed, 15-year loan agreement with institutional lenders on or about Jan. 23.

MPC's ESOP trustee currently holds nearly four percent of the company's outstanding common stock on behalf of employees of MPC and its subsidiaries. Following the acquisition of additional shares through the leveraged transaction, the ESOP would hold about 8 percent of MPC's common shares.

The plan is expected to enhance benefits to emplyees and to reduce MPC

costs through application of the dividend deductibility provision of federal tax regulations. Implementation of the plan should have no significant dilutive effect on earnings per share.

#90011p0405 01/11/1990 ~PR Newswire

PORTER, IN. (JAN. 11) PR NEWSWIRE - Canonie Environmental Services Corp. (NASDAQ: CANO) has announced the formation of a new company, named Nuclear Remediation Technologies Corp. (NRT Corp.). NRT Corp. is jointly owned by Canonie and General Atomics (GA) of San Diego, Calif. NRT Corp. will address problems in soil, ground water, landfills, operational waste streams, and others.

Canonie brings experience in processes and equipment, technical capabilities, and construction expertise relating to the identification and disposal of hazardous waste. GA brings considerable expertise and experience in the development and marketing of technologies, processes, and equipment relating to the identification and disposal of radioactive waste, especially in the federal government sector.

A key target market will be the multi-billion-dollar remediation of the Department of Energy weapons facilities. NRT Corp. will bring high-technology solutions to the remediation of these sites, yet solutions that are molded by the field experience and actual site remediation at many other contaminated sites.

NRT Corp. will be headquartered in San Diego, with representation near contaminated sites. Robert Burgoyne of GA will serve as president of NRT Corp. Burgoyne stated, "This is an outstanding opportunity for both companies. We look forward to a long and successful relationship with Canonie through NRT Corp.''

Canonie Environmental Services Corp. provides comprehensive services throughout the United States for remediation of sites contaminated by hazardous materials. The firm provides its clients with a complete range of services, including assessing the regulatory, technical, and construction aspects of the problem, developing a strategic plan to solve the problem, and performing the necessary remediation and operation activities. Canonie Environmental Services Corp. is one of the few companies capable of providing such a broad range of services. The company has performed work at more than 100 project sites nationwide, including the management and control of remediation activities at various Superfund sites.

GA, founded in 1955, is engaged in energy and defense technology,

including modular high-temperature, gas-cooled reactors for power generation and nuclear waste management systems and services.

TORRANCE, CA (JAN. 11) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) announced today the resignation of Eric B. Kim, vice president, Database Products, effective Jan. 19, 1990. Kim has resigned to pursue a new career opportunity.

Ashton-Tate does not intend to replace Kim; however, Edward M. Esber Jr., the company's chairman, president and chief executive officer will remain as acting general manager of Ashton-Tate's Database Division, a responsibility he assumed in August of 1989, while the company continues evaluating both internal and external candidates for the position of Database Division general manager.

"When I assumed the role of acting general manager of the Database Division, Eric agreed to stay on until we had a management team in place to complete development of all key database products," said Esber. "That team is now in place and Eric has decided to pursue another career opportunity. We wish him well."

Esber added that he foresees no negative impact on the shipment of dBASE IV version 1.1 as result of Kim's resignation. "The dBASE IV version 1.1 beta program continues to progress well and we are confident we have the technical and management expertise to accomplish our objectives of delivering a quality product," he said.

Kim said, "I consider my work at Ashton-Tate very rewarding and I will miss the many close friends and colleagues I have gained over the past five years. However, I feel confident that I am leaving the company with a strong development team in place to help Ashton-Tate achieve its database goals and objectives."

Headquartered in Torrance, Calif., Ashton-Tate develops and markets microcomputer business applications software for the DOS, OS/2 and Macintosh operating systems. The company offers products in five major categories: database management systems, word processing, integrated decision support software, spreadsheets and graphics. Ashton-Tate also markets a comprehensive line of service and support programs for individuals, corporations and government agencies.

#90011p0413 01/11/1990 ~PR Newswire

MEMPHIS, TN (JAN. 11) PR NEWSWIRE - Holiday Corporation (NYSE: HIA) today announced that it increased the Consent-Tender Payment in the consent solicitation with respect to the 11 percent Subordinated Debentures due 1999 of its Holiday Inns, Inc. subsidiary.

The Consent-Tender Payment for the 11 percent Subordinated Debentures has been increased from $50 to $60 per $1,000 principal amount. No increase is being made to the Consent-Only Payment with respect to the 11 percent Subordinated Debentures.

The increased Consent Payments will be paid to all consenting holders of 11 percent Subordinated Debentures, including to holders who have previously delivered their consents. Holders of 11 percent Subordinated Debentures who have delivered Consents for Consent-Only Payments and who now wish to receive the Consent-Tender Payments should simply tender their

11 percent Subordinated Debentures prior to the tender offer expiration date. Such holders should not attempt to revoke or redeliver their consents.

In addition, Holiday announced today that it extended to 5:00 p.m., New York City time, on Friday, January 19, 1990, the consent solicitation period for the 11 percent Subordinated Debentures. It also extended to Midnight, New York City time, on Friday, January 26, 1990, the tender offers for the 10-1/2 percent Senior Notes due 1994, the 11 percent Subordinated Debentures, the 8-3/8 percent Notes due 1996, the 15 percent Notes due 1992 and the 9-3/8 percent Notes due 1993.

Holiday announced earlier that it had received requisite consents from holders of the 9-3/8 percent Notes and 15 percent Notes and that it had executed supplemental indentures effectuating the proposed amendments to such issues.

Holiday Inns is soliciting consents in connection with its offers to purchase such securities for cash. The consent solicitations and tender offers were mailed to holders on December 15, 1989. Except for the increases in consent payments and the extension of the consent solicitation and tender offer periods reflected herein, all other terms of the consent solicitations and tender offers remain as previously announced.

As of January 10, 1990, Holiday had received consents from holders representing approximately 30 percent of the 11 percent Subordinated Debentures. It had also received tenders representing approximately 24 percent of the 10-1/2 percent Senior Notes, 16 percent of the 11 percent Subordinated Debentures, 11 percent of the 8-3/8 percent Notes, 56 percent of the 15 percent Notes and 78 percent of the 9-3/8 percent Notes due 1993.

SACRAMENTO, CA (JAN 11) PR NEWSWIRE - State Energy Commission Chairman Charles R. Imbrecht has been appointed co-chair of the United States Alternative Fuels Council. The appointment of Imbrecht and 15 others to the prestigious Council was announced Jan. 11 by the U.S. Deputy Secretary of Energy W. Henson Moore.

The Council is an advisory body to the national Interagency Commission on Alternative Motor Fuels chaired by Deputy Secretary Moore. The council and Interagency Commission will coordinate activities required under the Alternative Motor Fuels Act of 1988, including data collection and analysis, federal fleet demonstrations and engine research.

In addition to the 16 members appointed by Moore, four distinguished members of the U.S. Senate and House of Representatives were also appointed to the Council: Sen. Charles Grassley (R-Iowa), Sen. Jay Rockefeller (D-West Virginia), Rep. Jerry Lewis (R-California) and Rep. Bill Alexander (D-Arkansas).

The Council is a high-level body established to help the Interagency Commission establish a national alternative fuels policy. The work of the Council is an important element in insuring the success of President Bush's proposed Clean Fuels Program, a plan the president hopes will reduce urban air pollution and bring all cities into compliance with air quality standards.

#90011p0417 01/11/1990 ~PR Newswire

SAN FRANCISCO (JAN. 11) PR NEWSWIRE - Polaris Aircraft Leasing Corp. announced today it has leased 10 MD-88 aircraft to Aerovias de Mexico S.A. de C.V., a transaction valued at approximately $300 million.

Polaris purchased the delivery rights to 16 MD-88 aircraft from Wardair in 1989, and the 10 planes leased to Aerovias de Mexico are part of that package. The San Francisco-based aircraft leasing company delivered four aircraft to Aerovias in late 1989, and plans to deliver four more in 1990, and two in 1991. All 10 MD-88s will be on 10-year operating leases to the carrier.

Aerovias, which celebrated its one year anniversary in October 1989, has completed three transactions with Polaris as it has modernized its fleet and reorganized its route system. The 10 MD-88s will be used on routes from Mexico to U.S. border locations such as Los Angeles, Houston and Miami.

Pedro Cerisola y Weber, president of Aerovias de Mexico, said, "We appreciate the fine working relationship we have developed with Polaris during our first year of operation. The addition of new capacity, coupled with the replacement of older, less efficient equipment, will allow Aerovias to maintain its leadership position in the Latin American market."

Polaris manages more leased aircraft than any other leasing company in the world. Its fleet of more than 390 commercial jet aircraft, valued at over $5.9 billion, includes 248 of its own jetliners and 142 aircraft for GE Capital. Polaris generates in excess of $432 million in lease revenues from 27 operators, including such international carriers as Gulf Air, Maersk, Canadian Airlines International, Dragonair, Brittania, TACA International, and Philippine Airlines. The fleet it manages represents almost 5 percent of the commercial jet aircraft in current use throughout the world.

Polaris is also the leading sponsor of aircraft leasing limited partnerships, having raised nearly $1.3 billion in investor capital and sponsored 42 publicly and privately registered programs with over 85,000 investors.

In 1986 GE Capital, based in Stamford, Conn., purchased 81 percent of Polaris.

DALLAS (JAN. 12) PR NEWSWIRE - In response to certain news articles published on January 11, 1990, Royal International Optical Corp. (NYSE: RIO) confirmed today that during the meeting of its board of directors on Jan. 9, 1990 at which the board decided to accept the offer of U.S. Vision Inc. to acquire Royal, the board received an oral offer from IPCO Corp. to acquire all of Royal's common stock for $12.50 per share.

Royal's board considered IPCO's increased offer before reaching its decision to accept U.S. Vision's offer to acquire 100 percent of Royal's outstanding common stock. In the U.S. Vision transaction, shareholders

will receive $12.50 cash per share for up to 80 percent of Royal's common stock and a total of not less than 25 percent of the stock of the resulting corporation. Considering all of the circumstances, and the terms and conditions of both proposals, the board unanimously determined that accepting the U.S. Vision proposal was in the best interests of its stockholders.

PASADENA, Calif. (JAN. 11) UPI - An earthquake measuring 4.2 on the Richter scale struck an area 12 miles north of Mojave in the Tehachapi Mountains Wednesday, authorities said.

Caltech Seismology Laboratory spokesman Robert Finn said the earthquake at 5:22 p.m. PST could not be traced to a particular fault.

''There have been a number of very small earthquakes in that area in the past couple of weeks,'' he said, but added he could not immediately say if it was an aftershock of some previous earthquake.

There were no reports of damage.

#90011u0251 01/11/1990 ~United Press International
WASHINGTON (JAN. 11) UPI - Scientists report they have created mice with a disorder resembling sickle cell disease, an advance that may remove a

major obstacle to developing treatments for the disorder affecting up to 100,000 Americans.

A British research team said Wednesday it has genetically engineered a strain of mice to contain the defective hemoglobin found in blood cells of humans with sickle cell disease. Hemoglobin is a complex compound responsible for carrying oxygen throughout the body.

Dr. Alan Schechter, a sickle cell disease expert with the U.S. National Institutes of Health, called the British achievement ''an important step.''

''One of the major factors limiting research in sickle cell disease ... is the lack of a good animal model,'' said Schechter, who added that further improvements are probably needed in the genetically engineered mice before they can be used to test potential sickle cell drugs.

Schechter estimated that 50,000 to 100,000 Americans, most of them black, suffer from sickle cell disease.

In people who have the inherited disorder, hemoglobin tends to clump together and distort red blood cells into sickle shapes. The damaged blood cells die more quickly than healthy ones, leading to anemia, and can also clog small blood vessels. The disease also may cause agonizing bone pain and life-threatening infections.

Reporting in the journal Nature, a team led by Frank Grosveld of Britain's National Institute for Medical Research said it was able to create two transgenic mice containing relatively large amounts of human sickle cell hemoglobin in their red blood cells.

In test-tube experiments, blood cells taken from the transgenic mice were ''sickled'' under conditions that would cause similar deformities in cells taken from humans with sickle cell disease, researchers said. Other tests showed sickling also appeared to be occurring naturally within one of the transgenic mice.

No sickle cells were found in normal mice or a genetically engineered mouse that did not receive the defective hemoglobin, researchers said.

However, the researchers pointed out a major problem with their ''sickle cell'' mice is their failure to develop the anemia and other symptoms characteristic of the human disorder.

In an editorial accompanying the study, D.J. Weatherall of the University of Oxford speculated mice bred to have even higher levels of defective hemoglobin may develop anemia.

But Weatherall added, ''It may turn out, of course, that the size of the

red cells, the circulation dynamics and the regulation ... are so different in mice and men'' that symptoms of sickle disease may never be duplicated in the rodents.

#90011u0369 01/11/1990 ~United Press International
WASHINGTON (JAN. 11) UPI - The Food and Drug Administration has recalled the Jarvik artificial heart, citing problems in its manufacturing and reports of adverse reactions, it was reported Thursday.

The makers of the famed device, Symbion Inc., were notified by letter that the FDA withdrew its approval of further use of the device, the Washington Post reported.

Named after its inventor, Utah physician Robert Jarvik, the artifical heart has been implanted in more than 150 patients since it was first placed in a dying Seattle dentist seven years ago. It commonly has been used as a temporary measure until a heart donor could be found.

In withdrawing its approval for the device, the FDA cited deficiencies in manufacturing quality control, monitoring of research sites, training of personnel and reporting of adverse reactions to the FDA.

''The FDA believes that, on balance, the deficiencies in the Symbion studies were great enough that the risks to patients were outweighing the benefits,'' an agency spokesman told the Post.

Since alternative short-term implants are available for patients awaiting heart transplants, the decision does not mean the end to all artifical heart procedures.

The fist-sized, electrically powered Jarvik heart - made of graphite, polyurethane, dacron, velcro and metal - caused a sensation in 1982 when it was implanted in Barney Clark.

Clark, who was near death when the seven-hour operation began, lived 112 days on the device. However, three subsequent attempts to make the Jarvik device a permanent heart substitute resulted in serious medical complications.

Jarvik, who founded Symbion, sold his stock two years ago and left the company.

#90011u0372 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - An aviation group denounced the Federal Aviation Administration's management of a new air traffic system and said Congress should force the agency to shift to a system using satellites.

John Baker, head of the 300,000-member Aircraft Owners and Pilots Association, said Wednesday the FAA's current plan to modernize operations is billions of dollars over budget and years behind schedule. He said a more current system placing a heavy reliance on satellite monitoring of planes could be ready by 1995.

Baker also urged Congress to conduct a review of the FAA's handling of the National Airspace System plan, first spelled out in 1981.

FAA spokesman Fred Farrar responded later that the AOPA ''vastly overstates both the cost ... and when it will be in place and ignores the fact that ... the plan is designed to make full use of satellite technology when it becomes available.''

Farrar put the cost at $15.8 billion, and said other FAA modernization projects are expected to tally about $10 billion. Baker's figures lump both items together. Farrar estimated the air space moderization would be done in the year 2001.

And Farrar said that ''to demand a congressional investigation is somewhat ambiguous'' because the FAA's budget is reviewed by Congress each year and its purchases are monitored by the General Accounting Office and the Transportation Department's inspector general.

''We're not alleging impropriety. It's simply incompetence we're confronting here,'' said Baker, who added that when Congress delves into the procurement end of the FAA's program it would ''make the $700 toilet seat look like one of the all-time great bargains for the taxpayers.''

Baker said the program has mushroomed from 90 projects at the outset to 187 now, 32 of which have been completed and some of which would be made obsolete by an eventual switch to satellites.

He said his group, after a two-year study, identified $11 billion in savings among the remaining programs. He said the original $11.4 billion program is now estimated to cost as much as $27 billion, and the 1994 target date has slipped at least 10 years.

The savings, he said, would allow the Aviation Trust Fund to finance the improvements and shift the focus from ground-based facilities such as short and long-range radars and microwave landing systems to satellites that can tell a pilot within meters of his location and guide a jumbo jet to just a few feet above a runway in zero visibility.

And, he insisted, the modernization project - with or without satellites - can be paid for without raising the aviation fuel tax and ticket tax that fund the aviation account.

There already are 14 operating ''global positioning satellites'' put aloft by the military, and 18 would provide 24-hour navigation coverage worldwide. A total of 28 satellites are planned. Those and a military system known as ''milstar'' can be used for pilot-controller communications, navigation, terrain and collision avoidance and search and rescue functions.

Full use of such a system, Baker said, would save money in the long run by eliminating the need for expensive radars and reduce but not eliminate the need for controllers. In addition, he said, it would allow more direct routing, which could save both time and fuel.

Baker said the FAA three years ago produced a study suggesting satellites were the way to go, but rather than make the transition buried the report simply to keep money flowing on its ground-based system.

While Baker said experts think a satellite system could be operational in five years, ''I'm not at all confident (of the estimate) because we're talking about the federal government. Even I don't believe in Santa Claus to that extent, but the bulk of the technology is available off the shelf.''

#90011u0379 01/11/1990 ~United Press International

(JAN. 11) UPI - The five astronauts aboard the shuttle Columbia are waking up to their second full day in space. Meanwhile, NASA officials say the spaceplane is closing in on a dying 11-ton science satellite. They estimate Columbia will catch up with the Long Duration Exposure Facility... L-DEF... sometime Friday morning for a dramatic rescue.

Soviet President Gorbachev will travel to Lithuania Thursday in hopes of finding a compromise with the Lithuanian Communist Party that split from the Soviet party last month. It was the first such break in 72 years. The Kremlin leader delayed his trip by one day to avoid a planned demonstration in the capital city of Vilnius . But organizers say they've planned an even bigger rally for Gorbachev's arrival Thursday.

A report says the Food and Drug Administration has recalled the Jarvik artificial heart... citing problems in its manufacturing and reports of adverse reactions. Named after its inventer... Utah physician Robert Jarvik... the artifical heart has been implanted in more than 150 patients since it was first placed in a dying Seattle dentist seven years ago. It commonly has been used as a temporary measure until a heart donor can be found.

Worshippers gathered in a church in Kirtland, Ohio, Wednesday night for a memorial service for the family allegedly killed by a cult leader. The bodies of Dennis Avery, his wife Cheryl and their three daughters were found buried in a Kirtland barn last week. Earlier in the day, the final two of the 13 people charged in the shooting deaths were arrested in southern California.

-30- 5196
#90011u0423 01/11/1990 ~United Press International
(JAN. 10) UPI - The New York Rangers, who vaulted straight to the top of the Patrick Division standings at the beginning of the season, now are on the verge of dropping into the basement.

The Rangers, who have won only once in their last 16 games, managed a 2-2 tie Wednesday night against the Chicago Blackhawks on Brian Leetch's goal with 7:45 remaining.

Coupled with the New York Islanders' victory over Toronto, the Rangers and Islanders are tied for last place in the Patrick Division with 40 points. The Rangers are in the midst of a 1-11-4 tailspin that has precipitated their fall from the top to the bottom.

They would have taken sole possession of the cellar had it not been for Leetch's late heroics. Leetch took a pass from Troy Mallette in the high slot and beat goaltender Alain Chevrier to his stick side for his eighth goal of the season.

Patrick was forced to leave the game with a concussion, while Greschner

suffered a sprained left knee in the first period and did not return.

Rookie goaltender Mike Richter turned aside 38 shots to help keep the Rangers within striking distance.

The Blackhawks now are 3-0-2 in their last five matches.

Each team scored once in the first period. Patrick notched his 10th goal on a 45-foot shot at 15:33 with New York on a power play.

The Blackhawks tied the game at 18:45 when Steve Larmer skated out of the corner to the right circle and beat Richter with a 20-foot flip shot to his short side.

Chicago scored the only goal of the second period when Steve Thomas sent a 15-foot pass towards Adam Creighton in the goalmouth. Creighton did not touch the puck, but a distracted Richter allowed the puck to slide under him for Thomas' 18th goal.

--- AROUND THE NHL ---

Elsewhere in the NHL Wednesday night, the Islanders topped Toronto 3-1, New Jersey doubled up Pittsburgh 6-3, Winnipeg routed Washington 6-1 and Hartford beat Vancouver 3-1.

Islanders 3, Maple Leafs 1

At Toronto, NHL goal-scoring leader Pat LaFontaine scored twice to lead the Islanders. LaFontaine's goals gave him a league leading 38 as the Islanders stretched their winning streak to four games and halted the Maple Leafs' four-game streak.

Devils 6, Penguins 3

At East Rutherford, N.J., John MacLean scored a short-handed goal at 11:57 of the second period that turned out to be the game-winner for the Devils. New Jersey remained atop the Patrick Division and broke a three-game Pittsburgh winning streak. The Devils are 10-6-3 against Patrick Division opponents.

Jets 6, Capitals 1

At Winnipeg, Manitoba, Dave McLlwain scored his league-leading fifth short-handed goal and Dale Hawerchuk added a goal and two assists to pace the Jets. The victory stretched Winnipeg's home unbeaten streak to six games. The loss was the sixth straight for the injury-riddled Capitals.

Whalers 3, Canucks 1

At Vancouver, British Columbia, Dave Babych assisted on first-period goals by Randy Cunneyworth and Scott Young to help the Whalers snap a five-game winless streak. The loss was the fourth in five games for the Canucks.

#90011u0427 01/11/1990 ~United Press International

(JAN. 11) UPI - Coming off two sub-par performances, the No. 6 Syracuse Orangemen went back to basics Wednesday night.

After watching his team make just 28 percent of their shots last week in a 93-74 loss to Villanova, Syracuse Coach Jim Boeheim laid down the law.

No more bombing from the outside, pound the ball down low.

The Orangeman heeded their coach's advice and fed Derris added 12 points and 10 rebounds for St. John's, 13-3, 2-1.

The Redmen trailed 67-60 before Coleman sank two free throws and added a basket off a rebound and the Redman were never closer than 9 points in the final 4:29.

--- AROUND THE COLLEGE SCENE ---

Elsewhere in the Top Twenty, No. 1 Kansas walloped Miami (Fla.) 100-73; No. 5 Missouri waxed Southern 106-87; and No. 14 downed Baylor 99-84.

In other action; Maryland silenced North Carolina 98-88 and North Carolina State routed Boston U. 95-70.

At Miami, Fla., Rick Calloway led seven Jayhawks in double figures with 16 points and top-ranked Kansas rolled over the Hurricanes. Kansas, which improved to 17-0, dropped an 87-86 upset to Miami last year. The Hurricanes dropped to 4-6. Calloway scored six of his 17 points during a 17-2 spurt early in the second half which extended Kansas' lead to 66-41. Kevin Pritchard had 14 points and Jeff Gueldner added 13 for the Jayhawks. Joe Wylie topped Miami with 20 points.

At Columbia, Mo., Doug Smith scored 24 points and Nathan Buntin added 21 to lead the fifth-ranked Tigers over the Jaguars. Missouri scored the game's first 17 points and led 20-2 with five minutes gone. Missouri Assistant Coaches Rich Daly and Bob Sundvold filled in for head coach Norm Stewart who missed the game because of the flu. Anthony Peeler added 13 points and 11 assists for the Tigers, who improved to 14-1. Joe Faulkner led Southern with 27 Points.

At Fayetteville, Ark., Todd Day And Ron Huery scored 19 points apiece to

help the Razorbacks improve to 11-2. The Bears pulled to within four points with 15 minutes left before the Razorbacks pulled away. Lee Mayberry's 3-pointer with 8:33 left gave Arkansas a 71-61 lead. Oliver Miller added 17 points for Arkansas while Kelvin Chalmers led Baylor, 7-6 and 0-3, with 18.

At Raleigh, N.C., Rodney Monroe scored 17 of his 29 points in the first half to power the Wolfpack. N.C. State led by as much as 95-66 with 1:04 left. Brian Howard contributed 20 points and Chris Corchiani added 13 for North Carolina State, 12-2. Reggie Stewart led the Terriers, 5-8, with 27 points.

At College Park, Md., Walt Williams scored 21 of his career-best 33 points in the second half and Maryland snapped a nine-game losing streak against North Carolina, holding off a late Tar Heel rally. Maryland improved to 10-4 and 2-1 in the ACC.

In other games, it was: Bucknell 100, Colgate 94; Vermont 77, Maine 74; Auburn 93, Mississippi State 71; James Madison 87, William & Mary 65; Kentucky 89, Florida 81; N.C. State 95, Boston University 70; Vanderbilt 86, Mississippi 79; Wake Forest 73, East Tennessee State 69; Ball State 85 Eastern Michigan 67; Central Michigan 92, Western Michigan 82; Cleveland State 83, Youngstown State 67; Miami (Ohio) 96, Bowling Green 76; Toledo 86, Ohio University 66; Houston 83, Iowa State 82; Oklahoma State 73, New Orleans 61; Rice 74, Texas Tech 71; Southern Methodist 67, Texas A&M 54 and Texas 83, TCU 80.

(JAN. 11) UPI - Philadelphia's much-maligned bench made it possible for Charles Barkley to hit the game-winning shot.

Barkley scored 24 points and sank a 14-foot jumper with 2.7 seconds to play Wednesday night to give the 76ers a 113-111 victory over the New York Knicks.

But that shot would not have been meaningful without the contributions of Ron Anderson, Derek Smith and Corey Gaines off the Philadelphia bench.

The 76ers' reserves, who have heard critics blame them for the team's woes outscored their New York counterparts 43-19.

''The bench is being blamed for a lot of problems with the team, especially off the (recent 2-5) road trip,'' said Smith, who scored 10 of his 18 points in the fourth quarter before bruising both his knees in a collision with Mark Jackson. ''I disagree with it.

The 76ers went ahead by 15 points twice in the second quarter but the Knicks fought back and used a 9-2 run to tie the score at 111-111 on a 3-point basket by Jackson with 15.4 seconds to play.

But Barkley spun away from defender Charles Oakley and hit a shot from just inside the foul line to give Philadelphia its 12th win in 14 home games and hand New York only its third loss in its last 15 games.

''I wanted to make sure we got the last shot,'' said Barkley, who was 9-of-10 from the field and also grabbed 12 rebounds. ''He went for the steal, I reversed and got the shot off. We were very lucky it went in.''

Jackson, who had a season-high 33 points, missed a three-point shot with less than one second to play and Gerald Wilkins' tap was wide as time expired.

Jackson's 3-point play cut the Philadelphia lead to 109-108 with 37.4 seconds left in the game but Barkley canned two from the line for a 111-108 advantage with 22.4 seconds to go.

Anderson scored 21 points and Hersey Hawkins and Rick Mahorn had 18 each for the 76ers, who closed within five games of the first-place Knicks in the Atlantic Division.

Charles Oakley added 18 for the Knicks and Patrick Ewing had 15, below his average of 28.5 points per game.

--- AROUND THE NBA ---

In other games, Indiana whipped Chicago 120-113, Milwaukee clubbed Cleveland 116-100, Boston topped Detroit 104-97, the Los Angeles Clippers turned back Atlanta 115-109, Utah crushed Denver 130-99, Golden State held off Dallas 123-119 and the Los Angeles Lakers dumped Orlando 121-106.

Pacers 120, Bulls 113

At Indianapolis, Reggie Miller scored 44 points, a career-high for the third-year guard, and Indiana snapped a five-game losing streak. Michael Jordan scored 35 points to lead Chicago. Person scored 17 and Rik Smits added 16 for the Pacers.

Bucks 116, Cavaliers 100

At Richfield, Ohio, Ricky Pierce scored 31 points and Alvin Robertson added 23, eight in a 23-8 Milwaukee run to start the second half, to lead the Bucks to their fourth straight win. Cleveland was led by 23 points from John ''Hot Rod'' Williams, 22 points from Larry Nance and 18 from rookie Chucky Brown.

Celtics 104, Pistons 97

At Boston, Reggie Lewis scored a season-high 32 points and Kevin McHale added 30 in his first start of the year, helping the Celtics snap Detroit's six-game winning streak. The Celtics played their third straight game without Larry Bird, out with a sprained ankle. Detroit was led by James Edwards' 22 points.

Clippers 115, Hawks 109

At Atlanta, Ron Harper and Danny Manning combined for 64 points, including 21 in the fourth quarter, to spark Los Angles. Los Angeles got 37 points from Harper while Manning added 27. Atlanta was paced by Moses Malone with 27 points while Dominique Wilkins added 25.

Jazz 130, Nuggets 99

At Salt Lake City, Karl Malone scored 31 points to power Utah. Malone went 9 of 9 from the field to help Utah to a 29-12 lead and a score of 38-17 after the first period. The 31-point margin of victory was Utah's biggest win ever over the Nuggets. Blair Rasmussen led Denver with 19 points and 12 rebounds.

Warriors 123, Mavericks 119

At Oakland, Calif., Terry Teagle made 4 free throws in the final 24 seconds to lift Golden State to its fifth straight win. Rolando Blackman of Dallas led all scorers with 30 points. Chris Mullin added 25 points and

Sarunas Marciulionis added a season-high 23 for the Warriors.

Lakers 121, Magic 106

At Inglewood, Calif., Magic Johnson amassed 16 points and 13 assists to lead Los Angeles. Byron Scott led the Lakers with 20 points. Orlando Woolridge came off the bench to score 18 points and James Worthy added 15. Orlando's Otis Smith led all scorers with 28 points. Terry Catledge added 17 for the Magic.

OSLO, Norway (JAN. 11) UPI - A Soviet oil drilling platform under tow to southwestern Norway was met by gale-force winds and went out of control Thursday, and four Soviet tugs struggled to keep the structure from drifting onto Norway's northern coast, rescue officials said.

Fifteen of the 21 crew members aboard the platform Kolskaya were evacuated by a Norwegian helicopter early Thursday, while the rest remained on board to assist tugs in the towing operations, said a rescue spokesman at Bodoe in northern Norway.

The platform, relatively small by modern standards with a deck measuring 270 square feet, was under tow from Murmansk on the Soviet Kola peninsula to Stavanger in southwestern Norway when it ran into gale-force winds early Thursday. Attempts to anchor the platform were unsuccessful.

Some hours later, the situation appeared under control and there was no immediate danger of the platform drifting ashore, the rescue spokesman said.

But he added that if the weather worsened or if one of the towing wires broke, the Kolskaya might be washed onto coastal rocks and capsize.

The Kolskaya was chartered by a Stavanger, Norway, company for operations in the Norwegian sector of the North Sea.

WASHINGTON (JAN. 11) UPI - President Bush, seeking to ease Latin American concerns about U.S. military muscle, has assured Colombian President Virgilio Barco that he plans no naval ''blockade'' of his South American nation.

But an administration official said the United States still wants to use warships to monitor and help intercept drug shipments from Colombia, where

the world's biggest cocaine cartels reign.

''Right now, the operation is on hold until we have our consultations with the Colombians,'' said the official, speaking on the condition of anonymity. ''But we are confident that we will get it back on track.''

Bush, seeking to reaffirm close relations with Colombia in the drug war, telephoned Barco Wednesday, said Deputy White House press secretary Roman Popadiuk.

''The president called ... to express regret over the recent misunderstanding resulting from erroneous press stories about a proposed U.S. counternarcotics operation,'' Popadiuk said in a statement.

The spokesman said, ''The president assured Barco that the U.S. never intended to conduct any activities within Colombian territorial waters, that no U.S. actions would be taken without the full cooperation and consent of the Colombian government, that no 'blockade' was ever contemplated.''

Bush reacted to weekend news reports that the aircraft carrier USS John F. Kennedy and the cruiser USS Virginia were steaming toward Colombia to monitor drug smuggling.

According to the reports, the ships were to remain in international waters but Colombian news accounts, and some earlier U.S. ones, described the operation as a ''blockade.''

On Sunday, as Colombian officials expressed outrage, Bush declined comment. He told reporters that the administration might have more to say later.

On Monday and Tuesday, White House and State Department spokesmen said there were no plans for any blockade, but that the United States was seeking expanded drug-interdiction efforts. They also said the Kennedy and Virginia were on routine training exercises off Florida.

Popadiuk said Wednesday that Bush and Barco ''agreed that it was most unfortunate that inaccurate and confusing reports of tentative U.S. proposals for cooperation with the Colombian government had created such a false impression.''

The administration official who spoke on the condition of anonymity said U.S. authorities still hope to use the Kennedy and Virginia in drug monitoring efforts in international waters off Colombia, hopefully later this winter.

As proposed, the ships would use surveillance equipment and aircraft to

detect suspected drug shipments, by air and sea, and alert Colombian or U.S. ground forces who could make arrests and seizures, officials said.

The United States currently patrols the Caribbean with short-range planes and boats. A permanently assigned naval task force would strengthen and extend the drug-sweeping net.

Colombia is the primary source of cocaine smuggled into the United States. Bush plans to join leaders from Colombia, Bolivia and Peru at a Feb. 15 drug summit in Cartagena, Colombia.

During the weekend, the Pentagon said the Kennedy and the Virginia had left port on routine exercises in the Atlantic Ocean but would not disclose the destination of the ships.

Top Colombian officials had not been consulted before reports surfaced that the two ships were en route to Colombia and the angry reaction was exacerbated by concerns about U.S. ''gunboat diplomacy'' created by the invasion of Panama.

Bush, acknowledging that relations with Latin America have become strained announced last week that Vice President Dan Quayle will go on a fence-mending trip to the region. A date has not yet been set.

Quayle said Wednesday, ''We have many strong friends and supporters in our hemisphere and we're going to go and visit with them on a mission of democracy and freedom, a mission of consultation and a mission of listening.''

(JAN. 11) UPI - Around the world... around the clock... the latest news from U-P-I.

The time of Soviet President Mikhail Gorbachev's departure from Moscow for Lithuania and the schedule of his activities are a well-kept secret. But Gorbachev is expected to visit the rebellious republic today. Even if most Lithuanians DON'T find the Soviet leader, they are likely to continue the demonstrations they held yesterday. Gorbachev has been challenged to address what the organizers expect to be a rally of one-Million people today.

A transcript released in Romania shows that former dictator Nicolae Ceausescu personally ordered his forces to shoot at pro-democracy demonstrators last month. The transcript also shows that Ceausescu warned his top aides during the telephone conversation a week before his ouster that troops who disobeyed his orders would be harshly punished. The

transcript was published in a Bucharest newspaper.

Three bombs exploded at Oakland University in the Detroit suburb of Rochester last night. NO injuries are reported and damage is minimal. Two bombs were pipe bombs and at third was a fire bomb. Oakland U will be closed today while police and the F-B-I search for suspects. NO one has claimed responsibility for the bombs.

K-Mart and Toys ''R'' Us have agreed to pay 60-thousand dollars in fines to the federal government. Officials say the two retailers failed to promptly notify the Consumer Product Safety Commission about defects in their products. Both defects involved razor-sharp scissors in desk sets for children.

A New York state commission says a school wall that collapsed in high winds last fall was NOT braced properly. Nine children were crushed to death when the wall at the East Coldenham fell on them. The commission found that four near-by schools have the same flaws in construction and recommends they all be re-enforced.

SANTIAGO, Chile (JAN. 11) UPI - A search began Thursday for a small plane missing with five people aboard, including two U.S. Food and Drug Administration officials.

Authorities said planes and helicopters were participating in the search for the small Cessna plane missing since Wednesday night after it took off in northern Chile for a flight to Santiago.

The U.S. citizens aboard were identified by Chilean authorities as John F. Harty Jr., head of international affairs for the FDA, and Patrick J. Pouzar, director of inspections.

Also aboard were the pilot, Lt. German Fuentes Meza of the national police Sergio Lazcano Arroyo, director of the Chilean Exporters Association, and Oscar Badilla Saez, an official with the Chilean Agriculture Service.

The plane was believed to have taken off from Copiapo, 500 miles north of Santiago, about 5:15 p.m. and was to arrive in Santiago about 9 p.m., according to the newspaper El Mercurio.

After taking off, the pilot maintained radio contact with the control tower for five minutes before communications were lost, the paper said.

#90011u0556 01/11/1990 ~United Press International

BEIJING (JAN. 11) UPI - Troop presence in and around Beijing will remain slightly higher than normal following the formal lifting of martial law in the capital, a senior Chinese official said Thursday.

Government spokesman Yuan Mu said in a news briefing for the foreign news media that while most out-of-town troops have already withdrawn from Beijing, there will be ''a small increase'' in the normal number of troops stationed inside the city and surrounding suburbs.

''This will enable the People's Liberation Army to fulfill the task entrusted upon them by the Constitution, namely to safeguard public security,'' he said.

The latest Western intelligence estimates the presence of out-of-town troops stationed in the capital at 12,000 to 15,000, combined with the normal Beijing garrison strength estimated at around 60,000.

That, however, is a sharp drop from the more than 150,000 out-of-town troops that occupied Beijing and surrounding areas at the height of martial law last spring.

China on Thursday ended nearly eight months of martial law imposed in Beijing during last spring's massive pro-democracy protests. The move, announced Wednesday, was featured prominently in China's official newspapers and carried widely on state television and radio.

It was the first gesture toward easing the climate of repression prevailing since the army fired on demonstrators last June, killing hundreds and perhaps thousands of people.

China's state-run media praised the army's role during the crackdown, at the same time warning ''we cannot relax our vigilance'' against further unrest.

''The lifting of martial law does not mean that everything is all right,'' said a commentary in the main Communist Party newspaper, the People's Daily, adding ''it is imperative to smash the sabotage of hostile forces.''

In a symbolic gesture of relaxation just hours after the lifting of martial law was announced, armed paramilitary police withdrew early Thursday morning from guard duty in Tiananmen Square, the heart of last spring's protests.

The Square is now fully open to the public, after months during which visitors needed special passes. But eight guards remain posted on the steps of the central martyrs' monument, the former headquarters of last spring's student-led pro-democracy movement.

And in an announcement apparently aimed at discouraging any show of dissent, state television re-emphasized Thursday night tough new laws forbidding unauthorized protests in Tiananmen Square.

Western and Chinese observers agreed the lifting of martial law appears to be a cosmetic gesture aimed at placating the United States and other countries that imposed economic sanctions after the June carnage.

The freeze on foreign lending has crippled China's foreign exchange earnings even as the country grapples with a domestic economic crisis.

''The Chinese government has no choice but to lift martial law,'' scoffed a graduate student who was active in last spring's protests, adding, ''It's simple: They need money.''

A key objective is a sign of concession towards President Bush, whose surprise initiative last month to restore ties with China met with fierce criticism in Congress.

The White House welcomed the Chinese move Wednesday, calling it a ''positive step,'' but said economic sanctions imposed by Bush last June

would remain in place for the time being.

Martial law remains in place in the capital of Tibet, where troops were called in to quell violent anti-Chinese rioting last March.

Asked whether troops would also be removed from Lhasa, spokesman Yuan Mu said the situation in Tibet is ''very different'' from Beijing, and that there is no current indication martial law will soon be lifted in the Tibetan capital.

-30- 4027

#90011u0584 01/11/1990 ~United Press International

MOSCOW (JAN. 11) UPI - The Soviet Union announced it is upgrading PLO respresentation in Moscow to ambassador status and will send an envoy to Yasser Arafat's headquarters in Tunis, Tunisia.

Also Wednesday, Soviet Foreign Minister Eduard Shevardnadze discussed elevating the the status of Israeli representation in talks with Israeli Science Minister Ezer Weizman.

Yuli Vorontsov, first deputy to Shevardnadze, invited Arab representatives to the ministry and told them that the Palestine Liberation Organization would now have ambassador status in Moscow.

''The Soviet Foreign Ministry announces it is giving its consent to reorganizing the PLO representation in Moscow into that of an embassy in Moscow,'' Vorontsov said. ''The Soviet Union intends to designate an ambassador to the PLO executive committee (in Tunis).''

Weizman's meeting with Shevardnadze set off a ministorm in Israel because the head of the Israeli delegation in Moscow, Arieh Levin, was not present.

Israel and the Soviet Union have consular delegations in each other's country but are driving toward a restoration of full diplomatic relations, which the Kremlin severed in 1967 during the Arab-Israeli war.

''We spoke about trying to raise their and our status in the representation here to an envoy,'' Weizman told Israel radio in an interview. ''We spoke in parallel to this about the determination to arrive at diplomatic relations.''

#90011u0590 01/11/1990 ~United Press International

BEIJING (JAN. 11) UPI - The British governor of Hong Kong held lengthy and intense talks Thursday with Chinese officials on the territory's future as it nears return to rule under Beijing.

It was Hong Kong Gov. David Wilson's first trip to China since the suppression of the pro-democracy movement in June and comes at a low point in bilateral relations over the crackdown and the return of Hong Kong to China in 1997.

After a more than three-hour meeting with Vice Foreign Minister Zhou Nan, which ran longer than expected, Wilson said he would not discuss details until the end of his three-day trip Friday. He meets Friday morning with Premier Li Peng.

''We've had a discussion on a whole range of issues of concern,'' Wilson told reporters outside the Foreign Ministry. ''It's been a frank discussion and an in-depth discussion, which has been useful to both sides.''

Zhou was also tight-lipped, saying ''we exchange opinions frankly and in depth'' and that the meeting was ''very useful.''

Wilson would not comment on the lifting Thursday of martial law in Beijing but British Ambassador Alan Donald told reporters, ''It is a step in the right direction and will help us to get back to normal, friendly relations.''

Wilson met later Thursday with senior Chinese officials in charge of Hong Kong affairs.

Accusations in Hong Kong that Britain acceded to Chinese demands to curtail moves toward democracy in the territory before 1997 prompted Wilson to deny on his arrival Wednesday there would be a ''sellout.''

China has pledged to give Hong Kong special autonomy and not to interfere in its capitalist way of life for 50 years after 1997 under a ''one country, two systems'' policy.

But the territory of 5.7 million people remains anxious over China's willingness to honor its pledges in the wake of last June's crackdown.

The exodus of the middle class and professions from Hong Kong continues and China has denounced a recent British decision to grant citizenship to 225,000 Hong Kong citizens and demanded the policy be rescinded.

#90011u0646 01/11/1990 ~United Press International

(JAN. 11) UPI - Pro-democracy protesters in Lithuania await the arrival of Mikhail Gorbachev... the space shuttle continues chasing a satellite... three bombs explode at a college near Detroit... and scientists may be

watching the birth of two quasars. Those stories, and more... next from U-P-I.

Soviet President Gorbachev is on his way to the Baltic republic of Lithuania on a trip that may decide the future of the Soviet Union.

Gorbachev intends his trip to stem a breakaway by Lithuania's Commmunist Party, which declared its independence from Moscow last month.

The Sajudis nationalist popular front has turned the trip into a forum to show Gorbachev that Lithuanians want to end Soviet rule... even though many of the front's members also belong to the Communist party.

Lithuanian nationalists predict that more than 500-thousand pro-independence demonstrators will turn out to challenge Gorbachev to address the mammoth rally ''to see how people really feel.''

Gorbachev's itinerary in Lithuania has NOT been published.

In a bold assertion of independence, Sajudis president Vitautus Lansbergas says Gorbachev would be received on a state-to-state basis.

In the words of Lansbergas- ''We shall welcome him as the leader of a strong neighboring state with which we have had a long and difficult history... but with which we do NOT want bad relations.''

The Soviet Union occupied the independent Baltic states of Lithuania, Estonia and Latvia in 1939 as part of a secret agreement with Nazi Germany when the Nazis invaded Poland on September 1st, triggering World War Two.

Gorbachev hopes to convince the Lithuanians that it's in their best interest to remain within the Soviet sphere. Giving in to Lithuanian demands for independence would stir up a hornet's nest of nationalist sentiment in other Soviet republics, such as the Ukraine and Azerbaijan .

#90011u0656 01/11/1990 ~United Press International

(JAN. 11) UPI - The crew aboard the space shuttle Columbia is awake and ready for another hard day of work on their third day in orbit.

Flight director Robert Castle said this morning that NASA's oldest shuttle is performing flawlessly and that its 10-day mission is proceeding more smoothly than any in recent memory.

The astronauts quickly got down to work... setting up a large IMAX camera to film an African dust storm and pressing on with a series of scientific and medical experiments.

Three rocket firings are planned today as part of the ongoing procedure to rendezvous with a falling science probe. Columbia is trailing the satellite by about 570 miles... with the shuttle racing along in a slightly elliptical orbit allowing it to catch up with the falling science probe and rescue it tomorrow morning.

NASA Administrator Richard Truly says the rendezvous requires an intricate series of maneuvers by the shuttle crew. And he says that's a challenging maneuver, plus a lot of work.

But chief flight director Granvil Pennington says ''Everything is looking good'' and ''The rendezvous is on schedule.''

Yesterday, Columbia's five astronauts launched a Navy communications station like a giant Frisbee. It's the last of five Syncom-4 satellites to be sent into orbit.

A mysterious series of bombings caused officials at Oakland University to call off classes today.

Two small pipe bombs and a fire-bomb exploded last night in the school in Rochester, Michigan, about 20 miles north of Detroit. The bombs did NOT cause any injuries and damage was slight.

Two of the bombs exploded in a parking lot. The third was in the library's journalism section... damaging mainly books.

University spokesman Jim Llewellyn says officials decided to close the campus today for employees and its 12-thousand students while the bombings are investigated.

He says authorities have NO suspects... and NO one claimed responsibility for the blasts.

The F-B-I, Michigan state police, university police, city police and county deputies are investigating the bombings at the campus.

#90011u0666 01/11/1990 ~United Press International

(JAN. 11) UPI - The United States and Panama's new government have signed a broad agreement to co-operate in the fight against drug trafficking.

Melvyn Levitsky, the assistant secretary of state for international narcotics matters, says the accord will help Panama become eligible for further American aid. The agreement calls for co-operation in the areas of law enforcement and drug interdiction, with specific programs to be

developed later.

Panama has been one of the few countries in the past two years that has failed to receive U-S government certification that it is fighting drug trafficking. Certification is required for countries to be eligible for the full slate of U-S foreign aid programs.

With yesterday's agreement, Levitsky says he is confident Panama will be certified.

Justice Department officials revealed they may replace acting U-S Attorney Dexter Lehtinen as the lead prosecutor in the Miami drug-trafficking trial of deposed Panamanian General Manuel Noriega.

Lehtinen has NOT had any trial experience in at least 10 years. He has NOT commented on the possibility that he will be replaced for Noriega's trial.

A controversial remark by a senior French official about Japan's economic policies is overshadowing Japanese Prime Minister Kaifu's trip to France.

Before Kaifu's arrival in Paris last night, French Minister for European Affairs Edith Cresson lashed out at Japan in an interview as an aggressive foe bent on foreign economic conquest.

Cresson says... ''It is clear that today Japan is an adversary that does NOT play the game and which has an absolute will to conquer the world.''

Yesterday in Brussels, Kaifu told the European Community that Tokyo's Eastern Europe aid package intends to ease the region's economic transition.

A Japanese Foreign Ministry spokesman says the prime minister regards Eastern Europe as NOT just a regional problem, but as ''something that has a bearing on the peace and stability in the world.''

Kaifu announced Tuesday in West Germany that Japan would grant credits of more than 500-Million dollars each to Poland and Hungary, plus trade and investment guarantees for several hundred-Million dollars.

#90011u0669 01/11/1990 ~United Press International

(JAN. 11) UPI - An international team of astronomers says it may have witnessed the birth of the most powerful type of object in the universe- a pair of quasars.

Quasars... which is short for quasi-stellar objects... are thought to be the bright cores of certain galaxies. Some astronomers think their intense

energy may be caused by their material being pulled inward to giant black holes.

The team used a 40-inch telescope near Le Serena, Chile, to discover what it believes to be the first true set of quasar ''twins.''

Dr. Georges Meylan of NASA's Space Telescope Institute says the suspected double quasar... found in the constellation Pisces... appears to be separated by fewer than 100-thousand light years.

Quasars generally occur alone, but they sometimes appear to be two or three objects because a gravitational field may split their image.

The researchers say the quasars appear to be separate objects because they have slightly different chemical ''fingerprints.'' The quasars also appear to be moving in relation to each other, a fact which researchers cite as further evidence that they are distinct objects.

#90011u0775 01/11/1990 ~United Press International

(JAN. 11) UPI - A once-in-a-century flood in the Pacific Northwest showed signs of abating Thursday with rain tapering off from an earlier deluge, but thousands were washed out of their homes and the storm left at least three dead.

A breached dike caused the most serious flooding in the region, prompting the closure of a 12-mile stretch of Interstate 5 near Centralia, Wash., about 100 miles south of Seattle.

''This is the worst I've ever seen. In fact, I'm a lifelong resident and I've never seen I-5 closed,'' said Bob Berg, Lewis County undersheriff and director of emergency services.

''I've seen roads today that aren't just washed out or the shoulder is gone - it looks like somebody took a carving knife right across them - they're just gone,'' Berg said.

The flooding of the freeway, which had water running over 3-foot-high medians in places, blocked the state's major north-south artery and caused a major traffic headache.

At least three deaths were attributed to the flooding, including a 78-year-old man who apparently drowned and was found floating in a Centralia street.

Another elderly man died when he and his wife drove through barriers on northbound Interstate 5, plunged into water and sank in a ditch. Divers

managed to rescue his wife and airlift her to a hospital, the State Patrol said.

The storm, which started Tuesday, dumped up to 4 1/2 inches of rain in 24 hours on the Puget Sound region. Floodwaters continued to rise Wednesday.

''It's basically a 100-year storm,'' said Martin Thompson, a weather specialist with the National Weather Service in Seattle. ''We wouldn't get something like this for another hundred years.''

Flood warnings remained Thursday on a half-dozen rivers. Of those, the worst damage by far was along the Chehalis, which crested 8 1/2 feet above flood stage Wednesday.

The rushing waters that overflowed a section of an earthen dike on the Skookumchuk River at Centralia prompted the National Guard to evacuate about 200 people, including 57 residents of the Centralia Convalescent Center, Berg said. Another 2,000 to 3,000 people left their homes on their own, he added.

Mark Stewart, spokesman for the Washington Department of Emergency Services, said the state had provided more than 30,000 sand bags to Lewis County alone, where an estimated 426 homes were damaged, a water system serving 700 people was shut down and many local roads were under water.

The weather service forecast a moderate chance of rain late Thursday and a 60 percent chance of rain Friday, when up to a half-inch of precipitation could fall.

In Oregon, the flood waters in Tillamook County on the northwest coast receded Wednesday and officials said more than 300 homes, businesses and farms suffered damage in the deluge caused by four days of heavy rain.

Flood warnings were in effect through the night for the Coeur d'Alene River in northern Idaho, but officials expected little more than flooding of a few basements.

The weather service said the storm front was moving to Northern California and forecast rain for all of Northern and Central California by Friday with periods of rain expected through the weekend. A blizzard warning was issued for extreme northwest Minnesota and the storm was blamed for two traffic deaths in North Dakota. Visibility was near zero with snow and blowing snow whipped by 50 mph winds. A radio station in Willmark Minn., reported its digital wind gauge recorded 69 mph at 4:46 a.m.

The weather service cautioned against using ice fishing houses and such high-profile vehicles as vans, delivery trucks and semi-trailer trucks because they could be blown over.

The winds contributed to two traffic deaths in North Dakota Wednesday night. Authorities said a semi-trailer truck driver from Wisconsin was killed when his truck was blown over on Interstate 29 near Hillsboro. A second man was killed when he was struck by a car while walking along Interstate 94 near West Fargo during strong winds and blowing dirt.

Elsewhere, record-high temperatures were set Wednesday in Oklahoma, Texas, Arkansas, Louisiana, and New Mexico, and forecasters said the warm weather trend was expected to continue.

The warm, tinder-dry conditions in Oklahoma triggered several grass fires in Oklahoma City and the surrounding area Wednesday, destroying at least 15 homes in the city alone, officials said.

Fair weather prevailed through the South, while the Middle Atlantic states and New England remained cool with cloudy skies and scattered flurries. Light snow fell over northern Maine, where temperatures were in the upper teens.

Cloudy skies kept temperatures warm throughout the Midwest and Upper Great Lakes region. Light snow, flurries and snow was reported in northern lower Michigan and the Upper Peninsula.

Strong winds were reported in southern Wisconsin and Illinois, with gusts of up to 53 mph at Wausau in central Wisconsin.

#90011u0851 01/11/1990 ~United Press International

(JAN. 11) UPI - Soviet President Mikhail Gorbachev arrived in Lithuania today for what could be the largest confrontation he has ever faced. Lithuanian nationalists have challenged Gorbachev to address a rally in Vilnius today. But there is NO word on whether Gorbachev will attend the rally. The Tass news agency says members of a crowd at the statue of Lenin told Gorbachev they are satisfied with his reforms.

The Soviet Union says it will establish diplomatic ties with the Palestine Liberation Organization. Moscow says it is upgrading P-L-O respresentation in Moscow to ambassador status and will send an ambassador to Yasser Arafat's headquarters in Tunis, Tunisia. The Soviets say they may also elevate the status of their diplomatic ties with Israel.

Hungary's new opposition Democratic Forum is angry about what it calls a ''Hungarian Watergate'' scandal. The opposition says Hungary's security service tapped the phones of opposition leaders. In addition, the party says the Interior Ministry is destroying documents that prove the phones were tapped. The Democratic Forum and two other pro-democracy groups want

the interior minister to quit.

The astronauts on the shuttle Columbia are one day between their two major projects in space this mission. They launched a Navy communications satellite yesterday. And tomorrow they could be singing an old song... ''Catch a falling star and put it in your pocket.'' The Columbia's goal is to pluck a dying satellite from space and return it to Earth. Flight director Robert Castle said this morning the 10-day mission is smoother than any other in recent memory.

A once-in-a-century flood in the Pacific Northwest is being blamed for at least three deaths. The latest victim was a truck driver who drowned when his pickup slid off a road into a ditch in Washington's Pierce Country. The waters are receeding... because of a break in the rain. A National Weather Service forecaster in Seattle, Martin Thompson, says something like this WON'T happen for another 100 years.

#90011u1015 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Defense Secretary Dick Cheney announced cost-cutting management measures Thursday that he estimated will cut the military and civilian workforce by 42,000 and save an estimated $39

billion over five years.

The streamlining measures would save an estimated $2.3 billion in fiscal 1991, which begins Oct. 1, he said.

''The improvements make it possible to trim the logistics and management workforce of 580,000 civilian and military personnel by as many as 8,000 civilians and 8,000 military personnel'' in fiscal year 1991, the Pentagon said in a statement accompanying Cheney's announcement.

By the end of fiscal 1995, it said, the workforce will be reduced by a total of 18,000 civilians and 24,000 military personnel.

These reductions do not include the military force reductions, expected to amount to another 30,000 military personnel, connected with the fiscal 1991 budget, which President Bush will present to Congress Jan. 29.

''The changes in the nature of the threat around the world, and the realities of the budget, mean that our defense budget are going to be leaner in the years ahead,'' Cheney said.

''So every dollar that we can cut out of the cost of running the Pentagon is a dollar we don't have to cut from force structure, readiness, or the quality of life for our men and women in uniform,'' he said.

Deputy Defense Secretary Donald Atwood said the management changes would include better control of supplies by streamlining the individual services' maintenance activities and reducing the use of consultants and outside advisers.

It would also include the creation in each service of an acquisition corps of full-time experts who will report to top department officials, eliminating middle layers of bureaucracy, and eliminate unnecessary paperwork.

Known as the Defense Management Review, the cost-cutting measures stem from Bush's order last year for Pentagon officials to reform the way the Defense Department conducts business.

Bush ordered the review last February in response to reports of waste, fraud and abuse in the military's massive weapons-buying or procurement programs and the perception of a bloated Pentagon workforce.

Cheney's report closely follows the 1986 recommendations of former President Reagan's commission on defense reform chaired by David Packard, known as the Packard Commission.

As an example of one of the changes under Cheney's plan, nearly all

Contract Administration Services, currently divided among the three military departments and the Defense Logistics Agency, will be consolidated under the DLA.

''This action will result in a streamlined CAS organization that will promote uniform implementation of acquisition policies and regulations and will result in savings of both dollars and manpower,'' the Pentagon said.

#90011u1044 01/11/1990 ~United Press International
KFAR HATTA, LEBANON (JAN. 11) UPI - Hezbollah gunmen killed a member of a Palestinian force attempting to halt violence between the pro-Iranian militia and its Syrian-backed rivals, and a Palestinian commander warned Thursday his forces would defend themselves.

The warning from the commander of the 700-man Palestinian force raised concerns the incident might lead to a military confrontation between the Palestinians and Hezbollah.

Hezbollah snipers in the village of Kfar Milki opened fire on the Palestinians, killing one fighter and wounding seven others Wednesday.

The attack occurred in the Tufah region east of the southern port city of Sidon, 24 miles south of Beirut, the area where the rival militias have battled for the past 20 days.

The Palestinians were transferring supplies to a position they established last week when Palestine Liberation Organization Chairman Yasser Arafat deployed the force from the PLO's mainstream Fatah in the area to disengage the Shiite rivals.

''I hope that such incidents would not recur in the future because it is our legitimate right to defend our positions in any region,'' said Abu Fadi, the commander of the PLO buffer force.

Abu Fadi accused Hezbollah of ''harassing our fighters and preventing them from bringing supplies to (the newly established) positions.''

The Palestinian force set up 25 checkpoints and positions in the Tufah region with the aim of disengaging the antagonist Lebanese groups.

''Hezbollah has no right to provoke our fighters because we will feel

obliged to defend ourselves,'' the official added. ''I think Hezbollah has no intention to withdraw to its previous positions. On the contrary, they are planning to advance to the coastal area of Zahrani.'' Zahrani is 4.5 miles south of Sidon.

The sources said Amal and Hezbollah continued trading rockets and machine gun fire in several places.

They said Amal dispatched troop and equipment reinforcements to advance battle fronts in Kfar Hatta, Kfar Milki and Mjeidel.

Hezbollah is fighting for its return to southern Lebanon under an accord worked out in Syria last January. The accord stipulated the establishment of a joint ''operations room'' to coordinate guerrilla attacks against Israel. But the provisions of the accord have never been materialized.

Hezbollah has accused Amal of obstructing its open-ended guerrilla warfare against Israel.

According to the International Committee of the Red Cross, ICRC, the violence has killed 88 people and wounded 312.

Moslem sources said Iran's Deputy Foreign Minister Mohammed Ali Besharati, who has shuttled between Damascus and Beirut in an effort to end the fighting, has failed to persuade Hezbollah to withdraw to its original positions.

Hezbollah is fighting for its return to southern Lebanon under an accord worked out in Syria last January. The accord stipulated the establishment of a joint ''operations room'' to coordinate guerrilla attacks against Israel.

But the provisions of the accord have never been materialized.

Hezbollah accused Amal of obstructing its open-ended guerrilla warfare against Israel.

WASHINGTON (JAN. 11) UPI - The Food and Drug Administration has recalled the historic Jarvik artificial heart, citing problems in its manufacturing and reports of adverse reactions, officials confirmed Thursday.

The makers of the artificial heart, Symbion Inc., were notified by letter that the FDA withdrew approval for further use of the device, an FDA spokeswoman said.

Named after its inventor, Utah physician Robert Jarvik, the artificial heart had been implanted in more than 150 patients. It is a fist-sized, electrically powered combination of graphite, polyurethane, Dacron, Velcro and metal.

The device first made history in late 1982 when doctors placed it in the chest of Barney Clark, a Seattle dentist dying from a degenerative heart condition. Clark lived for 112 days with the artificial heart, dying in March 1983 at the age of 63.

Three subsequent attempts to make the device a permanent heart substitute resulted in serious medical complications.

The device has commonly been used as a temporary bridge between a failing heart and a live transplant. Other alternative, short-term implants remain available for patients awaiting heart transplants.

The Jarvik heart had been the only development approved for permanent heart replacement.

In withdrawing its approval, the FDA cited deficiencies in manufacturing quality control, research site monitoring, personnel training and reports to the FDA of adverse reactions.

Officials at Symbion, which moved from Salt Lake City to Tempe, Ariz., last fall, were not available for comment.

Jarvik, who founded Symbion, sold his stock and left the company two years ago.

NEW YORK (JAN. 11) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.50-73.50 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 122.80 c-lb.

Lead, common, U.S. primary producers 38.00-40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.67-$3.87 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $490.00-$502.00; dealer-approx., $472.00-$480.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.00 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 330.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

#90011u1097 01/11/1990 ~United Press International
VILNIUS, USSR (JAN. 11) UPI - The following is a partial translated text of the exchange Thursday between Soviet President Mikhail Gorbachev, Lithuania's Communist Party leader Algirdas Brazauskas and Vilnius residents in the center of the Lithuanian capital.

Gorbachev: ''When two states confront each other, you have to respect both large and small nations. Some people have doubts whether Lithuania is in the Soviet Union or not. This is simply not serious.''

Someone in the crowd: ''Why is this not serious?''

Gorbachev: ''We have lived together for 50 years. Try to understand who we are. I will start thinking about it. Let it be your homework. In every republic, in every village, there are representatives of every nationality.

''Even in Lithuania, although Lithuanians prevail, 20 percent are not Lithuanians. Even in Lithuania, you can find representatives of all 100 nationalities.

''Sixty million people live outside their national boundaries. Suppose one nation says, we will separate ourselves, we will isolate ourselves. A problem arises, what happens to those other people?

''Germans in East Germany and West Germany ask us about the status of our Volga Germans. If we get such questions from abroad, what kind of questions will we get in our country?

''We have been tied together these 50 years whether we like it or not. All the more so because we have not lived in a federation but in a unitary state with its own realities.''

Gorbachev, turning to Brazauskas: ''You think it is all so simple. If even the slightest suppression or misunderstanding occurs, say in Estonia or Moldavia, it spills over into the rest of the country. We need to begin with the human element. We want to make it so that the individual feels better. This is our goal, but to do it without harming anyone.''

(Gorbachev lectured for about five minutes on Russians who live in the Ukraine, the second largest republic in the U.S.S.R. after the Russian Republic, and then asked how such integrated populations could be separated.)

Gorbachev: ''What, shall we now start dividing everything? Forty percent

of the people in Estonia are Slavs. Slavic people have been living in the Estonian region near Leningrad for centuries. These are people too.

''What, are we going to separate them? Even there, they have plans to create a non-native language-based autonomous region of Estonia. But let's say Estonia raises the question of secession, but these Slavs in this region say they want to stay in the Soviet Union. What would happen then? Do we divide Estonia? Is that what we want?''

Brazauskas starts to say something.

Gorbachev: ''Hang on a minute.''

Gorbachev spoke with people as he was about to get into his black limousine.

Gorbachev: ''Remember we must find answers to all the questions that worry us, not on backward paths to the past, but on the paths to the future. And what will this future be like?

''We must decide together and not be suspicious of one another. That someone wants to accuse the Lithuanians of secessionist actions, I don't accept that. Just as Lithuanians should not suspect that someone doesn't wish them well. We must preserve all that is good in our state. And perestroika only adds to that which is good.''

#90011u1101 01/11/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 11) UPI - The new agriculture chief said Thursday that Romania does not have abundant food supplies and only enough meat to feed about two-thirds of the population this year. He appealed for help from the West.

Agriculture Minister Victor Surdu dismissed as misleading the news reports suggesting that food is plentiful in Romania after the halt in agriculural exports that accompanied the violent overthrow of President Nicolae Ceausescu last month.

''This is false because the volume of exports was not that great,'' Surdu told United Press International in an interview. ''By stopping the exports there was a better supply in the stores for Christmas and New Year's but the situation we have inherited is very bad.''

Since taking power two weeks ago, the ruling National Salvation Front has mandated that inefficient collective farms be dismantled and the land and farming equipment be given to individual farmers, who will sell their produce on the open market. Surdu will oversee the new policy.

Romania, its fertile fields having once served as a breadbasket for Europe exported less food in 1989 than 20 years ago and overall crop production has declined steadily for the past several years, Surdu said.

Surdu said the introduction of a Western-style market economy was expected to have an immediate impact on farm production. With improved Western farming techniques and international aid, Romania's food shortages could be eliminated by next year, he said.

''The repressive Ceausescu regime deliberately exaggerated reports of the amount of produce shipped abroad, apparently to justify the lack of food in Romanian grocery stores,'' he said.

The suspension of food exports after Ceausescu's arrest and Christmas Day execution has helped make Romania self-sufficient in the production o products will continue to be scarce for many months, he said.

Only enough meat was available through the fall to feed about two-thirds of the nation and imports and donations from other countries are needed to ensure Romanians have enough protein in their diets, Surdu said.

He said the meat shortage resulted chiefly from insufficient feed grain for cattle and poultry and blamed the ''sorry state of agriculture'' in Romania on Ceausescu. He said the dictator insisted on personally directing the nation's farm program despite his limited agricultural expertise.

''He was so convinced he was so clever and knew everything,'' Surdu said. ''He said explicitly, 'You don't have to think - you have to produce.'

''People felt frustrated because they were given orders that went against sound (agricultural) principles. Then they had to tell lies to prove his theories were correct.''

As a typical example, Surdu said, Ceausescu ordered farming districts in northern Romania to grow corn, even though it had been proven the region was too cool to support the crop. He then set production quotas that would be impossible to meet even if the climate were suited to corn.

Invariably, Ceausescu's agricultural programs were disasters, but records were doctored to indicate harvests had exceeded his quotas, Surdu said.

Such practices, along with the lack of individual incentives and the suppression of technology from the West, resulted in the agricultrual bankcuptcy of a country that includes some of the most fertile farmland in Europe, Surdu said.

''If it had gone on much longer, we would have reached the stone age,'' he said.

It may take longer before butcher shops in Bucharest rival the well stocked stores in the West, but the supply of fresh meat should gradually improve, Surdu said.

''If there was one good thing about the Ceausescu regime, it is that it has taught our people patience,'' he said.

NEW YORK (JAN. 11) UPI - London's International Petroleum Exchange announced Thursday that it was extending daily trading by 2 1/2 hours to 8 p.m. local time (3 p.m. EST) in response to a 100 percent increase in business over the past year.

"Total exchange turnover increased more than 100 percent for the year ... The increased hours have been initiated in response to the demands of major participants in the market," the exchange statement said.

The extension would appear to make IPE trading hours more directly competitive with the larger U.S. oil-trading exchange, the New York Mercantile Exchange which closes at 3:10 p.m. EST. The IPE opens each day at 9:15 a.m. local time (4:15 a.m. EST).

In an Oct. 6 meeting with reporters, Merc chairman Lou Guttman said the New York exchange planned to go to 24 hour-a-day computer trading in about a year. The exchange would then consider membership requests from foreign traders, Guttman said.

CARBONDALE, Ill. (JAN. 11) UPI - Ann Stringer, a former correspondent with United Press and CBS, died at a nursing home. She was 71.

Stringer, a native of Eastland, Texas, and a graduate of the University of Texas, was best known for her coverage of World War II. She is credited as having been the first American journalist to cover the 1945 meeting in Germany of forces of the United States and the Soviet Union.

Stringer stayed in Europe after the war and was posted in Berlin with United Press and CBS until the late 1940s, said her brother, Robert B. Harrell of Carbondale.

Julia Edwards, author of ''Women of the World: The Great Foreign Correspondents,'' credits Stringer with ''the biggest scoop of World War II'' for the United Press story of the news of the Russians' arrival at the Elbe River.

Harrell said his sister lived primarly in New York City after returning from Europe and retired from United Press in the mid-1950s.

Her first husband, Bill Stringer, was killed during World War II while working for Reuters as a foreign correspondent, Harrell said. He said she was divorced from her second husband, Henry Ries.

Stringer moved from the New York area to live with her brother in Carbondale in 1987 after being diagnosed with multi-infarc dementia, a disease similar to Alzheimer's disease.

Stringer moved to Styrest Nursing Home in Carbondale in January 1988, her brother said.

Stringer is survived by Harrell and and a sister, Jane Ferguson of Norcross, Ga.

#90011u1142 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Calling it a ''good sign,'' President Bush welcomed the lifting of martial law in China Thursday and said he would continue to watch the situation closely.

''I view the lifting of martial law as a very sound step for those that are interested in human rights and the reform that was on the move and that we would all like to see go forward,'' Bush said. ''There is no way you can look at that but not say that it is very positive. And we will continue to watch this situation very closely.''

The president made the comment to reporters during a picture taking session at the start of an Oval Office meeting with Portuguese Prime Minister Anibel Cavaco Silva.

''I have taken a position that I do not want to isolate China by no contacts and set the clock back,'' Bush said. ''And of course we welcome the lifting of marshal law. It is a good sign.''

Bush secretly sent two top administration officials to China last year following the bloody crackdown against students despite his public pronouncement of no high level exchanges with the Chinese leadership.

Martial law was lifted in Beijing Thursday seven months after it was imposed at the time of pro-democracy demonstrations, which were crushed by tanks.

Vice President Dan Quayle said Wednesday the lifting of martial law proved the president's policies toward China are working. ''We view China's decision to lift martial law as a step forward,'' Quayle said.

Beijing hopes the move will help reverse declines in foreign investment, trade and tourism. China has suffered a drop in foreign exchange earnings and faces repayment of more than $40 billion in foreign debt beginning this year.

The State Department said the United States would favor World Bank loans to China for ''humanitarian'' purposes, but would not support financial assistance for economic development.

State Department spokeswoman Margaret Tutwiler said the change of sentiment toward China on certain World Bank loans had nothing to do with Beijing's decision to end martial law. ''It is pure coincidence,'' she said.

#90011u1150 01/11/1990 ~United Press International
(JAN. 11) UPI - Soviet President Mikhail Gorbachev got down to business quickly today after he arrived in Lithuania. Gorbachev had an animated discussion with the leader of the Lithuanian Communist Party, which wants to split from the Soviet party. Gorbachev could be seen chopping the air with his right hand for emphasis as his voice sometimes rose.

The five astronauts aboard the Columbia had to do some housework this morning. Water leaked out of one of two humidity separators that help keep the shuttle's cabin air comfortable. Because of the weightlessness, the water became what the space agency calls ''globs.'' The leak did NOT appear to be a big problem.

Two Food and Drug Administration officials and three other people are missing,along with a small plane in Chile. Officials in Santiago say the Cessna disappeared in northern Chile last night. The F-D-A's head of international affairs, John Harty, and inspections director Patrick Pouzar are among the missing.

President Bush plans to host Portugese Prime Minister Anibal Cavaco Silva for a meeting and lunch today. A senior aide to Bush says they will discuss changes in the Soviet Union, NATO and the lease on the U-S air base in the Azores islands. During the Portugese leader's visit, an investment protocol will be signed.

China says it will keep slightly more troops than normal in Beijing for a while. A government spokesman said today that troop levels will be kept up because martial law has been lifted after eight months. But there are new laws forbidding UNauthorized protests in Tiananmen Square.

Environmentalists and city planners suggest turning the former no-man's land along the Berlin Wall into a park. They want to keep alive the flora and fauna that lived along the wall for 28 years. But some environmentalists say the East Germans might have poisoned the ground-water with defoliants.

#90011u1151 01/11/1990 ~United Press International
(JAN. 11) UPI - VIDEO REVIEWS:

MOVIES

''Do The Right Thing'' - It's summer time and living is anything but easy in Brooklyn's Bedford-Stuyvesant neighborhood. The hottest day of the year will eventually spur the already smoldering tempers and racial tensions to the breaking point and beyond. Writer-director Spike Lee aims to provoke rather than placate and he does so early and often with a stunning

tapestry of mutual distrust, funny one moment, frightful the next, teetering on the brink of hopelessness, larded with anger, from the militant rap song ''Fight The Power'' at the outset to a closing word from Malcolm X. The focal point is Sal's Famous Pizzeria, a corner landmark run by an Italian-American named Sal (Danny Aiello) and his two sons, the elder of whom reminds his father that they don't belong among all those black faces. Sal's vehement refusal to put pictures of black personalities on his wall instead of so many of Italian extraction (Sinatra, DiMaggio, Marciano, etc.) finally triggers the inevitable. Whether you agree with Lee's view or not, it's an intriguing movie. 1989. 120 minutes. MCA Home Video. Rated R. $89.95.

''Eddie And The Cruisers II: Eddie Lives'' - Elvis may be dead, but Eddie lives. Well, sort of. Twenty years after rock superstar Eddie Wilson supposedly died when he drove off a New Jersey bridge, he is bigger than ever, thanks largely to the appearance of some ''mystery tapes'' from his last album. Actually, Eddie survived and all this time has been living in Canada under an assumed name doing construction work, watching blandly this wild surge in posthumous popularity. Eventually, Eddie shucks his hard hat for hard rock and organizes a new band, becoming an instant hit all over again and putting him on a collision course with his dead legend. Michael Pare reprises his role as the Bruce Springsteen soundalike. It was the soundtrack that kept its 1983 predecessor afloat, and that's about all that this discordant sequel has going for it. 1989. 106 minutes. International Video Entertainment. Rated PG-13. $89.95.

''Signs Of Life'' - There is more desperation than signs of life in this tale of 24 hours in a small, picturesque Maine fishing village. There are sub-plots galore: Owen (Arthur Kennedy), last link in generations of boat builders, his business in tatters, is eager to end it all; John (Beau Bridges), broke and about to be a father for the fifth time, is reduced to becoming a thief, and Daryl (Vincent Phillip D'Onofrio), dying to see the outside world, is fenced in by having to care for a retarded brother. So it goes, like a soap opera. Yet while it sometimes is a mite depressing, everything has a way of working itself out and in the end there are some good signs for a change. 1989. 95 minutes. International Video Entertainment. Rated PG-13. $89.95.

''Women of Brewster Place'' - One of last year's memorable television dramas now is on video. The story revolves about a group of strong-willed slum-dwelling women who band together to pump hope back into hopeless lives. Featuring Oprah Winfrey, Paul Winfield, Cicely Tyson, Paula Kelly,

Robin Givens and Jackee. 1989. 180 Minutes. J2 Communications. $79.95.

SPECIAL INTEREST

''Vintage: A History Of Wine by Hugh Johnson'' - First there was the book, then the public television series and now the video. In the four-volume home video companion to his recent book, ''Vintage: The Story Of Wine'' (Simon And Schuster), Hugh Johnson has visually as well as verbally captured the flavor of his favorite subject, its origins, habits, customs and traditions - and secrets - told with dry humor and insight without despoiling its myths, from wine's birthplace at least 7,000 years ago in the Caucasus mountains where Soviet Georgia now stands to the California vineyards of today and beyond. For anyone interested in wine or history or both, a treasury of information, richly researched and filmed. Volume 1 runs 117 minutes, volumes 2-4 are 88 minutes each, $29.99 apiece, $119.95 for the set. From Public Media Video.

VIDBITS

''When Harry Met Sally ... '' has replaced ''Batman'' as the nation's favorite video rental movie, according to this week's Billboard Magazine survey. In fact, the erstwhile leader, still tops in sales, dropped to fourth, behind two Bill Murray pix, ''Ghostbusters II'' and ''Scrooged'' ... Now playing: ''Paul McCartney: Put It There'' documenting the ex-Beatle's career with interviews and 23 songs ranging from ''Let It Be'' to ''Flowers In The Dirt'', from Polygram, 65 minutes, $24.95 ... Fox Hills Video and NFL Films are wasting no time: they plan to have Super Bowl XXIV highlights on the video market Feb. 8 - just 11 days after the game.

#90011u1160 01/11/1990 ~United Press International

HARRISBURG, PA (JAN. 11) UPI - A federal judge issued an order Thursday temporarily blocking most of the provisions of Pennsylvania's new abortion control law - the toughest in the nation - from going into effect, a spokeswoman for the American Civil Liberties Union said.

Federal District Judge Daniel Huyett in Reading issued the injunction after the ACLU filed a complaint challenging the Abortion Control Act of 1989, which was to go into effect Tuesday, said ACLU spokeswoman Ariadne Valsamis.

The injunction covers most of the provisions of the new law, including provisions requiring spousal notification, a 24-hour waiting period and informed consent, Valsamis said.

''We're ecstatic,'' she said.

The ACLU filed the complaint as an amendment to a challenge to an earlier abortion control law enacted in 1988 that was already before Huyett, Valsamis said.

Lawyers for Attorney General Ernie Preate Jr., who was named as a defendant in the suit, met privately with ACLU lawyers and Huyett during much of the morning to discuss the lawsuit, said Preate spokesman Robert Gentzel.

Abortion rights groups were to hold a news conference in the Capitol Thursday afternoon to discuss their action.

Gentzel would not comment on the contents of the suit but sources have

said abortion rights groups are challenging at least two provisions in the law.

The groups are questioning a requirement that a husband be notified before his wife obtains an abortion. They are also targeting a required 24-hour waiting period before a woman obtains an abortion.

Pennsylvania in November became the first state to approve tougher abortion restrictions in the wake of a ruling by the court in July broadening the state's authority to do so.

The Abortion Control Act of 1989 was signed into law by Gov. Robert P. Casey after it was approved overwhelmingly by the House and Senate. Lawmakers who drafted the law said they hoped it would serve as a vehicle to overturn Roe vs. Wade, the 1973 Supreme Court decision that legalized abortion.

Abortion rights groups have said they would file a narrowly tailored lawsuit in order to avoid giving the Supreme Court an opportunity to overturn Roe vs. Wade.

Besides the 24-hour waiting period and the spousal notification requirement, the law prohibits abortions after the 24th week of pregnancy unless the woman's life is endangered or she faces irreversible damage to her health.

It also bans abortions to select the sex of one's offspring.

JOHANNESBURG, South Africa (JAN. 11) UPI - The minister for black education said Thursday the government would not - and probably never would - accept demands for the forced desegregation of public schools and ruled out an increase in state spending to resolve a crisis in black education.

Education Minister Stoffel van der Merwe described the failure of 58 percent of black high school students to pass their graduation exams last month as ''saddening'' but said equality in education could not be achieved overnight.

''To suddenly integrate all schools in South Africa is going to create such havoc that it will not be in the interests of any student of any color whatsoever and not in the interests of South Africa,'' he told a news conference.

Nationwide, only 74,249 black high school seniors, or 42 percent, passed

their matriculation exams last month. Of those, only 17,553 qualified for university entrance. In the Johannesburg satellite city of Soweto, more than two-thirds of the black seniors failed to graduate.

The 58 percent failure rate involving more than 120,000 students was the highest in five years and up from 46 percent the previous year.

Van der Merwe, regarded as one of the most ''enlightened'' members of President Frederik de Klerk's Cabinet, said he hoped to improve the pass rate ''dramatically'' and had appointed a commission to investigate the causes for the failure rate.

But he cited both political unrest in the schools as having been responsible to a ''large extent'' for the poor results and severe restrictions on the national budget, brought about in part by the 1986 launch of a U.S. punitive economic sanctions campaign.

''The present level of spending is as high as is possible under the present circumstances,'' he said. ''We are trying to do justice to all people but you cannot do it overnight, especially not while the taps from overseas are still closed.

''Part of the problem in the funding of black education should be on account of people like Wolpe,'' he said, referring to U.S. Rep. Howard Wolpe, D-Mich., a pro-sanctions legislator who ended a visit two days ago by warning of even tougher economic sanctions on Pretoria unless it hastens racial reform.

The South African Institute of Race Relations estimates the government spends $1,000 annually on the education of a white student against $198 for his black counterpart.

The ratio of white students to teachers is put at 16 to 1, for blacks 40 to 1.

Van der Merwe rejected wholesale desegregation of education in an effort to equalize education opportunities but noted that multi-racial private education has been on the increase over the past five years and would continue to grow.

''But I don't think - not under this government - will we ever forcibly integrate schools,'' Van der Merwe said.

He said the government rejected the demand by black educators, parents and civic leaders who met in Soweto on Sunday to have the examination results rechecked, estimating such an operation would cost the equivalent of building six new schools.

But he said virtually all the Soweto students who failed would be ''accommodated ... in one way or another,'' by either repeating the year or retaking in May and June sections of the examination they failed, after attending finishing school or adult education classes.

The schools officially opened on Wednesday and educators said they feared the high number of seniors returning for another year of schooling would exacerbate already overcrowded conditions.

One local high school in the black township of Alexandra outside Johannesburg has a student-teacher ratio of 80 to 1.

WASHINGTON (JAN. 11) UPI - President Bush met Thursday with members of the Emergency Committee for Aid to Poland and praised their private efforts to help the Polish people through the winter.

The committee is composed of businessmen, civic leaders and educators, and has already provided more than 50 tons in much-needed medical supplies and infant formula.

The group is chaired by Senate Republican leader Robert Dole of Kansas and Zbigniew Brzezinski, who served as President Jimmy Carter's national security adviser. ''The work of ECAP exemplifies both a spirit of volunteerism and our nation's commitment to aid the people of Eastern Europe as they embark on their new journey of freedom,'' said White House press secretary Marlin Fitzwater.

HOUSTON (JAN. 11) UPI - United Gas Pipeline Co. of Houston said it has

sold its 12.25 percent interest in Northern Border Pipeline to an Enron Corp. affiliate for an estimated $53 million.

United Gas also said Wednesday an investor group that includes former Treasury Secretary William E. Simon and former First Boston Corp. Chairman Alvin V. Shoemaker has exercised its option to buy a controlling interest in United's parent, LaSalle Energy Corp. of Dallas. Shoemaker is LaSalle's new chairman.

United Vice President James A. Tramuto said disposing of the Northern Border interest and the $99 million in annual demand charges it was obligated to pay for space on the line was a major step in the company's financial restructuring.

#90011u1210 01/11/1990 ~United Press International

SAN JOSE, CA (JAN. 11) UPI - Businessland Inc., the nation's largest retailer of personal computers to business, said Thursday it would slash its 3,900-person work force by five percent to seven percent as part of a major restructuring. The company said the cuts, affecting 195 to 273 workers, would take place immediately.

David Norman, chairman and chief executive, said the layoffs would save the company $12 million a year in operating costs and would improve narrowing profit margins.

Businessland, with sales of $1.19 billion in the fiscal year ended in June has been squeezed by heavy discounting in the computer industry. In October the company reported a 43 percent drop in earnings for the first quarter ended in September.

The company's stock has fallen more than 50 percent from its 52-week high of $15.25 in February 1989. In early trading Thursday after the layoff

announcement, the stock was down 50 cents to $7.25, just 12.5 cents above its 52-week low.

Although Businessland has not yet reported earnings for the December quarter, generous year-end discounts from major suppliers continued to cut into margins, Norman said.

Despite slowing growth in the computer industry, sales remained strong, he said. Revenue in the December quarter grew to more than $370 million, a 23 percent gain over the same quarter of 1988, Norman said. Despite the earnings squeeze, the company was profitable before any one-time charges to cover severance and other costs from the layoffs.

Norman said he expected the work force cuts to begin boosting profits as early as the current quarter, which ends in March. In addition, he said many discounting and promotional programs by major retailers ended in December, which will improve profit margins going forward.

"I think one thing the press has not reported is Businessland has the highest gross margins in the (computer reseller) industry, and I think clearly the pressure on margins has come throughout the industry," Norman told reporters on a nationwide conference call.

Norman said the work force cuts were made possible by improved efficiencies from multimillion dollar investments in automation and economies of scale from the recent acquisition of two regional computer resellers in Virginia and New Jersey.

Businessland, which began as a storefront retailer of personal computers to businesses, has evolved into a major supplier of personal computers to Fortune 1000 corporations.

Large corporate business uses a direct sales force and does not require storefront stores, Norman said, so Businessland is gradually converting many of its retail outlets in 50 of the country's largest metropolitan areas into branch sales offices, in which product is on display for demonstrations, but not for sale.

The company is channeling it retail business into its chain of ComputerCraft stores, aimed at small businesses. Norman said he expects to expand the ComputerCraft chain from eight major markets to 50 by 1992, using both converted Businesland locations and new stores.

At Businessland, he said he hopes to improve margins by focusing on the sale of high-end computer systems such as those made by Next Inc. and NetFrame, and on such services as training, repair and installation. Businessland is an exclusive distributor of the Next and NetFrame systems and does face the intense price competition that it meets in the market

for Apple and IBM computers.

"We're restructuring our organization to be more efficient in assuming a value-added integrator role in an intensely competitive and rapidly eveloving reseller market," he said.

Norman said he hoped to expand Businessland into the top 70 metropolitan markets in the country, compared with the current 50, and continue overseas growth.

On Monday, the company announced the purchase of a German reseller, and Norman said the company hoped to make other European acquisitions. the company has operated in the United Kingdom for two years and is the largest reseller of IBM computers there, he said. He also said the company expected to announce an acquisition or another deal in Japan in the next few months.

#90011u1224 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - President Bush welcomed Portuguese Prime Minister Anibal Cavaco Silva to the White House Thursday as a ''distinguished friend'' and arranged to discuss with him a range of mutual political and military issues.

Cavaco arrived in Washington Wednesday evening on a two-day visit that will include talks with Vice President Dan Quayle, Secretary of State James Baker, Defense Secretary Dick Cheney and other officials.

The Portuguese leader and a senior administration official stressed that the talks would focus on the growing ties between the United States and Portugal and the dramatic political changes in Eastern Europe.

Before he left for the United States, a Portuguese diplomat said, ''At the moment of profound transformations in Europe, we want America to understand that Portugal is a most reliable European ally.''

Bush also was expected to explore Cavaco's views on initiatives to resolve the guerrilla wars in Angola and Mozambique, former Portuguese colonies.

The meeting also sets the stage for negotiations on the renewal of the U.S. lease to use the air base at Lajes, Azores, which ends in February 1991.

The Bush administration official said the United States provides Portugal with $100 million in military equipment and is helping to spruce up its forces. Future sales will be generous, he said, although final decisions have not been made.

''The long-planned visit is to demonstrate that the relationship is maturing and thickening in a number of ways on the economic side,'' a senior administration official said.

The official said that U.S. investment in Portugal has doubled to $1 billion.

An investment protocol will be signed during Cavaco's stay in Washington.

#90011u1232 01/11/1990 ~United Press International

SANTIAGO, CHILE (JAN. 11) UPI - Rescuers searched Thursday for a small plane missing with five people aboard, including two U.S. Food and Drug Administration officials.

The small Cessna plane disappeared Wednesday after it took off in northern Chile for a flight to Santiago.

The U.S. citizens aboard were identified by Chilean and American authorities as John Harty Jr., head of international affairs for the FDA, and Patrick Pouzar, acting director of the agency's Nashville, Tenn., office.

Also aboard were the pilot, Lt. German Fuentes Meza of the national police Sergio Lazcano Arroyo, director of the Chilean Exporters Association, and Oscar Badilla Saez, an official with the Chilean Agriculture Service.

The plane was believed to have taken off from Copiapo, 500 miles north of Santiago, about 5:15 p.m. local time and was to arrive in Santiago about 9 p.m., officials said.

After taking off, the pilot reportedly maintained radio contact with the control tower for five minutes before communications were lost, officials said.

In Washington, FDA spokesman Jeff Nesbit said Harty and Pouzar were in South America to implement a U.S.-Chilean agreement to ensure the safety of fruit products shipped to America.

The pair spent Wednesday visiting a number of fruit processing centers in Chile, said Nesbit.

The joint government agreement stemmed from last year's FDA quarantine of fruit imported from Chile after U.S. investigators found traces of cyanide in two Chilean seedless red grapes.

#90011u1245 01/11/1990 ~United Press International
WASHINGTON (JAN. 11) UPI - Human rights activists criticized Romania's new government Thursday for the summary trials of alleged members of the Ceausescu security forces and warned such action could aid the coverup of earlier abuses.

At the same time, the activists said President Alfredo Cristiani's acknowledgement that elements of El Salvador's military were involved in the Nov. 16 murder of six Jesuit priests and two women was ''a landmark'' in that country's troubled human rights record but warned the government must pursue the case.

The assessments were made at a news conference where the prviate Aspen Institute released a report, ''State Crimes: Punishment or Pardon,'' that challenges those active in human rights to think through issues that arise when new, more democratic governments replace oppressive regimes.

The report grew out of a conference sponsored by the institute a year ago, before the dramatic changes in Eastern Europe began unfolding.

It said the transition toward democracy, not only in Eastern Europe but also in such nations as Chile, South Korea and the Philippines, raises questions of what to do with former officials involved in government-sanctioned rights abuses.

Aryeh Neier, executive director of Human Rights Watch, pointed to the situation in Romania as an example of where things might go wrong even though long-time Communist leader Nicolae Ceausescu was overthrown - and executed along with his his wife.

''The new government very quickly 'tried' and then executed the Ceausescus and now military tribunals have gotten underway'' to try members of the security forces, Neier said. ''But there is a danger in proceeding in a manner which itself will do violence to human rights.''

''If a government does undertake to investigate and prosecute, the manner in which it goes about it is very important. It cannot be one that simply rides roughshod over internationally recognized human rights,'' he said.

At the same time, he said it was ''extremely important ... there be full disclosure of the human rights violations'' of the Ceausescu regime and warned that the ''summary trials'' may end up covering up abuses of the past.

In praising El Salvador's admission of military involvement in the Jesuit murders, Neier noted that ''one of the factors looming over'' the pursuit of the murderers is the Central American nation's precedent of granting

amnesty to the military and the death squads for crimes against the civilian population.

Such an amnesty was granted in 1987 that forgave all crimes but one - the 1980 murder of Archbishop Oscar Romero - and he said such an amnesty by Cristiani remains a possibility.

Participants in the Aspen conference were divided on issues of punishment new governments should mete out but agreed that full disclosure of past abuses is necessary for national reconciliation and that any trials of former officials ''be in accordance with international standards of due process.''

#90011u1261 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - A soon-to-be-announced national transportation policy will mean fewer federal dollars and more costs absorbed at the state and local levels, the White House confirmed Thursday.

Speaking a day after Transportation Secretary Samuel Skinner gave the first hints of the policy to come, White House spokesman Marlin Fitzwater said, ''The goal is reduced dependence on federal money as well as a stronger partnership with other levels of government.''

Noting that the policy, due out in February, will provide financing options ''like user fees, private development and toll roads,'' he added, ''I would look for some proposals along those lines and while we haven't seen the specifics we generally think that's the right direction in which to move.''

And quoting what he called the key sentence of Skinner's remarks to the Transportation Research Board, Fitzwater said, ''We believe the recipients of federal transportation aid should pay a larger share of project costs.''

On Wednesday, Skinner said federal budget problems will hamstring any dramatic increases in federal spending for transportation and that much of the burden must be shifted to state and local governments.

''The federal government will continue to have a major role but the secretary is taking a look at some ways of raising money at the local level,'' Fitzwater said, ''particularly to pay for infrastructure things like bridges and other highways they have the principal use of.''

Asked if the strategy would amount to a convenient way of shifting responsibility for raising taxes, Fitzwater said, ''Our goal still is to not raise taxes. But taxes can be raised at the local level, state level. Those are issues for states and localities to decide.''

#90011u1294 01/11/1990 ~United Press International

DETROIT (JAN. 11) UPI - A spokesman for General Motors Corp. said Thursday that discussions with Hungarian officials are at an advanced stage, fueling reports that GM could be the first U.S. automaker to build cars in Eastern Europe.

However, company spokesman John Pekarek said no final agreement has been reached in the talks which, reports say, involve a $150-million joint venture to build cars and engines in Hungary with Raba, the state-owned truck maker.

The venture reportedly would involve the production of 25,000 cars and 100,000 engines a year by 1995 at the latest. It also would mean the expansion and modernization of Raba's facility in Szentgotthard, near the Austrian border.

Raba has been making axles since 1987 for GM's Adam Opel operations, headquartered in West Germany, Pekarek said. "In return, Opel is allowed to sell a certain number of cars in Hungary," he said.

But Pekarek declined to be more specific on what GM of Europe and Hungary have been discussing. "We have had discussions about business activities in Hungary for some time," he said. "Talks are in an advanced stage but there is no final agreement at this time."

Pekarek said he is not aware of any business discussions between GM and other Central and Eastern European countries involved in the recent political reform, such as Czechoslovakia.

Earlier this week, Japanese carmaker Suzuki Motor Co., which has been an affiliate of GM since 1981, announced a $138-million venture to build small cars in Hungary by 1992.

That joint venture, which will involve production of Suzuki's Swift car in Esztergom, 30 miles north of Budapest, is ultimately expected to produce 100,000 cars annually.

#90011u1298 01/11/1990 ~United Press International

BATON ROUGE, LA (JAN. 11) UPI - Following the link between a supermarket produce misting machine and an outbreak of Legionnaires disease that caused two deaths, grocery chains throughout the nation have quit using the devices.

''We are getting information out to every grocery in Louisiana, as well as every hospital. And all we are saying is that if you have a mister you are using, you will want to check with the manufacturer,'' Gwen Bach-Stewart, a spokeswoman with the Department of Health and Hospitals, said Thursday.

''We are not saying take them out,'' she said. ''They just need to check with the manufacturer.''

The Centers for Disease Control in Atlanta said the outbreak that ran from Oct. 10 to Nov. 10, 1989, is believed to be the first ever linked to a mist machine of any type. The machine was being used to keep fruits and vegetables moist and fresh in a Winn-Dixie supermarket.

Bach-Stewart said the Centers for Disease Control confirmed 30 cases of Legionnaire's disease in Bogalusa, La., two of them resulting in death. She said there were a number of other cases of pneumonia during the same period and about 10 deaths, but they could not be linked to Legionnaires' since no lab tests were done.

''Some people got sick and got well. They were not cultured, so they were not all lab confirmed,'' Bach-Stewart said.

The bacteria that causes Legionnaires' disease is carried in cool, fine mist and produces symptoms similar to pneumonia. It is particularly dangerous for elderly people and people with chronic heart and lung problems who inhale the mist. Produce items that have been misted are safe the Health Department said.

The disease was first recognized in 1976 when about 200 people became ill and 29 died during an American Legion convention in Philadelphia. The bacteria was found in the air conditioning system of a hotel where they had stayed.

Stewart said all of the people infected at Bogalusa had shopped at the same Winn-Dixie supermarket, and most of them were elderly women.

After lab tests confirmed the Legionnaires' bacteria was in the mister, Winn-Dixie immediately ordered removal of the devices from all 97 of its stores that been using it.

The device used in the Winn-Dixie store drew its water from a one-quart reservoir. The reservoir was difficult to access for cleaning, and the

Centers for Disease Control said it had operated continuously, without maintenance for a year.

The manufacturer of the misting machines, L.W. Beal & Co. of Portland, Maine, recommends daily inspection and cleaning, but the Bogalusa machine had not been cleaned for a month before the outbreak was reported.

A&P devices do not have reservoirs so there were no plans to disconnect them, said Michael Rourke, vice president for communications.

Delchamps said it has never used misters.

National-Canal Villere and the Real Superstore chains were checking their systems.

The Michigan Food and Beverage Association asked all grocers, produce stores and supermarkets to discontinue use of automotic produce misting systems with water reservoirs until they can be proven safe.

Four Michigan grocery store chains - Kroger, A&P, Farmer Jack and Great Scott - already had temporarily shut off automatic water misters in their produce departments the outbreak in Louisiana.

MFBA President Edward Deeb said his 700-member organization is contacting the Michigan Department of Agriculture to review what procedures the department is establishing to ensure consumer safety.

''Because consumers are already uptight about the use of chemical pesticides such as alar, and now the automatic water mist systems scare, we felt it best our industry take precautions to minimize any dangers,'' Deeb said.

The Kroger Co. announced Wednesday it was immediately stopping the use of all water misters in its store produce departments as a safety precaution.

In addition to stopping use of the misting systems, Kroger said it directed each of its operating divisions to undertake a thorough maintenance check of the systems.

#90011u1303 01/11/1990 ~United Press International

SANTA CRUZ, BOLIVIA (JAN. 11) UPI - A February cocaine summit among President Bush and three South American countries will not become a confrontation over the invasion of Panama, officials from two of the nations said Thursday.

Peru, the most-critical of the U.S. invasion last month, pledged at

pre-summit talks to send a high-level delegation and said strained relations with the United States would not affect its battle against cocaine traffickers.

Delegations from cocaine-producing countries - Bolivia, Peru and Colombia - were to end pre-summit talks Thursday before meeting with a U.S. delegation for two more days of talks to prepare for the Feb. 15 summit in Cartagena, Colombia.

U.S. relations with Latin America were damaged by the Dec. 20 invasion, which was viewed by many as another in a long history of U.S. attacks on hemispheric national sovereignty.

Bush on Wednesday also called Colombian President Virgilio Barco to smooth over sore feelings left by reports that the United States had planned to use its Navy to intercept planes and ships off the Colombian coast - a move Colombia vehemently opposed.

The head of the Colombian delegation, Vice Minister of Justice Mauricio Londono, said Thursday the summit with Bush ''is not a confrontation.''

''It has to do with a coming together of the policies aimed at combating drug trafficking, respecting the separate points of view and guaranteeing the sovereignty of each nation,'' he said.

Peruvian President Alan Garcia has said he will not attend the summit unless U.S. troops are first pulled out of Panama, where they were sent to topple strongman Gen. Antonio Manuel Noriega.

Garcia has been among the most vocal critics of the U.S. action.

But Armando Lecaros, who headed the Peruvian delegation at the pre-summit talks, said in an interview a high-level Peruvian delegation will attend the Cartegena summit. He said the delegation would be headed by either Interior Minister Agustin Mantilla or Foreign Minister Guillermo Larco.

''I don't believe the invasion of Panama can affect the anti-drug fight,'' said Lecaros, a sub-secretary of policy for the Peruvian Foreign Ministry.

''The invasion, as was admitted in the United States itself, left some unpleasantness in relations with that country and Latin America but the anti-drug fight must continue in harmony,'' he said.

Lecaros also said the need for the United States to increase money to Peru to fight drugs is ''indispensible.''

Participants hope to work out a common strategy to battle cocaine traffickers in the three cocaine-producing nations that ship their product

almost exclusively to the United States, the world's largest consumer of the illegal drug.

The U.S. delegation to the pre-summit talks, led by Michael Skol, deputy assistant secretary of state for inter-American affairs, was to arrive Thursday. The four nations are to hold pre-summit talks Friday and Saturday in Santa Cruz, 350 miles southeast of La Paz.

Londono also said a proposed project by the United States to install radar systems in the three nations to detect cocaine-laden planes ''must be analyzed technically.''

#90011u1310 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - A foot-long rat dubbed ''Willard'' by office workers ate the innards of a $93,000 Xerox machine in which he was living on Capitol Hill and killed the photocopier, congressional workers said Thursday.

Willard was later tracked down by exterminators and succumbed to poison.

The replacement machine set taxpayers back $107,000, less the $10,000 trade-in on the scrap metal Willard left behind.

Lynne Richardson, office manager for the House Legislative Counsel's office, said for several weeks before the huge machine ground to a halt workers noticed that something was chewing up the computer and telephone cables in the office, and food left out overnight was disappearing. Staffers and cleaning personnel working late at night occasionally spotted Willard, but exterminators could not get him.

Then, in the week before Congress adjourned in November - perhaps the busiest week for the office which helps members draft legislation - the Xerox 9900 machine ground to a halt.

Inside the 9-feet-long-by-4-feet-high machine was a nest of shredded paper and banana peels, corncobs and a sealed plastic bag with a Hostess Twinkie.

But Willard - who had eaten wiring inside the computerized machine but avoided those with large amounts of current, including some with enough to electrocute humans - was nowhere to be found. He eluded baits, sticky pads and steel traps.

''It's amazing he could evade the best efforts to catch him for so long, but it's like one of our attorneys said, 'Rats haven't been around for 10,000 years for no good reason,''' Richardson said.

As for Willard, although a positive identification was impossible, three rats were found dead two weeks ago from walking through poison powder near the office in the Cannon House Office Building, and at least one was suspected of being the rat that ate the Xerox machine.

While Willard's official size was never determined with finality - Capitol Hill's newspaper Roll Call put it at a foot - Richardson said, ''The more (people) saw it, the bigger they thought it was getting. At the end they imagined he was as big as a house.''

Richardson said that while Willard was on the lam after killing the machine, Xerox came to the office's rescue. She said the firm found a backup machine and had it installed in three days, unusual because that model is so large it must be dismantled for moving and outside riggers had to be used to get it to a truck.

#90011u1385 01/11/1990 ~United Press International

LONDON (JAN. 11) UPI - Stock prices closed higher in fairly active trading Thursday on the London International stock exchange.

The Financial Times 100-stock index, which tumbled 23.7 points Wednesday, closed up 5.3 points to 2,417.9. The narrower top 30 industrial average gained 4.1 points to 1,940.5.

Volume amounted to around 578 million shares, compared with 449 million shares changing hands Wednesday.

Traders said a buy program from Salomon Brothers and rumors of a big BP oil find in the Gulf of Mexico helped boost prices and the volume higher.

However, worries over a possible strike by Ford workers in Britain kept the gains in check.

A spokesman for Ford said unions have rejected the company's latest pay offer, but have agreed to hold further talks next week. Ford's latest two-year offer included a 10.2 percent pay increase for the first year, and the higher of either a 7.5 percent raise or an inflation rate-plus-2.5 percent raise for the second year.

Analysts said the rejected offer could set the stage for higher British wage claims and strengthen the growing realization that the British government's fight against inflationary pressures was far from being won.

Among the most widely traded stocks, Imperial Chemical Industries slipped 18 cents to $18.88 after announcing some cost-cutting moves.

British Petroleum added 8 cents to $5.38 as speculation grew that the company's exploration arm had made a big oil find in the Gulf of Mexico. BP Exploration reshaped itself in September 1989, and said at the time it had high hopes of its deepwater program in the Gulf of Mexico.

Among the day's other active issues, Thorn EMI lost 24 cents to $12.80 and Robert Horne surged 51 cents to $6.11 amid speculation that the Dutch group of Buehrmann-Tetterode NV may make a bid.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed higher in moderate trading.

The German Stock Index gained 16.20 points to 1,855.83.

Traders said news that Siemens AG agreed to acquire 51 percent of the Nixdorf Computer led the market higher.

Traders also said news that West Germany's cost of living rose 0.3 percent in December from November helped boost prices.

#90011u1484 01/11/1990 ~United Press International
(JAN. 11) UPI - TODAY'S PEOPLE:

BO'S PLACE: Bo knows nightclubs. Blues-rock star Bo Diddley has agreed to lend his name to a nightclub being planned as part of the renovation on historic Beale Street in Memphis, Tenn. Diddley, who stars with superstar athlete Bo Jackson in a popular Nike television commercial, also plans to play at the club occasionally, which will put him in competition with B.B. King. ''I like the idea and I like the place,'' Diddley said. ''It's down the street from where B.B. King is going to be.'' King's nightspot on Beale Street will open this spring.

BOOKS ON BARBARA: Barbara Walters is going to be the subject of two unauthorized biographies coming out this year but she's not sure her life has been spicy enough to make for interesting reading. ''You're not going to find out that I had an abortion of a baby by Frank Sinatra,'' Walters told a Jewish women's group in Los Angeles, according to the Los Angeles Times. One of the books is by Jerry Oppenheimer, who is the co-author of a 1986 Rock Hudson biography. ''In a strange way I'm curious,'' Walters said. ''I'm thinking, 'What can he write to make it juicy?'''

MASON ON THE MOVE: Now that his ''Chicken Soup'' series has been canceled, Jackie Mason has lots of time to travel and check out the changes in Eastern Europe. He plans to be at the Brandenberg Gate in Berlin Monday as part of a trip with Sen. Rudy Boschwitz, R-Minn., and a spokesman for Mason says the comedian also will visit U.S. Ambassador Vernon Walters at

his home in Bonn on Wednesday. From there, Mason goes to Hungary to meet with some government officials, Jewish leaders and local comedians.

EX-BOXER FIGHTS CRIME BUT LOSES: Former boxing champ Billy Conn, 72, still has the fighting spirit. Conn and his wife were shopping in a Pittsburgh supermarket Wednesday morning when a robber took $80 from a cash register. Conn and the store manager pounced on the thief and wrestled him to the floor, stripping him of his sweatshirt and a shoe in the process. Nonetheless, the robber escaped and Conn suffered minor injuries when a newspaper rack fell on him. Conn once was a light-heavyweight champion and in 1941 fought Joe Louis for the heavyweight title but got knocked out in the 13th round.

GLIMPSES: Pepsi is going after the younger set in its TV commercial war with Coca-Cola. Kirk Cameron of ''Growing Pains'' and Fred Savage of ''The Wonder Years'' will star in two Pepsi commercials that will be premiered during the Super Bowl on Jan. 28 ... Sebastian Bach, a singer for the heavy metal band Skid Row, went to court in Springfield, Mass., Tuesday to plead innocent to charges for hitting a fan with a bottle last year. A few hours later Bach, whose real name is Sebastian Bierk, was onstage as Skid Row opened for Aerosmith and he apologized to the crowd for the December incident. Bach allegedly flung the bottle back into the crowd after it was thrown on stage, striking the rock singer and leaving him with a bloody gash.

#90011u1501 01/11/1990 ~United Press International

KITTERY, ME (JAN. 11) UPI - If the Navy cancels a $100-million nuclear submarine overhaul contract, the Portsmouth Naval Shipyard may be forced to lay off 1,500 to 3,000 workers, union officials said Thursday.

The Navy has ordered a halt to all planning and engineering work involving the 23-month overhaul of the USS Sea Devil scheduled to start in November, said Ruth Dow, Portsmouth Naval Shipyard spokeswoman.

The shipyard, located on an island in the Piscataqua River near Portsmouth N.H., employees 8,500 workers and is a major overhaul facility for the Navy's attack class nuclear submarines.

New Hampshire and Maine congressional delegations are scheduled to meet with Navy officials Friday concerning the fate of the overhaul contract, said David Gray, a Washington, D.C., lobbyist for the Kittery Armed Services Committee.

"Obviously this is not a positive development. I think it's safe to say the Navy's action is related to overall budget constraints," Gray said. The Navy has been reported mulling whether to mothball submarines such as the

Sea Devil, rather than ordering expensive overhauls. Shipyard officials said the Navy has indicated it would make a final determination on the contract in early February.

"The loss of the ship would have a significant effect on employment at the shipyard. We're actively seeking replacement work as a contingency in case the Sea Devil is canceled," Dow said. The number of workers expected to lose their jobs if the contract is lost is not known, Dow said.

Officials of the shipyard's two major unions said Thursday they told their members that 1,500 to 3,000 workers could be laid off because of the loss of the estimated $100-million contract.

Gray said the loss of the Sea Devil would seriously hurt the shipyard's ability to compete for other contracts for Los Angeles class submarines expected to be bid in 1992.

"The importance of the Sea Devil ... is that it maintains the critical skill base at the shipyard. If we lose these people it will take a long time to replace those skilled workers," he said. There are eight public shipyards in the nation, six capable of overhauling nuclear vessels, Gray said.

WEST BERLIN (JAN. 11) UPI - The state-run East German airline Interflug and West Germany's largest tourist agency, TUI, will create a joint travel agency based in East Berlin, a TUI spokesman said Thursday.

The firm, which will be known as Transeuropa, or its German acronym DDR, will become fully operational as soon East Germany adopts new legislation on joint ventures, Hubert Geppert said.

The two companies will in any case offer a joint summer holiday travel program, which will be an offer in East Germany in late February, he said.

He said the program, which will include flights to Tunisia, Singapore and Turkey, will only be available to East Germans who will have to pay at least part of the fee in West German currency.

#90011u1509 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Defense Secretary Dick Cheney acknowledged Thursday that his plan to send U.S. warships to Colombia to interdict drug traffickers is ''on hold,'' but said he hoped it could be resurrected ''at some time.''

News reports based on administration leaks about the operation and the use of the word ''blockade'' in some reports upset the Colombian government, forcing the administration to postpone the plan this week.

''I think we would have preferred to go ahead with the operation,'' Cheney said. But, he added, ''All that's on hold now. Perhaps at some time we can go back to it following consultations (with the Colombian government).''

President Bush telephoned Colombian President Virgilio Barco on Wednesday to assure him the United States planned no naval blockade of the South American country.

Deputy White House press secretary Roman Popadiuk said Bush assured Barco that any anti-drug effort would be coordinated with the Colombian president's ''courageous and determined'' drive to break up the drug cartels.

Bush reacted to weekend news reports that the aircraft carrier USS John F. Kennedy and the cruiser USS Virginia were steaming toward Colombia to monitor drug smuggling.

In a statement, Popadiuk said Bush assured Barco ''that the United States never intended to conduct any activities within Colombian territorial waters, that no U.S. actions would be taken without the full cooperation and consent of the Colombian government, that no 'blockade' was ever contemplated.''

He also said the president informed Barco ''that he had not authorized the naval maneuvers, as incorrectly described in the press.''

An administration official, speaking on the condition of anonymity, said U.S. authorities still hope to use the Kennedy and Virginia to monitor drug traffic off Colombia, perhaps later this winter.

''Right now, the operation is on hold until we have our consultations with the Colombians,'' the official said. ''But we're confident that we will get it back on track.''

Cheney is scheduled next week to announce plans to increase the military's role in the detection and monitoring of international drug traffickers.

#90011u1514 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - A top Treasury Department official said Thursday that regulators should focus on the underlying causes of excessive stock market volatility rather than trying to outlaw

computerized program trading.

"Attempting to outlaw technology simply is not the answer. We cannot afford to be members of the 'flat earth' society," Treasury Undersecretary for Finance Robert Glauber said in a speech to the American Law Institute and the American Bar Association.

Glauber said the use of computers and other technology has become "an economic fact of life" in today's markets. Trying to stop the use of computers would be like shooting the messenger because we don't like the message," he said.

Glauber said the Treasury "generally supports" market reform legislation that has been approved by the Senate Banking Committee and is under consideration in the House.

The legislation would require reports form large traders, a provision Glauber termed "especially important" because of problems the government has had trying to collect market information in times of market chaos.

Glauber said the department cannot support amendments to the proposed legislation being considering by the House that would "encourage the government to simply turn off the computers."

Glauber said regulators instead should focus on "fundamental market mechanisms" that may contribute to excessive market volatility, such as breakdowns in both the stock and futures markets, inconsistent margins and short-selling rules and uncoordinated circuit breakers.

Glauber reiterated the position of Treasury Secretary Nicholas Brady, who has called for the futures exchanges to increase their margins to levels consistent with the stock exchanges.

Such "harmonizing" of margin requirements would strengthen the markets, Glauber said, discounting the contention of participants in the futures industry that the move would drive trading away from U.S. markets toward foreign markets.

BEVERLY HILLS, CA (JAN. 11) UPI - Following is the list of nominations in 76 categories for the 32nd Annual Grammy Awards to be televised Feb. 1 on CBS:

Record of the Year - ''The End Of The Innocence,'' Don Henley; ''The Living Years,'' Mike & The Mechanics; ''She Drives Me Crazy,'' Fine Young Cannibals; ''We Didn't Start The Fire,'' Billy Joel; ''Wind Beneath My Wings,'' Bette Midler.

Album of the Year - ''The End Of The Innocence,'' Don Henley; ''Full Moon Fever,'' Tom Petty; ''Nick Of Time,'' Bonnie Raitt; ''The Raw & The Cooked '' Fine Young Cannibals; ''Traveling Wilburys Volume 1,'' The Traveling Wilburys.

Song of the Year (a songwriter's award) - ''Don't Know Much,'' Barry Mann, Cynthia Weil, Tom Snow; ''The End Of The Innocence,'' Don Henley, Bruce Hornsby; ''The Living Years,'' Mike Rutherford, Brian Robertson; ''We Didn't Start The Fire,'' Billy Joel; ''Wind Beneath My Wings,'' Larry Henley, Jeff Silbar.

Best New Artist - Neneh Cherry; Indigo Girls; Milli Vanilli; Soul II Soul; Tone-Loc.

Best Pop Vocal Performance, Female - ''Cry Like A Rainstorm, Howl Like The Wind,'' Linda Ronstadt; ''Don't Wanna Lose You,'' Gloria Estefan; ''Nick of Time,'' Bonnie Raitt; ''Straight Up,'' Paula Abdul; ''Wind Beneath My Wings,'' Bette Midler.

Best Pop Vocal Performance, Male - ''Batman,'' Prince; ''How Am I Supposed to Live Without You,'' Michael Bolton; ''Right Here Waiting,'' Richard Marx; ''We Didn't Start The Fire,'' Billy Joel; ''You Got It,'' Roy Orbison.

Best Pop Performance, duo or group with vocal - ''Don't Know Much,'' Linda Ronstadt, Aaron Neville; ''If You Don't Know Me By Know,'' Simply Red; ''Love Shack,'' The B-52's; ''She Drives Me Crazy,'' Fine Young Cannibals; ''The Living Years,'' Mike & The Mechanics.

Best Pop Instrumental Performance - ''Breadline Blues'' soundtrack to ''Happy Anniversary Charlie Brown,'' various artists; ''Dancing With The Lion,'' Andreas Vollenweider; ''Healing Chant,'' Neville Brothers; ''Late Night,'' Paul Shaffer; ''Whispers and Promises,'' Earl Klugh.

Best Rock Vocal Performance, Female - ''Brave and Crazy,'' Melissa Etheridge; ''Foreign Affair,'' Tina Turner; ''I Drove All Night,'' Cyndi Lauper; ''Let's Stay Together,'' Pat Benatar; ''Nick of Time,'' Bonnie Raitt.

Best Rock Vocal Performance, Male - ''The End Of The Innocence,'' Don Henley; ''Free Fallin','' Tom Petty; ''Freedom,'' Neil Young; ''New York '' Lou Reed; ''When The Night Comes,'' Joe Cocker.

Best Rock Performance, duo or group with vocal - ''Glamour Boys,'' Living Colour; ''Mixed Emotions,'' the Rolling Stones; ''Rattle and Hum,'' U2; ''Traveling Wilburys Volume One,'' Traveling Wilburys; ''When Love Comes To Town,'' U2, B.B. King.

Best Rock Instrumental Performance - ''The Crush Of Love,'' Joe Satriani; ''High Tension Wires,'' Steve Morse; ''Jeff Beck's Guitar Shop With Terry Bozzio And Tony Hymas,'' Jeff Beck, Terry Bozzio, Tony Hymas; ''A Piece Of Time,'' Andy Summers; ''Travis Walk,'' Stevie Ray Vaughan, Double Trouble.

Best Hard Rock Performance - ''Cult Of Personality,'' Living Colour; ''Dr. Feelgood,'' Motley Crue; ''G N' R Lies,'' Guns N' Roses; ''Love In An Elevator,'' Aerosmith; ''Once Bitten Twice Shy,'' Great White.

Best Metal Performance - ''Beast From The East,'' Dokken; ''I Don't Believe In Love,'' Queensryche; ''One,'' Metallica; ''The Real Thing,'' Faith No More; ''Ultramega O.K.,'' Soundgarden.

Best R&B Vocal Performance, Female - ''Dreamin','' Vanessa Williams; ''Giving You The Best That I Got,'' Anita Baker; ''Good To Be Back, Natalie Cole; ''Miss You Much,'' Janet Jackson; ''Through The Storm,'' Aretha Franklin.

Best R&B Vocal Performance, Male - ''Batdance,'' Prince; ''Every Little Step,'' Bobby Brown; ''Heart's Horizon,'' Al Jarreau; ''She Won't Talk To Me,'' Luther Vandross; ''We Saved The Best For Last,'' Smokey Robinson.

Best R&B Performance, duo or group with vocal - ''Back To Life,'' Soul II Soul; ''Celebrate New Life,'' Bebe, Cece Winans; ''Gimme Your Love,'' Aretha Franklin, James Brown; ''It Isn't, It Wasn't, It Ain't Never Gonna Be,'' Aretha Franklin, Whitney Houston; ''We Sing Praises,'' Deniece Williams, Natalie Cole.

Best R&B Instrumental Performance - ''African Dance,'' Soul II Soul; ''Bermuda Nights,'' Gerald Albright; ''Constructive Criticism,'' Omar Hakim; ''I Can't Get Enough Of Your Love,'' Stix Hooper; ''It's No Crime '' Babyface.

Best Rhythm & Blues Song (a songwriter's award) - ''Every Little Step,'' L.A. Reid, Babyface; ''If You Don't Know Me By Now,'' Kenny Gamble, Leon Huff; ''Miss You Much,'' James Harris III, Terry Lewis; ''Superwoman,'' L.A. Reid, Babyface, Daryl Simmons; ''When A Man Loves A Woman,'' Calvin Lewis, Andrew Wright.

Best Rap Performance - ''Bust A Move,'' Young MC; ''Fight The Power,'' Public Enemy; ''Funky Cold Medina,'' Tone-Loc; ''I Think I Can Beat Mike Tyson,'' D.J. Jazzy Jeff And The Fresh Prince; ''Me Myself and I,'' De La Soul.

Best New Age Performance - ''Dancing With The Lion,'' Andreas Vollenweider; ''Icarus,'' (from the soundtrack, ''Wolf Eyes'') Paul Winter; ''Orinoco Flow (Sail Away),'' Enya; ''Passion - Music For The Last Temptation Of Christ,'' Peter Gabriel; ''Tibet,'' Mark Isham.

#90011u1544 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Michael R. Wise, former chairman and chief executive of Silverado Banking, Savings and Loan Association, became the failed thrift's third officer to be prohibited from working in the savings industry without prior regulatory approval, the government said Thursday.

The Office of Thrift Superivision said Wise has denied any wrongdoing and consented to the agreement to "avoid the time and expense that would be involved in litigating the case."

The agency previously announced similar agreements with Richard K. Vandapool, the Denver thrift's former vice chairman and chief operating officer, and Robert M. Lewis, Silverrado's former vice chairman and chief financial officer. Both consented to the order without admitting any wrongdoing.

Silverado was taken over by government regulators in December, 1988. At one time the thrift's board included President Bush's son, Neal Bush, who served on the board from August, 1985, until his resignation Aug. 8, 1988.

The thrift is under investigation by federal regulators who are examining an unusual volume of activity between Silverado, Lincoln Savings and Loan Association, of Irvine, Calif., and the junk bond division of Drexel Burnham Lambert.

Lincoln was seized by regulators last April and has been the focus of a highly charged congressional hearing into its operations and the intervention of five U.S. senators on behalf of its chairman, Charles Keating.

Keating has sued the government seeking to regain control of Lincoln. At a hearing last week he denied Lincoln was involved in sham transactions, as teh government has claimed.

Prior to the closing of Silverado, federal examiners have expressed concern about the soundness of the thrift's management. Examiners also were concerned with what they believed to be an "excessive concentration" of commercial lending in the depressed Denver market, the OTS said.

Also flagged for regulatory attention were deficiencies in assessing the ability of borrowers to repay loans and an unusually large number of problem transactions with shareholders, officers and directors, the agency said. The OTS said it anticipated additional prohibition actions against other Silverado directors in the near future.

#90011u1545 01/11/1990 ~United Press International

JERUSALEM (JAN. 11) UPI - A Palestinian principal was repeatedly stabbed during school hours Thursday by unknown assailants, while elsewhere in the Israeli-occupied territories soldiers shot and wounded at least 15 Arabs during confrontations.

Several masked men entered a girls elementary school in the West Bank town of Hebron Thursday morning and attacked principal Ramadan Jamila, Palestinian sources said. Jamila, 30, was admitted to Hadassah Ein Kerem hospital in Jerusalem in ''moderate'' condition with stab wounds to her face, hands and upper back, a hospital spokeswoman said.

Jamila has been attacked four times in the past several years, allegedly because local residents accused her of immoral behavior, Army Radio said. But Palestinian sources said Jamila was suspected of collaborating with Israeli authorities and that her brother had been killed after the same

accusations were leveled against him.

Since the start of the 2-year-old Palestinian uprising, hundreds of attacks have been carried out by Arab activists against Palestinians they accused of collaboration or immorality unbecoming of the spirit of the uprising.

More than 160 Palestinians have been killed by other Arabs during the uprising, most during the past year.

In the Israeli-occupied Gaza Strip, Israeli soldiers shot and wounded 15 Palestinians during clashes, Palestinian sources said. Among the wounded were a 13-year-old resident of the Jabalia refugee camp shot in the chest and a 12-year-old resident of Sheikh Radwan shot in the hand, the sources said.

The military spokesman had no information on the Gaza Strip reports.

Since the beginning of the intifada, Arabic for uprising, 628 Palestinians have been killed by Israeli soldiers or civilians.

In Gaza City Thursday, a group of young men rampaged through the open market, burning and smashing fruits and vegetables imported from Israel, Palestinian sources said. Leaflets distributed by the uprising's underground leadership have repeatedly demanded a boycott of all Israeli products.

At the Red Cross building in Gaza City, more than 100 men and women participated in the second day of a sit-down strike protesting poor conditions of Palestinian detainees in the Ketziot Prison in Israel's Negev Desert.

#90011u1555 01/11/1990 ~United Press International

WEST BERLIN (JAN. 11) UPI - About 20,000 people protesting government policies formed a human chain Thursday around parliament in East Berlin only hours after communist Prime Minister Hans Modrow defended his beleagured government and invited participation from opposition groups.

The demonstrators condemned plans to form a new internal security force to replace the hated State Security police that is being disbanded.

They also held aloft banners ridiculing the East German Communist Party, which opposition groups accused of manipulating its control of the government to gain the upper hand in May 6 elections.

About 20,000 protestors formed a human chain around the Volkskammer - the

East German parliament - as delegates left the building after a crucial session in which Modrow delivered a major policy statement.

During the session, lawmakers elected three new cabinet ministers and ousted 25 delegates linked to former hard-line communist leaders. Deputy Prime Minister Christa Luft also presented a draft constitutional amendment outlining conditions for foreign investment in East Germany.

In his statement, Modrow denounced ''attempts to dispute the legitimacy of this government,'' a remark apparently aimed at opposition movements.

''As far as the alleged lack of legitimacy of this government is concerned I cannot recall having become prime minister through a coup,'' said Modrow, reacting to growing criticism of his communist-dominated government.

Modrow, widely considered one of the Communist Party's leading reformers, was elected by the Volkskammer to head the crisis-torn East German government on Nov. 13.

Since the Oct. 18 resignation of hard-line Communist Party leader Erich Honecker, and then his successor, Egon Krenz, two months later, the Communist Party has given up its claim to sole control of the East German government.

''We are prepared for dialogue and have invited the opposition to work together (with the government),'' Modrow said. ''Now we urge them to present proposals outlining in which form they would be prepared to participate directly and responsibly in government work, through competent persons.''

The West German government welcomed Modrow's statement, which an official spokesman in Bonn said contained promising elements.

''What is important is the offer to the opposition to constructively participate in the government,'' the spokesman said.

Modrow heads a coalition government comprised of the Communist Party and its former allies, known as the bloc parties. Two of them, the East German Social Democrats and the Liberal Democrats, threatened earlier to quit the government.

Modrow said political parties would receive support from the state, pending legislation on party financing.

''The opposition has expressed fear that the democratic successes achieved last fall might be gambled away,'' Modrow said. ''My government has done nothing and will do nothing that could justify this accusation against

it.''

Responding to a claim that the communists are planning a secret police force to replace the once-feared National Security department, Modrow invited opposition groups to help supervise its dissolution. But he said the country needed a special force to guarantee the security of the state, particularly because of a recent increase in neo-Nazi activities.

Luft's draft of the constitutional amendment is expected to be debated next week.

Potential foreign investors, particularly in West Germany, favor legislation allowing foreign firms to buy majority control of East German companies, but observers believe the authorities are likely to set the limit at 49 percent.

The Bonn spokesman said the West German government is convinced major economic improvements can only be achieved through ''sustained encouragement of private initiative.''

#90011u1560 01/11/1990 ~United Press International

ANCHORAGE, AK (JAN. 11) UPI - Crews at the Drift River oil facility 20 miles from Redoubt Volcano planned Thursday to start loading stored crude oil onto a tanker to reduce the chance of a spill should another violent eruption rock the area.

There have been no eruptions at the volcano, 110 miles southwest of Anchorage, since Monday's surprise blast sent ash 40,000 feet into the air.

Schools in the Soldotna area, hardest hit by the volcanic ash, remained closed for the third day as borough officials checked ventilation systems and looked for ways to settle the ash.

The first of two scheduled tankers arrived at the crippled Drift River facility early Wednesday and crews spent the rest of the day trying to restore power with temporary generators, said Larry Duncanson, terminal manager.

Duncanson said Thursday he expected pumping to start within ''a couple of hours.''

Power to the facility was knocked out by mudflows following an eruption Jan. 2. The facility also suffered partial flooding after the blast sent steaming boulders and mud down the Drift River.

The initial tanker was scheduled to take on up to 395,000 of the 904,000

barrels of crude currently stored at the facility. A second tanker was to arrive Saturday, but had been delayed a day.

Once the two tankers were loaded, more than 8 million gallons of oil would remain in the depot's seven storage tanks, oil facility officials said.

Officials of Cook Inlet Pipeline Co., operators of the facility, planned to meet with state environmental representatives Thursday to figure out what to do with the remaining oil.

There was talk of scheduling a third tanker, however, draining the tanks completely dry was said to be a difficult task, officials added.

Pipeline and state officials also were concerned that empty tanks would shift and float more easily than partially filled ones should another volcanic blast cause flooding.

The owners of the Drift River facility stopped storing additional crude, forcing operators of offshore oil platforms in the inlet to halt or severely restrict production.

The prolonged shutdown could have severe economic effects and could threaten a contract to provide crude to Taiwan, said Jim Eason, director of oil and gas for the state Department of Natural Resources.

Eason also has said that closure of the aging platforms may render them less efficient once they are re-opened.

In Soldotna, 50 miles east of the volcano, officials continued to contend with an estimated one-half inch of sooty ash that fell Monday, said Jim Butler, a borough spokesman. Fierce winds Wednesday sent the ash swirling.

''Actually, we had a heck of a mess yesterday,'' Butler said. ''It was like being sandblasted. It was wicked.

''People are taking it a lot more seriously and that's good,'' he said of the ash situation. ''One thing we've learned is to be prepared. This is an on-going event.''

People were staying indoors is much as possible, while others are wearing surgical-like face masks when they went out, Butler said. There were reports of minor health problems, including stratchy throats and itchy eyes, he said.

Redoubt erupted to life Dec. 14 for the fourth time this century. The 10,197-foot volcano has simmered ever since, often sending ash clouds as high as 45,000 feet into the air.

#90011u1564 01/11/1990 ~United Press International
STROUDSBURG, PA (JAN. 11) UPI - A child psychiatrist Thursday questioned the competency of 10-year-old Cameron Kocher to stand trial, saying he is unable to help his lawyers defend him against charges he killed a 7-year-old girl.

Dr. Marshall Schechter testified as an expert witness for the defense at a pretrial hearing in Monroe County Common Pleas Court.

Kocher is charged with criminal homicide as an adult in the shooting death of first-grader Jessica Carr, 7. She was killed last Mar. 6 while riding a snow mobile outside a friend's home near Kresgeville.

Police said Kocher used a scope-equipped .35-caliber hunting rifle to shoot Jessica from a bedroom window at his home, a distance of 300 feet.

Schechter said he does not believe Kocher, who was 9 at the time, has the capacity ''to form a rational and reasonable understanding of what happened.''

Under questioning by defense lawyer Charles Hansford, Schechter said he did not believe Kocher was capable of understanding his Miranda rights when they were read to him by police at the time of the girl's death.

He also said he did not believe Kocher is competent to assist in his defense because of his age.

''You can't expect a 9- or 10-year old to comprehend their need for counsel,'' Schechter said.

During the hearing Kocher sat between his parents and occasionally appeared close to dozing off.

Kocher's competency is one of several issues being addressed at the hearing.

The defense is also seeking a change of venue, suppression of statements and physical evidence and an order to prevent Kocher's parents from being compelled to testify against their son.

In addition, Hansford has asked Common Pleas Judge Ronald Vican to quash the criminal information against Kocher and renewed his request to transfer the case from adult to juvenile court.

At the start of Thursday's hearing, Vican denied defense's request that he remove himself from the case. Hansford argued that Vican has shown

prejudice against Kocher in previous proceedings.

Jessica's parents Wednesday accepted a $300,000 settlement of a civil suit charging the 10-year-old suspect and his parents with liability for their daughter's death.

#90011u1606 01/11/1990 ~United Press International

LISBON, Portugal (JAN. 11) UPI - Angola's Marxist government and U.S.-backed Unita guerrillas exchanged claims of military victories Thursday in fighting that flared nearly three weeks ago and has complicated international efforts to negotiate a cease-fire.

Unita, in a statement issued in Lisbon, said its forces killed 63 soldiers and destroyed three tanks and 21 other military vehicles in fighting this week in southeastern Kuando Kubango province.

The U.S.-armed guerrillas acknowledged suffering 13 dead and 86 wounded in the fighting along the Kunzumbia river, some 38 miles east of Cuito Cuanavale, where the Angolan government launched the offensive on Dec. 23 to capture Unita-held territory.

The resurgence of fighting and cease-fire efforts in the former Portuguese colony were expected to come up during talks in Washington Thursday between President Bush and Portuguese Prime Minister Cavaco Silva.

The U.S. State Department Monday described the Angolan offensive as a ''dangerous escalation'' of the 14-year-old civil war and accused Moscow of providing a ''substantial'' number of Soviet advisers at the front line.

Unita chief Jonas Savimbi Wednesday announced the postponement of a six-country European tour set to begin this weekend in Portugal because of the government offensive in the southeast, much of which is held by Unita.

The Unita rebels said they had the ''situation under control.''

In contrast, the official Angolan news agency Angop reported troops killed more than 40 rebels in scattered operations from Jan. 3 to 9 and acknowledged suffering 22 dead and 42 wounded. It made no reference to any offensive in the southeast.

Savimbi and Angolan President Jose Eduardo dos Santo agreed last June to a cease-fire pending further negotiations during a face-to-face meeting arranged by Zairean President Mobuto Sese Seko, who is attempting to mediate a settlement. But the cease-fire never took hold, amid conflicting versions of the peace accord.

The State Department Monday said the offensive began ''at a time when Unita is prepared to agree to a cease-fire and unconditional negotiations'' and urged Angola and the Soviet Union to ''stop the offensive immediately and concentrate instead on the peace process.''

CHICAGO (JAN. 11) UPI - Police were seeking the mother of a 9-year-old girl whose body was found Thursday beneath a message scrawled in blood and signed ''her mother.''

Authorities, responding to a call from a worried grandmother, said they found the child's body - with a single stab wound in her chest and her face shrouded - with the message: ''Keisha Maxey, 9 years old. The system or the powers of Satan, nothing can hurt her anymore. She passed Jan. 9, 1990 between 2 and 4 o'clock. Her mother.''

Police withheld the name of the child's mother, who remained at large at midday.

The victim, found in an abandoned South Side apartment building, was tentatively identified as Khalah E. Muhammad, born April 8, 1980, the Cook County medical examiner's office said.

Police found the girl's fully clothed body lying on sofa cushions on the second floor of a vacant apartment during a search prompted by a call from her grandmother, said Capt. Theodore Pendleton.

''We received a call from a grandmother. She said the mother had killed her daughter,'' Pendleton said. ''She didn't have the address, so the officers had to comb the area before they found her.''

Investigators also recovered a knife they believe was used in the slaying.

A pool of blood was on the floor of the room where the girl's body was found. Her face had been wrapped in a scarf. There also was a container of flammable fluid, possibly gasoline, nearby on the floor, Pendleton said.

The blood-streaked walls also bore a Chicago telephone number, police said. Investigators hoped the party at the non-published number would lead them to the child's mother or shed some light on the circumstances of the slaying.

#90011u1631 01/11/1990 ~United Press International

WARSAW, Poland (JAN. 11) UPI - Czechoslovak Foreign Minister Jirzi

Dienstbier said Thursday that Czechoslovakia did not want to form a federation with Poland and preferred to establish closer multinational ties with the whole of Europe.

At a news conference in Warsaw at the end of two days of talks with Polish leaders, Dienstbier said there was a pressing need for the development of a united European ''home.''

''I do not think we should be establishing any new blocs in any new form '' he said.

Some political leaders had suggested in recent weeks that Czechoslovakia and neighboring Poland form a federation, an idea that was first raised after World War I but abandoned with the onslaught of World War II.

Dienstbier seemed to shy away from forming federation ties with eastern Europe and instead appeared to be looking toward the West.

He said he doubted the union of the European Community, scheduled to be completed in 1992, would end up only including the 12 western European countries now associated with the EC, saying the union could not take place without taking into account the newly liberalized eastern European states.

Dienstbier, whose government has been increasingly cool in recent days toward the idea of federation within eastern Europe, made no reference to the equally canvassed idea of forming a ''mini-market'' between his country, Poland and Hungary.

All three are part of the Soviet-dominated Comecon trading bloc and officials from both Poland and Hungary showed interest in the idea during a Comecon meeting earlier this week in Bulgaria. Comecon, which until recently included all communist countries, is a trade group comprised of the Soviet Union, east European states, Cuba and other countries.

Dienstbier did stress that Czechoslovakia felt it had a special relationship with Poland. The two have similar languages and have cultural and historical ties.

He said economic experts from the two countries would meet in Prague next week to discuss future economic and financial cooperation.

Dienstbier said he and Polish officials discussed the possible reunification of East and West Germany, a move that has made some German neighbors uncomfortable.

He said the reunification could only take place with the cooperation of European states in order to avert what he described as ''dangers, the

resurgence of old fears,'' a reference to the economic and political clout of a giant pan-German neighbor.

#90011u1634 01/11/1990 ~United Press International

UNITED NATIONS (JAN. 11) UPI - Worldwide economic growth is expected to slow down this year and the revolutionary changes in Central and Eastern Europe will have "profound" global economic implications, a senior U.N. economist said Thursday.

The economist said China, which suffered a drastic drop in growth in 1989, will have to cut down inflation and control its monetary situation. But he declined to link political turmoil to the country's economic slowdown.

Goran Ohlin, U.N. assistant secretary-general for development research and policy analysis, said latest forecasts suggested that the industrial countries' annual growth will fall below three percent in 1990, compared with the 1989 growth rate of slightly over three percent.

"The world economy is expected to slow down further in 1990, but will retain a considerable diversity of growth experience among countries," Ohlin said.

Latin America and Africa, which had slow growth in 1989, will have a "modest" one in 1990, South and East Asia will have a "moderate deceleration" but its average growth rate will remain high by most standards.

China, whose economic growth dropped to five percent in 1989 from 11 percent in 1988, is not expected to return to the rapid growth of the 1980s and will remain close to last year's sharply reduced rate. Ohlin said China's 11-percent annual growth in the 1980s had been "unsustainable."

"China was going to restrain the economy in any case and I don't think that the impact of demonstrations and political turmoil in Beijing was that great," he said.

The 11-percent growth created a "bottleneck" in the Chinese economy, the government was running behind developments and the monetary situation was getting out of hand, he said.

The U.N. economist said inflation in China rose to an unprecedented 25 percent in the first half of 1989 because of economic imbalances and "contractionary measures" taken in the world's most populous nation. The rate dropped to nine percent in October, he said. China devalued its currency by 21 percent in December in an effort to reduce its payments

imbalance, he said.

Ohlin noted that foreign investment slowed down considerably in China but declined to link the fact to the massive pro-democracy protests by students in May and June. The Chinese government Wednesday lifted the martial law it had imposed following the June events.

Ohlin said the predicted slow-down in the world economy may depress commodity prices further and compound the difficulties of developing countries which are trying to solve their large debt and revive stagnant economies.

The political changes in the Soviet bloc nations of Central and Eastern Europe and a possible reduction in military expenditures will transform world political and economic prospects, the U.N. official said.

"The next few years will presumably be ones of consolidation of the transition to new economic systems with closer ties with the rest of the world," he said. "Substantial additional demands on international resources will be made by the countries of Eastern Europe."

Based on 1989 economic returns, the short-term outlook for economic stability and growth in 1990 is "clouded," Ohlin said, but the medium-term outlook has "greatly improved."

#90011u1637 01/11/1990 ~United Press International

RIO DE JANEIRO, Brazil (JAN. 11) UPI - Judicial authorities may call the government into court to explain a deal officials struck with gold prospectors to avoid rousting them from Amazon Indian lands, a deputy federal prosecutor said Thursday.

The prosecutor, Carlos Victor Muzzi, said the deal has no legal standing and that the government could be hailed into court to explain why it has not carried out a judicial order to expel the 40,000 gold prospectors - known as ''garimpeiros'' in Portuguese.

Just as a much-publicized police-military operation was about to begin to force the garimpeiros out of their jungle digs, the government announced it had decided instead to offer to allow them to stay and work within three specific areas of the Roraima National Park near the Venezuelan border.

''Taking the gold prospectors out of the Indian area and putting them in the National Park is the same as if you called the police to capture a robber in your living room and the police asked the thief to please move to the kitchen,'' Muzzi said.

The compromise agreement was signed by Federal Police Chief Romeu Tuma and the heads of groups representing the garimpeiros. Leaders of the Ianomani Tribe had several times gone to Brasilia to demand that the government force the intruders out of their lands. Last October, under court order, President Jose Sarney's government finally agreed to remove the prospectors, by force if necessary.

International and Brazilian environmental groups have backed the Indian cause, saying the prospectors were destroying much of the area's fragile rainforest ecology and dumping mercury and other deadly chemicals associated with their gold mining operations into area streams and rivers.

The plan that was to have been launched earlier this week was to block the airports through which the garimpeiros receive their supplies. The plan also called for dropping 100,000 leaflets over the gold panning areas telling the garimpeiros to leave or be forced out.

The garimpeiros, part of one of the largest gold rushes in history that produces an estimated $1 billion a year in the precious metal, threatened to resist.

Justice Minister Saulo Ramos, disputed Muzzi's charge the pact was not legal. ''It isn't idea, but it is legal, constitutional,'' he said.

A Brazilian news agency reported that Sarney had promised British rock singer Sting in Brasilia Wednesday that he would not allow the garimpeiros to remain on the Indian lands.

Sting, who met with the outgoing president for 40 minutes at Planalto Palace, has led an international campaign to protect the rainforest and the hunting grounds of the Ianomani Indians.

#90011u1731 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Defense Secretary Dick Cheney announced management reforms Thursday that he said will slash 42,000 people from the military and civilian payroll and save $39 billion in Pentagon spending over the next five years.

''The $600 toilet seats are sexy and are easy to get people to focus on,'' Cheney said, referring to the military procurement scandal several years ago featuring high-priced coffee makers and exorbitant screw drivers.

But, he said, his reforms would have a greater impact on the Pentagon budget and would eliminate abuses of that kind. ''Real changes are being made,'' he said.

In addition to the reduction of 42,000 employees, Cheney disclosed at a news conference that he will recommend ''extensive'' military base closures in the fiscal 1991 defense budget that will be presented to Congress Jan. 29.

Refusing to be pinned down on the exact number of bases to be closed, Cheney told reporters at the Pentagon that he will recommend ''more than two'' and that he was ''looking at overseas bases as well as domestic bases.''

Congress last year approved the closing or partially closing of 86 major U.S. military bases from an all-or-nothing list drawn up by a special commission appointed under former Defense Secretary Frank Carlucci.

The workforce reductions from Thursday's streamlined management measures, together with further base closings and an expected withdrawal of at least 30,000 U.S. troops from Europe signals a major retrenchment by the Pentagon.

The change comes in the wake of the drastic upheaval in Eastern Europe, where nation after nation has rejected communist governments in favor of democratic reforms.

''The changes in the nature of the threat around the world, and the realities of the budget, mean that our defense budgets are going to be leaner in the years ahead,'' Cheney said.

''So every dollar that we can cut out of the cost of running the Pentagon is a dollar we don't have to cut from force structure, readiness, or the quality of life for our men and women in uniform,'' he said.

In announcing the management reforms that streamline or consolidate various parts of the military's paper-pushing bureaucracy, Cheney said he expects savings of $2.3 billion in 1991 and total savings of $39 billion by fiscal 1995.

''This is not fuzzy,'' Cheney said. ''These are very specific savings that we have already identified. ... We've tried to be very conservative in our cost estimates.''

The improvements, he said, will make it possible to trim the logistics and management workforce of 580,000 civilian and military personnel by as many as 8,000 civilians and 8,000 military personnel in fiscal year 1991.

By the end of fiscal 1995, Cheney added, the workforce will be reduced by a total of 18,000 civilians and 24,000 military personnel - 42,000 overall.

But Cheney's plan immediately drew fire from Capitol Hill. House Armed Services Committee Chairman Les Aspin, D-Wis., said the review ''offers no blueprint for implementation. We need one. That's where reform efforts have failed in the past.''

Aspin said skeptical congressional leaders ''won agreement'' to hold ''an acquisition summit with the administration ... that will help us know whether reform is heading in the right direction - or any direction at all.''

Deputy Defense Secretary Donald Atwood outlined the reforms and said they will cut overhead costs in logistics and maintenance, reduce ''micro-management'' by Congress and the Pentagon itself, strengthen the U.S. defense industrial base and improve ethical standards.

One of the biggest changes is the creation in each military service of an acquisition corps of full-time experts who will report to top department officials, eliminating middle layers of bureaucracy and reducing administrative costs by $3.7 billion over five years, Atwood said.

In addition, the reforms will better control supplies by streamlining the individual services' maintenance activities, reduce use of consultants and outside advisers and seek to eliminate unnecessary paperwork.

The Pentagon will also ''severely restrict'' the use of fixed-price defense contracts, which are strongly opposed by the shrinking defense industry because they do not allow for changes as programs progress.

Known as the Defense Management Review, the cost-cutting measures stem from President Bush's order last February for Pentagon officials to reform the way the Defense Department conducts business.

''This is just the first bite of the apple,'' Cheney said. ''This is going to be a continuing process.''

#90011u1736 01/11/1990 ~United Press International

PRINCETON, NJ (JAN. 11) UPI - A move by the Polish government has resulted in a delay in emigre Barbara Piasecka Johnson's plans to invest up to $100 million in the Lenin Shipyard in Gdansk, birthplace of the Solidarity free trade union, a member of the Polish-American Woman's staff said Thursday.

But John Peach, Johnson's managing director, said the heir to the Johnson & Johnson pharmaceutical fortune wants nevertheless to go forward with the deal to save the shipyard.

In June, Johnson, Solidarity Leader Lech Walesa and Czeslaw Tolwinski, the director of the shipyard, signed a letter of intent for Johnson to pay up to $100 million for 55 percent of the enterprise. The letter of intent expired Jan. 1, but Johnson has applied for an extension and is awaiting word from the Polish government, Peach said.

Last week, the Solidarity-led government of Prime Minister Tadeusz Mazowiecki announced a change of plans in disposing of the shipyard. Instead of putting the shipyard into liquidation, the government plans to create "some form of joint stock corporation," Peach said.

"They informed us of that and we are waiting to see what form that it takes," he said. "We are ready, willing and able to go forward and keep negotiating." "I don't consider it on hold," he added. "I am waiting for the government to say they are ready to sit down and start talking again."

In October 1988, the Communist government of Prime Minister Mieczyslaw Rakowski announced plans to close the money-losing shipyard, drawing wide-spread protests from home and abroad from critics who charged the decision had more to do with politics than economics.

Soon after the letter of intent was signed, Poland's first elections in more than 40 years led to a toppling of the Communist government and has set off a flurry of changes in the Eastern European country. "We expect to return (to Poland) in the next two to four weeks to keep moving forward," Peach said.

A group of international shipping experts spent five months examining the shipyard and its books for Johnson, Peach said. "We have the assesment," he said. "There have to be lengthy discussions with the government and the shipyard management about the assesment."

Johnson, now 49, emigrated to the United States in 1968 at the age of 18 and obtained a job as a cook and chambermaid in the home of J. Seward Johnson - 42 years her senior.

The two were married in 1971 and Johnson died of cancer at the age of 87, leaving his widow $300 million after a long legal battle with Johnson's six children.

The delay in the shipyard deal has not affected Johnson's plans to open the first private commercial bank in Poland and make other investments, Peach said.

#90011u1785 01/11/1990 ~United Press International

ATLANTA (JAN. 11) UPI - The number of people who have died from a blood disorder linked to the dietary supplement L-tryptophan has risen to seven, and evidence is mounting against the now-banned drug, federal officials said Thursday.

The federal Centers for Disease Control is monitoring cases of the potentially fatal eosinophilia-myalgia syndrome (EMS) to determine the extent of the disease and L-tryptophan's possible role in causing it.

Characterized by an unusually high humber of white blood cells known as eosinophils, EMS can cause intense muscle pain, fever, shortness of breath rash and pneumonia.

As of Jan. 9, the CDC said it had received seven reports of EMS deaths among people who used the over-the-counter supplement - up three deaths from the four reported in early December.

A total of 1,046 cases of EMS have been reported to the federal health agency from 49 states, the District of Columbia and Puerto Rico, officials said. Nearly one-third of the patients have required hospitalization.

The CDC's monitoring effort stared in November, but it includes cases that occurred before that date.

Among 429 cases for which more detail was supplied, 419, or 98 percent of the EMS patients had taken the amino acid pill for disorders like insomnia premenstrual syndrome and depression, the CDC said.

''Previously published studies demonstrated this link with L-tryptophan and cases reported to the Centers for Disease Control are supporting that link,'' said Dr. Leslie Swygert, the epidemiologist directing the study. ''Ninety-eight percent of the patients have reported L-tryptophan use prior to onset. That is a strong assocation.''

Researchers have yet to determine if EMS is being caused by L-tryptophan or a contaminant that may be added in the production process. But medical evidence linking it to the disease is mounting, Swygert said.

A finding that most of the patients - 87 percent - had been afflicted with the disease during July or after suggests that a contaminant may be the problem, Swygert said.

It has been estimated that about 5 percent of the U.S. population, or 14 million people were using the supplement before the government ordered it off the shelves in November.

''It appears to be a widely used product, judging from the phone calls we've been receiving,'' she said. ''We're hoping that by withdrawing the product from the market there will be no new cases. But there may be a lot of people who have taken L-tryptophan and may become ill that have not been identified.''

The first three cases of the new illness were reported last October by the New Mexico Department of Health and Environment. The CDC said that although those patients underwent extensive clinical evaulation, their illnesses were unlike any other known disease.

The federal health agency then took the unusual step of classifying the cases as a new disease not seen before by medical authorities.

#90011u1793 01/11/1990 ~United Press International

DETROIT (JAN. 11) UPI - Chrysler Corp. announced Thursday temporary closings at numerous assembly plants during January and February in moves that will idle nearly 20,000 U.S. workers because of slow sales.

Chrysler's Belvidere, Ill., and Newark, Del., car assembly plants will be closed the week of Feb. 5, along with its Jeep plant in Toledo, Ohio, the nation's No. 3 carmaker said.

The Belvidere plant employs 3,600 hourly workers who build Chrysler's large and luxury cars, while 3,600 workers at the Newark plant build mid-sized sedans like the Dodge Spirit and Plymouth Acclaim. Chrysler's Jeep plant in Toledo employs 5,300 hourly workers.

The carmaker will also close its Sterling Heights, Mich., plant next week, with production to resume Feb. 5. Chrysler previously announced that the plant, which builds Shadow and Sundance compact cars with about 3,000 workers, would be idled the week of Jan. 22.

Chrysler's Dodge City truck plant in Warren, Mich., which employs 2,700 workers, will be closed the weeks of Jan. 22 and Jan. 29 to trim inventories, while its Jefferson Avenue plant in Detroit, which builds Omni and Horizon subcompact cars, will operate on a single work shift through January. Chrysler announced last November that the aging plant would be closed permanently Feb. 2, putting 1,700 workers out of work.

Also announced at the time was the indefinite layoff next month of the second shift at its St. Louis Plant No. 1, which builds the Chrysler LeBaron and Dodge Daytona cars. About 1,900 of the 3,600 hourly workers at that plant will be indefinitely idled Feb. 12, Chrysler said. Chrysler's U.S. car sales during 1989 slipped 13.1 percent from year-ago levels. Sales of its light trucks dipped 0.4 percent.

Separately, Ward's Automotive Reports said Thursday that U.S. car and truck production this week will total an estimated 74,899 units, as only one-third of the assembly plants operated by the nation's Big Three carmakers operate.

The output estimate for the current week compares with 72,847 cars and trucks built during the previous week, and 231,175 vehicles built in the year-ago week, the statistical service said.

Most U.S. assembly plants, including numerous General Motors Corp. facilities idled in late December, will resume operations Jan. 16 after being closed Jan. 15 in observance of Martin Luther King's birthday.

Ford Motor Co.'s plants in Dearborn, Mich.; Chicago; Lorain, Ohio; Kansas City, Mo.; and Edison, N.J.; are closed this week to trim dealer inventories.

#90011u1817 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Seven out of 10 Americans want to limit the terms served by members of Congress, while more than 60 percent favor a mandatory retirement age for the lawmakers, according to a Gallup poll released Thursday.

''Essentially, what the public is saying is that being in office should be a period of public service and not a career,'' said George Gallup, whose firm did the survey for the National Federation of Independent Business.

The poll, taken in the past few weeks among 750 adults, reflected the results found in similar surveys that have also attempted to gauge the public's views of Congress.

But while Americans consistently show a dissatisfaction with Congress as an institution, they also appear to strongly support their own lawmaker - a fact demonstrated by the extremely high re-election rate of incumbents. For example, of the 408 House members who sought re-election in 1988, 402 were successful - a re-election rate of 98.5 percent.

Still, the Gallup poll showed that 70 percent of the adults surveyed believed there should be a limit on the total number of years a person can serve in Congress. At the same time, 62 percent said they favored a mandatory retirement age.

Eighty percent said they liked the current two-term limit for the president.

Despite the high percentage that favored the limit on congressional service, however, there was less agreement on what that limit should be, although 58 percent said they favored holding a person to serving 12 years in the House and 12 in the Senate.

The business organization, which represents about 500,000 small and independent businesses, said it commissioned the poll to determine if the public was as disenchanted with Congress as the group's members.

The group's president, John Sloan, said regular surveys of the organization's members showed that ''Washington, Congress in particular, has been the single biggest source'' of their problems.

Sloan said his group did not intend to use the survey to launch a new drive to limit congressional terms, or to engage in ''Congress-bashing,'' but contended that ''our objective is to initiate the debate on the broader question of effective government.''

There are currently several proposals in Congress to limit terms and the idea has been backed by some self-styled public interest leaders, such as Ralph Nader.

Gallup said the results of the poll were consistent with other findings from his organization's polls and added that over the years the public has also shown a strong tendency to favor things such as ending the Electoral College and creating regional or national primaries for presidential candidates.

A spokesman for the business group said the survey's error margin was 4 to 5 percentage points.

#90011u1818 01/11/1990 ~United Press International

TALLAHASSEE, FL (JAN. 11) UPI - Rosa Parks, the 76-year-old so-called ''Mother of the Civil Rights Movement,'' said Thursday that young blacks must not give up their vigilance in preserving the rights others fought so hard to gain.

''There seems to be ... something going on that we haven't experienced for many years,'' Parks said at a news conference in Tallahassee, where she was to speak to students at Florida State University Friday in connection with events honoring the Rev. Martin Luther King Jr.'s birthday.

''We should not be discouraged or fearful. We need to make it known that we are not as fearful or divided as people may think,'' she said.

Parks, whose refusal to give her bus seat to a white man in Birmingham, Ala., more than 30 years ago sparked an era of non-violent civil rights demonstrations, said she is concerned about the resurgence of hostility toward blacks. She cited the recent bomb attacks on federal judges and other officials in the South thought to be racially motivated.

Parks' arrest on Dec. 1, 1955 for defying Alabama bus segregation laws initiated a 381-day boycott and a legal battle that resulted in the end of bus segregation in Montgomery, Ala. The battle for bus seats is considered the turning point of the civil rights movement, and catapulted King into national prominence.

King, who received the Nobel peace prize in 1964, was assassinated on

April 4, 1968, in Memphis, Tenn. Congress made King's birthday a national holiday in 1986.

''If we sit down and accept defeat, it could make those in opposition to human and civil rights more agressive,'' the soft-spoken, white-haired Parks said. ''We've had some setbacks. For every obstacle we should gather extra strength and move on.''

#90011u1825 01/11/1990 ~United Press International

NEW YORK (JAN. 11) UPI - Sotheby's auction house will no longer allow buyers to purchase art on margin, saying the practice prompted criticism from dealers that the arrangement inflated prices in the art market.

The auction house also said the owner of "Irises," the most expensive artwork in the world, was considering putting the painting back on the market. The painting of flowers by Vincent Van Gogh was sold at auction in 1987 to Australian businessman Alan Bond in 1987 for $53.9 million, a record price.

The controversial sale of "Irises," facilitated by a $27 million loan to Bond from Sotheby's for which the painting itself served as collateral, drew criticism from art dealers who asserted the financing arrangement had artifically boosted the price. Bond has never actually possessed the work, because Sotheby's has kept it stored in a vault, waiting for him to repay the loan.

The complicated financing for the painting, in addition to hints that Bond's financial difficulties might prevent him from making good on the loan, disturbed many art experts.

In response to the criticism, Sotheby's officials said Thursday that buyers will no longer be able to use property they intend to purchase as collateral on loans. They will, however, be able to use other property as collateral, said Michael Ainslie, the president of Sotheby's Holdings Inc. parent company of the auction house.

"Our foremost concern was the credibility of the art market place," Ainslie said. "We were concerned about the perception of art dealers and art experts that this form of purchase might have an inflationary influence on prices." But Ainslie added he still thought the arrangement did not push up prices. "We don't believe that was the case," he said.

The auction house would still allow clients to finance purchases using other works of art as collateral, including pieces consigned for auction, Ainslie said.

(JAN. 11) UPI - Soviet leader Mikhail Gorbachev called Soviet Lithuania's demands for independence ''not serious'' Thursday but ducked an invitation to address a pro-independence rally during a visit to Vilnius, the capital of the Baltic state.

Elsewhere in eastern Europe, East German Prime Minister Hans Modrow defended his communist-led government as thousands of protesters formed a human ring around Parliament and Albania - almost the last hard-line communist hold out in the region - reportedly stepped up police presence in response to pro-reform demonstrations.

Moslems in Bulgaria, however, attempted to ease nationalist protests by promising that they were not seeking a separate Moslem Turkish state.

But the day had its lighter moments as well. East Germany lifted a ban on hang gliding imposed years ago after several East Germans made spectacular escapes across the border to the West.

Gorbachev flew to Vilnius Thursday to confront Lithuanians, who are becoming increasing vocal in their demands for autonomy from the U.S.S.R.

''We have been tied together these 50 years whether we like it or not,'' Gorbachev told an early morning crowd in the center of the Lithuanian capital. Gorbachev spoke with officials, visited a factory and met with Lithuanian writers and artists, but refused several invitations to attend the evening rally for independence.

The official Tass news agency said Gorbachev would stay in Lithuania for three days. It is the first visit ever by any Soviet leader to Lithuania, a resentful Soviet republic since 1940 when it was annexed by Soviet dictator Josef Stalin as part of a deal with Adolf Hitler.

Albania has imposed emergency measures in the western town of Shkoder and stepped up police control in villages following anti-government demonstrations in the tiny Balkan country, a published report said Thursday.

An official at the Albanian Embassy in Belgrade denied the newspaper report as ''sheer fabrication.''

Reports on turmoil in self-isolated Albania, the last stronghold of orthodox communism in eastern Europe, have spread in recent months following pro-democracy movements in all states of the once Soviet-controlled bloc.

About 20,000 people protesting government policies formed a human chain Thursday around Parliament in East Berlin only hours after Modrow defended his beleaguered government and invited participation from opposition groups.

The demonstrators condemned plans to form a new internal security force and charged the Communist Party with manipulating its control of the government to gain the upper hand in upcoming May 6 elections.

Modrow, considered a very reform-minded member of the Communist Party, denied the charges in a speech to Parliament, saying opposition parties would be funded by the state and inviting opposition members to join the government immediately.

In a bid to calm nationalist tensions, Bulgarian Moslems demanded equal rights Thursday but said they never sought autonomy or partition of Turkish areas from the rest of Bulgaria.

''Our past, present and future are forever linked to the destiny of Bulgaria,'' said the Supreme Moslem Theological Council in a statement.

But it said it stood fully behind the decree of the new government Dec. 29 that ended four years of persecution of the language, culture and Moslem religion of many of Bulgaria's 1.5 million ethnic Turks.

WASHINGTON (JAN. 11) UPI - Robert Kimmitt, undersecretary of state for political affairs, will fly to Pakistan, India and Saudi Arabia next week, the State Department said Thursday.

Kimmitt, one of the key policy level officials in the State Department organization established by Secretary of State James Baker, will leave Washington on Saturday, the department said.

Kimmitt's talks with foreign officials are expected to focus on the continued fighting in Afghanistan and other local and bilateral issues.

ATLANTA (JAN. 11) UPI - Delta Air Lines said Thursday it will ban smoking on all domestic flights next month, expanding the no-smoking rule enacted by Congress for all flights of six hours or less within the United States. Beginning Feb. 25, smoking will be permitted only on Delta flights to Europe and Asia.

A federal law took effect April 23, 1988, banning smoking on domestic flights of two hours or less. Last fall, Congress extended the law to include all domestic flights of six hours, effectively banning smoking on flights within the continental United States. Northwest Airlines was the first carrier to ban smoking on all domestic flights in April 1988.

"In expanding the smoking ban we continue to respond to the wishes of our passengers," said Whit Hawkins, Delta's senior vice president, marketing. "Over the years we have seen a dramatic decrease in the demand for designated smoking seats on our flights. At the same time, the two-hour smoking ban begun in 1988 has been very well received by our passengers."

Hawkins said the two-hour ban has been in effect on over 70 percent of Delta's flights. On flights where smoking was permitted, only about 20 percent of the seats were designated smoking, a sharp decrease from the 30-40 percent just five years ago.

"Based on these experiences, we are confident that Delta's no-smoking flights throughout North America will be welcomed by the vast majority of our passengers, both nonsmokers and smokers," Hawkins said.

The smoking ban will apply to all Delta flights within the United States, including Alaska, Hawaii and Puerto Rico, as well as the Bahamas, Bermuda,

Canada, and Mexico.

Doug Miller, a spokesman for Northwest Airlines in St. Paul, Minn., said the smoking ban has had "a very positive effect" on the airline's operations since it was put in effect.

#90011u1907 01/11/1990 ~United Press International

CHICAGO (JAN. 11) UPI - UAL Corp. Chairman Stephen Wolf Thursday sought to rally employees to work out an employee-led buyout of United Airlines and avert imposition of a recapitalization plan sought by an investment firm that has threatened to seize control of the UAL board.

"If we allow the ... imposed recapitalization to go forward and the balance sheet to become highly leveraged, we will not be able to fund our growth plans," Wolf said in a letter to employees.

"If we are forced into a leveraged recapitalization, our financial position will change from our being a high-cost carrier with a strong balance sheet to a high-cost carrier with a weak balance sheet and high interest. In short, the worst of all worlds," he wrote.

Wolf planned to begin meeting with employees Thursday in an effort to hammer out a new buyout bid. A UAL spokeswoman refused to comment on Wolf's letter and the new effort to work out an employee-led buyout.

A standoff between two powerful unions - the Airline Pilots Association and the International Association of Machinists - has thus far foiled efforts to draft a new employee-led buyout of UAL, parent of United Airlines.

The standoff prompted UAL directors earlier this week to instruct the company's financial advisers to draft a recapitalization plan for consideration at a Jan. 25 board meeting.

Efforts to draft a new employee bid were stalled by the IAM, United's biggest union, whose opposition helped scuttle the $6.75 billion, $300 a share employee-led buyout that collapsed for lack of financing in October.

Condor Partners, a New York investment group that controls 11.8 percent of UAL stock, moved in following the collapse of that deal and threatened to mount a campaign to seize control of the UAL board of directors.

Condor set a Jan. 8 deadline for the board to find a buyer or begin pursuing a recapitalization. With no bid on the table Monday, UAL directors held a telephone conference and agreed to instruct the board's financial advisers to draft a recapitalization plan.

The pilots union, which has taken the lead in the buyout efforts, and the Association of Flight Attendants have repeated their interest in a buyout that would give employees a majority stake in UAL through an Employee Stock Ownership Plan and expressed opposition to recapitalization.

The IAM also has expressed opposition to a recapitalization that would result in heavy debt. But both the IAM and a non-union employee group have expressed opposition to any buyout that would give employees a majority interest.

The machinists and non-union employees have expressed fears that they would bear the brunt of the salary and benefits concessions required to finance such a deal. IAM officials also have expressed concerns that such a buyout would give pilots an unacceptable degree of control of the company.

#90011u1920 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Like any other dissatisfied customer, the U.S. government is using its power of the purse more often, holding back payments to international organizations to express unhappiness, officials said Thursday.

One State Department official said, ''There is a definite connection between our unhappiness, both in the administration and in Congress, and the arrearages. We are definitely insisting on reform and this is one way to send the message.''

The United States has used the tactic sporadically against the United Nations for several years. Since the U.S. assessment for various international organizations generally amounts to 25 percent of the total U.N. budget - and sometimes as much as 38 percent of special functions, such as peacekeeping operations - American clout is considerable.

In the latest example, the State Department announced Wednesday that it will not be paying its current dues to the U.N. Food and Agricultural Organization, based in Rome.

While the U.S. decision was based on a variety of reasons, it was triggered by an FAO decision to give the Palestine Liberation Organization effective status as a full nation-member. The State Department warned the FAO of its displeasure, arguing that such side-door attempts at creating international recognition for a Palestinian state create an unnecessary complication in the Arab-Israeli negotiations.

As State Department spokeswoman Margaret Tutwiler explained, ''We said we would do it, and we did it.''

In addition, the United States had expressed displeasure with the inefficiency and high-handed manner of the FAO's professional staff.

Under the decision announced this week, total U.S. arrearages to the FAO, dating back to 1987, now stand at $195 million, a sizable sum for an organization with an annual budget of $313 million.

U.S. dissastisfaction with the U.N. headquarters operation in New York was expressed in a similar manner, compounded by Gramm-Rudman budget-cutting rules.

The United States owes the U.N. headquarters budget $365 million, dating back to 1988. The State Department has said that it intends to pay up, when it can, but not if the General Assembly tries to upgrade the PLO's observer status to the equivalent of a member-nation.

U.S. irritation with the Organization of American States, based in Washington, was expressed the same way after the OAS expressed ''profound regret'' over the Dec. 20 U.S. invasion of Panama and the overthrow of the Noriega government.

A total of $49 million is being held back from payments due to the OAS, which is not part of the U.N. system. State Department officials have not disguised the fact that they are unhappy with the inter-American organization, both for for its recent votes against the U.S. actions in Panama and for general ineffectiveness.

But - not unlike a credit card user who knows he has to make minimum payments to maintain his credit rating - the United States has carefully sent the minimum payment required to retain voting membership in the organizations.

For the FAO, that means the United States will send a check for $18 million, rather than the full $69 million for its 1990 dues. The missing $51 million is the message.

#90011u1985 01/11/1990 ~United Press International
WASHINGTON (JAN. 11) UPI - Commerce Secretary Robert A. Mosbacher Thursday announced an industrial cooperation initiative between his department and the powerful Japanese Ministry of International Trade and Industry.

The initiative "will enable our corresponding industry offices to exchange information formally and regularly and to identify opportunities for cooperation between U.S. and Japanese industry," Mosbacher said after a meeting with MITI's chief, Hiratu Matsunaga.

Mosbacher visited Tokyo last September in an effort to find ways to reduce the U.S. $50 billion trade deficit with Japan. Commerce sources said the joint initiative, a result of his talks with Japanese officials, will explore ways to stem the flow of red ink.

"I believe that the Joint Industrial Cooperation Initiative can and will promote a better understanding of the policy development process that exists for each of our industry sectors," Mosbacher said. "That kind of understanding will help to reduce the potential for bilateral friction and enhance our prospects for expanded and fruitful commercial ties."

As part of the initiative, periodical meetings between U.S. and Japanese officials will exchange information about industrial policies, white papers in progress, special programs such as tax incentives, research and development, supply and demand forecasts, investments, capacity assessments, industrial outlooks, and long-term marketing, Commerce spokeswoman Elizabeth Dugan.

The initiative will pay special attention to increasing the understanding of sectorial industrial policies and areas of technological cooperation in both countries, she noted.

WASHINGTON (JAN. 11) UPI - The World Bank said Thursday it will launch its second U.S. global-bond issue in the coming weeks.

The $1.5 billion issue will be underwritten and distributed at the same time in the U.S., Japanese and Euromarkets, making it the first time a single public bond issue will be offered simultaneously in all three of the world's largest capital markets.

The multilateral organization said that terms for the issue will depend on market conditions, and that Goldman Sachs and Morgan Stanley will serve as joint lead managers. The bank's first global-bond issue was launched last September.

#90011u2023 01/11/1990 ~United Press International

SANTA CRUZ, BOLIVIA (JAN. 11) UPI - The United States proposal to be discussed at next month's drug summit includes proposed reductions in foreign debt to compensate South American nations for lost income from cocaine production.

The economic programs proposed by the United States to Peru, Colombia and Bolivia also would give trade preferences to products from the three countries to compensate for the billions of dollars that would be lost from reduced cocaine production.

The proposals, first included in an anti-drug bill signed by President Bush Dec. 13, are contained in a ''preliminary agenda'' proposal for a drug summit to begin Feb. 15 in Cartagena, Colombia. The proposal was submitted by the United States to a pre-summit meeting in Santa Cruz, 355 miles southeast of La Paz.

The pre-summit meetings that began Wednesday and are to end Saturday were called to reach an agreement on an agenda for the summit between President Bush and delegations from the three cocaine-producing regions.

''The illicit wealth of the coca (leaf), although it very much deforms the economies of the Andean countries, contributes to the receipt of funds and the generation of employment and income,'' the United States said in the document.

''Therefore the suppression of the commercialization of the coca leaf would cause grave disturbances, both immediate and prolonged, not only in the regions where the coca leaf is cultivated but in all producing countries.''

Bolivian officials estimate their country's coca leaf crop is worth some $600 million a year. It is perhaps double that in Peru, the world's largest coca producer, while Colombia is believed to receive several billion dollars in income from cocaine production, according to officials from those countries.

To make up for the loss of revenue from reduced cocaine production, the United States is proposing the debt swap program with international lending institutions. The program apparently would be similiar to a proposal in which Brazil would protect the Amazon rain forests from destruction in return for a reduced foreign debt.

The U.S. proposal also said Bush will ask Congress for new funds for each

year from 1991 to 1994 ''in order to assist the three Andean nations in their efforts to correct the economic disturbances in the short and long term that would occur as a consequence of the application of efficient measures against narcotics.''

One program would give trade preference to 4,000 products from the three nations to provide alternative employment to cocaine production and would promote private investment, according to the U.S. document.

The U.S. is asking the nations for involvement of their military forces in combating drug traffickers. It also calls for extradition treaties and control of the illicit traffic in arms, boats, airplanes and chemicals used to make cocaine.

In Washington, Bush administration officials, speaking on the condition of anonymity, said the United States wants to see enhanced law enforcement efforts in South American and is ready to offer more financial aid.

Officials said the administration will also propose economic assistance to help peasant farmers, the primary growers of coca for the cocaine cartels, find a new and legal line of work.

''We hope to have agreements on expanded efforts among all three nations to combat the drug traffickers,'' said one official.

#90011u2024 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Gerard Collins, foreign minister of Ireland and new president of the European Council of Foreign Ministers, will meet with Secretary of State James Baker on Friday to discuss developments in Eastern Europe.

Collins, who assumed the presidency at the beginning of the year, will meet Baker as part of the process of coordinating Western European and American policies on dealing with the emerging democratic systems in Eastern Europe.

The Irish government has proposed a meeting of all European foreign ministers in Dublin next week to continue the discussions on the same subject.

European officials said the European Community believes that Baker's Berlin speech in December laying out U.S. policy toward German reunification and the future of Eastern Europe was a landmark, but the Europeans now want to see how Baker and the United States are following up the speech.

In the Berlin speech, Baker called for a ''new architecture'' for Europe in which NATO would take on a more political, non-military role. He also called for stronger links between the United States and the European Community, but he did not suggest specific measures.

By VERNON SCOTT

HOLLYWOOD (JAN. 11) UPI - In many of the films he's done, Richard Gere appears to be a throwback to a couple of the brightest stars of the 1930s and 40s, namely John Garfield and Humphrey Bogart.

As with those legends, Gere is not conventionally handsome. But more to the point, he brings to mind Bogie and Garfield with his selection of roles. Gere inevitably plays the hard-edged protagonist whose dark side clouds whatever heroics he may demonstrate.

Garfield in ''The Postman Always Rings Twice'' and Bogart in ''Treasure of the Sierra Madre'' illustrated the wisdom of their choices.

Robert Redford, Paul Newman, or even young Tom Cruise, are straight-ahead leading men who play characters of sterling quality.

Not Gere. He actively seeks off-center characters with fatal flaws.

His most recent choice is as the menacing cop in ''Internal Affairs,'' a scheming, charming, deadly killer without a single redeeming feature.

In Hollywood recently on a visit from his home in New York, Gere was thoughtful about comparisons with Garfield and Bogart and their shared proclivity for playing dubious heroes.

''Maybe there's room for comparison, but it's hard for me to think in those terms,'' Gere said. ''The guy Bogart played in 'Petrified Forest' was the kind of role that appeals to me.

''And, believe it or not, there was a time when I was going to play Garfield in a movie about the Hollywood blacklist, but it never came off.

''Neither one of them seemed interested in playing nice guys. And I don't want to play a nice guy either. There's an edge of danger to the characters I play.

''When I'm told not to play a role because the character is not redeemable in any way or that nobody will sit and watch him for a couple of hours, I

know I can make it work.''

Time after time, in ''An Officer and a Gentleman,'' ''American Gigolo,'' ''Looking for Mr. Goodbar'' and ''Breathless,'' Gere has demonstrated his ability to bring to life the complex protagonist with as many bad qualities as good.

''Obviously, the complex man is more interesting to play,'' he said. ''There are good and bad characteristics in all of us.

''The complex man is more real. I look around me and see that they are the real people. I couldn't play a yuppie or the equivalent. Boring.

''Peck, the cop I play in 'Internal Affairs,' is very manipulative, which is what the movie is all about - control. The image I had in mind while playing him was Iago, a man with unusual talents and a terrible weakness.

''In many respects Peck is a good cop. But the other side of him is like a big jungle cat, a lion or tiger, a killer who knows his jungle.

''He's not a serial killer or psychotic. He kills only when he's cornered. It's a lot of fun playing a villain of Peck's stature. It was like playing Iago and Richard III in drama classes.

''I felt it was important to play him because he deals with existential questions constantly, knowing he has a great deal to hide.

''In a lot of ways I'm as difficult to read as Peck is. You can't play anything that you don't have. If you invest a character with certain qualities, it means you are drawing on your own experiences. I had to have some recollection of control and manipulation to give them to Peck.

''He's a murderer and I'm not, but I have to feel what that is like. All the worst in humanity and all the best can be found to some degree in everyone.

''I've never played a villain this dark before. But I always wanted to. In college I auditioned for an Elizabethan drama titled 'The Changeling' to play the darkest character I'd ever read.

''But they didn't give me the part because I didn't look like a villain.''

Gere has long been an admirer of old Bogart and Garfield movies, although he's never compared his work to theirs.

''People criticized Bogart, saying he always played himself,'' Gere said. ''I thought he was one of the great ones. The hardest thing for an actor is to play close to himself.

''Great actors, like Bogart and Spencer Tracy, have something in common. As they got older their characters became less extreme, which allowed for pure communication.

''They reached a point where there's nothing between the inner soul and the audience. As actors - and people - they distilled down to a stillness and simplicity as a means of dealing with life.''

Gere, who's 40 and whose hair is graying, would like to think he is developing that stillness he admires so much in the great stars of the past.

#90011u2028 01/11/1990 ~United Press International

WASHINGTON (JAN. 11) UPI - Federal anti-drug chief William Bennett recommends in his new narcotic strategy that drug kingpins receive the death sentence - even if they are not involved in a murder, an administration official said Thursday.

The official also said that while final figures have not been completed, Bennett's proposed drug-fighting package is expected to total $10 billion to $11 billion, about a 10 percent increase over current spending.

In addition, said the official spoke on the condition of anonymity, the strategy would designate Miami, Los Angeles, New York City and Houston as ''high-intensity drug trafficking areas.''

Such designations would entitle them to additional federal assistance. But the official said since there is less than $25 million in the discretionary fund, the cities would get relatively little.

Bennett's so-called Drug Strategy 2 will be an update of the congressionally imposed plan that President Bush announced in September.

That one increased the war on all fronts - education, treatment, interdiction and law enforcement - although a wide range of critics still complained that it was inadequate to combat a worsening narcotic crisis.

The White House's Domestic Policy Council has reviewed the new proposal that was to be presented to Bush Friday. The plan is to be announced Jan. 29, the same day the president sends his proposed 1991 budget to Congress.

The administration official confirmed a report Thursday in The Washington Post that Bennett proposes to impose the death penalty on major drug kingpins, even if they or their organizations are not involved directly in a murder.

''You can assume that a drug network, with all its distributors and action cause a homicide somewhere along the line,'' the official said. ''This proposal would be an extention of the of felony murder rule.''

Under that rule, if someone is involved in a crime where a murder occurs, even if they are not the one to commit the homicide, they could receive the death sentence.

The official said Bush is expected to endorse Bennett's proposal, but that it may likely run into resistance on Capitol Hill.

Last year, Congress refused to approve a proposal by the president to expand the federal death sentence to seven new crimes: genocide, murder of a foreign official, murder by a federal prisoner, kidnapping, hostage-taking, murder for hire, and murder in aid of racketeering

The measure was included in the president's $1.2 billion anti-crime package, the bulk of which Congress enacted. Bush is now urging Congress to pass the rest of it.

A major administration goal in the drug war this year is to provide a greater role for the military.

The United States had planned to place a naval task force off the coast of Colombia this month to help monitor and intercept drug shipments, administration officials said.

But the plan was placed on hold pending consultations with Colombian officials who were outraged by early reports - denied by Bush - that the administration planned to ''blockade'' the South American nation.

#90011u2043 01/11/1990 ~United Press International

(JAN. 11) UPI - The government says there will be NO more use of the Jarvik artificial heart in humans. The Food and Drug Administration confirms it has recalled the fist-sized plastic, Dacron, Velcro and metal artificial heart because of problems in quality control and reports of adverse reactions. The heart is named for its inventor, Dr. Robert Jarvik. It has been implanted in more than 150 patients since 1982. Seattle dentist Barney Clark made history by living for 112 days with the device electrically pumping his blood.

Two former Japanese soldiers are heading home today after more than 44 years in the jungles of Malaysia. The men- now 71 and 77 years old- and 13 other Japanese joined up with communist rebels in Malaysia after Japan surrendered to end World War Two. The diehards decided to go home recently

after their guerrilla group disbanded. Yesterday, they left a jungle camp along the Thai-Malaysia border and met with relatives for the first time in 40 years. Doctors in Bangkok say the pair is healthy enough to travel.

Albania is denying reports that it is crushing a fledging reform movement in the tiny Balkan country. An official at the Albania Embassy in Belgrade Yugoslavia, calls ''sheer fabrication'' a published report that Albania has imposed emergency measures in a western town. The Yugoslav report says police patrols in villages have been stepped up following anti-government demonstrations in Albania. Self-isolated Albania is the last stronghold of orthodox communism in Eastern Europe.

#90011u2046 01/11/1990 ~United Press International

SYRACUSE, NY (JAN. 11) UPI - A University of California computer specialist, testifying Thursday in the first criminal trial arising from a computer virus, described how the ''worm'' created havoc by flooding computer networks nationwide and covering its own tracks.

''It's designed to break into as many computer systems as possible, and be difficult to detect,'' said Keith Bostic, a computer analyst at the University of California at Berkeley. ''It uses simple, quick, powerful attacks.''

Bostic detailed the layers of commands the program contained in the second day of testimony in the fraud trial of Robert T. Morris, 25, of Arnold, Md.

Morris is the first person to be prosecuted under a portion of the 1986 Computer Fraud and Abuse Act. He was indicted by a federal grand jury in July for allegedly intentionally introducing a program into military and research computer networks without authorization.

If convicted, Morris faces up to five years in prison and a $250,000 fine.

Bostic described how the computer worm used different methods to break into computer systems, then replicated quickly to overburden the systems and continued to operate at full strength while multiplying.

The program was technically a ''worm'' rather than a ''virus'' because it moved between computers and computer networks. A virus attaches itself to a program and spreads only when that program is shared.

''(The 'worm') was designed to solve or crack computer passwords,'' Bostic said. ''The worm actually had as part of its program a list of passwords that it would try.''

The list closely matched one investigators found in computer files that

Morris maintained at Cornell University, where the 1988 Harvard University graduate was attending his first year of graduate school, Bostic said.

If one of the approximately 430 passwords did not get the worm into a system, the program would use other basic information to try to crack the password. If that did not work, it would use a computerized dictionary until it found a match for the password, Bostic said.

If the computer's security was programmed to jumble passwords, the worm would try different methods to solve the jumble, he testified.

The worm was also programmed to change its own name to ''sh,'' the name of a common program, and to change its identification number frequently, which made it difficult to detect, Bostic said.

Prosecutors have argued that Morris programmed the worm into a computer at Cornell and it replicated out of control and froze about 6,000 computers linked to the major military and research computer networks Internet and Arpanet, officials said.

Bostic, the third of 14 witnesses Justice Department lawyer Mark Rasch plans to call, said he was told of difficulties with the university's computers on Nov. 2, 1988, when an ''excited and quite concerned'' colleague telephoned.

''We were becoming infected repeatedly. Our computers were being overwhelmed because hundreds of programs were being run on a single computer,'' he said.

The individual computers either crashed or became ''catatonic'' as the worm flooded them with commands, he said.

Thomas Guidoboni, a Washington lawyer representing Morris, said he will show that the worm was merely the result of an experiment gone wrong, and that the defendant did not intend to cause any damage with the program.

NEW YORK (JAN. 11) UPI - Goldman Sachs & Co. said Thursday it has acquired an 11.5 percent interest in Catalina Marketing Corp., a survey company specializing in electronic monitoring of consumers trends. Terms were not disclosed.

Anaheim, Calif.-based Catalina is a privately held company which has developed an electronic system allowing retailers to monitor consumers trends. The system tracks the items most frequently bought by shoppers. Catalina had revenues of $25 million in 1989.

The system also allows Catalina to inform retailers about the group of products that sell best and the new items that should be added to fast-going lines.

The system includes a PC and a printer hooked up at the store to bar code scanners, which allows users to store and study millions of data about consumers' trends, seasonal variations in consumers habits or needs, and groups of products targeted to a certain segment of shoppers. Catalina serves 1,700 stores nationwide and handles 32 million transactions per week.

President Tom Greer said he believes the company's business will experience a growth period, noting the very competitive retail environment requires sophisticated market-monitoring techniques.

Catalina said it represents virtually all major consumer products companies in the country and distributes incentives, such as shoppers' coupons, tailored to the profile of the clientele. "There are endless opportunities yet to be discovered through electronic marketing," said Michael O'Brien, Catalina's chief executive.

NEW YORK (JAN. 11) UPI - A Brooklyn grand jury will decide if family members who allegedly turned off their comatose father's respirator should be prosecuted in what would be the first such homicide case in state history, officials said Thursday.

If criminal charges are filed against the family of Leon Myszka, 78, it will be the first time New York state has criminally prosecuted someone for turning off a life-support machine, officials said.

Myszka, a retired tailor from Brooklyn, died Monday morning in Kings County Hospital after the alarm on his life support equipment sounded, police officer Fred Weiner said.

Three of Myszka's children reportedly blocked medical personnel who rushed

to the room to resuscitate Myszka and turn the equipment back on shortly after the alarm sounded.

Myszka was in the intensive care unit of the hospital, where he was taken Jan. 6 after suffering life-threatening head injuries in a fall in his apartment, a hospital spokesman said.

Ellen Borakove, a spokesman for the city's Medical Examiner, said that Myszka was not legally brain dead at the time his respirator was turned off, leading to the coroner's ruling Tuesday that his death was a homicide.

Evidence in the case will be presented to a Brooklyn grand jury, said District Attorney Charles Hynes.

Rose Gasner, a staff attorney for the Society for the Right to Die, said there have been several civil cases in New York involving extraordinary measures of supporting life, but no one has ever faced criminal charges for actually turning a life-supporting system off.

''It would be the first time in the state that the issue of stopping medical treatment will come up in a criminal context,'' Gasner said.

Walter Mordanut, a spokesman for the state Court of Appeals, said several civil cases have dealt with whether a respirator should be removed. ''But no criminal actions were contemplated by anyone,'' he said.

#90011u2086 01/11/1990 ~United Press International

NEW YORK (JAN. 11) UPI - Norway's state-owned oil company Thursday said operating profits nearly doubled to $1.5 billion in 1989 largely because of higher crude prices, which are expected to nosedive in 1990 as a result of overproduction by the OPEC oil cartel.

Harald Norvik, president and chairman of Norway's Statoil Group, said Statoil's budget is forecasting that the European benchmark North Sea Brent crude, which has been selling recently at more than $20 a barrel, will average $16.80 a barrel in 1990 compared to a 1989 average of $19.

Following a speech to the Norwegian American Chamber of Commerce, Norvik said although demand for oil is increasing "more than expected in many parts of the world" the 13-nation Organization of Petroleum Exporting Countries has the capacity to produce even more than it is today.

"That is the main element in this picture. That is why there is uncertainty more than the expectation of high prices," he said in an interview. He said the outlook is for alternating rapid increases followed by quick drops in crude prices. "In 1990 and many years after there will be rapid

increases and the opposite in oil prices."

Because of the projected lower crude prices, Statoil will have a "good" year in 1990 in terms of profits but not necessarily as good as 1989, Norvik said in a news conference held after the speech. Statoil had 1989 revenues of $10 billion, he said.

His price comments echoed those made in November by Pete Silas, chairman of Phillips Petroleum Co. Silas said the price of the U.S. benchmark West Texas Intermediate crude, which has been running near $23 a barrel recently, will average about $18.50 in 1990, the same as 1989's overall average.

Norvik said Statoil profits will get some help in 1990 because Norway, which clamped a lid on output following the 1986 world price collapse, has raised daily production by 200,000 barrels to 1.7 million barrels.

Norvik said work is proceeding on the shipping and storage needed for Statoil's first marketing of liquid natural gas in the United States. The company is aiming to sell 250 million cubic feet a day by 1994 and would double that amount if the initial venture proves successful.

Statoil is already supplying ten percent of the foreign crude sent to refineries on the U.S. East Coast and Norvik said, "We are well placed to take on a larger share of this market."

He added, "North West European refineries will continue to be our most imnportant market for crude oil. The U.S. is, however, taking on a more significant role in our trading activities."

Statoil also is studying the possibility of building with the Conoco unit of Du Pont in Houston a large methanol plant in Norway, which could meet any future European demand for cleaner auto fuels, Norvik said.

ORLANDO, FL. (JAN. 11) UPI - Dean Kleckner, an Iowa hog and soybean farmer, won his third consecutive term Thursday as president of the American Farm Bureau Federation, the country's biggest and most influential farm group.

The election makes Kleckner one of the nation's most visible farm advocates in a year critical to the future of farming.

The 1990 Farm Bill, the first rewrite of federal farm legislation in five years, is due by early February and will establish farm policy for the first half of the 1990s.

Moreover, this is the final year of negotiations on a rework of the General Agreement on Tariffs and Trade, the rule book on international trading.

U.S. Trade Representative Carla Hills, who spoke to the group Tuesday, is leading an effort to eliminate ''trade-distorting'' agricultural support payments abroad which she says costs the farm economy $11 billion annually

or $3,400 per farmer.

Kleckner, 57, of Rudd, Iowa, who has traveled to Switzerland, Uruguay and Canada to lobby for the U.S. GATT team, edged out Vice President Harry Bell, 62, a cotton and cattle producer from Ward, S.C., in the race for federation president.

After Bell's defeat in the presidential race, delegates re-elected him to his third term as vice president.

#90011u2123 01/11/1990 ~United Press International

NEW YORK (JAN. 11) UPI - Foreign exchange markets focused on the Swiss franc's gains against the West German mark Thursday, players said, leaving the dollar mixed at the end of a choppy New York trading session.

Participants said market interest was directed at trading in the Swiss franc and the German mark, which was sparked by some feisty comments from the Swiss National Bank governor in defense of his currency.

Monetary official Markus Lusser said a "critical point" had been reached in the Swiss unit's decline against the deutsche mark. He pledged that his central bank would parry the threat, and this jawboning triggered heavy sales of the mark and purchases of the Swiss franc.

"They sold the marks against the Swiss pretty aggressively," reported trader Thomas Paladino of the Amsterdam Rotterdam Bank N.V. in New York. The focus on "cross-trading," as non-dollar transactions are described on U.S. trading desks, left spot dollar trading somewhat adrift.

In late New York currency trading the dollar was changing hands at 1.6797, up slightly from 1.6788 Wednesday. Against the Japanese currency the

dollar was quoted at 145.38 yen, off from 145.56.

"The market is very confused - with all the cross trading going on the dollar trading seems very erratic," Paladino said. "Everybody seems to be playing Sherlock Holmes and trying to figure out what is going on."

The deutsche mark's emergence as the dominant world currency has shifted the focus of international markets away from the dollar, making trading more complex for traditionally dollar-oriented U.S. dealers.

In New York, the British pound eased to $1.6588 from $1.6630. Other dollar rates: 1.5050 Swiss francs, off from 1.5147; 5.7175 French francs, up from 5.7150; and 1,253.50 Italian lire, down from 1,254.

In Europe the dollar closed mostly higher. In Frankfurt it was unchanged at 1.6795 after intraday gains evaporated. In Zurich it closed higher at 1.5152 Swiss francs against 1.5098 Wednesday.

In Paris it finished at 5.7365 French francs, up from 5.6995, in Brussels at 35.35 Belgian francs, up from 35.09, and in Milan at 1,258.35 Italian lire, ahead from Thursday's closing rate of 1,251.90. In London the pound moved down to $1.6570 from $1.6615.

Republic National Bank in New York closed cash gold at $414.25 an ounce, up from $412.25. The New York Commodity Exchange settled gold at $414 an ounce, a gain from $412.40. Zurich gold rose to $413 an ounce from $409, while in London gold advanced to $412.50 an ounce from $409.25.

Republic closed cash silver at $5.33 an ounce, up from $5.325. Comex spot silver was unchanged at $5.306 an ounce. Zurich silver rose to $5.35 an ounce, against $5.30. London silver rose to $5.33 an ounce from $5.25.

#90011u2152 01/11/1990 ~United Press International

NEW YORK (JAN. 11) UPI - The narrow definition of the nation's basic money supply known as M1 rose $2.9 billion in the latest reporting week, while the broader aggregates M2 and M3 also grew, the Federal Reserve Board said Thursday. M2 gained $5.9 billion and M3 rose $2.0 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - rose to a seasonally adjusted average of $805.2 billion in the week ended Jan. 1 from a revised $802.3 billion the week before.

For the latest 13 weeks, M1 averaged $791.8 billion, a 6.7 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,221.4 billion in the latest week, up from a revised $3,227.3 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,064.4 billion in the latest week, up from a revised $4,044.4 billion, the Fed said.

-30- 1360

#90011u2179 01/11/1990 ~United Press International

NEW YORK (JAN. 11) UPI - Assets of the nation's 483 money market mutual funds increased $6.82 billion to $375.23 billion for the week ended Wednesday, the Washington-based Investment Company Institute reported Thursday.

The institute said broker-dealer fund assets rose $3.65 billion to $160.59 billion, assets of general purpose funds increased $1.26 billion to $124.50 billion and institutional fund assets climbed $1.91 billion to $90.14 billion.

"Powerful seasonal factors apparent every January propelled total assets of money market funds to a new record high," said Dr. Jacob Dreyer, vice president and chief economist at the Institute.

"The boost in assets was the biggest since last January and the third biggest weekly increase on record," Dreyer said. Interest rates remained volatile, but as their sideways movements were rather subdued, they did not have a substantial impact on asset flows."

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization of Holliston, Mass., said Wednesday average seven-day simple yields on money market funds fell to 7.80 percent from 8.06, while 30-day simple yields dropped to 7.92 percent from 7.94. The average maturity of fund portfolios was down to 38 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions mostly declined in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.14 percent, down from 6.16; Super-Now accounts 5.02 percent, unchanged;

six-month certificates of deposit 7.69 percent, down from 7.72; one-year CDs 7.70 percent, down from 7.71; 2 1/2-year CDs 7.65 percent, down from 7.66; and five-year CDs 7.67 percent, unchanged.

The average rate for a one-year adjustable rate mortgage rose to 8.38 percent from 8.35 percent last week.

The average rate on a 15-year fixed-rate mortgage went up to 9.42 percent from 9.41 percent and the average rate on a 30-year fixed-rate mortgage rose toto 9.66 percent from 9.63 percent.

The average rate for a four-year automobile loan fell to 12.12 percent from 12.13 percent.

#90011u2196 01/11/1990 ~United Press International

ANCHORAGE, AK (JAN. 11) UPI - Redoubt Volcano apparently erupted Thursday for the second time this week, but clouds prevented scientists from seeing whether the mountain spewed another burst of steam and ash into the air, geologists said.

''There was a seismic event at the volcano beginning at 10:01 (a.m. local time) that lasted for between 8 to 10 minutes,'' said Steve Brantley of the Alaska Volcano Observatory.

He described the activity as ''relatively small'' and ''much much smaller'' than the eruption Monday.

There was no confirmation of volcanic ash because the peak was obscured by dense clouds, Brantley said.

''We interpret the seismic event as a small explosion in the volcano, but we aren't able to confirm that'' because of the clouds, he said.

Crews at the Drift River oil facility 20 miles from Redoubt Volcano planned to start loading stored crude oil onto a tanker to reduce the chance of a spill should another violent eruption rock the area.

There had been no eruptions at the volcano, 110 miles southwest of Anchorage, since Monday's surprise blast sent ash 40,000 feet into the air.

Schools in the Soldotna area, hardest hit by the volcanic ash, remained closed for the third day as borough officials checked ventilation systems and looked for ways to settle the ash.

The first of two scheduled tankers arrived at the crippled Drift River facility early Wednesday and crews spent the rest of the day trying to restore power with temporary generators, said Larry Duncanson, terminal manager.

Duncanson said Thursday he expected pumping to start within ''a couple of hours.''

Power to the facility was knocked out by mudflows following an eruption Jan. 2. The facility also suffered partial flooding after the blast sent steaming boulders and mud down the Drift River.

The initial tanker was scheduled to take on up to 395,000 of the 904,000 barrels of crude currently stored at the facility. A second tanker was to arrive Saturday, but had been delayed a day.

Once the two tankers were loaded, more than 8 million gallons of oil would remain in the depot's seven storage tanks, oil facility officials said.

Officials of Cook Inlet Pipeline Co., operators of the facility, planned to meet with state environmental representatives Thursday to figure out what to do with the remaining oil.

There was talk of scheduling a third tanker, however, draining the tanks completely dry was said to be a difficult task, officials added.

Pipeline and state officials also were concerned that empty tanks would shift and float more easily than partially filled ones should another volcanic blast cause flooding.

The owners of the Drift River facility stopped storing additional crude,

forcing operators of offshore oil platforms in the inlet to halt or severely restrict production.

The prolonged shutdown could have severe economic effects and could threaten a contract to provide crude to Taiwan, said Jim Eason, director of oil and gas for the state Department of Natural Resources.

Eason also has said that closure of the aging platforms may render them less efficient once they are re-opened.

In Soldotna, 50 miles east of the volcano, officials continued to contend with an estimated one-half inch of sooty ash that fell Monday, said Jim Butler, a borough spokesman. Fierce winds Wednesday sent the ash swirling.

''Actually, we had a heck of a mess yesterday,'' Butler said. ''It was like being sandblasted. It was wicked.

''People are taking it a lot more seriously and that's good,'' he said of the ash situation. ''One thing we've learned is to be prepared. This is an on-going event.''

People were staying indoors is much as possible, while others are wearing surgical-like face masks when they went out, Butler said. There were reports of minor health problems, including stratchy throats and itchy eyes, he said.

Redoubt erupted to life Dec. 14 for the fourth time this century. The 10,197-foot volcano has simmered ever since, often sending ash clouds as high as 45,000 feet into the air.

WASHINGTON (JAN. 11) UPI - Geraldine Ferraro, the former New York member of Congress whose bid as the first woman vice presidential candidate ended in defeat, said Thursday she has learned some political lessons and is considering running for the Senate.

In an interview with United Press International from her home in the

Queens section of New York, Ferraro said it is ''much too premature'' to set up even an exploratory campaign committee but that she is beginning to think about a 1992 race for the seat held by Sen. Alfonse D'Amato, R-N.Y.

''I won't even be doing a poll until probably next year, early 1991, (but) I'd love to do it. I'd love to work in Washington and have input into what's going on in the world,'' the 1984 Democratic vice presidential candidate said.

Although the election is more than two years away, D'Amato appears somewhat vulnerable. The Senate Ethics Committee is investigating allegations D'Amato pressured federal housing officials to support projects backed by friends and campaign contributors and had improper ties to the scandal-ridden Wedtech Corp.

But Ferraro said ''it is a voting pattern (by D'Amato) that doesn't reflect the interests or concerns of the people of the state of New York '' not the suggestion of scandal, that prompted her interest in the seat. She acknowledged other New York Democrats will want in the race, too, and the party primary likely will be tough and expensive.

D'Amato, who has not announced his intentions for '92, was in Utah and unavailable for comment.

An official with the National Republican Senatorial Committee said despite D'Amato's current problems, New Yorkers would return him to the Senate.

''We don't have any doubt that he would be elected to a third term,'' said Wendy DeMocker, the committee's communications director.

Ferraro considered running against D'Amato in 1986, but did not, in part because she was under a Justice Department investigation into her husband's business practices - allegations that surfaced during her 1984 campaign as Walter Mondale's running mate.

''The Justice Department, surprise surprise, found no criminal action on my part or any civil liability,'' she said with some indignation, noting the investigation cost ''millions of taxpayer dollars.''

She said the intense media attention on her family and their finances taught her some lessons.

''I certainly know what people are capable of doing, my opponents and the press. But you know, in '84, I didn't expect it,'' she said.

Ferraro said she had been on the lecture circuit until last May - ''I decided I didn't want to do that any more'' - and most recently has been involved with the transition team of New York's new mayor, David Dinkins.

#90011u2265 01/11/1990 ~United Press International
(JAN. 11) UPI - Soviet President Gorbachev says Lithuanians who doubt they are part of the Soviet Union are ''simply NOT serious.'' Gorbachev began a three-day visit to the Baltic republic by meeting with independence-minded Communist Party members. He lectured residents of the capital to do their homework on ethnic relations in the Soviet Union... telling party members that Lithuania is part of the Soviet Union- quote- ''whether we like it or NOT.''

The White House says the Bush administration plans NO changes in the Social Security system. White House spokesman Marlin Fitzwater made the comment in response to questions about a plan from New York Senator Daniel Moynihan. Says Fitzwater- ''Democrats seem to want to fiddle around with the Social Security system. We do NOT.'' The proposal would put Social Security on a ''pay as you go'' basis, cutting by about one percent the payroll tax that generates the current surplus.

More streamlining at the Pentagon. Defense Secretary Cheney says new management cost-cutting will save an estimated 39-BILLION dollars over the next five years. The savings would be realized by trimming the military and defense work force by 42-thousand people. Cheney says that would save an estimated two-point-three-BILLION dollars in fiscal 1991, which begins October 1st. The projected reductions do NOT include fiscal 1991 military force reductions expected to total another 30-thousand.

WASHINGTON (JAN. 11) UPI - President Bush said Thursday he intends to appoint Richard Trefry, a retired Army lieutenant general, as director of the White House Military Office.

As Bush's military assistant, Trefry, 65, of Clifton, Va., would be responsible for coordinating presidential travel. A 1950 graduate of the U.S. Military Academy, Trefry retired from the Army in 1983.

#90011u2400 01/11/1990 ~United Press International

BOSTON (JAN. 11) UPI - Charles Stuart's brothers and sisters broke their silence Thursday about his murder-suicide case, denying through a lawyer that there was a family conspiracy to perpetuate a deadly hoax.

The lawyer, Richard Clayman, said at a news conference that only brothers Matthew and Michael Stuart knew last fall that Charles Stuart, as police believe, had killed his pregnant wife on Oct. 23, a crime the Boston furrier blamed on a black gunman.

While Matthew Stuart, 23, who told police he was an unwitting participant in the scheme, informed Michael Stuart within three days of the shooting about what really happened, other family members knew nothing until this month, Clayman said.

Meanwhile, a young woman whom police questioned about a possible love motive in Stuart's scheme issued a statement Thursday insisting she was ''never romantically involved'' with him.

Flanked by four of the Stuart siblings at his Chelsea law office, Clayman said three of them - Mark Stuart, Shelly Yandoli and Neysa Porter - did not learn of Stuart's involvement until three days before he jumped to his death Jan. 4 from a bridge over Boston Harbor.

News reports this week quoted family sources as saying that all but one of Stuart's siblings knew of his involvement three days after the shooting.

''The appearance that has evolved in my judgement is that some type of conspiratorial scenerio had existed by and between all these family members, sitting around talking about leaving something hidden. That is not true,'' said Clayman, who represents Michael Stuart, a firefighter from suburban Revere.

''I am comfortable, after an examination and talking to my client, that there is no violation of law and he did not violate any statute whatsoever; that his hands are legally clean,'' Clayman said.

Police now believe Charles Stuart shot and killed his wife, Carol, in Boston's racially mixed Mission Hill neighborhood after they attended a childbirth class at Brigham and Women's Hospital. Stuart also shot himself in the abdomen before calling police on his car phone, according to police. Stuart, who was 29, claimed they had been robbed and shot by a black gunman.

On Jan. 3 Matthew Stuart told authorities he met Charles Stuart near the hospital on the night of Oct. 23, and Charles tossed him a bag containing a handgun, Carol Stuart's engagement ring, and other items. He said he tossed everything but the diamond ring into the Pines River in Revere.

A telephone conversation between Stuart and a police dispatcher, recorded as Stuart drove through Boston with his wife beside him, brought the story national attention. Their baby boy, born two months premature by Caesarian section before Carol was pronounced dead, lived for 17 days.

Clayman, waving his hands and raising his voice to emphasize his points, said no conspiracy to cover up the truth had existed.

''Mrs. Yandoli, Mrs. Porter and Mark Stuart never knew anything directly or indirectly in any nature or way relative to the homicide until at least Jan. 1,'' Clayman said. ''When in fact the story was presented to them ... within a matter of hours the police were involved.''

None of the Stuarts present at the news conference commented during Clayman's statement.

After Matthew Stuart was questioned by authorities on the night of Jan. 3, investigators refocused their efforts on Charles Stuart and sought to arrest him. The next morning, he jumped from the Tobin Bridge, 210 feet over Boston Harbor.

Meanwhile, Deborah J. Allen, 23, of Millis, issued a statement through her lawyer denying that she had any romantic involvement with Stuart, whom she met while working at Kakas Furs, which Stuart managed, during the summers of 1988 and 1989.

Allen said she felt ''nothing but sympathy'' for Stuart after his wife's death and called him frequently at the hospital to cheer him up. Her boyfriend, Brian Heffernan, whom she met when both were students at Brown University, issued a concurring statement.

''The real tragedy is the death of Carol Stuart and her baby,'' Allen said. ''In comparison to the DiMaiti family's loss, the unjustified injury to my reputation is of little consequence.''

#90011u2419 01/11/1990 ~United Press International

HONOLULU (JAN. 12) UPI - Former United Airlines president Richard Ferris is among those who will be members of the board of directors of the parent company of Hawaiian Airlines, company officials said Wednesday.

J. Thomas Talbot, who with former baseball commissioner Peter Ueberroth led the group that purchased HAL Inc. at the end of the year, said Ferris has bought 10,000 shares of HAL and will be seated on the company's board of directors at its late January meeting.

All but three of HAL's former eight-member board will step aside at the meeting.

Among the other board members identified by Talbot was the former owner of the Seattle Mariners baseball team, George Argyros. Argyros, previously a co-owner of AirCal purchased 300,000 HAL shares, the company said.

The board will also include James Nordstrom of the Nordstrom Inc. retail chain, Southern California developer Ron Lane, investment banker George McCowan, Japan Air Lines regional vice president in Hawaii Tetsumi Hayashi Honolulu businessman Kenneth Brown, attorney Martin Anderson and HAL co-chairman John Magoon Jr.

Non-investor members are New York attorney Ko-Yung Tung and International Associaton of Machinists assistant general chairman Sam Poomaihealani.

Talbot, Ueberroth, and Ueberroth's brother John also will be on the board of directors.

A 15th board member will be appointed later, Talbot said.

#90011u2420 01/11/1990 ~United Press International

CAPE CANAVERAL, FL. (JAN. 11) UPI - Columbia's astronauts, hunting for a science satellite on a collision course with Earth, fired their rockets

three times Thursday setting the stage for Friday's rescue of the 11-ton orbital platform.

Besides keeping their eyes peeled for the satellite, the three-man, two-woman crew of America's 33rd shuttle mission spent three hours playing plumber to repair a broken ''humidity separator,'' one of two units used to keep the ship's cabin comfortable.

''There are some big globs,'' Columbia commander Daniel Brandenstein radioed mission control in Houston as the astronauts mopped up two gallons of water floating in the weightlessness of space with towels and a vacuum.

With the housekeeping chores behind them, Brandenstein and co-pilot James Wetherbee executed a series of rocket firings to close in on the Long Duration Exposure Facility and save it from a fiery demise in the planet's atmosphere.

''Pilot stuff takes long, careful thinking and exact and direct actions,'' astronaut Bonnie Dunbar said as the crew beamed home live video of the cockpit action. ''They take their time and the end result is perfection.''

During Friday's 9:48 a.m. EST rescue, Brandenstein was to guide the shuttle to within 35-feet of LDEF in the final carefully choreographed rendezvous, at an altitude of 196 miles just west of Hawaii, while Dunbar was to latched onto the satellite with the ship's Canadian-built, $50-million, 50-foot robot arm.

After a five-hour photographic examination of the school-bus sized satellite packed with a variety of experiments, Dunbar was to lower LDEF into Columbia's 60-foot cargo hold for the ride home Jan. 19 to Edwards Air Force Base, Calif., and eagerly awaiting project scientists.

LDEF exposed a variety of materials to the radiation, vacuum and temperature extremes of space, information needed by scientists working on the space station Freedom and Star Wars orbital defense project.

School children nationwide also looked forward to getting their hands on some of the 14 million seeds stowed on LDEF in an experiment to learn how plants are affected by space radiation.

As rendezvous time approached, flight director Bob Castle said the falling satellite appeared to be ''very stable, it was not tumbling, it was sitting there very perfect, probably the way we left it five years ago.''

Had NASA failed to launch a rescue mission, the 12-sided LDEF, placed in orbit in 1984 by the shuttle Challenger, would have slammed into the atmosphere March 9 and broken apart.

''There were times when we wondered if this day would ever come about,'' LDEF project scientist William Kinard said.

While no problems appeared on the horizon, NASA officials said if the mechanism used to lock the LDEF in payload bay failed - which is not likely - the shuttle crew could boost the satellite to a higher orbit for a future rescue attempt.

''We'd like to get it to an altitude of 225 miles from wherever we were at the time,'' said Granvil Pennington, the mission's lead flight director. ''That would give you enough longevity for six months and as you know, we've put together retrieve missions in as short as four months.''

After the successful launch Wednesday of an 8-ton Navy communications satellite from the shuttle, Brandenstein, 46, Wetherbee, 37, Dunbar, 40, Marsha Ivins, 38, and David Low, 33, also conducted medical and scientific experiments Thursday and photographed the planet with an IMAX camera for a wide screen movie that will be shown at the Smithsonian Institution.

Aside from the water leak, Columbia, which is making its ninth flight since it rang in the age of the space shuttle on April 12, 1981, performed flawlessly as it sailed around the globe.

Nonetheless, the five astronauts remained on guard for more water ''globs '' which also afflicted the shuttle Atlantis during a secret military flight in December 1988.

''Uncontained water can pose a unique problem in microgravity because liquids form globs that can cause a hazard to onboard electrical systems '' a NASA status report said. ''Flight controllers and the crew will watch ... carefully for any signs of moisture.''

#90011u2430 01/11/1990 ~United Press International

MILWAUKEE (JAN. 11) UPI - Milwaukee authorities Thursday were investigating the death of an infant girl who was born five weeks ago with enough alcohol in her bloodstream to make her legally drunk.

An autopsy Wednesday showed the girl's blood-alcohol level at birth was 0.16 percent, higher than the 0.10 percent level considered evidence of intoxication in Wisconsin.

The cause of the baby's death last Tuesday will be determined after more tests, authorities said.

Police said the baby was born with fetal alcohol syndrome, but officials said police could not ask that the mother be prosecuted unless the death

was due to recent abuse. The mother had a blood-alcohol level of .38 percent at the time of delivery, a medical examiner's report said.

Capt. Craig Hasting compared the case to those of babies born addicted to cocaine.

''I think we should re-examine the issue carefully because we may have a problem on our hands down the road,'' Hasting said.

Medical Examiner Jeffrey Jentzen, who performed the autopsy, said the baby also suffered from a condition known as microcephaly, or an abnormally small head.

#90011u2584 01/11/1990 ~United Press International

NEW YORK (JAN. 12) UPI - Campeau Corp.'s board Thursday approved the transfer of voting control over Federated Department Stores Inc. and Allied Stores Corp. to trustees, stripping Chairman Robert Campeau of his role in running the U.S. retail operations that have teetered on the brink of bankruptcy.

The board acted after Federated and Allied, in a filing with the Securities and Exchange Commission, projected a dire five-year outlook of substantial financial losses.

Campeau directors, in a decision announced late Thursday, said they had decided to appoint existing independent members to a committee for monitoring the U.S. retail operations until trustees can be named.

In a statement, Campeau said the committee will have the ''sole authority'' to monitor and to report to the board on the company's U.S. investments and to vote the shares of Campeau (U.S.)

Robert Campeau, chairman and chief executive officer, said he would be involved only in the management and development of the company's real estate business.

The board said it had recommended that the U.S. retail operations appoint a chairman and chief executive officer and that a majority of the Campeau (U.S.) board be made up of independent U.S. residents.

The Campeau directors said the board of Campeau (U.S.) and the new chief executive will be responsible for the management and financial restructuring of the U.S. operations. The Campeau board said it will disband its restructuring committee.

In filings with the SEC, Federated and Allied projected healthy

performances through fiscal 1994 by their department stores, which include such major chains as Bloomingdale's and Jordan Marsh.

Expected to offset the better-than-average showing by the stores and result in after-tax losses, however, is the need to repay billions of dollars associated with the leveraged buyouts of both retailers by Campeau the filings showed. Toronto-based Campeau bought Federated in 1988 for $6.6 billion and Allied a year earlier for $3.6 billion in transactions that relied heavily on debt.

''What is distressing is the filings didn't suggest profitability anytime in the next decade,'' said Janet Mangano, a securities analyst with Josephthal & Co. ''It definitely supports the case for a Chapter 11 (bankruptcy) filing.''

Campeau's board, struggling to stave off a petition for federal bankruptcy protection from creditors for Federated and Allied, has been negotiating with the company's banks and bondholders since Dec. 13 in an attempt to restructure the retail units' $7.4 billion combined debt due early this year.

A spokeswoman at the company's Cincinnati office said the board has been at the negotiating table with creditors all week and that meetings continued Thursday.

In addition to Bloomingdale's, Federated stores include Abraham & Straus, Burdines, Lazarus and Rich's. Allied's department stores include Jordan Marsh Goldsmith's, The Bon Marche, Maas Brothers and Stern's.

The SEC documents, made publicly available Thursday after the company filed them late Wednesday, presented two sets of financial projections - one for ''a normal operating environment'' and another assuming the retail units experience a restriction on credit.

The credit restriction scenario assumed Federated and Allied would complete a financial restructuring by March 1, enabling normal relations with suppliers. Campeau advised however, ''There can be no assurance that restructurings can be completed on satsifactory terms ... if at all.''

Under both scenarios the retailers were expected to lose money each year - with wider losses anticipated if credit restrictions occurred.

The projected losses for Federated ranged from a low $61 million in fiscal 1994 under normal operating circumstances to a high of $424 million in fiscal 1991 if credit restrictions were put in place.

For Allied, the range for projected losses was a low of $195 million in fiscal 1992 under normal operating conditions to a high of $310 million in

fiscal 1990 under credit restrictions.

Monroe Greenstein, a securities analyst with Bear, Stearns & Co., said a bankruptcy petition remained but one possible resolution to the retailers' debt crisis, even with a deadline looming next week for Federated and Allied to prove their solvency or be declared in default on a $2.34 billion loan.

''There are common equity holders, some with board representation, who would not like to see a bankruptcy because they would fare less well,'' he said. ''Others would not mind a bankruptcy because (their debts) are more secured.''

#90011u3004 01/11/1990 ~United Press International
(JAN. 11) UPI - The Jarvik artificial heart has lost its federal approval.

Food and Drug Administration officials confirm that the F-D-A recalled the device, citing problems in its manufacturing and reports of adverse reactions by patients.

In a letter, the F-D-A notified the makers of the fist-sized artificial heart, Symbion Incorporated, that it was withdrawing approval for further use of the device.

The electrically powered device first made history in late 1982 when doctors implanted it in Seattle dentist Barney Clark. The 63-year-old Clark lived for 112 days with the mechanical heart beating in his chest.

The Jarvik-7 heart, named after its inventor, Utah physician Robert Jarvik was hailed as a medical break-through and has been implanted in more than 150 patients.

But the device failed to fulfill expectations of providing a man-made implant to replace the most vital of human organs. All of the patients who received the Jarvik-7 heart on a permanent basis died after experiencing a variety of complications.

In withdrawing its approval of the artificial heart, the F-D-A said the risks to patients were outweighing the benefits. But it said it's willing to reconsider its decision if the makers of the heart ''turn things around.''

#90011u3046 01/11/1990 ~United Press International
(JAN. 11) UPI - Defense Secretary Cheney says he's looking to close foreign as well as domestic military bases to help trim the Pentagon budget.

Cheney is NOT saying how many bases he wants to close but describes the proposed number as ''extensive'' and ''more than two.''

The proposal will come in the fiscal 1991 defense budget to be presented to Congress at the end of the month.

Cheney says he hopes to save 39-BILLION dollars in Pentagon spending during the next five years. He estimates 42-thousand people will be slashed from the military and civilian payroll.

Cheney adds that his reforms will eliminate abuses like the ''600-dollar

toilet seats'' that came with the military procurement scandal several years ago.

Defense Secretary Cheney says his plan to send U-S warships to Colombia to nab drug traffickers is ''on hold.'' But Cheney says he's hoping the idea will be revived at some point following consultations with Colombia's government.

The White House found itself in hot water with Colombia after word of the operation was leaked by Bush administration officials. The Bogota government did NOT take kindly to the use of the word ''blockade'' in some of the reports and the Bush administration postponed the plan this week.

But the administration is making progress on another front in its anti-drug campaign. Officials in Latin America say a hemispheric drug summit in Colombia next month will NOT be used to debate the U-S invasion of Panama.

Peruvian officials say strained relations with the United States will NOT affect its participation in the summit or its battle against drug traffickers.

#90011u3805 01/11/1990 ~United Press International

(JAN. 11) UPI - Geologists say Redoubt Volcano near Anchorage, Alaska, erupted again today. Scientists called the tremor in the mountain ''relatively small.'' But crews at the Drift River oil facility 20 miles away plan to start loading oil onto a tanker to reduce the chance of a spill in case of another volcanic eruption. Nearby schools remain closed for a third day because of Redoubt's ash. Area residents report scratchy

throats and itchy eyes.

Rain abated today in the flooded Pacific Northwest, but rivers kept rising and flood warnings remained in effect. The once-in-a-century floods have washed thousands of people out of their homes in storms that claimed at least six lives in Washington state and Oregon. A breached dike caused the most serious flooding in the region, prompting the closure of 12 miles of Interstate 5 near Centralia, Washington, about 100 miles south of Seattle.

Former Chief Justice Warren Burger is urging Americans to accept some form of gun control. Burger has owned sporting rifles all his life. But in a published report... he says the right to bear arms for hunting is recreational and NOT essential to survival as it was when the Constitution was written. Burger called for requiring gun buyers to fill out applications and wait 10 days for a license.

Rosa Parks, the so-called ''Mother of the Civil Rights'' movement, is urging young blacks NOT to give up their vigilance in preserving the rights others fought so hard to gain. The 76-year-old Parks told a news conference in Tallahassee, Florida, today that she's concerned about the resurgence of hostility toward blacks. Parks' refusal to give up her bus seat to a white man in Montgomery, Alabama, more than 30 years ago sparked an era of non-violent civil rights demonstrations.

-30- 1954

#90011u3989 01/11/1990 ~United Press International

(JAN. 11) UPI - Mikhail Gorbachev tried to defuse a potentially volatile situation in the republic of Lithuania today. He told Lithuanians in the capital of Vilnius that their demands for immediate secession from the Soviet Union will NOT be allowed. But he offered unprecedented freedom in a new Soviet federation, and said republics will NOT want to leave such a federation. He told workers at an engine plant that people who think they should leave the Soviet Union- quote- ''must think NOT seven times but a thousand times or more'' about such a serious move.

Albania reportedly has imposed emergency measures in a western town and stepped up police control in villages following anti-government demonstrations. The tiny Balkan nation is the last stronghold of orthodox communism in Eastern Europe. A Yugoslav newspaper reports that the Albanian police strictly control the movement of people and traffic in villages... and that passes are again required for internal travel. An Albanian Embassy official in Belgrade calls the report ''sheer fabrication.''

Defense Secretary Cheney today came up with a plan to save 39-BILLION dollars in military spending over the next five years. The savings would come from slashing 42-thousand jobs and cutting down management costs such

as consultant fees and middle-level bureaucrats. But House Armed Services Committee Chairman Les Aspin says the proposal needs a blueprint for implementation.

It was like a scene out of Eastern Europe, as the walls came tumbling down in Panama today. Panamanian President Endara swung a sledgehammer into the wall of the former headquarters of deposed ruler Manuel Noriega. Crowds cheered on the destruction of the structure in Panama City. Panama says it will replace the building with housing for those made homeless by last month's U-S invasion. But so far there's NO money for the project.

#90011u4067 01/11/1990 ~United Press International

(JAN. 11) UPI - News from around the world and across the nation... the latest details and developments from the wires of United Press International.

Soviet President Gorbachev today promised Lithuanians unprecedented freedom in a new Soviet federation he's proposing.

During a visit to Lithuania's capital, the Kremlin leader rejected calls for immediate secession by the restive Baltic republic as ''simply NOT serious.''

Gorbachev said, however, a draft law may give each of the Soviet Union's 15 republics the right to leave. But he made it clear that he won't accept any unilateral secession by Lithuania or any of the other republics.

He told workers at an engine plant in Vilnius- quoting now- ''Those who are convinced that they can leave the Soviet Union must think NOT seven times but a thousand times or more.''

The Soviet leader explained that although the Soviet constitution now provides for secession, it does NOT outline the process since NO republic has ever attempted to withdraw from the Soviet Union.

Gorbachev argued that the republics would NOT want to leave the new federation he is building- saying there will be a wide-ranging political independence, ''an unprecedented independence both political and economic.''

President Bush plans to reduce the foreign debt of some South American countries who take up arms in the war on drugs.

That idea is put forth in a preliminary agenda for the February 15th drug summit in Cartagena. U-S officials have submitted the agenda to representatives of the attending countries, Peru, Bolivia, and Colombia,

at a pre-summit meeting in Santa Cruz, Bolivia.

The reductions in foreign debt are to compensate for income lost from curtailed cocaine production. The United States would also give trade preferences to products from the three countries.

The U-S proposal says Bush will ask Congress for new funds for the three Andean nations each year from 1991 to 1994.

In return, each nation would use its military to combat drug traffickers.

At the pre-summit meeting, Peru and Colombia pledged NOT to turn the summit into a confrontation over last month's U-S invasion of Panama.

#90011u4102 01/11/1990 ~United Press International
(JAN. 11) UPI - In eastern Europe today thousands staged a protest in East Berlin... and there are reports of turmoil in the last orthodox communist stronghold of Albania.

About 20-thousand people formed a human chain around Parliament in East Berlin to condemn plans to form a new internal security force.

The demonstration came only hours after East German Prime Minister Modrow defended his beleaguered communist-led government and invited participation from opposition groups.

In Albania, a published report says the tiny Balkan nation imposed emergency measures in a western town and stepped up police control in villages following anti-government demonstrations. But an Albanian Embassy official in Belgrade, Yugoslavia, calls the report in a Yugoslav newspaper ''sheer fabrication.''

Moslems in Bulgaria today attempted to ease nationalist protests by promising that they're NOT seeking a separate Moslem Turkish state.

And Romania's new agriculture chief appealed to the West for aid, saying the country needs food and has only enough meat to feed two-thirds of the population this year.

French President Mitterrand met with Japanese Prime Minister Kaifu in Paris today and sought to smooth over an insult by the European Affairs Minister.

European Affairs chief Edith Cresson in an interview yesterday called Japan an ''adversary'' that ''wants to conquer the world.''

Mitterand instead praised Japan's ''remarkable work dynamism and efficiency.'' But Mitterrand complained that sometimes the Japanese market is ''impenetrable.''

Kaifu replied that Japan had canceled customs duties on more than one-thousand products over the past six months. Kaifu says Japan is ''on the right road.''

On another matter, the two agreed that China should influence the Khmer Rouge to stop the fighting in Cambodia.

#90011u4157 01/11/1990 ~United Press International

(JAN. 11) UPI - The walls came tumbling down today on the former headquarters of deposed Panamanian dictator Manuel Noriega.

President Guillermo Endara gritted his teeth and swung a sledgehammer into the concrete wall as a crowd of about 200 spectators shouted ''Harder! Harder!''

As cranes and backhoes began to knock down the outer walls of the compound spectators picked up souvenir pieces of concrete.

The demolition of the headquarters of the Panamanian Defense Forces symbolized the end of a dark era of repressive militarism to many Panamanians. The bullet-pocked, four-story compound is being razed to make way for housing for families left homeless by the December 20th U-S invasion.

About 24-hundred people who live near the headquarters in a run-down neighborhood of Panama City were made homeless by the invasion.

Defense Secretary Cheney today announced management reforms that he says will eliminate abuses that led to the Pentagon procurement scandal several years ago.

Cheney's streamlined management measures call for slashing 42-thousand people from the military and civilian payroll and saving 39-BILLION dollars in Pentagon spending over the next five years.

In addition, Cheney says he'll recommend ''extensive'' military base closures in the fiscal 1991 defense budget that will be presented to Congress January 29th.

Congress last year approved the closing or partially closing of 86 major U-S military bases.

The workforce reductions and an expected withdrawal of at least 30-thousand U-S troops from Europe signal a major retrenchment by the Pentagon.

The change comes in the wake of the drastic upheaval in Eastern Europe, where many Soviet bloc nations have rejected communism in favor of democratic reforms.

#90011u4232 01/11/1990 ~United Press International

(JAN. 11) UPI - The crew of the shuttle Columbia is closing in on a satellite they must rescue from a dying orbit.

The astronauts fired their rockets three times to home in on the satellite and kept their eyes peeled for the school-bus sized object. The satellite was hurled into space five years ago. Since then, it's exposed a variety of materials to the radiation, vacuum and temperature extremes of space.

The information will be used by scientists working on the space station Freedom and the ''star wars'' orbital defense system.

School children nationwide will also get their hands on some of the 14 14-Million seeds stowed on the satellite to learn how plants are affected by space radiation.

The three-man, two-woman crew also spent three hours today fixing a machine used to keep the ship's cabin comfortable.

The astronauts used towels and a vacuum to mop up two gallons of water floating in the weightlessness of space.

Scientists think Redoubt Volcano in Alaska erupted again today, but nobody wants to get close enough to be sure.

Geologists measured a ''relatively small'' explosion in the mountain, 110 miles southwest of Anchorage. But they couldn't tell if Redoubt was spewing steam and ash because clouds are draping the peak.

A surprise blast Monday sent debris 40-thousand feet skyward.

20 miles from the volcano, crews at the Drift River oil facility plan to load crude oil onto a tanker to reduce the chance of a spill in case of an eruption.

But officials say its very difficult to drain the storage tanks dry, and

plan to leave more than eight-Million gallons of oil in them. Operators of the facility plan to meet state environmental workers tomorrow to figure out what to do with the remaining oil.

One state official says a prolonged shutdown of the facility could have severe economic effects on the area.

#90011u4431 01/11/1990 ~United Press International

(JAN. 11) UPI - Soviet President Gorbachev visited Lithuania today, and rejected the republic's demands for immediate secession from the Soviet Union. But he said a draft law might someday give every republic the right to leave. Gorbachev said the Soviet constitution now provides for secession, but does NOT outline the process. He said a law which would establish such a mechanism is being prepared for parliament to consider.

In El Salvador, the air force pounded suspected guerrilla hideouts near the capital today. The bombing was part of a ''softening-up operation'' aimed at driving leftist rebels out of the mountainous terrain north of San Salvador, where they've been hiding since a huge rebel offensive

against the capital in November. The latest bombing came as rebel leaders offered an immediate end to the hostilities... in exchange for a cut-off in U-S military aid to the Salvadoran government.

A Bush administration official says federal anti-drug chief William Bennett advocates the death penalty for drug kingpins- even if they are NOT involved in a murder. Bennett's recommendation comes in his second strategy for fighting drugs, which he'll present to President Bush tomorrow. The program is expected to cost 10-BILLION to 11-BILLION dollars. It would especially target Miami, Los Angeles, New York City and Houston.

Strong winds whipped through the Midwest and northern Plains today, knocking down power lines in northern Illinois and forcing schools to close in Michigan's Upper Peninsula because of near-blizzard conditions. In Chicago, high winds pushed pedestrians into intersections and forced the closing of the skydeck on the world's tallest building, the Sears Tower. In Iowa, winds gusted to 50 miles an hour.

-30- 1931

#90011u4445 01/11/1990 ~United Press International

(JAN. 11) UPI - Florida Governor Bob Martinez today asked President Bush to declare seven Florida counties disaster areas. A Christmas freeze ruined Millions of dollars worth of citrus crops, and thousands of farmworkers are unemployed. A disaster declaration would let farmworkers and growers apply for special federal unemployment assistance and low-interest loans.

Lawyers for the American Civil Liberties Union say a Pennsylvania federal judge today blocked most of the provisions of the state's tough new abortion control law... just days before it was to go into effect. U-S District Judge Daniel Huyett issued a temporary injunction covering provisions requiring spousal notification... a 24-hour waiting period... and certain informed consent procedures that a woman must undergo before obtaining an abortion.

Those who think they're paying a lot of rent ought to try living in Tokyo's Ginza district. A new survey says the average rent in The Ginza is 675 dollars... per square foot. Nathan Road in Hong Kong is second on the list, drawn up by the real estate firm of Hubert and Peters. But fear NOT, New Yorkers. The Big Apple dominates the top 10 with four separate areas- East 57th Street, Fifth Avenue, Madison Avenue and Lexington Avenue.

Ex-Eagles member Don Henley took the most honors for a single performer in nominations for the 32nd Annual Grammy Awards announced today in Beverly Hills. Henley's ''The End Of The Innocence'' picked up nominations for record and album of the year, song of the year and best male rock vocal

performance. Billy Joel's ''We Didn't Start The Fire'' and Bette Midler's ''Wind Beneath My Wings'' each received three nominations, including one for record of the year.

#90012b0017 01/12/1990 ~Business Wire

WESTBOROUGH, MA (JAN. 12) BUSINESS WIRE - ASA International Ltd. (NASDAQ:ASAA) announced here Friday that it has completed the acquisition of the assets of Trade Data Services Inc. of Savannah, Ga., a subsidiary of International Advisory Services Inc.

Under the terms of the purchase and sale agreement, ASA acquired the customers and assets of Trade Data.

The operations of Trade Data, which markets computer solutions for customs house brokers and freight forwarders on an IBM platform, will complement ASA's existing International Trade Systems division, located in Salem, N.H., which provides multi-user computer solutions to the same market on a Digital Equipment computer systems platform.

ASA's International Trade Systems division, the leading supplier of computer solutions to the customs house brokerage/freight forwarder industry, had a 25 percent share of the market of computerized customs house brokers and freight forwarders in a January 1989 National Customs Brokerage study published by the accounting firm if Ernst & Whinney. With the acquisition of Trade Data, which had a 9 percent share in the Ernst & Whinney study, ASA consolidates its position in the marketplace. In the same study, nearest national competitors of the new operating unit had, respectively, a 5 percent and 4 percent market share.

According to Robert L. Voelk, division president of the International Trade Systems unit and executive vice president of parent company ASA International. ''The acquisition of Trade Data certainly increases our market share and gives us a commanding position in the current market, but more importantly, it enables us to provide an IBM-based solution. In the long term, the ability to provide a customs house brokerage/freight forwarding solution on the two leading computer platforms, IBM and Digital -- to provide brokers with a choice -- will be what allows us to maintain, and augment, our market share.''

Trade Insurance Services Inc., a subsidiary of International Advisory Services Inc. and a leading supplier of insurance to the international trade industry, will continue to promote the Trade Data and existing ASA products, providing ASA with increased market penetration capability.

#90012b0030 01/12/1990 ~Business Wire
REDDING, CA (JAN. 12) BUSINESS WIRE - American Eagle Industries Inc. is pleased to announce an agreement with Nashville, Tenn.-based Mr. Transmission, for the sale of American Eagle's aftermarket automotive overdrive systems through Mr. Transmission's retail chain. Mr. Transmission currently operates 96 transmission stores in the southeast.

Charles E. Chambers, consultant to American Eagle Industries and president of United Amalgamated Industries, AEI's 85 percent shareholder, stated: "This agreement with Mr. Transmission is another important step for American Eagle in demonstrating the growing market acceptance of our fuel efficient overdrive systems.

"Walter W. Smith, president of Mr. Transmission, believes that their retail chain can sell as much as $1.5 million worth of American Eagle Overdrive units monthly during the initial three to six months of marketing, with a potential buildup as much as $3 million monthly.

"Mr. Transmission's agreement to carry our product is an important addition to our more than 325 distributors, and 4,000 jobbers and manufacturers representatives. The addition of Mr. Transmission provides a significant boost to our revenue growth for 1990 and beyond."

American Eagle Industries Inc. is currently in the process of finalizing a private placement of its common stock. If successful, the company expects to qualify for NASDAQ listing of its stock and will apply for NASDAQ listing upon completion of the private placement. American Eagle Industries Inc. is a publicly owned company whose common stock is traded in the over-the-counter market.

#90012b0038 01/12/1990 ~Business Wire
LOS ANGELES (JAN. 12) BUSINESS WIRE - Color Systems Technology Inc. (ASE: CLR) Friday announced that an agreement has been reached for the licensing and color conversion of the highly successful black-and-white television series "Peter Gunn."

This market-proven, 114-edisode series, starring Craig Stevens and featuring the acclaimed music of Henry Mancini, was aired on the ABC and NBC networks from 1958 through 1961.

Under terms of the agreement reached with its owner, International Creative Exchange, the series will be licensed for a period of 15 years and distributed throughout the world by International Creative Exchange (Color Systems will receive the reveneus from colorization and retain a residual equity interest at the end of the period). The company anticipates that the financing for this project will be completed shortly.

Created and produced by Blake Edwards, "Peter Gunn" set a new style and standard for detective dramas from the very first episode. His clean-cut role as a sometimes reluctant champion, caught in the tawdry world of Los Angeles crime, provided gripping drama. Peter Gunn became a legend in his own time and promises to continue that legend in the decade of the 90s.

Gunn's adventures are shared by Edie (played by Lola Albright). She provides the romantic interest and a considerable amount of the jazz singing, perhaps one of the more memorable elements of the series.

Henry Mancini created the music for "Peter Gunn." Herschel Bernardi plays Lt. Jacobi, Gunn's tireless friend and "long arm of the law." Joining Stevens, Albright and Bernardi are a list of guest stars that reads like a "who's who," including Diahann Carroll, Norman Fell, Ted Knight and James Coburn.

Buddy Young, president and chief executive officer, indicated that "this agreement represents a major step in broadening the company's customer base. We believe that the color conversion of successful black-and-white television series represents a major new opportunity for Color Systems."

A spokesman for International Creative Exchange said, "We are pleased to be working with Color Systems Technology on the revitalization of this classic series, opening it up to a vast new worldwide audience."

CONTACT: Color Systems Technology Inc., Los Angeles, Buddy Young, (213) 822-6567 or Rockwell Communications, Los Angeles, Arthur E. Rockwell, (213) 477-6855.

AKRON, OH (JAN. 12) BUSINESS WIRE - Directors of A. Schulman, Inc., a leading international supplier of plastic compounds and resins, today voted to increase the Company's quarterly cash dividend by 10 percent. The dividend was raised to $.11 per share from the $.10 per share paid in prior quarters.

The increased dividend will be payable on February 7, 1990 to shareholders of record on January 29, 1990.

The Company said the dividend increase reflects recognition by the Board of the higher profit levels and its confidence that this trend will continue.

#90012b0055 01/12/1990 ~Business Wire

SAN JOSE, CA (JAN. 12) BUSINESS WIRE - ARIX Corp. (NASDAQ/NMS:ARIX) Friday announced the addition of three new models to its System90 family of UNIX-based superminicomputers.

The new computer systems incorporate a new streamlined architecture which offers enhanced I/O throughput performance in relational database management systems and communications applications, as well as the ability to support new innovations such as sophisticated graphical user interfaces.

These additions to the System90 family, designed to provide a high-performance applications platform for the commercial marketplace, create a comprehensive family of systems to fit a variety of applications. Expandability within the model and compatibility within the family allows users to escalate the connectivity and computing power for maximum system flexibility.

The Model 90/25 supports from 16-128 users, offers up to 160 MB of memory, and can provide over 5 GB of disk storage. The Model 90/45 supports from 128-256 users, offers up to 416 MB of memory, and can provide over 63 GB of disk storage. The Model 90/85 supports from 256-512 users, offers up to 416 MB of memory, and provides over 82 GB of disk storage.

The Model 90/25 represents the company's entry-level system in this family. A high level of scalability allows end-users to increase system capabilities both within the model and within the family. End-user pricing for the Model 90/25 and 90/45 will be approximately $52,000 and $128,000 respectively, with volume deliveries beginning in March. The Model 90/85 will start around $260,000, with volume deliveries beginning in June.

The new models are binary compatible with the existing System90 platform, allowing applications software and all communications products currently available to System90 users to run on the new models. As a result, the latest in database software and a large library of application software is immediately available on the new hardware platform.

ARIX Corp. designs, manufactures, and markets high-performance UNIX-based symmetric multiprocessor computer systems. ARIX distributes its systems

almost exclusively through domestic and international reseller channels.

LAFAYETTE, CA (JAN. 12) BUSINESS WIRE - BPI Hotels Inc., a company of the Bedford Hospitality Group in Lafayette, announced Friday that it has acquired the Parkside Hotel, a 342-room luxury hotel in Walnut Creek, Calif. The purchase price was not disclosed.

The hotel is located in downtown Walnut Creek near Interstate 680 and has two restaurants and more than 9,000 square feet of banquet and conference facilities.

BPI Hotels Inc. will manage the hotel. "There is a strong demand for luxury rooms and conference facilities in this area of Contra Costa County," said Robert Burke, president of Bedford Hospitality Group. "We're in a rapidly expanding office market that is expected to continue its high demand for first-class hotel space." Burke also expects the hotel to attract guests because of the hotel's convenient location to BART and Interstate 680.

The hotel has concierge service, a swimming pool and valet parking. All rooms have mini-bars and three phones. "We're considering a national reservation system and a possible name change for the hotel to gain broader market participation," said Burke.

Grubb & Ellis of San Francisco served as broker. The seller is Calren II Inc., a wholly owned subsidiary of First Bank Systems of Minneapolis.

BPI Hotels Inc. manages quality restaurants including the award-winning Lascaux Bar and Rotisserie in San Francisco and the recently remodeled Tourelle Restaurant in Lafayette. The company is also currently constructing a 130 all-suite hotel scheduled to open in the fall in Temecula, Calif.

BPI Hotels Inc. is a member of the Bedford Hospitality Group and an affiliate of Bedford Properties Inc., a leading real estate development and management organization in the Western United States.

Bedford Properties develops land throughout California, Hawaii and other western states. Its portfolio contains more than 11 million square feet of buildings managed by the company. Other Bedford ventures include art

galleries, a newspaper chain and a fine art book publishing company.

NEW YORK (JAN. 12) BUSINESS WIRE - Chaix & Johnson, a leading Los Angeles-based interior planning, design and architectural firm specializing in retail, shopping center and mixed-use developments, is participating in the National Retailers Merchandising Association show Jan. 14-17 at the New York Hilton.

The firm's booth, No. 90-91, in Exhibit Hall 1, will present new retail design concepts representative of "cultural landscapes" developed for Chaix & Johnson's international clientele, announced Wayne Y. Takeuchi, president.

"Of special interest to NRMA attendees is Melbourne Central, a 860,000-square-foot, mixed-use development for Victoria Central Pty. Ltd., including a 380,000-square-foot Daimaru anchor store, which presents five different cultural landscapes for shoppers, integrated with 200 shops and the anchor in the largest private development in the Southern Hemisphere," said Takeuchi of the spectacular retail environment in Melbourne, Australia.

"Members of our management and design staff will be available to NRMA show attendees to discuss new trends emerging in Asia and the Southern Hemisphere where department stores are waging massive campaigns to win back bored customers with lifestyle merchandising and cultural landscaping " said Takeuchi.

On hand at the design firm's booth, in addition to Takeuchi, will be Scott J. Kohno, executive vice president, Edward H. Marquez, executive vice president, Julie White, senior designer, Tom Turner, project manager and designer, and Audrey Castillo, marketing coordinator.

Among Chaix & Johnson's current projects are Bullock's in Sherman Oaks, Calif., Central World Trade Center in Bangkok, Thailand, Changi Airport passenger terminal in Singapore, Daimaru stores in Melbourne and Tokyo, Macy's K Street Mall in Sacramento, Matsuya Ginza in Tokyo, Melbourne Central Shopping Center in Melbourne, Otaru Grand Hotel in Hokkaido, Japan and Vancouver Airport's Allders duty-free shop.

In 1988, the National Retailers Merchandising Association/Institute of Store Planners awarded the firm first place honors for its design of the food floors of Marui Imai in Japan.

The firm has offices in London and Singapore in addition to Los Angeles and provides a full range of professional architecture, interior planning and design services, including master planning, interior and architectural design, graphics/signage and visual presentation.

#90012b0099 01/12/1990 ~Business Wire

CINCINNATI (JAN. 12) BUSINESS WIRE - Queen City Home Health Care, a Cincinnati-based distributor and national marketer of durable medical equipment (DME), announced a company restructuring and layoff of part of its workforce.

John Chase, vice president for human resources, said the layoffs are immediate. Anticipated changes in the Medicare program will require the company to modify its marketing strategy, resulting in a reduction in force, he said.

Also, claims processing problems at Medicare have dramatically slowed down the agency's reimbursement payments to DME suppliers, causing industry-wide dislocations, Chase said.

Chase said the company views the layoffs with ''great regret.'' He said the company is optimistic about future sales. A new marketing strategy is being formulated.

The company is using a local out-placement service to help its laid off workers find new jobs, Chase said.

Queen City Home Health Care, 4040 Rev Drive, has been located in Cincinnati since 1982. The firm employs approximately 600 nationally.

LOS ANGELES (JAN. 12) BUSINESS WIRE - New World/Trans-Atlantic Pictures (NW/TAP) Friday announced that New World International President William Shields has been named president and chief executive officer of the newly formed NW/TAP.

Shields, who is currently chairman of the American Film Marketing

Association, brings over 20 years of experience in international distribution to his new position.

NW/TAP intends to release 10 new motion pictures internationally each year. Current company plans call for four in-house productions and six acquisitions per year with an expectation that production plans for its first two films and two to three acquisitions will be announced by the 1990 Cannes Film Festival in May. Film budgets are projected to fall within the $4-8 million range.

New World Video operations will continue to function with a reduced staff while a licensee is sought for its catalog of some 270 released titles and the numerous unreleased movies-of-the-week, mini-series and other programming in its inventory.

The company is currently compiling all pertinent information needed by a prospective licensee of the catalog to evaluate the New World video library.

NW/TAP will operate a full-service, international sales company representing all rights for its own library of some 180 feature films, for its new productions and acquisitions and for foreign video rights to over 300 hours of New World Television programming.

NW/TAP will also enter the television arena with an initial emphasis on international co-production of long-form programming and the gradual development of series programming abilities. A new, first-run, family-oriented series of 26 one-hour programs is expected to be ready for international licensing by MIPTV in April.

In addition to its Los Angeles headquarters, NW/TAP will maintain overseas offices in London and Sydney to service its library and worldwide customer base.

NW/TAP's staff of 24 persons is already in place and operating at full capacity and is composed largely of the same personnel who previously made up the New World International organization before the asset sale transaction which took place in December 1990.

Key executive appointments include: Murry Schultz, director of theatrical sales; Naomi Mishima, vice president of finance and administration; John Lloyd, as controller; Loraine Yglesias, director (distribution servicing) international servicing; and Wilma Arnold-Cyrus, director (marketing) international servicing.

Martin Goldthorpe will head NW/TAP's operations in London as its managing director and Ray Donohue will represent the company in Australia.

NW/TAP will not be involved in the domestic theatrical distribution of feature films.

SAN RAFAEL, CA (JAN. 12) BUSINESS WIRE - WordStar International Inc. (NASDAQ:WDST) Friday announced revenues of $8,402,000 and a net loss of $2,826,000 (21 cents per share) for its first quarter ended Nov. 30, 1989.

In the like quarter of the preceding year, the company reported a net loss of $2,607,000 (19 cents per share) on revenues of $9,656,000. Cash and equivalents totaled $15,492,000 on Nov. 30, 1989 as compared to $15,370,000 on Nov. 30, 1988.

The results of the first quarter in fiscal year 1990 reflect a decline in North American sales of 36 percent and a 17 percent growth in international sales. Operating expenses remained consistent with the first quarter of fiscal 1989 except for the severance and outplacement cost of $470,000 in fiscal 1989.

''WordStar's North American retail revenues were off in the first quarter because of a general move seen in the software industry to reduce inventories in the retail channel and our conscious decision to support this move.

''Update sales are doing well given that our last product release was in the third quarter of fiscal year 1989. WordStar's government, education and OEM revenue streams were also off in the first quarter. However, our product sell-through still shows signs of improvement in the retail channel,'' said Dean Scott, V.P. and general manager of WordStar North America.

WordStar and Challenger Software are engaged in settlement negotiations for the lawsuit filed between them regarding the Macintosh product. Although the final details of the settlement are still being worked out, the parties are confident that a final settlement agreement will be reached.

WordStar International Inc., headquartered in San Rafael, is a leading developer and marketer of business productivity software products. WordStar's family of word processing products are among the largest selling microcomputer software programs in the world.

SAN JOSE, CA (JAN. 12) BUSINESS WIRE - Maxtor Corp. (NASDAQ:MXTR) Friday announced the promotions of several key executives and a new management structure, designed to further enhance the disk drive manufacturer's leading position in the high-capacity, high performance market.

Alex Malaccorto assumes responsibility for all products, including their manufacturing, as vice president, disk drive products. Malaccorto was previously vice president, 5.25-inch products.

James Lynch has been promoted to vice president of administration, a job that encompasses materials, international logistics, information services, facilities and human resources.

Lynch was formerly vice president of manufacturing systems.

William J. Brown was promoted to vice president, product and technology development, leading a group of engineering and marketing professionals who will define and design Maxtor's future generations of product offerings.

Maxtor's European presence, which is increasingly important in Maxtor's growth strategy for the future, will be directed by Steven P. Kitrosser, with the new title of executive vice president, European operations. He was formerly executive vice president, operations.

Other promotions include: Leo Tandecki, vice president of manufacturing (domestic and international); Parvis Ghajar, vice president of 5.25-inch products; Gaylan Larson, vice president of 3.5-inch products; Al Fischler, vice president of product engineering.

Maxtor Corp. was founded in 1982 and has its headquarters in San Jose. The company manufactures high-capacity Winchester and optical data storage products in San Jose, Singapore and Malaysia, and has a worldwide sales and distribution network. Maxtor's products are designed for use in computer systems, workstations, and local area networks.

PLACENTIA, CA (JAN. 12) BUSINESS WIRE - A California company has submitted extensive research documenting the biodegradability of the plastic on its disposable diapers to the Federal Trade Commission and the attorneys general of seven states.

American Enviro Products of Placentia, marketers of Bunnies Biodegradable Diapers, provided the 150-page report in response to requests from California, New York, Texas, Minnesota, Missouri, Massachusetts, and Washington that the company as well as other companies marketing photodegradable and biodegradable products support claims that their plastic will biodegrade. The plastics used on most diapers and garbage bags are cited to last 100-200 years or longer.

"It's an incredible product that uses important advances in plastics manufacturing, so a lot of people are having a hard time believing it can do what it purports to do - that is, break down harmlessly in the environment many times faster than regular plastic," said Bob Chickering, American Enviro president.

But that is precisely what happens, Chickering said. He credited the development of the biodegradable plastic to Archer Daniels Midland (ADM), a multi-billion dollar agricultural conglomerate based in Decatur, Ill., and traded on the NYSE. ADM holds worldwide rights to the unique technology which uses corn starch and auto-oxidants to achieve biodegradability.

"Eventually, we hope to work with all the states and the federal government to set standards of biodegradability that consumers can rely on " Chickering said.

Biodegradable plastics have achieved widespread use in Great Britain and Europe since being developed there in the early 1970s but have only recently been introduced in the United States. Bunnies diapers have won considerable consumer interest since being marketed nationwide last summer.

#90012b0154 01/12/1990 ~Business Wire

SAN DIEGO (JAN. 12) BUSINESS WIRE - Mission West Properties (ASE/PSE: MSW) Friday announced consolidated results of operations for its fiscal year ended Nov. 30, 1989, reporting net income of $146,000, or ten cents per share. Operating income before taxes and minority interest was $312,000.

In the prior fiscal year, the company had net income of $1,596,000, or $1.06 per share; pretax operating income for that period was $2,827,000. Total revenues were $10,964,000 in 1989 and $9,974,000 in 1988.

During the fourth quarter of fiscal 1989, the company realized a net loss of $70,000, or five cents per share, compared with net income of $488,000, or 32 cents per share, for the corresponding quarter of 1988.

G. Joseph LaBreche, president of the company, said that net income was lower in 1989 than in 1988 due to decreased margins on the current year property sales and due to the $786,000 provision for estimated losses recorded in the third quarter.

During 1989, the company sold six industrial buildings in Carlsbad, Calif. and 10.9 acres of vacant land in Pascagoula, Miss. The company also completed 177,000 square feet of office/R&D buildings in the Sorrento Mesa area of San Diego and purchased a 76,000-square-foot office building in San Diego.

Subsequent to the end of the fiscal year, Mission West completed construction of three new hangars totaling 55,000 square feet on land leased at Palomar Airport in Carlsbad. The company is continuing to develop other projects, including the final two buildings of its nine-building office/industrial project in the Sorrento Mesa area of San Diego.

Mission West Properties, a real estate corporation with headquarters in San Diego, with approximately $48 million in assets, develops, owns and operates income properties primarily located in Southern California.

BARTLESVILLE, OK (JAN. 12) BUSINESS WIRE - Damage resulting from an accident on Jan. 6 is affecting some processing units at Phillips 66 Co.'s Sweeny, Texas, refinery and petrochemical complex.

An explosion, which slightly injured one worker, damaged a control room facility that serves an olefins unit and an isopentane unit. Olefins is a feedstock used in making plastics, and isopentane is used in making motor fuels.

Phillips now estimates that the olefins unit will be out of operation until early March. Sweeny's ethylene deliveries will not be affected due to production from other olefins units and available ethylene inventory.

Damage from the accident is affecting other processing units at the Sweeny complex. This has resulted in the reduction of refinery crude oil

throughput from 180,000 barrels a day down to approximately 160,000 barrels a day.

In addition, a cyclohexane unit at Sweeny was also affected and has been shutdown since Jan. 6. It is expected to be back in operation by Jan. 16 at a rate of about 4,500 barrels a day, some 75 percent of its rated capacity.

It is anticipated the unit will reach full operating capacity by March when the affected olefins unit is restarted. Cyclohexane is used in making nylon fibers and polymers.

LOS ANGELES (JAN. 12) BUSINESS WIRE - L.A. Gear Inc. (NYSE:LA) announced that it was served with a class action complaint alleging violations of federal securities laws and related state law against the corporation, its directors and certain of its officers.

The plaintiffs seek to represent a class of persons who purchased shares of L.A. Gear common stock during the period from Feb. 28, 1989, to Dec. 8, 1989. A related shareholder derivative action was filed against the same directors and officers alleging violations of federal securities laws, state corporation law and breach of fiduciary duty. The claims arise out of alleged material misrepresentation and omissions.

Based on a preliminary review, L.A. Gear believes the material charges in the complaints are without merit. L.A. Gear and the individual director and officer defendants intend to vigorously defend the lawsuits.

#90012b0213 01/12/1990 ~Business Wire
BURLINGTON, VT. (JAN. 12) BUSINESS WIRE - Eastern Bancorp Inc. (NASDAQ:VFBK) announced Friday that its board of directors has unanimously determined that it is in the best interests of the company, and all of its shareholders, depositors, customers and employees, to reject an unsolicited proposal of Merchants Bancshares Inc., of Burlington, to negotiate a business combination between Eastern and Merchants.

The proposal contemplated a merger of Eastern with Merchants for a per

share price of either $12 per share in cash or $10 per share of Merchants common stock for each outstanding share of Eastern common stock.

''After reviewing Merchants proposal, the board of directors concluded that the proposed purchase price is grossly inadequate and have indicated that no negotiations of that proposal are planned by Eastern Bancorp,'' said William J. Cody Jr., chairman of the board. He added, ''The board has determined that it is inappropriate to consider the sale of the company at this time but even if the company were for sale, the company believes that significantly higher values should be obtainable than those contained in the Merchants proposal.''

John A. Cobb, president of Eastern, stated: ''We remain confident of Eastern's ability to implement its long-term strategies successfully as an independent company. In this regard, we believe that our recent acquisition of Rockingham Bancorp Inc. has significantly enhanced our franchise value and that Eastern's management will continue to take steps to enhance shareholder value in the long-term.''

On Jan. 8, 1990, Eastern announced that both of Eastern's banking subsidiaries, Vermont Federal Bank, FSB, in Burlington, and First Savings and Loan Association of New Hampshire, of Exeter, N.H., have met and exceeded the new capital standards required under the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA).

Cobb stated, ''The fact that Vermont Federal and First Savings exceed these stringent guidelines clearly positions each of them among the strongest and most sound thrift institutions in the nation.''

Eastern Bancorp, a Delaware corporation, conducts business as a multiple non-diversified savings and loan holding company. It is the holding company of Vermont Federal Bank, FSB, a federally chartered stock savings bank, headquartered in Burlington, and First Savings and Loan Association of New Hampshire, headquartered in Exeter, N.H.

As of its Sept. 30, 1989, fiscal year end, Eastern Bancorp, on a consolidated basis, had total assets of $613.5 million and stockholder's equity of $53.9 million, or a $20.99 book value per share. Common stock of Eastern Bancorp is traded in the NASDAQ's National Market System under the symbol ''VFBK.'' At Sept. 30, 1989, the company had 2,567,372 shares of common stock outstanding.

PHOENIX (JAN. 13) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) has announced that it has succeeded in making temporary arrangements that will permit it to continue its operations at both New York LaGuardia and Washington National airports beyond Monday, Jan. 15.

The carrier continues to explore additional possibilities, looking toward a more permanent resolution of its slot needs, and expects to have additional information by next week.

Peter J. Otradovec, vice president of planning for the airline, said: ''We are very appreciative of the efforts of the Secretary of Transportation and the Federal Aviation Administrator in addressing this matter. We are also grateful for the support and interest of many congressmen, senators and civic leaders.''

He stressed: ''America West thrives on competition and we are confident that we will ultimately gain increased access at these slot-controlled airports to permit us to pursue the goals of deregulation.''

America West had been awarded 10 temporary slots, six at Washington National and four at New York LaGuardia, after Eastern's Chapter 11 bankruptcy. The carrier had been informed earlier this week that it would have to relinquish its slots at LaGuardia on Monday, Jan. 22, as well as make adjustments to slot usage at Washington National on Monday, Jan. 15.

Otradovec said: ''We are confident that a more permanent resolution will be achieved and that our passengers at both New York LaGuardia and Washington National will not experience a permanent disruption of service.''

America West operates the most modern aircraft fleet among major carriers utilizing large aircraft. The average age of the carrier's fleet is approximately six years. As the nation's 10th largest airline, America West flies coast-to-coast and across the Pacific with 747s, 757s, 737s and de Havilland Dash 8 aircraft.

CAMARILLO, CA. (JAN. 13) BUSINESS WIRE - Friday, California Amplifier Inc. (NASDAQ:CAMP) of Camarillo and Amplica Inc. of Newbury Park, announced jointly that the two companies had signed a letter of intent whereby Amplica will manufacture all military products for all of California Amplifier's (Cal-Amp) existing military contracts.

As part of the agreement, Amplica will hire the majority of Cal-Amp's employees engaged in the manufacturing of these products and will purchase certain inventory from Cal-Amp. In turn, California Amplifier will not accept orders on military products and will refer all inquiries to Amplica as the designated manufacturer of military products for Cal-Amp.

No other details of the agreement were disclosed. The agreement is subject to signing a definitive agreement and the ratification of the boards of directors of both companies, which is expected to occur within 30 days.

Commenting on the agreement Barry W. Hall, chairman and chief executive officer of Cal-Amp, said: ''Effectively this agreement means that Cal-Amp is out of the military business. We will now be able to devote our full resources to commercial microwave products with heavy emphasis on the TVRO industry.'' (TVRO refers to the satellite dish industry.)

Hall added: ''Our recent return to profitability is the result of dramatic growth in our TVRO business. We have also identified other commercial applications for our technology that we feel that tremendous potential for sales growth and profits. Production problems on our military products during the past year also contributed to the decision.''

Hall stated: ''Amplica has recently proved themselves to be capable suppliers to the military market. That, combined with their state-of-the-art manufacturing, should enable them to provide high-quality products on a timely basis under these contracts.''

Amplica is a wholly owned subsidiary of Triax Corp. located in Westport, Conn. Colin O'Brien, chairman and president of Triax stated: ''Amplica currently has excess capacity and our ability through this agreement to increase output by 30 percent in products that are very closely aligned to our strengths makes this an excellent arrangement for Amplica. I also believe that California Amplifier's ability to exit the defense market on a sound financial and business basis while honoring their contractual commitment makes this a winning agreement for both parties.''

California Amplifier designs, manufactures and markets microwave products used in commercial and consumer telecommunications. Amplica is a leading supplier of RF/Microwave components and subassemblies to the world's defense industries.

ANCHORAGE, AK (JAN. 13) BUSINESS WIRE - Security Pacific Bank Alaska President and Chief Executive Officer Ronald L. Bosi Friday said his bank has acquired $63.4 million in deposits of the failed Home Savings Bank, F.S.B., in Anchorage, from the Resolution Trust Corp. (RTC) for $582,000.

''We are pleased to provide Home Savings' former customers with the security and broader array of products that come from banking with one of the country's largest full-service banking companies. We look forward to a long and satisfying relationship with all of them,'' said Bosi.

Home Savings Bank with assets of $70.2 million had two offices, one in Anchorage and one in Wasilla. Both will be reopened Tuesday, Jan. 16 as branches of Security Pacific Bank Alaska.

Security Pacific Bank Alaska, with four offices in Anchorage, is a subsidiary of Security Pacific Bancorporation Northwest, a Seattle-based, multi-bank holding company with assets of $10.1 billion. The Bancorporation is an affiliate of Security Pacific Corp., the nation's fourth-largest banking company.

SHELTON, CT (JAN. 12) BUSINESS WIRE - Shelton Bancorp Inc., (NASDAQ: SSBC) the parent company of Shelton Savings Bank, announced Friday that earnings for the six months ended Dec. 31, 1989, were $571,000, or 50 cents per share, compared to $929,000, or 79 cents per share, during the same period last year.

Earnings for the second quarter ended Dec. 31, 1989, were $284,000, or 25 cents per share, compared to $665,000, or 57 cents per share, during the quarter ended Dec. 31, 1989.

The company attributed the reduction in earnings to a decline in income from its real estate development activities, partially offset by an increase in gains on the sale of investment securities.

The company also announced that its board of directors has declared a regular quarterly cash dividend of ten cents per share, payable on Feb. 8, 1990, to stockholders of record as of the close of business on Jan. 23, 1990.

The company's assets totaled $167.9 million at Dec. 31, 1989, up ten percent from $152.6 million a year ago. Total loans increased by five percent from $136.4 million at Dec. 31, 1988, to $143 million at Dec. 31, 1989.

Deposits were $132.1 million at the end of the current period, up 15 percent from $115.3 million at Dec. 31, 1988. Stockholders' equity totaled $14.3 million at Dec. 31, 1989, representing a $12.56 book value per share on 1,137,420 outstanding shares.

Shelton Bancorp Inc. is the parent company at Shelton Savings Bank, a 70 year old state-chartered, FDIC-insured savings bank. Since its founding, Shelton Savings Bank has specialized in retail banking, with specific emphasis on residential mortgage lending. The bank is headquartered in Shelton, Conn., and operates live full service offices within eastern Fairfield and southwestern New Haven counties.

#90012b0610 01/12/1990 ~Business Wire

VENTURA, CA (JAN. 12) BUSINESS WIRE - Benton Oil & Gas Co. (OTC:BNTN BNTNW) announces the signing of an agreement to acquire a 50 percent interest in the Pershing Field in Osage County, Oklahoma.

The terms of the agreement, signed on Dec. 20, 1989 include the acquisition for $700,000 of a 50 percent working interest in the existing production in the field, effective Jan. 1, 1990. The reserves from the existing wells were estimated to be approximately 420,000 barrels of oil as of Oct. 1, 1989. Under the agreement, Benton also commits to further develop the field by drilling additional wells.

Preliminary internal analyses indicate that the field might be exploited effectively by drilling up to 125 additional oil production and water injection wells in a phased series of projects. The first phase, consisting of 9 oil and 10 water injection wells and estimated to cost up to $1.5 million, is anticipated to commence by July 1, 1990, and take three to six months to complete.

Benton's share of the production from this first phase is estimated to be 425,000 barrels, and its cash flows over the life of the phase are

estimated to be $4.3 million, net of development and operating costs.

Under the terms of the agreement, Benton will earn a 50 percent working interest after payout in each of three such phases scheduled over the next three years. After completing these three phases, the company will earn a 50 percent working interest in the entire field, including the existing production and the remaining phases of development.

Similar waterfloods have produced the equivalent of approximately 80 percent of primary production, which was approximately 5.5 million barrels for the Pershing field. Based on that experience, Benton estimates that its share of the total production from all the development phases could be approximtely 2 million barrels, with a total cash flow value of approximately $21 million, net of development and operating costs.

Benton estimates that its total development costs for all phases might be approximately $6.5 million. Actual production rates and costs for the Pershing field will be better known after the first development phase is completed and production experience becomes available.

Benton also announces that it is considering several alternatives to finance the waterflood and other projects.

Benton Oil & Gas Co., based in Ventura, Calif., is an independent exploration and development company with operations in California, Colorado, Oklahoma, Texas and Louisiana. Benton's common stock (BNTN) and warrants (BNTNW) are traded OTC.

SAN BERNARDINO, CA (JAN. 12) BUSINESS WIRE - Kasler Corp. (NASDAQ/OTC:KASL), one of the premier highway/heavy contractors in the nation, announced that the company was the successful low bidder on a $15,550,000 contract in Los Angeles County for the California State Department of Transportation.

This project is to construct portions of the Century Freeway, including rail transit facilities in Lynwood (near Los Angeles), from east of Alameda Street to Atlantic Avenue. The work consists of concrete paving of approximately two miles of new freeway and the constructing of a roadbed for future light rail transit systems.

Bob Ferguson, president and chief executive officer, commenting on the low bid said, ''Kasler continues to play an important role in the construction

of the new Century Freeway in Los Angeles.''

''Prior to our successful low bid on this project, Kasler's contract awards to date totaled $311 million, or approximately 47 percent of total work awarded on the $1.2 billion Century Freeway project,'' continued Ferguson.

The Century Freeway, which represents the largest surface highway project in the nation, encompasses 18 miles of new freeway construction from Los Angeles International Airport to Norwalk.

Kasler is a general contractor engaged in the construction of concrete roadways, bridges and other public works projects, including airport runways and water control distribution facilities.

VAN NUYS, CA (JAN. 12) BUSINESS WIRE - Valley Federal Savings and Loan Association (NASDAQ/NMS:VFED) Friday announced that the association's 1989 fourth-quarter results will include a non-cash charge of $66 million.

The association also announced the receipt of a letter from the Office of Thrift Supervision (OTS) substantially restricting its operations.

The charge is largely the result of a change in the carrying values of the association's mobile home finance assets to their estimated net realizable value.

Included in the charge is $30 million to reduce the finance income receivable for the association's mobile home loans to zero, $27 million to reduce the carrying value of the association's mobile home loan portfolio to its net realizable value and $9 million pertaining primarily to capitalized servicing rights for the association's real estate loans.

After the charge, the equity of the association computed pursuant to generally accepted accounting principles is projected to be a deficit of approximately $31 million, which takes into account an estimated $5 million of consolidated earnings from core operations during the fourth quarter of 1989. The estimated results for the 1989 fourth quarter are subject to normal year-end audit adjustments.

After the charge, two of the three measures of regulatory capital,

tangible capital and core capital (which exclude $12 million of cumulative perpetual preferred stock), are both estimated to be a deficit of approximately $43 million, while risk-based capital (which includes the preferred stock and asset reserves) is estimated to be a deficit of $12 million.

Valley Federal Savings, with assets of $3.1 billion, is traded on the NASDAQ National Market System. Deposits are insured by the Federal Deposit Insurance Corporation and backed by the full faith and credit of the U.S. government. The association has been a part of building the San Fernando Valley since 1925.

ORLANDO, FL (JAN. 12) BUSINESS WIRE - Laser Photonics Inc. (NASDAQ: LAZR) announced Friday that they will complete preliminary testing of their new solid state lithotriptor and submit an IDE to the FDA by the end of January. The company anticipates approval to begin clinical testing of this system some time in March.

Introduction of this product is anticipated at the American Urological Association meeting in April of this year, with expected commercial availability of the product some time mid-year.

The solid-state lithotriptor is designed to break urinary and biliary tract stones through non-invasive surgery. Each year over 450,000 people are treated for extreme pain associated with kidney stones.

To date, the only alternatives to surgery have been extracorporeal shock-wave lithotripsy (ESWL) and flash pump dye laser systems which are very costly to purchase and expensive to maintain. The new solid state lithotriptor will offer an affordable and effective treatment for the thousands of people suffering from kidney stones each year.

Laser Photonics Inc. designs, manufactures, and markets solid state and gas laser systems, components, and other peripheral equipment for applications in the medical and scientific markets.

DENVER (JAN. 12) BUSINESS WIRE - Hallador Petroleum Co. (formerly Kimbark Oil & Gas Co.) Friday announced that H.T. Hilliard, a director of the company, has been appointed the chief executive officer of the company and vice chairman of the board.

Hilliard, age 66, has acted as a consultant to and served as a director of several companies affiliated with Hallador since 1985. He has been involved in the oil and gas business since 1947, having worked for Gulf Oil Corp., and was a founder of Ashmun & Hilliard and the founder of Hilliard Oil & Gas Inc.

Hilliard is currently active as an independent oil and gas producer. He presently serves as a director of Plains Resources Inc. and is a member of that board's executive committee.

David Hardie, chairman of the board, said: ''I am delighted that Toby Hilliard, an oil and gas company executive who has built two successful energy companies, has agreed to serve as Hallador's chief executive officer.

The company also announced the resignation of Rodgers A. Dockstader as senior vice president and a director of the company to pursue other interests.

Hallador is an independent oil and gas exploration company based in Denver. The company's stock trades on the NASDAQ System under the symbol HPET.

ENGLEWOOD, CO (JAN. 12) BUSINESS WIRE - Pierce International Inc. is pleased to announce that its Transportation Services Division has negotiated a sale - lease back financing package for a Fortune 100 corporation.

The transaction, valued at $18.66 million, will produce gross income to Pierce International Inc. of $933,000. Net revenues on this transaction are projected to be approximately $466,500.

While this is the first such transaction, the company anticipates that additional transactions will be made in 1990. The Transportation Services Division arranges lease financing for transportation equipment and manages the mobile used-car inspection service Lemon-Aid of America Inc.

Lemon-Aid has recently filed for a public stock offering with the Securities and Exchange Commission which became effective Nov. 9, 1989. For further information or a prospectus call Nancy Parker, vice president investor relations.

SHEFFIELD, AL (JAN. 12) BUSINESS WIRE - Valley Federal's (NASDAQ/NMS: VAFD) Annual Stockholder's Meeting was conducted Jan. 8, 1990, at its corporate headquarters in Sheffield, Ala.

Two directors were reelected, each for three year terms. President Anderson reported Valley Federal's assets had reached a record of $103 million by fiscal 1989 yearend.

The bank experienced a 41 percent increase in lending activity over the previous year as it originated nearly $30 million in loans. Even though savings activity was hampered by adverse nationwide publicity of troubled thrifts, the bank still managed a positive savings growth of three percent for the year. Net income after taxes for the bank was recorded at $362,056.

President Anderson reported that the recently legislated Financial Institutions Reform, Recovery and Enforcement Act will not impact Valley Federal to any significant degree.

"Our traditional lending policies have enabled us to meet the Qualified Lenders Test with no difficulty. Our net worth position of $7,201,677 well exceeds any capital requirements and our core earnings are not dependent on fee income.

"We have good asset quality and the bank has no purchased or supervisory goodwill on the books. However, we will be challenged to the future to operate with more efficiency, especially as the Federal Home Loan Bank experiences fiscal pressure throughout the financial industry."

Valley Federal is a federally chartered FDIC insured savings bank operating four full service offices in northwest Alabama.

IRVINE, CA (JAN. 12) BUSINESS WIRE - Newly appointed C.Itoh Electronics (CIE) President S. Homma Friday announced a major reorganization of the 17-year-old company that will form new business groups based on individual product lines, effective this month.

The reorganization is designed to strengthen the marketing, sales and customer support efforts of the company's product lines, expedite new product development cycles to meet market demands and develop closer ties with the Japan-based business partners of C.Itoh's product lines, including Tokyo Electric Co. Ltd. for pc printers, Olympus Optical Co. Ltd. for ion deposition page printers and Citizen Watch Co. Ltd. for high-speed serial/line printers.

The video terminal business group, to be integrated into the line printer group, will concentrate its efforts on major OEM sales and technical licensing. There will be no changes in the C.Itoh Export Group's location or operations.

Each business unit will be responsible for its own sales, marketing, distribution and service operations. All activities will remain at C.Itoh Electronics headquarters in Irvine.

Tokyo Electric manufactures C.Itoh's ProWriter dot matrix printers, including the 24-wire C-610 Document Printer, C310/315, C715A and other serial dot matrix and non-impact models.

Olympus Optical manufactures C.Itoh's family of 30- and 45-ppm ion deposition printers. Citizen Watch manufactures C.Itoh's high-speed CI400/800 and new CI1000 line printers and the CI-5000 serial dot matrix printer.

"C.Itoh's multiple business units signal a new period in the company's history," Homma said. "C.Itoh and its partners are now ready to compete even more agressively for leadership in the peripherals marketplace of the '90s," he explained. Homma said that key management positions for each business group are currently being filled and announcements will be made in the near future.

Marc Liebesman, C.Itoh Electronics vice president of marketing, said that the company is bringing its strategic and manufacturing relationships closer to its U.S. base of operations. "This will allow C.Itoh and its business partners to explore various alternatives within its overall commitment to the peripherals marketplace," he said.

Liebesman also noted that the company's current distribution channels will remain intact. "We are proceeding with new product development and plan major additions this year to each group's printer lines," he said.

IRVINE, CA (JAN. 12) BUSINESS WIRE - C.Itoh Electronics Inc., a major supplier of terminals, printers and storage peripherals, has named S. Homma its new president, effectively immediately.

Homma, a senior management executive with C.Itoh & Co. Ltd., replaces K. Sudo, president of C.Itoh Electronics since 1987.

Sudo has accepted a new management position at the parent company's international headquarters in Tokyo.

In his new role, Homma will continue to strengthen C.Itoh Electronics' position in the marketplace, and form new business units based on product lines, including pc printers, ion deposition page printers, and high-speed serial/line printers and terminals, as well as export activities. In addition, Homma will explore new business opportunities. He will be based at C.Itoh Electronics' headquarters in Irvine.

Homma has held a number of management positions in the C.Itoh organization. Prior to his present appointment, he was a general manager of the information systems and electronics division, whose major activities include the sales, support and maintenance of U.S.-manufactured computer hardware, software and semiconductor products in Japan.

Previous to his general manager position, Homma was an executive managing director of Innotec, a C.Itoh subsidiary and one of the leading suppliers of U.S.-manufactured equipment and materials for the design, manufacture and testing of semiconductor devices in Japan.

C.Itoh Electronics is a subsidiary of C.Itoh & Co. Ltd., one of the world's largest corporations. The company has built an industry-wide reputation for high-quality, high-performance products in corporate and personal computer markets.

STOCKHOLM, SWEDEN (JAN. 12) BUSINESS WIRE - Ericsson has been awarded a

$32 million contract by the Mexican Telephone Administration, Telmex, for a cellular telephone system for Mexico City and for expansions to the existing Ericsson system in Tijuana, Mexico.

The contract includes AXE cellular switches, radio base stations, towers, containers and network engineering for delivery in 1990 to DIPSA, a Telmex subsidiary.

Ericsson's Tijuana system was put into service last October and today serves 2,500 subscribers. The system is growing rapidly and soon will include ''roaming'' capabilities between Tijuana and San Diego.

Mexico City, the world's largest city, has 10 fixed telephones per 100 residents and cellular telephony is seen as a quick way to offer telephone service.

Ericsson employs about 3,000 people in Mexico and is the leading supplier of AXE digital switching equipment for the public telephone network. Ericsson's share of the Mexican telephone equipment market is over 60 percent.

Headquartered in Stockholm, Ericsson is one of the world's leading manufacturers of telecommunications equipment. Its wholly owned North American subsidiary is based in Richardson, Texas.

SAN JUAN CAPISTRANO, CA (JAN. 12) BUSINESS WIRE - Nichols Institute (ASE:LAB) Friday announced that five institutional holders of warrants exercisable to purchase an aggregate of 724,249 shares of its common stock have given notice that they intend to exercise their warrants and to distribute their shares in an underwritten public offering.

The offering is expected to occur in March or April after Nichols Institute's year-end financial statements are available and the offering is registered with the Securities and Exchange Commission.

James W. Whitmer, chief financial officer of the institute, said the exercise of the warrants is not expected to have a dilutive effect on earnings per share.

The institutional investors -- Teachers Insurance and Annuity Association of America, Massachusetts Mutual Life Insurance Co., MassMutual Corporate Investors, Monumental Life Insurance Co. and Monumental General Insurance

Co. -- received the warrants in July 1988 in connection with a $27 million senior note financing.

The exercise price per share of the warrants is $7.14, and upon exercise of the warrants the institute would receive total proceeds (before registration and other expenses) of $5,168,000. The warrant holders indicated that they will pay the exercise price in cash rather than reduce the indebtedness under the senior notes by that amount.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology. It also has regional laboratories in California, the Pacific Northwest and the Midwest that provide clinical testing to those markets.

Substance abuse testing is also provided to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests that are distributed worldwide.

HIGH POINT, NC (JAN. 12) BUSINESS WIRE - Carolina Bancorp Inc. (NASDAQ: FFCA) the parent holding company of First Federal of the Carolinas F.A., reported Friday its results of operations, which were significantly influenced by certain long-term planning by First Federal during the quarter.

In late December, First Federal's board reaffirmed its desire for the proposed merger of Carolina Bancorp with BB&T Financial Corp. which received stockholder approval on Dec. 6, 1989, and which is expected to be effective later this year.

In the event the proposed merger is not consummated, however, First Federal determined that it would be in its best interest to seek to be acquired by another bank holding company or convert to a national bank charter.

Because any of these alternatives would cause First Federal to change its status as a savings and loan for tax purposes and recapture its bad debt reserve, First Federal accrued tax liability of $2,358,000 for the anticipated recapture in the first quarter and made a one-time charge to earnings for this liability.

BB&T Financial Corp. agreed to indemnify Carolina Bancorp and First Federal for loss relating to the recapture of the bad debt reserve if the proposed merger is not consummated for any reason other than a breach of the merger agreement by Carolina Bancorp or First Federal or an attempt by a third party to acquire either of them.

As a result of these actions, Carolina Bancorp reported a net loss of $2,116,000 as compared to net income of $330,000 in the comparable quarter in fiscal 1989. This is equivalent to ($1.25) per share compared to 20 cents per share for the like period last year. If First Federal had not recaptured its bad debt reserve in the first quarter, Carolina Bancorp's earnings would have been $242,000.

Carolina Bancorp's total assets at Dec. 31, 1989 were $294.8 million, a decrease compared to $309.2 million at the like time last year. Total deposits increased to $241.5 million from $238.3 million at the end of the prior year's first quarter.

Stockholders' equity at quarter end was $20.3 million, or 6.89 percent of total assets as compared to $21.4 million, or 6.90 percent of total assets at the like time last year.

#90012b0651 01/12/1990 ~Business Wire

CINCINNATI (JAN. 12) BUSINESS WIRE - Fifth Third Bancorp's net income for the year 1989 was $108,318,000, compared to $91,103,000 for the year 1988.

Earnings per share, adjusted for the 50 percent stock dividend payable Jan. 13, 1990, were $2.79, an increase of 15.8 percent over last year's $2.41.

Total assets were $7.1 billion at year-end, compared to 1988's year-end total of $6.4 billion. Return on average equity was 16.5 percent and return on average assets was 1.62 percent for the year 1989.

All figures have been restated for First Ohio Bancshares Inc., of Toledo, Ohio, acquired Nov. 30, 1989, and 1st Security Bank, of Hillsboro, Ohio, acquired Dec. 13, 1989. These acquisitions have been accounted for as poolings of interests.

Net income for the fourth quarter was $27,671,000, compared to $26,088,000 last year. Per share fourth quarter earnings, adjusted for the stock dividend, were 71 cents, an increase of 4.4 percent over last year's 68 cents. During the fourth quarter of 1988, the sale of leased assets

resulted in an after-tax gain of 4 cents per share.

In consolidating First Ohio (Toledo), fourth quarter earnings were decreased by the write-off of duplicate data processing equipment and other charges (2 cents per share), closing costs (3 cents per share), and additional loan loss provisions (4 cents per share). A gain on certain pension settlements (4 cents per share) plus favorable accrual adjustments (2 cents per share) partially offset the decrease.

The Bancorp recently increased its quarterly cash dividend to 24 cents per share (restated for the stock dividend) from 22 cents per share. This represents the 19th dividend increase in the 14 years since the formation of Fifth Third Bancorp.

#90012b0652 01/12/1990 ~Business Wire

VALLEY STREAM, NY (JAN. 12) BUSINESS WIRE - Nationwide Cellular Service Inc. (NASDAQ:NCEL) Friday announced that it had received an aggregate of $10 million from the private sale of equity securities to Merv Adelson, former chairman of Lorimar-Telepictures Corp. and an independent investor, and, under the agreement with Adelson, an additional $5 million of securities could be purchased.

Nationwide is one of the major resellers of cellular telephone service in the United States with in excess of 51,000 cellular telephone subscribers.

The securities acquired by Adelson consist of 400,000 shares of convertible preferred stock at a price of $15.00 per share, 400,000 Contingent Value Rights (CVR) at a purchase price of $1.00 per CVR and Warrants to purchase 850,000 shares at an exercise price of $13.50 per share, with a purchase price for the warrants of $4.235 per underlying share.

These securities, upon conversion, would represent 14 percent of the outstanding common stock of the company assuming the conversion of all other outstanding options and warrants, and upon such conversion would raise an additional $11,475,000 for the company.

Prior to this purchase, Adelson owned approximately 330,000 shares of common stock. Under this purchase agreement, up to two-thirds of these shares may be exchanged by Adelson within 30 days for additional securities similar to those just acquired. It is expected that Adelson will become a director of Nationwide.

Stephen Katz, chairman and president of Nationwide, stated this additional equity would enable the company to continue its expansion and enhance its position as one of the premier companies in the cellular telephone service resale market.

Katz further stated that he was particularly pleased with Adelson's commitment to the company, and looks forward to working with Adelson for many years ahead.

STEVENS POINT, WI (JAN. 12) BUSINESS WIRE - First Financial Corp. (NASDAQ: FFHC) announced Friday it has received all required regulatory agency approvals for the acquisition of Illini Federal Savings and Loan Association of Fairview Heights, Ill.

"We look forward to beginning the 1990s with our entry into the Illinois market. The acquisition of Illini Federal strengthens our position as a leading Midwest financial institution and provides opportunities for further expansion in Illinois," said John C. Seramur, president and chief executive officer of First Financial.

Illini Federal, with assets of $525 million, has ten branch offices which serve suburban St. Louis from their location in southwestern Illinois. The offices will become branches of First Financial Bank and will assume the First Financial Bank name.

The acquisition increases First Financial Corp.'s total assets to over $3.0 billion and its number of offices to 79 locations throughout Wisconsin and in Illinois.

First Financial Corp. is the holding company for First Financial Bank, FSB Wisconsin's third largest financial institution and largest thrift. The company's shares are traded in the national over-the-counter market with the listing symbol FFHC.

BARTLESVILLE, OK (JAN. 12) BUSINESS WIRE - Phillips 66 Natural Gas Co. and Marathon Oil Co. have signed a letter of intent with Ishikawajima-Harima Heavy Industries Co. Ltd. (IHI) of Tokyo for IHI to construct two liquefied natural gas (LNG) vessels.

Phillips 66 Natural Gas Co. is a subsidiary of Phillips Petroleum Co. (NYSE:P).

The new vessels would replace the Phillips and Marathon LNG carriers Arctic Tokyo and the Polar Alaska. The vessels carry LNG production from the Phillips and Marathon LNG plant in Kenai, Ala., to contract customers in Japan -- Tokyo Electric Power Co. Inc., and Tokyo Gas Co. Ltd.

Phillips is operator of the Kenai LNG plant, while Marathon Oil Co. operates the two LNG vessels. Phillips has a 70 percent interest -- and Marathon 30 percent -- in the sales and facilities.

The new carriers will have a capacity of 87,500 cubic meters of LNG. The first vessel is scheduled to be delivered in mid 1993 and the second at the end of 1993. The Arctic Tokyo and Polar Alaska are Liberian-registered vessels with product capacities of 71,500 cubic meters.

They are being replaced to provide additional product capacity. They have been carrying LNG from Kenai to Tokyo since 1969.

The cost of the new vessels was not disclosed.

IHI is a major Japanese conglomerate involved in various heavy construction and shipbuilding enterprises.

CHICAGO (JAN. 12) BUSINESS WIRE - Acme Frame Products Inc., a leading manufacturer and distributor of picture frames to the mass retail market, announced Friday that it is relocating to larger facilities in order to meet the increasing demand for its products.

A wholly owned subsidiary of American Greetings, the world's largest publicly owned greeting card company, Acme has doubled its customer base and sales revenues since its acquisition in 1986.

President Howard F. Reese said Acme's 240,000-square-foot Chicago headquarters building is an aging five-story facility that cannot be expanded to accommodate anticipated future demand.

Therefore, on March 1, 1990, Acme will begin to relocate manufacturing operations from the Chicago building to Harrisburg, Ark., where American Greetings has a 425,000-square-foot facility, currently used for packaging seasonal products.

More than 300 manufacturing jobs will be transferred. Harrisburg's American Greetings seasonal operations will move to the firm's major seasonal manufacturing facility in nearby Osceola, Ark., later this year.

Acme will also transfer its sales, marketing and administrative offices to American Greetings Headquarters in Cleveland. This move will affect 26 jobs.

The relocation to both locations is expected to be completed around Sept. 1, 1990.

Acme's other manufacturing facility in Tutweiler, Miss., will not be affected by this action, Reese noted.

Acme's Chicago employees were notified of the relocation plans today.

Reese said dislocated workers will receive a generous severance package, including severance pay, job counseling and referral services and other Human Resources assistance needed to ease the transition.

#90012b0673 01/12/1990 ~Business Wire

HOUSTON (JAN. 12) BUSINESS WIRE - Shell Oil Co. announced Friday the introduction of a reformulated heavy duty motor oil. A new additive technology in Rotella(R) T Multigrade with XLA (Extended Life Additives) is designed to provide improved engine cleanliness and protection, and better oil consumption control.

The reformulated lubricant reduces engine deposits, maintains viscosity control, and preserves oil consumption control better than Shell's current Rotella T, the industry's best-selling multigrade truck motor oil.

Industry tests using Cummins NTC-400 and John Deere 6466A engines show Rotella T with XLA lessens the chance of sticking engine parts, reduces the need for top-off oil and can extend engine overhaul intervals. The reformulated oil also prevents thickening that can hamper cold starts, cut fuel economy and diminish lubrication effectiveness.

"The new formulation showed enhanced performance under the severe engine operating conditions of industry tests," Shell Lubricants Manager Tom Sanders said. "We ran the Cummins NTC-400 test twice as long as required, and Rotella T with XLA exceeded Shell's own test standards."

Sanders said Rotella T Multigrade with XLA outperforms the previous Rotella formulation, and provides an increased margin of protection for both current and projected diesel engine designs.

"Rotella T Multigrade with XLA is formulated to meet the challenging l990s' federal exhaust emission standards which require engine designs that put more stress on crankcase oils," he said. Rotella T Multigrade with XLA will be available after Feb. 1.

#90012b0684 01/12/1990 ~Business Wire

AKRON, OH (JAN. 12) BUSINESS WIRE - A. Schulman, Inc. reported that revenues and net income for the quarter ended November 30, 1989, were the highest for any first quarter in the Company's history.

Net income for the quarter was $7,565,000 or $.56 per common share, an

increase of 12 percent over earnings of $6,775,000 or $.50 per share in the first quarter of fiscal 1989. Revenues were $164.7 million compared with $160.9 million in the same period a year ago.

''The growth in net income was provided by our North American operations, with the largest portion of the increase resulting from the strength of our manufacturing business,'' reported William C. Zekan, Chairman and President. ''Overall profit margins were also higher due to lower plastic resin prices and the strength of our worldwide manufacturing business. Manufacturing revenues constituted 56 percent of total sales, but provided 66 percent of our gross profits. These sales traditionally have higher profit margins than our merchant and distribution activities.

''Profits were also good in our European operations, although most of the increase was offset by higher selling expenses, including the costs of a major trade fair in Germany which occurs once every three years. The U.S. dollar, which was slightly higher during the quarter, reduced sales by $2.7 million and net income by $139,000 or $.01 per share.''

Total sales were up approximately 2 percent, but overall volume increased by 14 percent, the Company said. Sales growth was less than the increase in volume, primarily because of the decline in plastic resin prices.

Based in Akron, Ohio, A. Schulman is a leading international supplier of plastic compounds and resins.

#90012b0686 01/12/1990 ~Business Wire
BEVERLY HILLS, CA (JAN. 12) BUSINESS WIRE - Salick Health Care Inc. (NASDAQ: SHCI) Friday reported record revenues in its first quarter ended Nov. 30, 1989.

In the first fiscal quarter Operating Income increased by 22 percent to $1,965,000 from $1,613,000. Net Revenues, which were at the highest level in the company's history, rose by 47 percent to $16,432,000 from $11,139,000. Net Income for the quarter was $1,005,000 or 18 cents per share compared to last year's $1,003,000 and 18 cents per share.

''We are pleased with the company's progress and growth. Our outpatient cancer and dialysis centers continue to achieve excellent results and our expansion continues,'' said Dr. Bernard Salick, chairman and chief executive officer.

''During the quarter we completed our interim cancer center facility at

Temple University, and we now provide a broad range of outpatient diagnostic and treatment services for cancer patients. We also began providing radiation therapy services at the Desert Hospital Cancer Center in Palm Springs, Calif., and expect to begin providing medical oncology services in the spring,'' added Dr. Salick.

The quarters excellent operating results were achieved despite the effect of reductions in reimbursement for services provided Medicare patients resulting from the automatic cuts mandated by the Gramm-Rudman Budget Reconciliation Act, the implementation of the final reduction in reimbursement for the technical component of radiation therapy and radiologic service charges and negative investment and interest income due to the utilization of capital in the expansion of the company's operations and lower interest rates being realized on the company's investment portfolio as the result of its restructuring and upgrading during the past year.

The company is in active discussions with university-teaching, major urban and community hospitals, and multi-hospital systems to add new centers and expand our cancer center network.

A leading provider of outpatient disease-specific healthcare, Salick Health Care now operates seven outpatient comprehensive cancer centers nationwide. In addition, the company is a major provider of both outpatient and inpatient artificial kidney (dialysis) services in Southern California and distributes medical supplies.

AMITYVILLE, NY (JAN. 12) BUSINESS WIRE - Nu Horizons Electronics Corp. (AMEX:NUH) Friday announced results of operations for the third quarter ended Nov. 30, 1989.

The company reported net sales of $29,863,486 for the nine months ended Nov. 30, 1989 as compared to $28,442,800 for the nine months ended Nov. 30, 1988. Net sales for the three months ended Nov. 30, 1989 and 1988 were $9,774,931 and $9,604,644, respectively. Net income for the nine months ended Nov. 30, 1989 was $673,789, or 15 cents per share on a primary basis and 14 cents on a fully diluted basis as compared to $608,072, or 13 cents per share on a primary and fully diluted basis for the corresponding period of the prior year.

Net income for the three months ended Nov. 30, 1989 was $247,169, or 6 cents per share on a primary basis and 5 cents per share in a fully diluted basis as compared to $152,209, or 3 cents per share on a primary and fully diluted basis for the three months ended Nov. 30, 1988.

The company's sales growth has been facilitated by its expansion into new geographical markets, the addition of experienced sales people and the addition of niche franchise lines.

The company's wholly owned subsidiaries, NIC Components Corp. and Nu Horizons International Corp., attributed their increased growth to greater market penetration and acceptability for NIC's line of passive products.

Nu Horizons Electronics Corp. is a leading distributor of active and passive electronic components for a variety of military, commercial, and industrial markets.

BRAINTREE, MA (JAN. 12) BUSINESS WIRE - Grossman's Inc. (NASDAQ:GROS) reported December 1989 sales of $55,681,000, 17.3 percent behind sales of $67,320,000 from ongoing divisions in 1988.

For accounting purposes, the December 1988 sales included six weeks' sales while December 1989 included five weeks' sales.

Comparable store sales were 5.7 percent behind December of 1988.

The soft economic climate in the New England states continues to affect both contractor and retail sales.

Grossman's, a major retailer of lumber and building materials, operates 156 stores in nine northeastern states and in California.

FORT WORTH, TX (JAN. 11) BUSINESS WIRE - Stevens Graphics Corp. (AMEX:SVGA & SVGB) announced Friday the sale of 1,500,000 shares of its Series A Common Stock to an underwriting group lead-managed by Shearson Lehman Hutton Inc. First Boston Corporation and Oppenheimer & Co., Inc. are the other underwriters on the offering.

The transaction included 1,000,000 shares sold by the Company and 500,000 shares sold by existing stockholders. The underwriting group has the option to purchase 225,000 shares from the Company to cover over-allotments.

The Company intends to use the net proceeds from the offering of its shares to further its long-term growth strategy of pursuing selected acquisition opportunities and for other general corporate purposes.

Stevens Graphics Corp. designs, manufactures, markets and services web printing and packaging presses, collators and related graphic arts equipment throughout the world.

The Company serves the packaging, commercial, business forms and currency/securities segments of the domestic and international printing and packaging industries. Stevens' strategy is to create, by internal growth and by acquisition of other printing and packaging equipment manufacturers, a global company providing the commercial printing and packaging industries with a ''complete systems solution'' for printing, pre-press and post- press equipment.

The public offering is to be made only by means of a prospectus, which may be obtained from any member of the underwriting group, including Shearson Lehman Hutton Inc. at American Express Tower, Three World Financial Center 200 Vesey Street, New York, New York 10285.

HARTFORD, CT (JAN. 12) BUSINESS WIRE - Aetna Life & Casualty, Voluntary Hospitals of America Inc. (VHA), and VHA Enterprises Inc. have agreed to restructure their current partnership in PARTNERS National Health Plans, subject to approval of the companies' boards and VHA Enterprises' shareholders.

VHA will have responsibility for hospital provider network design and composition, and Aetna will become sole owner of PARTNERS National Health Plans.

PARTNERS is the nation's third largest managed health care organization, with almost three million members in 33 states. PARTNERS was founded in 1985 as a 50-50 joint venture between Aetna and VHA Enterprises, a subsidiary of VHA.

Under the restructuring, VHA Enterprises will receive $26 million in cash at closing and up to $8 million in cash, payable over the next two years. VHA Enterprises also will be relieved of its present liability for more than $34 million of PARTNERS' obligations, the bulk of which is owed to Aetna.

In addition, all shares of VHA Enterprises' stock held by Aetna and by PARTNERS will be returned to VHA Enterprises.

The agreement calls for VHA to provide extensive services to Aetna in managing its relationship with health care providers, including primary responsibility for the design and composition of hospital provider networks. VHA will provide consulting services in the areas of quality assurance, utilization management programs, HMO management and acquisition

and managed care product development.

The restructuring, which is also subject to approval by regulatory authorities and certain other pre-closing conditions, is expected to be completed this spring.

VHA is the nation's largest alliance of not-for-profit hospitals. Aetna is the nation's largest investor owned insurance and financial services organization.

STAMFORD, CT (JAN. 12) BUSINESS WIRE - American Television and Communications Corp. has concluded that potential cross-ownership problems under federal law have been resolved for its Austin, Texas, cable system and the cable systems in the Los Angeles area owned by ATC and Paragon Communications, as a result of the recently completed acquisition of Warner Communications by Time Warner Inc.

ATC is an 82 percent owned subsidiary of Time Warner and owns 50 percent of and manages Paragon Communications.

The potential cross-ownership problems arose from the proposed merger of Warner Communications and Time Inc. announced in March 1989. It was then anticipated that Chris-Craft Industries Inc. and its affiliate BHC Communications would own stock in the new Time Warner Inc. Because BHC owns television stations in San Antonio, Texas, and Los Angeles, ATC and Paragon could have been required to divest their cable systems to comply with federal law.

The merger terms subsequently were revised and Time Warner's recently completed acquisition of Warner Communications has relieved the ATC and Paragon systems from possible divestiture. Time Warner had been granted an 18-month divestiture waiver to resolve this issue last spring.

PIKEVILLE, KY (JAN. 12) BUSINESS WIRE - Pikeville National Corp.

(NASDAQ:PKVL) will acquire 100 percent of F. Deposit Corp., Flemingsburg, Ky.

F. Deposit Corp. owns 100 percent of the capital stock of Farmers Deposit Bank, Flemingsburg.

This announcement came from Burlin Coleman, chairman of Pikeville National Corp., and William A. Graham Jr., chairman of F. Deposit Corp.

The agreement provides for an exchange of Pikeville National Corp. common stock for all of the outstanding shares of F. Deposit Corp. This agreement is subject to approval by all the regulatory agencies.

Farmers Deposit Bank had assets of $64,200,000 and capital of $6,004,000 as of Dec. 31, 1989. Pikeville National Corp. presently owns five banks with total assets of $703,000,000. Combined assets as of Dec. 31, 1989, equal $767,200,000.

''Farmers Deposit Bank is an excellent bank in a vibrant community,'' Coleman said. ''We have the highest respect for Bill Graham and his staff. There will be no change in Farmers Deposit Bank's management, employees or directors.

''Farmers Deposit Bank will continue to do business under its present name and its management will continue to respond to the needs of its customers, employees and community. We look forward to a great and exciting future and welcome Bill Graham and his people to our team.''

''We believe this is a very positive step for Farmers Deposit Bank,'' Graham said. ''The combined resources of the corporations make it easier for us to respond to the needs of our customers and community as well as the regulatory changes and demands. We look forward to becoming a part of a larger team.''

SOMERVILLE, NJ (JAN. 12) BUSINESS WIRE - Beatrice D'Agostino, president and chief executive officer of Bancorp New Jersey Inc. (OTC, NASDAQ: BCNJ) announced Friday that a definitive agreement has been signed by which Bancorp New Jersey's subsidiary, the New Jersey Savings Bank, would acquire the Finderne Office (Bridgewater Twp., N.J.) of Hansen Savings Bank SLA.

Under the terms of the agreement New Jersey Savings Bank and Hansen Savings Bank SLA will make immediate application with regulatory authorities to obtain the necessary approvals for the purchase and sale of the Finderne Branch Office, including approximately $10 million in deposits. Other terms of the agreement were undisclosed.

"Acquisition of this office provides the opportunity for New Jersey Savings Bank to expand its customer service base into the Bridgewater Township market area, while taking advantage of the bank's expertise and name recognition in Somerset County," said D'Agostino.

The 118-year-old New Jersey Savings Bank, with assets of $274.3 million at Sept. 30, 1989, currently operates six banking offices in Somerset, Hunterdon and Mercer counties and is a member of the Federal Deposit Insurance Corp. (FDIC).

Hansen Savings Bank SLA, with assets of $636 million, continues to operate three branches in central New Jersey and six branches in southern New Jersey.

#90012b0762 01/12/1990 ~Business Wire

NEW CANAAN, CT. (JAN. 11) BUSINESS WIRE - Century Communications announced results of the quarter and the six months ending Nov. 30, 1989 Friday.

Total revenues for the second quarter were $54,470,000, up 15.0 percent over the $47,357,000 for the comparable 1988 quarter.

Operating income before depreciation and federal income taxes was equal to 51.7 percent of revenues or $28,184,000, an increase of $3,357,000 over the $24,827,000 of the second quarter of 1988. The loss for the quarter was $15,193,000, 23 cents per share, compared to a loss of $6,648,000, 10 cents per share, for the same quarter in 1988.

Total revenues for the six month period were $107,349,000, an increase of $16,389,000 or 18 percent over the prior fiscal year's first half. Operating income before depreciation and federal income taxes was equal to 50.9 percent of revenues or $54,672,000, an increase of $5,915,000 over the $48,757,000 reported in the first half of 1988.

The net loss for the six months was $29,602,000, or 45 cents per share, compared to a net loss of $8,846,000, or 13 cents per share, for the comparable six months of the prior year.

Century operates 55 cable television systems in 24 states and Puerto Rico serving approximately 825,000 primary basic subscribers. Century also owns and operates four radio stations and owns or has agreed to purchase cellular telephone systems which serve markets with a population of approximately 2,500,000.

HAUPPAUGE, NY (JAN. 12) BUSINESS WIRE - TSR Inc., (NASDAQ: TSRI), a supplier of computer software and information services, Friday reported revenues and earnings for the quarter and six months ended Nov. 30, 1989. The comparative results follow.

J.F. Hughes, president, stated, ''The revenue declines for the current three and six month periods were principally the result of the previously announced May 1989 sale of substantially all the assets of CDP Marketing Information Corporation, the company's bank marketing services wholly-owned subsidiary. The company was profitable in spite of operating losses incurred during the current and prior year periods as a result of net investment income.''

Additionally, the provision for income taxes was favorably adjusted in the current quarter and for the six months ended Nov. 30, 1989 by $30,000 and

$60,000 respectively, as compared with $36,000 and $71,000 for the corresponding prior year periods, due to partial reversals of deferred income taxes previously established at higher tax rates relating to the cash to accrual basis.

TSR Inc.

#90012b0765 01/12/1990 ~Business Wire

BILLERICA, MA (JAN. 12) BUSINESS WIRE - Davox Corp. (OTC:DAVX) announced Friday preliminary results for the fourth quarter of 1989, ended Dec. 31, and for all of fiscal 1989.

Revenue for the quarter and for the full year was $10.6 million and $36.3 million, respectively. Net income was $178,018 for the fourth quarter. The company reported a net loss of $2,042,966 for the full year. In the third quarter of 1989, Davox reported revenue of $8.8 million and a net loss of $332,000.

Revenue for the fourth quarter of 1989 and for the full year compares with $11.52 million and $36.28 million, respectively, reported in 1988. Fourth quarter 1989 net income compares with a net loss of $1,596,000 reported for the same period in 1988. The 1989 full-year net loss compares with a net loss of $3,430,000 for 1988. Net loss figures from 1988 reflected a non-recurring restructuring charge of $1,750,000.

''We ended 1989 on a strong note, highlighted by a contract from Ford Motor Credit Co. potentially worth up to $12 million,'' said Daniel A. Hosage, president, chairman and chief executive officer. ''This is the largest single customer order in our history, and volume shipments are aleady underway. We returned to profitability in the fourth quarter and demonstrated a steady revenue gain over the last several quarters.''

Davox develops, produces and markets computer aided communications systems which include predictive dialing, voice response and multifunction workstation systems. These products automate and integrate telephone and data communications functions in applications such as collections, telemarketing and customer service.

STAMFORD, CT (JAN. 12) BUSINESS WIRE - TSS Ltd. (NASDAQ: TSSL) Friday reported results for the second quarter and first half of fiscal 1990.

TSS's revenues for the three month and six month periods ended Nov. 30, 1989, were $70,790 and $120,563, respective, compared to $4,750 recorded in both 1988 periods. (There was no revenue recorded in the fiscal 1988 first quarter.)

Fiscal 1990 second quarter revenues also compared favorably to the $49,773 recorded in the first quarter of fiscal 1990.

TSS reported net losses of $1,135,568, or 24 cents per share, and $2,291,448, or 50 cents per share, for the second quarter and first half of fiscal 1990, respectively.

In the comparable fiscal 1989 periods, the company had net losses of $306,623, or 7 cents per share, and $692,493, or 15 cents per share, respectively.

TSS, a development stage company founded in May 1988, completed an $8.625 million initial public offering in December of last year. The company provides its proprietary in-store coupon distribution service to packaged goods manufacturers through its Savings Spot R program utilizing its patented consumer-operated coupon dispensing machines.

STAMFORD, CT (JAN. 12) COMTEX - Through its subsidiaries, NERCO Inc. of Portland, OR, has acquired oil and gas interests in LA, TX, and OK from six privately owned companies.

The properties include interests in seven offshore and 11 onshore oil and gas fields in those three states, according to a filing with the Securities and Exchange Commission.

The holding company paid about $158.9 million for the interests.

NERCO estimated that the properties contain proven developed and undeveloped reserves of about 62.2 billion cubic feet of natural gas and 5.9 million barrels of oil and natural gas liquids.

STAMFORD, CT (JAN. 12) COMTEX - MagneTek Inc. of Los Angeles has entered an agreement to buy all the common shares outstanding of ABB Electric Inc. for $54 million, according to a Securities and Exchange Commission filing.

ABB's parent, Asea Brown Boveri Inc., is selling the company under a consent decree with the U.S. Justice Department.

The decree involves Asea Brown's joint venture with Westinghouse Electric Corp., under which the two combined their U.S. power transmission and distribution businesses.

ABB, a leading manufacturer of medium-power transformers, reported sales of $79.8 million for the 10 months ended Oct. 31.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 11, 1990

-30- 905
#90012c0025 01/12/1990 ~Comtex
STAMFORD, CT (JAN. 12) COMTEX - Two shareholders asked the Delaware Chancery Court, in a class-action suit filed Dec. 29, to block a group led by AIFS Inc. President Roger O. Walther from acquiring the company.

Peter Kennard and Johanna R. Hale charged that the $5.25 a-share bid was timed to take advantage of AIFS' depressed stock price and does not reflect the true value of the company, according to a Securities and Exchange Commission filing.

The shareholders argued that, because a large block of AIFS' shares are

held by insiders, the board has a ''greater responsibility than they would otherwise have to adequately insure that no conflicts of interest exist.''

The company and its entire board, including Walther, are named in the suit.

The buyout would deprive shareholders of the benefits of the education company's long-term growth and profitability, the shareholders said.

AIFS said it believes it has ''meritous defenses'' to the suit.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 11, 1990

#90012c0026 01/12/1990 ~Comtex

STAMFORD, CT (JAN. 12) COMTEX - The Colonial BancGroup Inc. said it will take a $35.5 million charge against earnings in the fourth quarter, primarily to reflect the write down of goodwill accumulated in the company's recent acquisition binge.

The company, based in Montgomery, Al, said it also added $6 million to its loan loss reserve in the fourth quarter.

Colonial will write off goodwill totaling $31 million, according to a Securities and Exchange Commission filing.

Goodwill is an intangible assets that relates to such things as a company's good name and must be written off over a period of time.

The company will also write off $4.5 million relating to recently acquired bank buildings.

Because it has centralized operations, the bank buildings are no longer as valuable as they were when they housed free-standing banks, Colonial said.

The company said it must add to loan loss reserves because of loan growth in 1989 and uncertainty about the direction in which the economy is heading.

Colonial's net loans grew to $1 billion as of Nov. 30, from $884 million at year-end 1988.

Following the addition to reserves, the company will have a reserves-to-outstanding-loans ratio of 1.4 percent.

Colonial has primary capital of 5.75 percent and total capital of 7.85 percent, both well above minimum regulatory standards.

#90012c0057 01/12/1990 ~Comtex

WASHINGTON (JAN. 12) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, AIFS Inc.'s statutory agent in Delaware was served with a summons and class action complaint regarding retained earnings, inequitable insider control of company, an undervalued buyout offer, and a general nonrepresentation of the interests of shareholders by insiders. The insider shareholders control 57% of issued stock and have, according to the suit, "a greater responsibility to insure that no conflicts of interests exist ... [and to] maximize shareholder value."

Since 1985, the suit alleges, AIFS ceased to pay cash dividends to shareholders, despite profits, in order to fund business expansion. Further allegations contend that the buyout, offered at $5.25 per share by president Roger Walther and others, takes advantage of a temporary depression in stock price that does not reflect AIFS's true value, and thereby attempts to deprive public shareholders of benefits of the company's long-term, profitable growth.

AIFS intends to contest the action vigorously.

#90012c0059 01/12/1990 ~Comtex
WASHINGTON (JAN. 12) COMTEX - The 8-K report filed at the SEC shows on Dec. 29, 1989, UMC Electronics Co. discontinued the services of Ernst & Young as their independent auditors. Ernst & Young's opinion in their 1988 fiscal report for UMC Electronics stated that UMC Electronic's ability to continue as a going concern was contingent upon their ability to attain satisfactory levels of cash-flows from operations. Otherwise, the change was not made because of disagreements over accounting practices, financial statement disclosures or auditing procedures.

On Jan. 2, 1990, UMC Elecronics engaged the services of Deloitte & Touche as their new independent auditors.

BEIJING (JAN. 12) - China's tight-fisted austerity policy pushed industrial growth down to 6.8 percent last year, from an over-heated 17.7 per cent in 1988, it was reported Friday.

But growth of fourth-quarter industrial output came to a near standstill at 0.7 percent, the State Statistical Bureau said, fueling concern among observers that China is settling into a recession.

The Chinese government, which launched an "economic rectification" program more than a year ago to curb double-digit inflation, has repeatedly dismissed the industrial slowdown as temporary.

Total industrial output - the figure on which industrial growth is based - was 1.296 trillion yuan (275.6 billion dollars) in 1988, the bureau said.

Rural and collectively-owned industries bore the brunt of the slowdown, just as they had led the breathless industrial growth of 1988 with their

export-oriented products and more efficient management.

NAIROBI (JAN. 12) - A total of 45,000 bags of Kenyan coffee were offered for sale to markets at Nairobi's weekly auction and 44,704 bags were sold for an average 1,537.74 Kenyan pounds (1,464.51 dollars) per ton.

A stronger overseas market pushed prices up by four to five dollars.

To date, 2,415,429 bags have been sold to all markets, including 1,333,366, bags of 198889 pool, with an overall gross average price of 1,815 Kenyan pounds (1,728.57 dollars) per ton.

KUALA LUMPUR (JAN. 12) - The Association of Tin Producing Countries (ATPC) and non-members Brazil and China said here Friday that they would lower tin exports and take stringent measures to curb smuggling.

The ATPC said in a statement at the end of a four-day meeting that stocks stood at an estimated 33,900 tons at the end of October against 33,000 tonnes at the end of July.

It said members - Australia, Bolivia, Indonesia, Malaysia, Nigeria, Thailand and Zaire - agreed to export 84,233 tons of tin in the 10 months from March, or a five percent cut from the existing export ceiling of 106,400 tons in the 12 months ending February.

Brazil, the world's largest producer, agreed to keep exports in 1990 within levels which would maintain market stability and achieve the ATPC's objective of reducing the stock overhang to 20,000 tons, the ATPC said.

Brazil had volunteered to keep exports to 31,500 tons in calendar 1989 but trade sources said that some 9,000 tons of excess tin were smuggled out during the year bringing prices down.

China, meanwhile, pledged to control tin exports for 1990 at a level lower than 1987. China does not report export figures but trade sources estimated that it sold 18,000 tons of tin last year and 15,000 tons in 1987.

In another attempt to cooperate with the ATPC, China recently imposed a substantial export tax to discourage exports of tin concentrates.

"The meeting also agreed that both members and observers should take stringent measures to curb smuggling, which has been a major factor

contributing to the recent increase in stocks," the ATPC statement said.

The group said that the recent fall in tin price might have been precipitated by the usual mid-year lull in consumer demand but increased supply and excessive merchant speculation compounded the decline, especially in August and November.

The metal now trades at around 7,000 dollars a ton, down from more than 10,000 dollars earlier last year.

"We had the full cooperation of Brazil and China," Visith Noiphan, the leader of the Thai delegation said, adding that the agreement was a good sign for the market.

SEOUL (JAN. 12) - South Korea has rejected a U.S. demand to open its beef market wider, despite threats of retaliatory measures from Washington, South Korean officials said here Friday.

During talks between the two countries here Thursday, South Korea also turned down a U.S. demand that Seoul present a clear-cut timetable on liberalizing importation of foreign beef, the sources said.

They said that South Korea was sticking to its position of maintaining an annual import quota on foreign beef to protect its fledgling livestock industry.

The two sides agreed to meet again soon, probably in Washington, but no date was fixed, the sources said.

The U.S. Trade Representative's Office in Washington has warned that retaliatory action would be taken if no agreement was reached by late April.

Shin Koo-Bum, chief of the agriculture ministry's livestock department, who led the South Korean delegation, was quoted in local press reports as saying that Seoul needed to continue import restrictions.

He said South Korea would ban imports of U.S. beef if Washington carried out its threat to take retaliatory measures.

This year's beef import quota was expected to be 50,000 tons, about the same as last year's, officials said.

South Korea imported 33,000 tons of beef from Australia, 12,000 tons from the United States, 2,900 tons from Canada and 1,550 tons from New Zealand

in 1989, officials said.

South Korea has also been under pressure to open more of its markets.

The General Agreement on Tariffs and Trade (GATT) formally decided in October that Seoul should lift import restrictions on all goods by June 1997.

TOKYO (JAN. 12) - Bank of Japan Governor Yasushi Mieno expressed grave concern Friday over the recent trend of rising crude oil prices and already skyrocketing land prices which would adversely affect domestic inflation.

In a lecture in Tokyo, Mr. Mieno said that he did not expect consumer spending to begin falling this year but added that "maintaining price stability to sustain continued economic growth is the most important."

He cited the yen's continued weakness and a serious domestic labor shortage as other factors threatening price stability.

#90012d3950 01/12/1990 ~French/German News Agency

TOKYO (JAN. 12) - Japan will import 167,000 tons of beef for general use during the first half of fiscal 1990 starting April, under a quota decided by the Agriculture, Forestry and Fisheries Ministry, ministry officials said Friday.

The quota for beef imports for the first half of year for general use is usually set in February, but demand for beef has been so strong this year that the ministry decided on it earlier than usual, the officials said.

The import quota for business use such as in hotels will be fixed later, they said.

Japan has agreed with the United States and Australia, the two main beef exporting countries to Japan to import 394,000 tons during fiscal 1990, up 6,000 tons from the current fiscal year ending March.

TOKYO (JAN. 12) - Japan's Tokai Bank Ltd. is seeking to buy 25 percent of Carr Futures International Inc., a Chicago futures broker owned by Banque Indosuez of France, for five million dollars, a bank official said Friday.

The official said details of the purchase were still being worked out.

Carr Futures, set up by Banque Indosuez in 1987, is a clearing member of both the Chicago Board of Trade and the Chicago Mercantile Exchange. The bank operates affiliated companies in Paris and Singapore.

The Nagoya-based Tokai bank is Japan's seventh-biggest bank with 34,333 billion yen (237 billion dollars) in assets at the end of September.

CAIRO (JAN. 12) - Egyptian President Hosni Mubarak Friday dismissed Interior Minister Zaki Badr, a former police general who had for almost four years been a key hardline force against dissidence and Moslem fundamentalism.

General Badr, 64, was replaced by Mohamed Abdel Halim Mussa, the governor of Asyut in Upper Egypt, according to a presidential decree.

The decree gave no reason for the decision, but the move came amid increasing criticism in political circles of Gen. Badr for his use of excessively strong language in frequent attacks on the opposition.

The press carried remarks he made at a recent meeting in which he insulted several opposition figures, notably the leaders of the fundamentalist Moslem Brotherhood, a group tolerated in Egypt although formally illegal.

Gen. Badr was noted for his hard line against Moslem fundamentalists and was repeatedly attacked by the opposition for crackdowns on dissidents.

He was appointed interior minister in February 1986, replacing Ahmed Rushdi who had resigned after riots in the police force.

Gen. Badr is also a former governor of Asyut, a centre of Islamic and Christian fundamentalism.

#90012d5110 01/12/1990 ~French/German News Agency

FORT BRAGG, North Carolina (JAN. 12) - More than 2,000 soldiers of the elite 82nd Airborne Division who took part in the U.S. invasion of Panama flew back home Friday, jumping from planes onto their base here to the cheers of flag-waving families and friends.

In a flawless 20-minute operation, 20 C-141 transport planes dropped the paratroopers in two waves onto the sprawling base. Attending the welcoming ceremony were several dignitaries, including Army Chief of Staff General Carl Vuono.

The jump was moved up two hours because of strong winds.

Thursday, Defense Secretary Dick Cheney said that the schedule for withdrawing the U.S. invasion force from Panama should be set by the end of the week.

But he said that U.S. troop strength would be reduced by the number of forces sent in for the December 20 invasion - about 14,000.

The 12,000 U.S. troops permanently stationed in the Panama Canal Zone under the U.S. Southern Command would remain, he said.

#90012d5820 01/12/1990 ~French/German News Agency

TOKYO, (JAN 12) - Texan oilman and corporate raider T. Boone Pickens, the biggest shareholder in Japan's Koito Manufacturing Co. Ltd, said Friday he was suing the company for alleged illegal ties with Toyota Motor Co.

The suit, filed in the Tokyo District Court, aims to investigate alleged dumping activities by Japan's biggest light automobile manufacturer, according to a statement released by Pickens' lawyers. The move follows repeated requests by Pickens to examine the minutes of a November board meeting which rejected his demand for a bigger dividend.

Pickens is also seeking to examine various Koito accounts which allegedly show sales of cheap parts to Toyota and other Japanese carmakers as well as exhorbitant fees paid to lawyers and consultants.

The Texan oilman has been locked in a bitter dispute with Koito since March last year when he acquired 20.2 percent of the company, displacing Toyota as its biggest shareholder. Despite two visits to Japan, where he met with Koito management, the company has refused to grant him board representation. The refusal shows that Koito shuts out "outsiders who are not members of the Japanese closed corporate system," the statement said.

The reluctance to disclose details of the company's books reveals the company's "hidden reason", which the statement said was to suppress details of cheap sales of parts to Japanese carmakers that deprived shareholders of reasonable profits.

Koito president Takao Matsuura released a brief statement, saying he was "very surprised" by the legal action. He admitted that the company was slow in responding to Pickens' request but said this was due to the paperwork involved and the onset of the end-of-year holiday period. Toyota owns 19 percent of Koito.

PHNOM PENH (JAN. 12) - Phnom Penh wants to double its imports from capitalist neighbors to offset an expected drop in products arriving from eastern Europe, a Cambodian Planning Ministry official said here Friday.

"We anticipate a significant growth this year in our economic relations with capitalist countries in the region, such as Thailand, Singapore, Hong Kong,

Australia and Japan," said Un Buntha, deputy director of the ministry's general planning department.

He said Cambodia was developing regional ties to protect the nation's "already feeble economy" from any major blows that might result from political upheaval in Eastern Europe.

Cambodia runs a massive trade deficit with other socialist nations,

according to official figures.

"Last year, we balanced our imports and exports with capitalist Asian nations at 17 million U.S. dollars, but we expect in 1990 to double our imports from these countries and to increase our exports by about a million dollars," Mr. Buntha said.

"The currently signed agreements with East European nations under our 1986-90 plan will be respected, but we don't know what will happen after that, given the important changes under way there," he said.

Mr. Buntha said Cambodia would welcome trade with "other capitalist countries" outside Asia. But another official admitted that it "isn't easy" to strengthen ties with capitalist nations while fighting continues between the Vietnamese-backed government and the tripartite resistance coalition headed by Prince Norodom Sihanouk and former prime minister Son Sann.

Mr. Buntha said that in 1989, Cambodia's imports from socialist nations were worth 122 million rubles (97.6 million U.S. dollars), while exports to them totaled a mere 23 million rubles (18.4 million dollars).

For this year, imports from socialist nations have been pegged at 135 million rubles (108 million dollars) while exports should total 42 million rubles (33.6 million dollars), he said, adding that the figures covered only government trade, as statistics were not available from the private sector,
which has been expanding rapidly.

Cambodia's main exports are wood, fish and agricultural items, such as peanuts, soybeans and corn. It imports mainly basic goods, machine tools and fuel.

#90012d5980 01/12/1990 ~French/German News Agency

NEW DELHI (JAN. 12) - India's foreign currency reserves dropped by more than 627 million dollars in the year to December 29, the steepest fall ever in a single business year, the Press Trust of India (PTI) said Friday.

On the last Friday of 1989, the reserves totalled 3.1 billion dollars, sufficient to pay for just two-and-a-half months of imports, the news agency said quoting Reserve Bank of India (RBI) figures.

The drop was the steepest ever recorded over a single business calendar year, PTI said. In the year up to December 29, 1988, the decline was 503 million dollars.

PTI cited no reasons for the unprecedented drop, but high imports of such essentials as crude and edible oil and heavy debt servicing were believed to be the main factors.

#90012d6170 01/12/1990 ~French/German News Agency

STOCKHOLM (JAN. 12) - A Finnish ferry boat undergoing a refit at Nacka shipyard outside Stockholm was damaged, possibly beyond repair, in a fire which raged on board for three days before being put out Friday, firemen said.

No-one was injured in the blaze but damage is initially estimated at more than 500 million Swedish crowns (about 80 million U.S. dollars). Only the machine room and the hold were unscathed, firemen said.

An official from the Finnbodavarvet shipyard, said the cause of the fire was still being investigated. He said it was not yet known whether the ship, the Sally Albatross, could be repaired.

The ship is owned by the Finnish company Sally Lines.

#90012d6290 01/12/1990 ~French/German News Agency

PARIS (JAN. 12) - Air France said here Friday it is to take control of France's leading private airline UTA, a subsidiary of the Chargeurs group.

Air France said it was to take 54.58 percent of UTA capital.

Shares in UTA and Chargeurs had been suspended in Paris Friday ahead of the announcement.

Air France, the national airline, owns 120 aircraft, serves 197 routes in 79 counries and carried 15 million passengers in 1988. Turnover for that year was 31 billion francs (5.34 billion dollars).

UTA has a fleet of only 19 aircraft, six of which belong to its charter subsidiary Aeromaritime.

It serves mainly the countries of black Africa and others in the Asia-Pacific region, where Air France is virtually absent.

#90012d6860 01/12/1990 ~French/German News Agency
PARIS (JAN. 12) - The French aerospace group Aerospatiale said Friday it had received a record 66 billion francs (11.37 billion dollars) in orders in 1989 and that its turnover on the year rose 12.5 percent to 31.5 billion francs (5.43 billion dollars).

Aerospatiale president Henri Martre told a news conference that the turnover figure would rise progressively in the coming years to reach around 44 billion francs (7.58 billion dollars) by 1992.

Export turnover, valued at 20 million francs (3.44 million dollars), accounted for around 75 percent of the overall 1989 turnover figure which boosted the value of all Aerospatiale orders to around 90 billion francs (15.51 billion dollars).

The 1989 result was due largely to sales of Airbus and other commercial aircraft as well as helicopters and various strategic and space-related products.

WASHINGTON (JAN. 12) - U.S. Senator Rudy Boschwitz is to arrive in Berlin Monday for an emotional visit to the city of his birth which has has not seen since he was a child.

''I'd never wanted to go back and see Berlin before, as a divided city,'' Boschwitz, senator from Minnesota, announced in Washington Thursday. ''But when I saw the pictures of Berlin after the opening of the Wall, I felt a strong need to return and look up my old home.''

Boschwitz was only 3 years old when his parents fled Germany as the Nazis seized power in 1933. The family came to America in 1935.

Monday's visit will start with stops at the Brandenburg Gate and the Berlin Wall. The next day he will visit his birthplace.

''I'm looking forward to being there personally and experiencing the neighborhood and the people,'' Boschwitz said.

He also plans to tour East Berlin and meet with East German government and opposition leaders, as well as with West Berlin Mayor Walter Momper.

#90012d6900 01/12/1990 ~French/German News Agency
BEIRUT (JAN. 12) - Christian leader General Michel Aoun, who refuses to recognize the Syrian-backed Lebanese government, is in permanent contact with Damascus in a bid to become president, a senior cabinet minister has charged.

Agriculture Minister Mohsen Dalloul, a figure considered close to Syria, said in an interview in the Ad-Diyar newspaper Friday that he had sat in at several meetings between Syrian officials and emissaries from Aoun.

Aoun, who heads a contested military government, "proposed everything", including "delivering" pro-Iraqi officials to the Syrians, in a bid to persuade Damascus to accept his candidacy as president, Dalloul charged.

The general, backed by weapons delivered mainly from Iraq, waged a six-month "war of liberation" against Syria's troops in Lebanon last year. He rejected an Arab peace plan because it failed to guarantee a Syrian military withdrawal.

Aoun remains entrenched in the Baabda presidential palace near here backed by 15,000 regular army troops and refuses to heed calls by Syrian-backed President Elias Hrawi and his prime minister Selim al-Hoss to step down.

On Friday, he described Hrawi and Hoss, who came to power under the Arab plan in late November with strong international support, as "vile agents of foreign states that want to hand Lebanon as a consolation prize to Syria."

"These agents want to keep their posts to end what is left of Lebanon," Aoun told supporters at Baabda. "They leave us with shame, underdevelopment, humiliation and servitude before occupying forces and terrorists."

Aoun's government meanwhile declared "null and void" key diplomatic appointments announced one day earlier by the Hoss administration and said those who responded to the new measures would be "tried for collaboration with the Syrian occupation forces."

A senior member of Aoun's administation had earlier warned of retaliatory measures against countries that expel Lebanese ambassadors.

Most Western diplomatic missions are in Christian east Beirut, controlled by Aoun's troops and the Christian Lebanese Forces militia.

The Hoss cabinet named a new ambassador to Washington and announced that top posts would be reassigned at the United Nations, Paris, Bern, London and Rome.

Lebanese demonstrators backing Aoun have occupied the embassy in Paris, threatening to stay for several days, to protest the new appointments.

Hoss's finance minister, Ali al-Khalil, left Beirut for Paris, Washington and the United Nations in New York "as part of government efforts to extend its sovereignty and authority over all Lebanese territory."

Dalloul, in the Ad-Dayar interview, criticised France and the Vatican for limiting themselves to "verbal" support for Hrawi and Hoss.

"This pleases us very much, but we have not seen until now any positive

action," the agriculture minister added without elaborating.

He described the Vatican's position as "strange," noting that when Papal nuncio Monsignor Pablo Puente presented his credentials to Hrawi last week, "he alluded to a recognition of the legality of the Aoun situation."

Mr. Dalloul said the Vatican "is behaving with a crusade-type logic as if it wanted to turn Lebanon into a solely Christian nation."

Mgr. Puente failed to openly support the Arab peace plan and called for "dialogue between all parties," with special attention to those "who fear for their future" -- an apparent reference to residents of Christian areas.

#90012d6930 01/12/1990 ~French/German News Agency

JOHANNESBURG (JAN. 12) - The industrials index on the Johannesburg Stock Exchange hit a third record in a week Friday, according to preliminary closing indexes.

The index hit 3,007 points, a three-point gain on Thursday's close, when it broke through the 3,000 mark for the first time to end on 3,004. On Monday it had risen to 2,933, which shattered the previous record of 2,853 posted a week ago Thursday.

Analysts said the index was going from strength to strength as the big institutions sought out quality scrip.

The overall index dropped eight points Friday from Thursday's record of 3232.

LONDON (DEC. 12) - Foreign Secretary Douglas Hurd may meet the released African National Congress veteran Walter Sisulu during a proposed visit to London later this month, the Foreign Office said Friday.

The former ANC secretary-general was freed from a South African jail last October after serving 25 years of a life sentence and is believed to be planning a European tour.

A Foreign Office spokesman said: "Since Britain campaigned for his release from detention it would be natural that he should call at the Foreign Office. A meeting with the Foreign Secretary, if he is in London at the time, cannot be ruled out, or with some other minister."

Prime Minister Margaret Thatcher is believed to be planning to visit South Africa later this year, and Hurd is also thought to be considering a visit in the next few months.

JOHANNESBURG (JAN. 12) - The National Education Co-ordinating Committee (NECC) of watchdogs in black education Friday slammed minister Stoffel van

der Merwe for refusing to allow black candidates' exam papers to be marked again.

The pass rate for the 190,000 black candidates in last November's matriculation (high school graduation) exams was just 42 percent, compared to 54 percent the previous year and a 95 percent pass rate among white pupils this year.

Van Der Merwe on Thursday rejected NECC calls for a re-sit, on the grounds that it would not be fair to those who had passed. He said grading the papers again would cost too much, suggesting that anyone who felt hard done by could pay the usual 33 rand (13 dollar) fee to have their answers checked.

Dismissing his worries about the cost, the NECC said the minister's Department of Education and Training was tainted with allegations of fraud and embezzlement running into millions.

The NECC also criticized Van Der Merwe for supposedly choosing to work with black municipal councillors widely seen as corrupt puppets of Pretoria, saying he was "insensitive to our communities' feelings."

NEW YORK (JAN. 12) - Iran is to release 50 ill or wounded Iraqi prisoners of war in the next few days on humanitarian grounds, the Iranian permanent representative at the United Nations, Kamal Kharrazi, announced here Friday.

Kharrazi told reporters the release would mean that all sick Iraqi prisoners of war had been returned home.

He said the Iranians were holding 50,000 Iraqi prisoners, while Iraq was holding 55,000 Iranians.

A U.N.-mediated ceasefire has been in force in the Gulf since August 1988, but exchanges of prisoners remain a moot point in arguments between the two nations on a final peace settlement.

Iraq has declared its readiness to exchange prisoners, but Iran says it will only proceed with an exchange if Iraq simultaneously withdraws its troops from occupied Iranian territory.

According to Kharrazi, about 100,000 Iranians have fled the Iraqi-occupied villages and are refugees.

BUCAREST (DEC. 12) - Romania's new government has outlawed the Communist Party, the vice-president of the ruling National Salvation Front Council, Dimitru Mazilu, said on television Friday.

Mazilu, surrounded by other council members, said the Communist Party had been "declared illegal". He was speaking soon after demonstrators here demanded the expulsion of former Communist Party members from the new leadership.

He also said a national referendum would be held by popular demand "on the possible re-introduction of the death penalty". The Front announced the abolition of capital punishment on Dec. 31, following the Christmas Day execution of president Nicolae Ceausescu and his wife Elena.

Mazilu said a "national committee to solve all the population's grievances" would be formed. The committee would be "under the direct orders of the National Salvation Front Committee," he said.

#90012d8190 01/12/1990 ~French/German News Agency
BELGRADE (JAN. 12) - The authorities in Albania denied reports by the official Yugoslav news agency Tanjug on Friday that they had declared a state of emergency to forestall demonstrations by protestors.

Foto Cami, secretary of the central committee of the Albanian communist party, described the report as "a tissue of lies".

Anti-Albanian forces, he said, "wish to see Albania succumb to the same kind of upheavals as seen in eastern European countries."

Tanjug, citing "reliable sources", said on Friday that the authorities in Albania were "concerned to forestall demonstrations of protest" and had "put extremely strict measures into effect to control the situation in the country."

It described the measures as "a state of emergency".

Cami, in an interview with Albanian state television and radio, said the Yugoslav media had joined a campaign "to deprive Albania of its freedom, independence and sovereignty."

Yugoslavia, he said, "is seeking to discredit Albania so as to intensify repression and violence against Albanians in Yugoslavia."

The interview was reported by the Albanian news agency, ATA, monitored

here.

Albanian television, monitored here, made no mention of disturbances in its main evening news broadcast, which began with an item featuring communist party leader Ramiz Alia and mentioned the name of his late predecessor, Enver Hoxha.

In Paris, the Albanian embassy said that all international flights to and from the Albanian capital, Tirana, including a twice-weekly Air France flight, were operating normally.

On Thursday the Belgrade daily Politika Ekspres said that emergency measures had been imposed on Shkoder, northwestern Albania, after a demonstration by some of its 60,000 inhabitants said to have taken place late last month.

It said security had been tightened in border areas and in labour camps and that the number of guards at the residences in Tirana of Alia and of Hoxha's widow Nexhmia Hoxha had been quadrupled.

LONDON (JAN. 12) - The British Communist party daily, the Morning Star, said Friday that it would be forced to sack up to 25 of its 85 employees since a halving of orders from the Soviet Union caused its circulation to slump.

In a communique issued here, the newspaper said that it planned to go from 12 pages to eight as a temporary measure until its finances improved.

Several months ago, the Soviet Union cut its subscription to the Morning Star from 12,000 to 6,000, causing total sales to drop to 20,000 a day.

GRANADA, SPAIN (JAN. 12) EFE - An earth tremor measuring 3.5 on the open-ended Richter scale shook the southern Spanish province of Granada early Friday, authorities said.

No injuries or serious damage was reported from the quake, which occurred at 6:37 a.m.

Seismolgists said the temblor was centered near the village of Santa Cruz del Comercio, 390 km south of Madrid, and was felt in villages within a 10-km radius.

VALHALLA, NY (JAN. 12) PR NEWSWIRE - The board of directors of ComponentGuard, Inc. (NASDAQ: PLUG), headquartered here, today announced it has voted to reduce the exercise price of its outstanding warrants to $.30 from $.50 and to extend the expiration date of the warrants to March 30, 1990.

Under the previous structure, each public warrant entitled the warrant holder to purchase one share of the company's common stock at an exercise price of $.50 until Jan. 14, 1990. Under the new structure, the warrants may be exercised at $.30 until March 30, 1990, at which time they will expire.

"We are extremely pleased by the strong upswing in business during the current year," said Robert P. Minnick, ComponentGuard president and chief executive officer. "The monies generated from exercised warrants will help fuel continued growth that we anticipate in the months ahead."

ComponentGuard is now recognized among retailers nationwide as one of the leading providers of extended service plans and performance protection programs on a wide range of electronics products. ComponentGuard is the first and currently the only company to offer a "name brand" consumer extended warranty program, which includes a unique packaged off-the-shelf warranty plan called "Guardman."

RENO, NEV (JAN. 12) PR NEWSWIRE - Amserv Inc. (NASDAQ: AMSR) reported record results for the tenth consecutive quarter. Second quarter sales increased 45 percent and net income increased 44 percent. Sales were $3,070,747 with net income of $344,252 or $.11 per share for the quarter ended Dec. 31, 1989, compared to sales of $2,121,211 with net income of $239,793 or $.09 per share in the second quarter a year ago.

For the six months ended Dec. 31, 1989, Amserv had record net income of $701,164 or $.23 per share on record sales of $6,160,684 compared to net income of $494,906 or $.18 per share on sales of $3,991,603 in the like period a year ago.

The sales increase is attributed primarily to the company's nursing services business which has five offices located in Belleville, Ill.; Las Vegas, Nev.; Louisville, Ky.; St. Louis, Mo.; and Tucson, Ariz.

Amserv Inc. is a national health care services and products company that provides temporary nursing personnel to hospitals and nursing homes to supplement their permanent staffs under the name, Amserv Nurses, and markets cardiographic equipment and services under the name, Amserv Medical Products.

#90012p0025 01/12/1990 ~PR Newswire

COUDERSPORT, PA (JAN. 12) PR NEWSWIRE - Adelphia Communications Corp. (NASDAQ: ADLAC) announced updated forecasts to include the results of completed acquisitions of cable television systems located in central and

southwest Virginia, the transfer of southeast Florida cable systems to Olympus Communications, L.P. (a non-consolidated entity in which Adelphia holds partnership interests), and the pending acquisition of a western New York cable system from Jones Intercable.

For the year ended March 31, 1990, and the year ended March 31, 1991, total revenues for Adelphia and its wholly owned subsidiaries are expected to be approximately $244.6 MM and $278.4 MM, based upon average monthly revenues per subscriber of $27.03 for 1990 and $28.77 for 1991. Basic subscribers of systems wholly owned by Adelphia are expected to be approximately 763,000 (including the western New York acquisition) at March 31, 1990, and 801,000 at March 31, 1991.

Operating income for Adelphia and its wholly owned subsidiaries before depreciation and amortization, and interest expense is expected to be $140.7 million for the year ended March 31, 1990, and $167.7 million for the year ended March 31, 1991.

At March 31, 1990, Adelphia will own or manage cable television systems in 11 states serving approximately 1,100,000 basic subscribers including non-owned or non-consolidated cable television systems serving approximately 345,000 basic subscribers.

Based upon the now outstanding 13,819,476 shares of Adelphia's Class A and Class B common stock and a range of multiples of 11.5 times to 12.5 times the next 12 months projected cable cash flow (before investment income), which is $160.2 MM for the 12 months beginning April 1, 1990, and $182.0 MM for the 12 months beginning April 1, 1991, plus Adelphia's investment in the Olympus joint venture, the indicated private market value per share would range from $46 to $58 at April 1, 1990, and from $64 to $81 at April 1, 1991. Typically, cable television stocks, including Adelphia's Class A common stock, trade on the public markets at a substantial discount from indicated private market value per share.

The Class A common stock of Adelphia Communications Corp. is traded under the NASDAQ symbol "ADLAC."

BALA CYNWYD, PA (JAN. 12) PR NEWSWIRE - Germantown Savings Bank (GSB) (NASDAQ: GSBK) reported today that net income for the year ended Dec. 31, 1989, increased 3.3 percent to a record $8.8 million compared with $8.5 million a year ago.

Earnings per share were $2.19, up from $2.12 for 1988.

For the fourth quarter, net income was $2 million, or 51 cents per share, up from $1.9 million, or 48 cents per share, for the comparable period of 1988.

According to Martin I. Kleppe, chairman of the board and president of GSB, "Our 1989 record performance distinguishes GSB from many other banks and thrifts that are experiencing difficulties. GSB's earnings and capital remain strong and solid as indicated by our increase in net income to $8.8 million and our regulatory capital to regulatory asset ratio of 6.85 percent."

Kleppe continued, "In addition, our ongoing asset restructuring efforts are proving to be successful and are helping to strengthen our position to deal with a fluctuating interest rate environment."

At year end 1989, total stockholders' equity reached $85.5 million, or 6.07 percent of assets, compared with $76.7 million, or 5.57 percent of assets, a year ago. Book value per share at year end was $21.25, up from $19.06 per share a year ago. Total assets were $1.41 billion as of Dec. 31 1989, an increase of $32.6 million from the previous year. Deposits increased slightly to $1.29 billion at year end 1989.

Germantown Savings Bank, headquartered in Bala Cynwyd, is a state-chartered, FDIC-insured stock savings bank with 31 offices in the Pennsylvania counties of Berks, Bucks, Chester, Delaware, Montgomery and Philadelphia.

ATLANTA (JAN. 12) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) announced that a special meeting of its board of directors has been scheduled for the afternoon of Monday, Jan. 15, at which time the board will consider a definitive proposal for financing a recapitalization of the company.

This follows previous announcements by the company that its board preliminarily determined that a leveraged capitalization, among various transactions which had been under consideration, would be the most favorable to the company's stockholders, and that discussions with lenders concerning financing for a recapitalization plan were underway.

The company said no assurances can be given, however, that the financing proposal will be acceptable to the board or that a plan of recapitalization will be approved.

Georgia Gulf, headquartered in Atlanta and listed on the NYSE (GGC), is a major manufacturer of several highly integrated lines of commodity chemicals and polymers including aromatic, natural gas and electrochemical products as well as thermoplastic and thermosetting resins.

DONALDSONVILLE, LA (JAN. 12) PR NEWSWIRE - Melamine Chemicals, Inc. (NASDAQ: MTWO), today announced the unaudited results of its operations for the quarter and six months ended Dec. 31, 1989.

Net earnings for the six months ended Dec. 31, 1989, were $3.0 million, or $.55 per share as compared to net earnings of $3.1 million or $.57 per share a year ago. For the three months ended Dec. 31, 1989, net earnings were $1.5 million, or $.28 per share as compared to $1.5 million, or $.28 per share for the same period in fiscal 1989.

James W. Crook, chairman, stated that the second quarter earnings were adversely affected by lower production because of an annual maintenance turnaround taken in October 1989. Also during the second fiscal quarter of 1990, the manufacturing plants sustained damage caused by unprecedented cold weather and were shut down from Dec. 22, 1989, through Jan. 5, 1990. The company has contacted its insurer regarding the business interruption caused by cold weather and expects that most of the lost profits because of the shutdown would be covered by insurance. The expected insurance recovery applicable to the quarter ended Dec. 31, 1989 has been accrued.

Crook also stated that demand for melamine continues to remain strong and was reflected in further improvements in sales prices in the second quarter of fiscal 1990.

Melamine Chemicals, Inc. is engaged in the production and marketing of melamine, a specialty chemical having numerous industrial and commercial applications. The company is actively engaged in the development of new melamine process and applications technology. The company is one of only two producers of melamine in North America and one of the five largest producers worldwide.

WAYNE, PA (JAN. 12) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) announced today that it has agreed to acquire Warrington Financial Systems Inc., a subsidiary of United Kingdom-based SD-Scicon plc.

The acquisition, which is subject to certain conditions including approval of the shareholders of SD-Scicon, is expected to close during February 1990.

Warrington is the largest domestic provider of investment accounting and portfolio management systems and computer services to bank treasury departments. Revenues, a very high percentage of which are recurring, were approximately $38 million in 1989. The company's major product line is the IBM mainframe-based Bond On-Line Trading (BOLT) system, which together with its TRAC product line has among its customers approximately 160 of the nation's largest commercial banks. Warrington's other principal product is the PMS system, an industry- leading micro-computer product with more than 200 financial services customers, primarily thrifts. Warrington has 260 employees, with headquarters and principal operations in Minneapolis and additional offices in North Andover, Mass.

James L. Mann, president of SunGard, stated, "Of our 11 acquisitions to-date, Warrington is the most strategically significant. The company's products ideally complement the products and services we now provide through Money Management Systems Inc., Devon Systems International Inc., SunGard Investment Systems Inc. and Wismer Associates Inc. In order to capitalize on our comprehensive product position and expertise, we intend to form a new division named SunGard Financial Systems that will include Warrington, Money Management and Wismer Associates. Dr. David A. Wismer, a recognized industry expert as well as one of our most capable executives will head up the new division. The current executive group of Warrington will continue to manage that business, reporting to Dr. Wismer."

Gerald A. Kraut, president of Warrington, added, "The acquisition of Warrington by SunGard has major implications for our customers. SunGard is an extremely successful organization with a fine reputation for quality service and careful attention to customer needs. The opportunity to share applications knowledge and technical expertise will make each of the product lines of the combined operation better."

SunGard will pay $65.3 million in cash to acquire the net assets of Warrington, excluding approximately $10 million of debt. A portion of the purchase price will initially be financed with short-term bank debt based on a money market rate of interest.

SunGard Data Systems Inc. is the largest diversified provider of proprietary investment management systems to the financial services

industry, including shareholder accounting, portfolio management, investment accounting, employee benefit reporting, trust accounting, and securities and derivative instrument trading systems. SunGard is also the pioneer and leading provider of comprehensive computer disaster recovery services. Its common stock is reported on the NASDAQ National Market System under the symbol SNDT.

KENT, WA (JAN. 12) PR NEWSWIRE - Flow International Corporation (NASDAQ: FLOW) announced today that its Japanese strategic partner, Okura & Co., has invested $5 million in Flow's preferred stock, with an annual dividend of 8 percent completing an agreement announced last month.

"Okura is a distributor for our products in Japan. In partnership with Okura, we have penetrated important markets and have become the leader in waterjet cutting and drilling systems in Japan. This investment by Okura further strengthens the strategic alliance between our two companies," said Dr. Y.H. (Michael) Pao, president and chief executive officer.

Okura has a three-year option to convert this preferred stock into Flow's common stock at a price equal to 1.35 times the average daily closing price for the month of July 1990, but not less than $4 per share in any event.

The proceeds from this infusion will be used towards the retirement of approximately 1.6 million shares, or 12 percent, of Flow's outstanding common stock.

Flow International Corporation is the world's leader in ultrahigh-pressure waterjets for industrial cutting and drilling.

CAMBRIDGE, ENGLAND (JAN. 12) PR NEWSWIRE - IXI Limited today announced general availability of X.desktop(tm) Version 2.0, an OSF/Motif(tm) compliant desktop manager that incorporates advanced object management facilities.

IXI has been developing this object management approach for its software during the last two years and has incorporated it in X.desktop 2.0. IXI believes that as users demand more power and flexibility from their computers, an object-oriented approach will best meet users' needs. As a result, X.desktop 2.0 has object management facilities similar to those found in Hewlett-Packard's New Wave graphical user interface. But unlike New Wave, which runs only on DOS, X.desktop 2.0 provides these features on

UNIX(R) computers.

Leading vendors in the UNIX industry including IBM, Unisys, Uniplex, The Santa Cruz Operation Inc., Dell, Locus Computing, Unicad and Intel have recognized that X.desktop lets users harness the full power of their UNIX computers without knowing UNIX. Many of these companies offer X.desktop as part of a complete software solution.

X.desktop 2.0 features professionally designed icons that provide the popular 3D look and feel. There are several sets of incons each designed for high and low resolution screen insuring the highest clarity possible. X.desktop 2.0 also features a "supply cabinet" facility that contains frequently used objects for each individual user making them always close at hand.

IXI has also introduced new "client-server load balancing" technology. This maximizes the use of processor intensive activities and maintains optimum performance depending upon whether X.desktop is working in stand-alone or networked mode.

X.desktop 2.0 retail version is availble now for Sun 3, Sun 4, Apollo Domain, Hewlett-Packard 9000, Sony NEWS workstations, Mac II, DECStation and Intel 80386-based PCs directly from UniPress Software in the U.S., IXI in Europe and Tomen Electronics in Japan. The software will retail for $495 per single user. Site licensing is available.

X.desktop 2.0 conforms to the X/Open Common Application Environment, bears the X/Open Base 87 Application logo and is also POSIX compliant. The software also conforms to the X/Open Native Language System standard that enables the software to be easily translated into different languages and dialects. In addition, the software supports double-byte character sets for easy translation into Asian languages.

Headquartered in Cambridge, England, IXI Limited is a leading developer and supplier of X Windows-related software products and technology. IXI's corporate objective is to make it easier for non-technical users to take advantage of powerful computers.

NEW YORK (JAN. 12) PR NEWSWIRE - The trustees of Mellon Participating Mortgage Trust, Commercial Properties Series 85/10 (NASDAQ: MPMTS) today announced a fourth quarter dividend of 5.85 cents per share for the quarter ended Dec. 31, 1989.

The dividend is payable Feb. 12, 1990, to shareholders of record at the close of business on Jan. 29, 1990. This brings the dividend for calendar 1989 to 71.9 cents per share with 92 percent paid in the first three quarters. A REIT (real estate investment trust) must distribute 85 percent of its ordinary income during the same year in which it is accrued to avoid a penalty tax. The result is that 85 percent of the income, as in previous years, will always be distributed in the first three quarters with a lower fourth quarter dividend.

Compared to the total dividends for 1988 in the amount of 83.4 cents per share, the total 1989 dividend is down 11.5 cents per share. problem loans contributed to reduced earnings in 1989 with the major cause directly attributable to the Hall Street Industrial loan which is in default. Income not received from the Hall Street Industrial loan amount to 8.65 cents per share. Legal fees related to this loan were 2.18 cents per share. Negotiations are continuing in an effort to resolve all disputes between the borrower and the Trust. The Trust is continuing to pursue enforcement of its legal remedies against the borrower. Based upon its investigation to date, counsel continues to believe the Trust will ultimately prevail in the litigation with the borrower.

As of Dec. 31, 1989, approximately 96 percent of the net proceeds of the Trust were invested in seven permanent real estate investments secured by 47 properties located in 20 states. Five of the Trust's seven investments involving 83.3 percent of the assets are performing well.

SHIPPINGPORT, PA (JAN. 12) PR NEWSWIRE - Duquesne Light Co. employees at the Beaver Valley Power Station have set a new company safety record for work hours without a lost time accident, the company announced today.

The Beaver Valley personnel have completed 3.6 million work hours without a lost time accident. That represents 510 consecutive days without an accident that resulted in a worker at Beaver Valley having to miss work time.

John D. Sieber, vice president - nuclear for Duquesne Light, praised the employees' commitment to safety that made this achievement possible.

"Safety is our number one priority and this remarkable achievement is a reflection of the concern and commitment of every person working at Beaver Valley. We're very serious about safety in everything that we do, and everyone has contributed to establishing this outstanding record," Sieber

said.

This new record is only the second time in the company's history that the 3 million hour mark has been surpassed. Employees at the former Colfax Power Station achieved 3.5 million hours without a lost time accident in 1966.

STILLWATER, MN (JAN. 12) PR NEWSWIRE - At the request of the American Stock Exchange, INCSTAR Corporation is issuing the following press release asking brokers and other members of the investment community to please note the exchange's Ticker Notice Number 90-68.

Reference is made to the Ticker Notice Number 89-1497, dated Dec. 13, 1990 regarding the admission of the additional common stock, par value 1 cent, of INCSTAR Corporation (Ticker Symbol ISR:WI) to "when issued" dealings on Dec. 14, 1989.

Shareholders (members) are reminded that dealings in the additional common stock on a "when issued" basis do not carry the right to receive the $7.49 special cash dividend declared by the board of directors of INCSTAR Corporation and will not be entitled to the 1 cent per share redemption price for the purchase rights which have been associated with the common

stock of INCSTAR Corporation.

Shareholders (members) are also reminded that dealings in the common stock of INCSTAR Corporation on a "regular way" basis, presently trading with the $7.49 special cash dividend and the 1 cent redemption price for the common stock purchase rights which have been associated with the common stock, will be quoted "ex" on Wednesday, Jan. 17, 1990. Dealings in the common stock of INCSTAR Corporation on a "regular way" basis are accompanied by "due bills" for the above distributions for all deliveries after Dec. 12, 1989, in settlement of transcriptions made prior to Jan. 17 1990. Due bills must be redeemed on Jan. 23, 1990.

CONTACT: Orwin Carter, INCSTAR Corporation, 612-438-9710, or Michael Rosenbaum or Janet Denefe, Financial Relations Board, 312-266-7800, for INCSTAR

NEW YORK (JAN. 12) PR NEWSWIRE - The Reinsurance Corporation of New York ("RECO"), a wholly owned subsidiary of Piedmont Management Company Inc. (NASDAQ-NMS: PMAN), today announced its decision to withdraw from underwriting reinsurance business in London through its subsidiary, The Reinsurance Corporation of New York (UK) Limited ("RECO UK"), effective at the end of 1989.

As a result of this decision, RECO entered into an agreement to sell RECO UK to The Copenhagen Reinsurance Company (UK) Ltd. ("Copenhagen Re"), the company which had for several years served as underwriting manager for RECO UK. The sale price, $12 million, was based on an estimate of the year-end 1989 net book value of RECO UK and thus no significant pre-tax gain or loss will be realized as a result of the sale. Coincident with the sale, RECO entered into a standard reinsurance agreement with Copenhagen Re whereby RECO assumed assets equal to liabilities associated with business written by RECO UK through Dec. 31, 1989.

RECO UK's net premiums written represent approximately 8 percent of RECO's total net premiums written. Provisions for deferred taxes and foreign tax credits, relating to the future U.S. tax liability for the undistributed earnings of RECO UK, will be recorded in RECO's fourth quarter of 1989.

A spokesman for RECO explained that the reason for exiting the reinsurance business in London was connected with Copenhagen Re's decision to increase the capitalization of its own company and terminate underwriting management agreements with RECO UK and two other companies. RECO's management did not believe its was in its best interests to seek an underwriting manager to replace Copenhagen Re. The relationship between RECO and Copenhagen Re was mutually beneficial. Although the underwriting

management agreement has been terminated, an open line of communication exists whereby both companies believe that joint opportunities to work together could emerge in the future.

Piedmont Management Company Inc., is a financial services company whose principal subsidiaries include The Reinsurance Corporation of New York (RECO), a property and casualty reinsurer and Lexington Management Corporation, an investment advisory and mutual fund distribution company.

DOWNINGTON, PA. (JAN. 12) PR NEWSWIRE - First Financial Savings Association (NASDAQ: FIRF) announced today that its net income for the three- and six-month periods ended Dec. 31, 1989, was $354,000 and $714,000, respectively, compared to $377,000 and $705,000 for the same periods in 1988.

Ellen Ann Roberts, president and chief executive officer of the association, stated that she is pleased with the results of the first six months, particularly in light of the additional cost of professional fees sustained in the second quarter. These were incurred as a result of the association's filing with the Office of Thrift Supervision and Securities and Exchange Commission for the formation of a holding company, which was approved by shareholders at the association's 1989 annual meeting in October. In addition, Roberts noted that she is also pleased with the performance of the association's new Westtown office, opened in October 1989, which has grown to nearly $6 million in deposits.

"The formation of a holding company and the opening of our new Westtown office," Roberts stated, "should continue to provide a strong foundation in building for the future of our association."

Core earnings, defined as net interest income after provision for possible loan losses, increased by 19.6 percent to $2,649,000 during the first six months ended Dec. 31, 1989, compared to $2,214,000 for the same period in 1988. Earnings per share for the six-month periods ended Dec. 31, 1988 and 1989, were $.61 and $.62, respectively. Assets increased to $141.4 million at Dec. 31, 1989, compared to $129.1 million at Dec. 31, 1988. First Financial conducts business under the name of First Financial Savings Bank PaSA and has branch locations in Downingtown, Exton, Frazer, Thorndale and Westtown, Pa.

NEW YORK (JAN. 12) PR NEWSWIRE - The American Stock Exchange announced that the Hillhaven Corporation of Tacoma, Wash., is the third company to list this year. The company began trading 96,500,000 common shares on a "when issued" basis today.

Trading under ticker symbol HIL.WI, the common stock opened on 46,000 shares at 1-7/8.

Hillhaven, a wholly-owned subsidiary of National Medical Enterprises, Inc. will be spun off to National Medical shareholders on Jan. 31. Each National Medical shareholder will receive one share of common stock of Hillhaven for each share of National Medical common stock owned as of Jan. 12.

Hillhaven is one of the nation's leading providers of quality long term care, operating 345 nursing homes in 38 states. The company also operates 122 Medi-$ave Pharmacies.

On a pro forma basis, Hillhaven would have reported net income of $496,000 on revenues of $273,424,000 for the three months ended Aug. 31, 1989, compared with net income of $241,000 on revenues of $247,207,000 for the comparable period in 1988.

DETROIT (JAN. 12) PR NEWSWIRE - This week, domestic automakers scheduled output of 48,551 units, 24.48 percent above last week's 39,004, but 66.83 percent below the year-ago week's 146,380, Automotive News said today.

So far this year, 87,555 cars have been assembled, 67.12 percent below the 266,265 completed at this point last year.

Truckmakers targeted output of 31,391 units this week, 12.39 percent below last week's 35,830 and 63.89 percent below the year-ago week's 86,932.

Year to date, 67,221 trucks have been built, 58.23 percent below the 160,947 assembled at this time last year.

This week's estimated auto production was shared as follows: General Motors, 14.79 percent; Ford Motor Co., 25.01 percent; Chrysler Motors, 7.00 percent; Honda of America Manufacturing, 15.26 percent; Mazda Motor Manufacturing U.S.A. Corp., 8.85 percent; Toyota Motor Manufacturing U.S.A., 8.85 percent; New United Motor Manufacturing Inc., 8.44 percent;

Diamond-Star Motors, 5.75 percent; Nissan Motor Manufacturing, U.S.A., 4.90 percent; and Subaru-Isuzu Automotive, 1.15 percent.

HUNT VALLEY, MD (JAN. 12) PR NEWSWIRE - EA Engineering, Science, and Technology, Inc (NASDAQ: EACO) today reported first-quarter net revenue, income from operations, and net income for the three months ended Nov. 30, 1989, as compared to the similar period in 1988. The results were reported today by Dr. Loren D. Jensen, chairman and president of the environmental services and remediation company.

Net revenue in the first three months of fiscal 1990 increased 26 percent to $9,729,800 from $7,733,100 in the comparable period in fiscal 1989. Income from operations grew 28 percent to $726,000 from $567,400 in the prior period. Although interest income decreased due to the utilization of funds for company expansion activities and interest expense increased due to borrowings for working capital needs, net income increased 19 percent to $413,200, or 17 cents per share, from $347,500, or 14 cents per share, a year earlier.

In making the announcement, Jenson attributed the increase in net revenue to higher contract levels in several of the company's service areas, particularly toxic and hazardous materials management, including underground storage tank assessments and Department of Defense investigations, to the addition of EA Remediation Technologies, Inc. (EA RTI), and to the overall growth and improved performance of regional operations and EA Laboratories.

"We remain optimistic about the outlook for fiscal 1990, Jensen said. "Income from operations continues to improve due to the higher level of net revenue and a lower rate of increase in operating expenses as operational efficiencies improve. We expect contract levels to continue to increase and, with the expansion of remediation activities of EA RTI, we expect continued revenue growth and improvement in net income in fiscal 1990. Furthermore, operating results should also improve as each of our regional offices benefits from increased utilization of personnel through higher levels of project work for existing clients," Jensen concluded.

EA Engineering, Science, and Technology, Inc. is a multidisciplinary professional services consulting firm providing a wide range of engineering, scientific, analytical, and remediation capabilities to address existing and potential threats to the environment and to human health and safety for government and industrial clients across the nation.

#90012p0064 01/12/1990 ~PR Newswire

SAN FRANCISCO (JAN. 11) PR NEWSWIRE - Polaris Aircraft Leasing Corp. announced today it has leased 10 MD-88 aircraft to Aerovias de Mexico S.A. de C.V., a transaction valued at approximately $300 million.

Polaris purchased the delivery rights to 16 MD-88 aircraft from Wardair in 1989, and the 10 planes leased to Aerovias de Mexico are part of that package. The San Francisco-based aircraft leasing company delivered four aircraft to Aerovias in late 1989, and plans to deliver four more in 1990, and two in 1991. All 10 MD-88s will be on 10-year operating leases to the carrier.

Aerovias, which celebrated its one year anniversary in October 1989, has completed three transactions with Polaris as it has modernized its fleet and reorganized its route system. The 10 MD-88s will be used on routes from Mexico to U.S. border locations such as Los Angeles, Houston and Miami.

Pedro Cerisola y Weber, president of Aerovias de Mexico, said, "We appreciate the fine working relationship we have developed with Polaris during our first year of operation. The addition of new capacity, coupled with the replacement of older, less efficient equipment, will allow Aerovias to maintain its leadership position in the Latin American market."

The new airline operates under the trade name of AeroMexico. "We applaud Aerovias de Mexico's exceptional success in its first year," said Marc Desautels, president of Polaris. "We are delighted to have played a role in the revitalization and expansion of one of Latin America's premier airlines."

Polaris manages more leased aircraft than any other leasing company in the world. Its fleet of more than 390 commercial jet aircraft, valued at over $5.9 billion, includes 248 of its own jetliners and 142 aircraft for GE Capital. Polaris generates in excess of $432 million in lease revenues from 27 operators, including such international carriers as Gulf

Air, Maersk, Canadian Airlines International, Dragonair, Brittania, TACA International, and Philippine Airlines. The fleet it manages represents almost 5 percent of the commercial jet aircraft in current use throughout the world.

Polaris is also the leading sponsor of aircraft leasing limited partnerships, having raised nearly $1.3 billion in investor capital and sponsored 42 publicly and privately registered programs with over 85,000 investors.

In 1986 GE Capital, based in Stamford, Conn., purchased 81 percent of Polaris.

NEW YORK (JAN. 12) PR NEWSWIRE - Lexington Precision Corporation (NASDAQ-NMS: LEXP) announced today that it completed the sale of 1,750,000 shares of its new 12 percent cumulative convertible exchangeable preferred stock, Series C, par value $1.00 per share ("Series C stock"), to L&D Woolens Limited Partnership. L&D Woolens purchased the Series C stock for cash consideration of $3,500,000. Warren Delano, Jr. and Michael A. Lubin, directors and the president and chief executive officer, respectively, of the company, are the general partners of L&D Woolens.

The Series C stock is convertible into shares of the company's common stock at an initial conversion price of $2.00 per share (equivalent to a

conversion of one share of common stock for each share of Series C stock). Dividends on the Series C stock are cumulative and are payable quarterly on the first business day of February, May, August and November, commencing Feb. 1, 1990, when, as and if declared, at the rate of 24 cents per annum per share. The liquidation preference of the Series C stock is $2.00 per share plus accrued and unpaid dividends.

Commencing on the second anniversary of the issuance of the Series C. Stock and subject to the company's common stock having traded at specified prices during specified periods prior to the date of redemption, the Series C stock will be redeemable at the option of the company, in whole or in part, at certain predetermined redemption prices plus accrued and unpaid dividends, On any dividend payment date on or after Feb. 1, 1990, the Series C stock may, subject to certain conditions and at the option of the company, be exchanged in whole (but not in part) for the company's 12 percent junior subordinated convertible notes ("the notes") due ten years from the date of issuance thereof, provided that, after giving pro forma effect to such exchange, the stockholders' equity of the company is at least $10,000,000. The notes will be convertible into shares of the company's common stock at an initial conversion price per share of common stock equivalent to the conversion price in effect for the Series C stock at the time of exchange. Interest on the notes will be payable quarterly on the first business day of February, May, August and November of each year, commencing on the first such interest payment date following the date of exchange. Commencing on the second anniversary of the date of issuance of Series C stock, and subject to the company's common stock having traded at specified prices during specified periods prior to the date of redemption, the notes will be redeemable at the option of the company, in whole or in part, at certain predetermined redemption prices plus accrued and unpaid interest.

Lexington Precision also announced that it and two of its subsidiaries, Lexington Components, Inc. and Wise Die Casting, Inc., entered into a $9,000,000 secured credit facility with Congress Financial Corporation. The credit facility with Congress Financial is for an initial term of two years. Borrowings under the facility will bear interest at a rate equal to 2 percent per annum in excess of the prime commercial interest rate of The Philadelphia National Bank. The credit facility with Congress Financial is guaranteed by Lexington Precision and its subsidiaries and is secured by personal property of Lexington Precision and its subsidiaries.

Lexington Precision manufactures precision metal and rubber components which are used by some of America's largest and best known manufacturers of office equipment, computers, televisions, industrial equipment and automobiles. Lexington Precision also manufactures open office systems furniture and modular in-plant offices. Principal manufacturing facilities are located in Casa Granda, Ariz.; Blue Ridge and Jasper, Ga.; Jamestown, Lakewood, Manchester and Rochester, N.Y.; Burton, Ohio; and

Rock Hill, S.C.

RED BANK, NJ (JAN. 12) PR NEWSWIRE - Hovnanian Enterprises, Inc. (AMEX: HOV), announced today its revenues and earnings for the third quarter and first nine months of fiscal 1989/90, ended Nov. 30, 1989.

For the three months ended Nov. 30, 1989, revenues totaled $93.0 million up from $83.1 million in the year earlier's period. Net income was $7.1 million, equal to $.34 per share, excluding a $6.6 million ($10.0 million pre-tax), or $.32 per share, non-cash reserve against certain properties in Florida and New York. In last year's third quarter net income amounted to $7.1 million, or $.34 per share.

For the nine months ended Nov. 30, 1989, revenues totaled $231.0 million, up $30.9 million from a year ago. Net income was $13.8 million, or $.66 per share, excluding the land reserve, compared to $13.5 million, or $.64 per share, excluding a one time benefit of $2.6 million, equal to $.13 per share, due to a change in the method of accounting for income taxes last year.

Deliveries in the quarter increased $7.7 million to $84.7 million. New orders in the quarter increased from $52.4 million to $86.4 million. Contract backlog at quarter end was $228.1 million, down $16.2 million from the level recorded in the prior year.

Hovnanian Enterprises, Inc. designs, constructs and markets condominiums, townhomes and single family homes in planned residential communities in New Jersey, New York, New Hampshire and Florida and through a joint venture in North Carolina. The company also develops and manages income-producing properties and provides civil and environmental engineering services. In 1988, Hovnanian ranked 19th among the nation's top 100 homebuilders and third among builders of attached for sale homes.

#90012p0079 01/12/1990 ~PR Newswire

NEW YORK (JAN. 12) PR NEWSWIRE - Oak Hill Sportswear Corporation (NASDAQ:

OHSC) announced today that preliminary estimates indicate that the company incurred a net loss of approximately $1,250,000 or $.59 per share in the fourth quarter ended Dec. 31, 1989, on sales of approximately $26,000,000. These results compare to net income of $687,000 or $.26 per share in the fourth quarter last year on sales of $31,117,000.

Fourth quarter operating results reduced earnings for the full year ended Dec. 31, 1989, to approximately $550,000 or $.26 per share on sales of approximately $118,000,000. In 1988 the company earned $2,654,000 or $.86 per share on sales of $115,820,000.

Arthur L. Asch, chairman of the board of Oak Hill Sportswear Corporation, stated that, "the fourth quarter loss was primarily attributable to the highly promotional retail environment created by uncertainty concerning the financial viability and potential ownership changes of several large retailers. These factors caused our company to sell a substantial amount of merchandise at discounted prices. We reduced our inventories, especially of imported sweaters, in a weak retail market that was further hindered by unseasonably warm weather.

Final results for the fourth quarter and full year ended Dec. 31, 1989, which will be reported in early March, are subject to a review which includes further evaluation of our remaining inventories and the credit worthiness of several of our customers.

Oak Hill Sportswear Corporation's financial condition remains strong despite recent operating results. At Dec. 31, 1989, shareholders equity exceeded $17,000,000 and working capital exceeded $13,000,000. At that date, long-term debt was $2,400,000 and short-term bank borrowing was $9,400,000.

The current unsettled climate in the apparel industry makes it difficult to accurately predict our company's 1990 operating results. While regular spring orders from our department and specialty store customers are below anticipated levels, as they appear to be buying later than normal, we have received and expect to receive several substantial spring and fall private label orders from a few of our largest customers. In addition, our results for 1990 will be heavily impacted by the resolution of the various financial and merchandising uncertainties that currently prevail in the retail community as well as by the state of the overall economy."

Oak Hill Sportswear Corporation is a manufacturer of women's apparel.

#90012p0081 01/12/1990 ~PR Newswire

LAKE SUCCESS, NY (JAN. 12) PR NEWSWIRE - Staff Builders, Inc. (NASDAQ: SBLI), reported today revenues and net income for the third quarter ended Nov. 30, 1989.

Revenues for the third quarter ended Nov. 30, 1989 decreased one percent, or $326,000 to $46,693,000 from $47,019,000 for the quarter ended Nov. 30, 1988. Net income for the third quarter ended Nov. 30, 1989 declined 90 percent or $940,000 to $102,000 from $1,042,000 for the comparable quarter last year. On a per share basis, after the deduction for cash dividends on its redeemable Class B preferred stock, the company's earnings per common and common equivalent share was $.00 in the current quarter versus $.14 for the year-ago quarter.

Revenues for the nine months ended Nov. 30, 1989 increased $16,840,000, or 13 percent to $142,701,000 from $125,861,000 for the nine months ended Nov. 30, 1988. Net income for the nine months ended Nov. 30, 1989 declined $2,135,000 to $679,000, or 76 percent from $2,814,000 for the nine months ended Nov. 30, 1988. On a per share basis, after the deduction for the cash dividends on its preferred stock, the company's earnings per common and common equivalent share was $.05 for the current nine months versus $.38 for the comparable period last year.

The operating results for the three months ended Nov. 30, 1989 and 1988 include the effect of two acquisitions which were made in the prior year quarter ended Aug. 31, 1988. The operating results for the nine months ended Nov. 30, 1989, include the effect of these acquisitions which were reflected in part in the operating results for the comparable nine month period last year. In late June 1988, the company acquired PGL Industries, Inc., a temporary personnel services company with annual revenues of approximately $15,000,000 operating in the Baltimore area. In late August 1988, in a single transaction, the company acquired Bergall Corporation and Careco, Inc., two temporary personnel services companies with combined annual revenues of approximately $20,000,000 operating in the Boston area. PGL, Bergall and Careco had previously been franchisees of the company.

Revenues and net income include $652,000 and $271,000, respectively, for the three months ended Nov. 30, 1989 and $3,319,000 and $1,380,000, respectively, for the nine months ended Nov. 30, 1989, relating to the sale of certain assets and the sale of rights to establish and operate a franchised temporary personnel service business in certain territories to franchisees under the company's franchise program.

The results for the current periods as compared to the prior year's periods reflected a higher level of general and administrative expenses incurred in anticipation of increased sales volume which has not been realized. For the nine months ended Nov. 30, 1989, as compared to the comparable prior year period, the general and administrative expense

increases were a result of two acquisitions made during the prior year's second quarter, increased interest expense associated with a higher level of borrowing necessary to finance the acquisitions and increased amortization of intangible assets arising from these acquisitions. Additionally, costs associated with the company's litigation with a franchise, which began in the prior year's second quarter, have contributed to the increase in general and administrative expenses in the current period.

In commenting on this quarter's results, and on certain expense reductions Ephraim Koschitzki, president of Staff Builders, Inc., stated "The company's efforts to reduce its general and administrative expenses have been successful as reflected in the decrease of nearly $700,000 or five percent from the previous quarter ended Aug. 31, 1989. Continuing efforts to reduce general and administrative expenses will provide additional savings in the fourth quarter. Excluding the effect of the sales of franchises and fees, these cost savings have served to increase our operating income from the previous quarter. However, a lower level of sales volume than originally anticipated has reduced the amount of this increase to $270,000. During the recently completed third quarter, the company has initiated a comprehensive field sales incentive program to promote increased market penetration within regional territories in which we provide our services. The results of these efforts, together with additional cost savings, should contribute to further improvement in operating income in the fourth quarter."

Staff Builders, Inc. provides temporary personnel and permanent placement services, including home care, hospital staffing and business services, to individuals, institutions, business and industry. The company presently has 150 offices in 28 states and the District of Columbia.

ROCKY MOUNT, NC (JAN. 12) PR NEWSWIRE - The Planters Corp. (NASDAQ: PNBT) today reported 1989 net income of $11.3 million, a 7.6 percent increase from $10.5 million in 1988. Earnings per share were $1.62 compared to $1.51 per share one year ago.

In the fourth quarter, net income increased 7.6 percent to $2.9 million from $2.7 million in the same period in 1988. Earnings per share were 41 cents compared to 38 cents per share in the fourth quarter of the previous year.

"Our performance for the year was very good despite slower economic growth and lower interest rates, which reduced our interest margin," said J. Richard Futrell Jr., chairman and chief executive officer of Planters. "We also added several new offices through acquisition and normal expansion that will help us long-term, although they increased our expenses for the year.

"We continue to rank considerably better than our peers in the key measures of credit quality. Our charge-offs are less than one-third of average charge-offs for banks our size nationwide."

Net charge-offs for the year were .18 percent of average loans, compared to .20 percent in 1988. Nonperforming loans were .21 percent of total loans compared to .04 percent one year ago.

Return on assets for the year was 1.07 percent, and return on shareholders' equity was 14.70 percent.

Total assets increased 18 percent to $1.2 billion. Loans rose 19 percent to $804 million, and deposits rose 18 percent to $1 billion. Shareholder's equity increased 10 percent to $81 million.

The Planters Corp. is the 10th largest bank holding company in North Carolina with one subsidiary, Planters National Bank, which has 64 offices in 33 North Carolina communities.

DENVER (JAN. 12) PR NEWSWIRE - Premier Resources Ltd. (BSE: PRL) today reported a net loss of $1,000, $.00 cents per share, for the fiscal year ended Sept. 30, 1989.

Despite flat oil and gas prices during the year and reduced volumes of production, Premier's fiscal 1989 operating income of $293,000 reflects an increase of $57,000 over the prior year's figure. Reduced operating revenues of $716,000, due to lower oil and gas sales volumes were more than offset by reductions in operating expenses. The company's net income for the year ended Sept. 30, 1988 included a $2,778,000 gain recorded on the sale of a significant Canadian partnership interest.

Premier also reports that at Sept. 30, 1989 its proved oil and gas reserves, as estimated by an independent petroleum engineer, comprised 686,000 barrels of oil and 11.8 billion cubic feet of natural gas. These amounts represent a decrease in oil reserves and an increase in gas reserves of 125,000 barrels and .9 billion cubic feet of gas, respectively from those figures reported at Sept. 30, 1988. Estimated future net revenues associated with these reserves, using unescalated year end prices had a present value (discounted at 10 percent per annum) of $9,161,000, a 15 percent increase over the amount reported at Sept. 30, 1988.

DALLAS (JAN. 12) PR NEWSWIRE - Halliburton Company (NYSE: HAL) today announced the promotion of Charles F. Jones to the position of chairman of the board and chief executive officer of NUS Corporation, a wholly owned subsidiary of Halliburton. Peter D. Arrowsmith has been named to succeed Jones as president of NUS. He will continue to serve as the company's chief operating officer.

Jones, 62, joined NUS in 1962 as manager of engineering. He has served the company in a variety of managerial and executive positions during his career, and was named president and chief executive officer of NUS in 1971. Jones received his B.S. degree in mechanical engineering from Worcester Polytechnic Institute and also attended Carnegie Institute of Technology where he studied electrical engineering

Arrowsmith, 55, was employed as a project manager by NUS in 1963. Arrowsmith served as executive vice president and chief operating officer of NUS in his most recent assignment. He has had a wide range of responsibilities during his career at NUS, including managing the company's operations, engineering, sales, environmental services and consulting business units. Arrowsmith graduated from University of Kansas with a B.S. degree in chemical engineering and continued with graduate studies at George Washington University and the Oak Ridge School of Reactor Technology. He is a registered engineer in the states of Florida, Illinois, Maryland, Michigan, New York, Ohio and the Commonwealth of Virginia.

NUS Corporation, headquartered in Gaithersburg, Md., provides environmental, engineering, consulting and management services for industry, utilities and government.

Halliburton Company is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

#90012p0090 01/12/1990 ~PR Newswire
NORWALK, CT (JAN. 12) PR NEWSWIRE - According to the results of the "1989 Innovation Survey" of senior corporate managers, Campbell Soup Company is perceived as the "Most Innovative Company" in the United States in terms of return from new-products introductions.

In addition, marketing managers believe the success rate for new products will plummet to under 10 percent in 1990, down from 20 percent in 1989.

This is the fifth consecutive year that the Innovation Survey, conducted by Group EFO Limited, Norwalk, Conn., has cited Campbell as the corporate leader in new-product development.

For 1989, Proctor & Gamble ranked second and three other food processors rounded out the top five: Kellogg; Kraft General Foods; and Quaker.

According to Edward F. Ogiba, president of Group EFO Limited, the most alarming finding of the Innovation Survey, which polls 500 senior executive at Fortune 500 companies, is that the new-product success rate is forecasted to drop significantly next year. However, Ogiba points out, 47 percent of the respondents predict that a larger percentage of their company's sales during the next five years will come from new products as compared with sales in previous years.

The Innovation Survey, conducted by Group EFO Limited, a consulting firm located in Norwalk, Conn., was distributed to 500 chief executive officers presidents and directors of marketing at many of the world's largest consumer packaged goods companies. The same questionnaire was also included in the February 1989 issue of Food & Beverage Marketing magazine.

Group EFO Limited is a new-products group which specializes in the creative development and consumer assessment of new products.

Copies of the copyrighted 1989 Innovative Survey results are available from Group EFO Limited, 50 Washington Plaza, Norwalk, Conn., 06854, or by calling 203-853-4445.

THOMASVILLE, GA. (JAN. 12) PR NEWSWIRE - The board of directors of Flowers Industries Inc. (NYSE: FLO) voted to increase the quarterly

dividend to $.15 per common share, it was announced today by Amos R. McMullian, chairman of the board and chief executive officer following the regular quarterly meeting of the board of directors.

The new annual rate of $.60 per common share represents a 15.4 percent increase over the $.52 annual rate in effect a year ago. The dividend is payable on Feb. 12 to shareholders of record on Jan. 26.

Commenting on the announcement, McMullian said, "This dividend represents our 42nd consecutive quarterly dividend increase and reflects your board of directors' confidence in the bright future of Flowers Industries.

"Over the past several years, your company and management team have been tested, strengthened and rededicated to building a profitable food company with strong operating cash flows, state-of-the-art production facilities and the most talented and experienced work force in our industry.

"As the remainder of fiscal 1990 unfolds, the recovery will become evident to all of our shareholders. We look forward to fiscal 1991 and the return to strong profit growth that it will bring," McMullian concluded.

Flowers Industries Inc. produces and markets a variety of specialty branded food products throughout the South.

PHILADELPHIA (JAN. 12) PR NEWSWIRE - Midway Airlines will begin service to Jacksonville, Fla.; Providence, R.I., and Savannah, Ga., with three daily round-trip flights each from its hub at Philadelphia International Airport.

Service to Jacksonville will begin Feb. 15. Service to Providence will begin March 2. Service to Savannah will begin March 15.

The southbound Jacksonville flights will depart Philadelphia at 8:58 a.m., 2:15 p.m. and 7:58 p.m. The return flights will depart Jacksonville International Airport at 7:33 a.m., 12:50 p.m. and 6:05 p.m.

The northbound Providence flights will depart Philadelphia at 10:22 a.m., 3:45 p.m. and 8:57 p.m. The return flights will depart Providence Theodore Francis Green State Airport at 7 a.m., 12:22 p.m. and 5:50 p.m.

The southbound Savannah flights will depart Philadelphia at 9:02 a.m., 2:23 p.m. and 7:59 p.m. The return flights will depart Savannah

International Airport at 7:45 a.m., 1:15 p.m. and 6:30 p.m. Introductory fares between Providence and Philadelphia range from $59 to $99 one way; fares between Providence and the eight Florida destinations Midway serves from Philadelphia range from $119 to $189 one way.

Introductory fares between Savannah and Philadelphia range from $99 to $119 one way.

Introductory fares between Jacksonville and Philadelphia range from $99 to $119 one way.

Post-introductory fares between Philadelphia and Jacksonville, Providence and Savannah will be as much as $20 lower than those fares which presently exist in those markets.

Midway Airlines, which marked its tenth anniversary Nov. 1, began its Philadelphia hub operation Nov. 15. Other cities served from Philadelphia include Albany, Boston, Buffalo, Chicago, Hartford/Springfield, Ft. Lauderdale, Ft. Myers, Miami, Orlando, Rochester, Sarasota, Tampa and West Palm Beach.

Midway Airlines on Jan. 15 will begin service to Canada with three daily non-stop flights to Toronto from Philadelphia. On Feb. 15, Midway will extend its Canadian service to Montreal from Philadelphia with three daily non-stop flights.

By the end of the first quarter 1990, Midway will offer more than 60 daily departures from Philadelphia International Airport, growing to 120 daily departures by 1992.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, U.S. Virgin Islands and the Bahamas.

DEARBORN, MI (JAN. 12) PR NEWSWIRE - Ford Motor Company (NYSE: F) today notified employees and customers of Ford Aerospace Corporation of plans by Ford to offer to sell the wholly owned subsidiary.

The principal businesses of Ford Aerospace are space and ground- based command, control, communications and intelligence systems; tactical weapons systems; and professional services. In 1989, Ford Aerospace received an estimated $1.8 billion in contract awards and had a backlog of about $2 billion at year-end.

Headquarters for Ford Aerospace is in Newport Beach, Calif., and major operations are located in northern and southern California, Colorado, Pennsylvania, Texas and the Washington, D.C., metropolitan area. Total employment of Ford Aerospace, including BDM International, a professional services subsidiary headquartered in McLean, Va., is almost 17,000.

Ford Aerospace began in 1956 with the formation of what is now the Aeronutronic Division and expanded when Ford acquired Philco Corporation in 1961. Growth and diversity continued with the formation of several major divisions, and in 1988 with the acquisition of BDM International, Inc.

Milestones in the history of Ford Aerospace include the building of the Johnson Space Center Mission Control Center used for the first moon landing and the construction of the Mariner IV satellite which returned to earth the first fly-by shots of the planet Mars. When Voyager 2 encountered Neptune in 1989 after a 12-year flight, the pictures and data were transmitted to Earth via an antenna built by Ford Aerospace.

Ford Aerospace built the INTELSAT V for a consortium of nations as an international communications satellite, and is in process of building the INTELSAT VII.

The most powerful commercial communications satellite ever developed was built by Ford Aerospace for Space Communications Corporation of Japan. President Bush visited Ford Aerospace facilities in Palo Alto, Calif., in April, 1989, and cited Ford Aerospace's success in selling to Japan as an example of how America's technological prowess can expand trade with other countries.

Ford Aerospace also has built the Sidewinder air-to-air short range missile for the United States and other free-world nations and recently was awarded a $220 million contract for Chaparral ground-to-air defense systems.

Goldman, Sachs and Co. is advising Ford Motor Company on the sale.

TULSA, OK (JAN. 12) PR NEWSWIRE - Florafax International Inc. (NASDAQ: FIIF) reported a consolidated net loss of $219,000 for the three months ended Nov. 30, 1989 on operating revenues of $2,023,000 as compared to consolidated net income of $17,000 ($.00 cents per share) on operating revenues of $2,095,000 for the three months ended Nov. 30, 1988.

Operating revenues primarily consist of order transaction, credit card, advertising and membership fees received from the company's florist members net of payments made to members for filling wire service orders.

Floyd Cox, Jr., chairman, attributed the quarterly loss to the seasonality of the floral business segment which does not contain any major floral sending holidays and additional expenses associated with the development of new business segments.

Florafax also announced that at the annual shareholders meeting held on Dec. 12, 1989, the following individuals were re-elected to the Florafax board of directors: Floyd Cox, Jr., John C. Gray, Bryan L. Herrmann, Solomon O. Howell, Jr., William E. Mercer and Andrew W. Williams.

Florafax is headquartered in Tulsa and provides a nationwide wire service and related services to its member florists. Its stock is traded over the counter on the NASDAQ, symbol FIIF.

EL PASO, TX (JAN. 12) PR NEWSWIRE - Property Trust of America (NYSE: PTR) following a regular meeting of its board of trustees, announced today that it continues to oppose the tender offer for Property Trust made by a subsidiary of Sizeler Property Investors, Inc.

On Jan. 8, Sizeler announced that it had shares tendered for approximately 46 percent of Property Trust's outstanding shares. James H. Polk, III, president and chief executive officer of Property Trust stated, "The board of trustees continues to oppose Sizeler's tender offer. We believe that many of our shareholders are feeling forced to tender into Sizeler's offer because of its coercive nature, in large part because the offer is for

less than half the trust's outstanding shares. The board of trustees continues to believe that the offer does not create value for all shareholders and is opposed to the unequal treatment of shareholders. We are prepared to defend our actions on behalf of the shareholders in the Federal court litigation scheduled for late February, and we expect to prevail."

Property Trust of America is an El Paso-based equity real estate investment trust with properties located primarily in the states of Texas, California and Colorado.

VENLO, THE NETHERLANDS (JAN. 12) PR NEWSWIRE - Oce-van der Grinten N.V. (NASDAQ: OCENY), the Dutch copying equipment group, stated here today that fiscal 1989 had been a good year for the Oce Group. Oce supplies the world design engineering and office systems copying markets.

In a New Year's message to employees, Oce's CEO, Henk Bodt, announced that 1989 revenues went up 14 percent to more than $1.0 billion ($1 equals DLF 2.0084, the noon buying rate of Nov. 30, 1989). Group net income amounted to about $42 million, an increase of 11 percent for the whole year and about 15 percent for the fourth quarter. These results are, therefore, slightly higher than the expectations announced when the third quarter results were published.

These improved results are attributable to excellent design engineering sales, favorable office systems sales, and the five month contribution of Oce Graphics acquired in July 1989.

Bodt further announced that the Oce 2500, launched last year, has been very well received by the market and that at the end of 1989 user tests were started on the Oce 2400, a new office copier for the high volume market.

According to Bodt, integration of the group's U.S. activities is progressing in line with plans, and startup expenses there continue to decline.

He added that the group's good performance in 1989 made him positive about the prospects for 1990.

The consolidated results will be published on Feb. 16, 1990 and the annual report will be available in March.

Oce-van der Grinten N.V. is the Dutch parent company of the Oce Group which is active in some 90 countries and has its own operating companies in more than 20 countries.

The group has over 11,000 employees and annual revenues of some $1 billion.

Oce is known worldwide for its advanced systems, products and services for the presentation of information on paper. Its extensive product range comprises:

-- copiers and copying supplies for office systems and design engineering;
-- systems for printing and publishing;
-- plotter systems for design engineering;
-- photosensitive materials and graphic films.

The greater part of the group's products and systems are developed, produced and marketed by Oce itself.

MIDLAND, MI (JAN. 12) PR NEWSWIRE - William N. Lipscomb Jr., a member of the Dow Board of Directors since 1982, retired from his position effective Jan. 2, 1990, upon reaching the board's mandatory retirement age of 70 for outside directors.

Most recently, Lipscomb served on the Environment, Health and Safety Committee and the Public Interest Committee of the Dow Board of Directors.

His retirement decreases the size of the board to 18 members.

Lipscomb, the Abbott and James Lawrence Professor of Chemistry at Harvard University, received the Nobel Prize in chemistry in 1976. He received the award for his original research on the structure and bonding of boron hydrides and their derivatives.

Lipscomb was chairman of the Harvard Department of Chemistry from 1962 to 1965 prior to assuming the Abbott and James Lawrence chair in chemistry in 1971. He is recognized internationally for his innovative leadership at the Gibbs Laboratory at Harvard and for his work with his colleagues in X-ray crystallography.

He received a bachelor's degree from the University of Kentucky and his doctorate from the California Institute of Technology. Both degrees are in chemistry. He also holds several honorary degrees and has received numerous awards for his research.

#90012p0119 01/12/1990 ~PR Newswire

BUFFALO, N.Y. (JAN. 12) PR NEWSWIRE - First Empire State Corporation (AMEX: FES) today announced that 1989 net income, after a special charge related to an accounting change, totaled $41,251,000, or $5.73 per share. Net income and earnings per share in 1988 were $44,458,000 and $6.02, respectively. Net income in the fourth quarter was $12,504,000, 35 percent improved from $9,291,000 in 1988's final quarter, while earnings per share were $1.75, 37 percent above the $1.28 for the comparable 1988 period.

Earnings from the company's core banking business in 1989 were offset by the company's adoption of an accrual method of accounting for postretirement health and dental benefits in accordance with Financial Accounting Standards Board's Technical Bulletin No. 87-1, "Accounting for a Change in Method of Accounting for Certain Postretirement Benefits." In December, the company elected to adopt this accounting change, which recognizes the company's postretirement health and dental obligations to its employees and retirees accumulated in prior years. The resulting $9,455,000 charge against net income, in accordance with Financial Accounting Standard No. 3, has been applied against first quarter 1989 results, which have been restated. Excluding this charge, 1989 net income would have been $50,706,000, a 14 percent improvement over 1988, while earnings per share would have been $7.04, 17 percent above the prior year.

The improvement in fourth quarter earnings from the previous year was primarily due to the prior year's fourth quarter's being adversely impacted by $2,803,000 of pre-tax losses on sales of bank investment securities, and a $1,750,000 pre-tax charge for restructuring costs.

Largely driven by a 12 percent growth in average loans and leases outstanding, taxable-equivalent net interest income rose 3 percent to $201.4 million in 1989 from $195.4 million in 1988. The benefit from this growth was largely offset by a compression of the spread between the yield on earning assets and the rate paid on interest-bearing liabilities, which fell to 2.64 percent in 1989 from 3.01 percent in 1988. The drop in the net interest spread resulted in part from an increased utilization of higher-cost purchased funds, since average earning asset growth exceeded growth in core deposits. Net interest income, expressed as an annualized percentage of average earning assets, was 3.57 percent in 1989, compared with 3.83 percent a year earlier.

The provision for possible credit losses in the year just completed was $15,285,000, compared with $13,914,000 in 1988. Net charge-offs amounted to $9,083,000 in 1989 compared with $7,707,000 in 1988. Nonperforming

loans at year-end were $26.2 million, up from $21.6 million at Dec. 31, 1988. The allowance for possible credit losses at Dec. 31, 1989 was $58.0 million or 1.33 percent of total loans and leases, compared with $51.8 million or 1.31 percent at Dec. 31, 1988. At Dec. 31, 1989, the allowance for loan losses aggregated more than twice the level of nonperforming loans.

Noninterest income reached $50.9 million in 1989, 14 percent above 1988's $44.6 million. Reflecting management's 1989 goal to contain expenses, noninterest expense of $151.5 million was virtually unchanged from 1988.

The annualized rate of return on average total assets was .69 percent in 1989 and .83 percent in 1988. Return on average stockholders' equity was 10.47 percent compared with 11.80 percent a year ago. Exclusive of the charge taken for postretirement health and dental obligations, return on assets and stockholders' equity in 1989 would have been .85 percent and 12.87 percent, respectively.

NEW YORK (JAN. 12) PR NEWSWIRE - Aer Lingus, the airline of Ireland, hopes to repeat last winter's success with a special low fare of $298.00 roundtrip to Shannon. A feature of this year's fare is a connection to seven internal airports in Ireland for just $30.00 roundtrip.

Departures are from JFK (New York) Monday, Tuesday or Wednesday with returns on Tuesday or Wednesday. There is a seven-day advance purchase requirement and all travel must be completed by March 14. Departures from Boston are less frequent and travel must be completed before Feb. 26.

Bernie Lynch, passenger marketing manager for Aer Lingus suggests that, "There is plenty to do in Ireland at this time of the year -- a romantic stay in Dublin for Valentine's Day, for example, or a visit to some of the country houses and fine restaurants throughout the country. For the sports enthusiasts the first of this year's rugby internationals, against Scotland, is scheduled to be played at Landsdowne Road, Dublin on Feb. 3."

This new fare, together with the very successful Aer Lingus Emerald Escape all-inclusive week-ends already available up to the end of April, makes Ireland a very attractive alternative for a winter/spring short- stay vacation.

For reservation and information on Aer Lingus fares, contact a travel agent or call Aer Lingus, 1-800-223-6537 or in New York City, 212-557-1110.

#90012p0128 01/12/1990 ~PR Newswire

HONOLULU (JAN. 12) PR NEWSWIRE - GTE Hawaiian Tel will offer Hawaii's first international prepaid telephone-card service geared primarily for Japanese visitors. The cards are used in specially designed "telephone-card" telephones.

"The telephone card affords a convenient and familiar way for Japanese visitors to make international calls," said Bob Craver, GTE Hawaiian Tel's director of international services. "Customers don't have to concern themselves with carrying enough coins to make a call or worry about collect calling verification when they use a telephone-card phone. They also will be able to place payphone calls at direct-dial rates and avoid higher charges that apply on operator-assisted calls."

The telephone card will cost about $20 for 10 units of calling time with rates determined by the country called and the time of day the call is made. The customer prepays for the card, and simply inserts it into the telephone-card telephone before dialing a call. The telephone records the call's length and adjusts the remaining balance of units accordingly. The telephone cards can only be used to make international long-distance calls originating in Hawaii and, will be distributed through travel agencies and hotels.

GTE Hawaiian Tel will introduce two standard international telephone-card designs. Both are attractively printed in color depicting distinctive Hawaiian landmarks -- Waikiki Beach with Diamond Head in the background and a panoramic view of Hanauma Bay. The telephone cards also can be printed with different designs, for example, a company logo or a store front.

Initially, GTE will install 20 telephone-card phones between Jan. 5 and 15 at several Waikiki locations including the Hyatt Regency Waikiki, the Ilikai, and some Sheraton Hotels (Moana Surf Rider, Princess Kaiulani, and Sheraton Waikiki). The phones will be in service on Jan. 16. GTE plans to install 50 telephone-card phones in Hawaii by the end of the year.

"The telephone-card phone is cutting edge technology," Craver said. "The Japanese market constitutes a significant portion of our international revenue base. The technology allows GTE Hawaiian Tel to provide more convenient and better quality service to the company's international customers.

"The Japanese are very familiar with the telephone-card phone," said Craver. "In 1983, telephone-card technology was introduced to Japan in

response to growing maintenance and coin-collecting costs of pay telephones.

Japan has approximately 850,000 pay telephones, half of which have been converted to telephone-card phones. We have been working for over a year to develop the Hawaii prepaid card service, and we're very excited about this opportunity."

GTE is a multinational corporation with combined revenues and sales of $16.5 billion and net income of $1.2 billion in 1988.

BOSTON (JAN. 12) PR NEWSWIRE - Boston Globe Editor John S. Driscoll has announced the promotion of two editors to top-level positions in the news department, both effective March 1.

-- Alfred S. Larkin Jr., Sunday managing editor, has been named managing editor/administration, succeeding S.J. Micciche, assistant executive editor, who is retiring after more than 34 years with the Globe.

-- Helen Donovan, deputy managing editor, was named Sunday managing editor succeeding Larkin.

In their new posts, Larkin will be responsible for a variety of administrative duties in the news department, including personnel matters, training, and budgets, and Donovan will be responsible for the news and feature content of the Sunday Globe.

A Boston native, Larkin, 42, joined the Globe in 1972 and has been a general assignment reporter, political reporter, education reporter, and assistant metropolitan editor. He has also been editor of the Sunday Globe Magazine and assistant managing editor for local news. He was named deputy managing editor in 1986 and became Sunday managing editor on Jan. 1, 1989.

Donovan, 42, joined the Globe in 1976 from the Berkshire Eagle. She has been editor of the letters to the editor section, editor of the opposite editorial page, assistant managing editor for the Sunday Globe, and assistant managing editor for national news. She was named deputy managing editor in January 1986. She has been supervising the Globe's national and foreign coverage, including the Washington Bureau. She has also directed the paper's political coverage, including the 1988 presidential election.

SANTA CLARA, CA. (JAN 12) PR NEWSWIRE - Avantek Inc. (NASDAQ: AVAK), announced today that it would take a charge of approximately $16.5 million pre-tax ($.56 per share after tax) in the fourth quarter of 1989 to provide for contract issues, restructuring of operations, and the elimination of excess capacity. Including the charge, the company estimates a net loss of $18.1 million ($1.03 per share) for fiscal year 1989. Unaudited 1989 sales were approximately $159 million. Year-end backlog was approximately $89 million, down $4 million from the backlog reported at the end of the third quarter of 1989 and down approximately $32 million from the 1988 year-end backlog. The backlog change in 1989 was due to reductions, cancellations, and shipments associated with multifunction assembly contracts.

According to Roy A. Anderson, chairman of Avantek, "We have completed a detailed evaluation of microwave component market opportunities over the next several years and have concluded that it is prudent to reduce excess capacity, reserve for residual problem programs and substantially restructure operations. These actions will permit us to be more competitive in a declining defense environment and will improve focus on our high growth commercial businesses."

The company's restructuring includes centralization of its manufacturing operations and consolidation of customer service, strategic marketing, and program management functions. In addition, organizational changes will provide increased focus on product marketing and engineering development. According to Dr. E. Oran Brigham, CEO and president, "We anticipate improvement in Avantek's performance to schedule, customer support, quality and cost with these changes."

Avantek manufactures and markets several hundred microwave electronics products -- including semiconductors, components and assemblies -- for use in various commercial and defense electronics applications.

#90012p0132 01/12/1990 ~PR Newswire

MIDDLETOWN, PA. (JAN. 12) PR NEWSWIRE - GPU Nuclear said today it will pay a $50,000 fine assessed by the staff of the Nuclear Regulatory Commission (NRC) for a September 1989 incident in which a worker at Three Mile Island Unit 2 received a radiation exposure to his hand in excess of

federal standards.

The staff has classed the violation as a Level III on a scale of five. The event was announced by GPU Nuclear in October. In response to the NRC's violation notice, the company acknowledged that, while the exposure is not expected to cause any adverse health effects to the worker, it should not have occurred, and that it caused GPU Nuclear to reinforce its procedures for work in radiological areas at TMI-2. At the same time, the company said it was "surprised and disappointed that the NRC staff did not choose to mitigate the fine based on 10 years of outstanding radiological performance in the Unit 2 cleanup, which the commission itself and the independent TMI-2 Safety Advisory Board have previously recognized."

The company added that this is only the second incident in about 2 million person-hours of work on the cleanup in which a worker received an exposure in excess of a federal standard. Work in radiological areas at TMI, it added, has involved control of work with radioactive material and in radiation fields that are unique to TMI-2.

Total worker exposure in the cleanup will be only about a third of the amount estimated by the NRC when the cleanup began.

Under GPU Nuclear's radiological procedures, workers are responsible for reporting any inadvertent handling of radioactive material. When the worker who received the exposure inadvertently picked up a piece of TMI-2 fuel debris on Sept. 25, he did not make such a report, and the incident did not come to the company's attention until the next day.

As a result of the event, GPUN's training, monitoring and housekeeping procedures have been strengthened.

In the Sept. 25 incident, the worker who received the exposure to his hand inadvertently held a piece of fuel debris in his hand for about 25 seconds and a second worker handled it for about seven seconds. The first worker received a dose to the skin of his left hand of about 55 rems and to the skin of his right hand of about 8 rems, while the second worker received a dose to the skin of his right hand of approximately 13 rems. The federal standard for such exposures is 18.75 rems per calendar quarter.

The incident occurred in a Decontamination Facility in the TMI-2 reactor building adjacent to the reactor vessel. The NRC staff concluded that the facility was "cluttered with debris." This was due in part to the fact that prior work in the facility had been suspended because of substantial contamination that was discovered during the work. When work restarted after a weekend, there was inadequate communication of conditions in the facility.

In a second aspect of the Sept. 25 incident, the NRC staff assessed a

Level IV violation, without a fine, for GPU Nuclear's failure promptly to notify the NRC that the exposure might potentially have exceeded 75 rems, the threshold for a 24-hour notification on the NRC's "red phone." GPU Nuclear management notified NRC inspectors at TMI of the incident on Sept. 27, and kept the staff continually advised of its investigation, but did not conclude that the 75 rem threshold might have been exceeded until Oct. 6, when it made a "red phone" notification. As it turned out, following a complex dose assessment process, the highest exposure was found to be about 55 rems.

The workers in both incidents were involved in the final stages of removing fuel debris from the TMI-2 reactor. That work has now been virtually completed. Final underwater vacuuming and television inspections of the reactor vessel are underway, and the four-year defueling effort is expected to be wrapped up by the end of the month. About another year of final decontamination work and other activity remains in the TMI-2 Cleanup Program itself.

BARBERTON, OH (JAN. 12) PR NEWSWIRE - Novar Electronics Corporation (NASDAQ: NOVR), Barberton-based manufacturer of building management computer systems, today said that continued strong sales of its LOGIC ONE building management systems in the fourth quarter boosted total company revenues to approximately $14.7 million for the fiscal year ended December 30, 1989.

Revenues of about $2.9 million from LOGIC ONE sales were a record for the fourth quarter, up about 32 percent from the same period in 1988. For the year, LOGIC ONE revenues rose some 46 percent above 1988 and contributed $11.0 million to the Company's total.

James H. Ott, president and chief executive officer, said that strong LOGIC ONE sales gains continue to reflect customer acceptance and progress in expanding the Company's share of the building management market. He noted that while final period and year-end earnings results are not yet available, results for the period are expected to be profitable.

PHILADELPHIA (JAN. 12) PR NEWSWIRE - Midway Airlines on Feb. 15 will begin

service to Montreal International Airport at Dorval with three daily non-stop flights from the carrier's new hub at Philadelphia International Airport, announced John P. Tague, vice president of marketing and planning. On Jan. 15, service will begin to Toronto with three daily non-stop flights from Philadelphia.

Midway Airlines, which marked its tenth anniversary Nov. 1, began its Philadelphia hub operation Nov. 15. Other cities served from Philadelphia include: Albany, Boston, Buffalo, Chicago, Ft. Lauderdale, Ft. Myers, Hartford/Springfield, Miami, Orlando, Rochester, Sarasota, Tampa, and West Palm Beach. Midway will have a total of 51 daily departures from Philadelphia International Airport by Feb. 15.

Previously, Midway served Philadelphia with six daily flights to the airline's Midway Airport hub in Chicago. Using McDonnell Douglas DC9-30 aircraft, Midway's new service operates as scheduled:

BUFFALO, N.Y. (JAN. 12) PR NEWSWIRE - LTV Missiles and Electronics Group announced today that its Sierra Research Division has received $2.4 million in additional funding from the U.S. Air Force for engineering changes to its radar bomb scoring systems.

These engineering changes will enhance the operational utility and reliability of the 15 AN/TPQ-43 systems to be deployed at strategic air command sites throughout the United States.

The contract was awarded by the Air Force Electronic Systems Division, Hanscom Air Force Base, Mass.

Work is scheduled to be completed at the division's headquarters in suburban Cheektowaga in June.

The AN/TPQ-43 radar bomb scoring system is transportable, automated and operates in all weather. It is used both for training and evaluating the performance of bomb crews. The system automatically scores simulated bomb drops, gives instant readouts of mission results and supplies a computer printout for a permanent record of the results.

Precise, low-level tracking, one of the system's many features, is accomplished through the use of a special optical tracker and a computerized radar-tracking system. Advanced software and hardware greatly enhance the speed of the system and simplify its operation.

Sierra Research Division is an integrator of electronic systems and manufactures electronic and avionic equipment for military and commercial use worldwide. It is one of three divisions of LTV Missiles and Electronics Group which also produces missiles, rockets, space systems and military vehicles.

DALLAS (JAN. 12) PR NEWSWIRE - Recognition Equipment Inc. (NYSE: REC) announced today that it is engaged in discussions with The Prospect Group Inc. (NASDAQ: PROS) regarding amending the agreement between Recognition and Prospect which provides for, among other things, an additional $15 million cash investment by Prospect in Recognition and a self-tender offer for $15 million to $20 million of Recognition common shares.

Recognition has proposed to Prospect that the commencement of the self-tender offer be delayed for up to 120 days after the closing of the Prospect investment. The agreement currently provides that the

self-tender offer will close substantially simultaneously with the closing of the Prospect investment.

If the proposal is agreed to, Recognition's management anticipates that a portion of the $15 million Prospect investment would be used for working capital purposes in the short term. Recognition stated that there could be no assurance that any agreement regarding an amendment would be reached with Prospect.

The Prospect investment and the self-tender offer are subject to approval by the stockholders of Recognition at the Annual Meeting of Stockholders of Recognition scheduled to be held in February, 1990. Recognition said that it expects the Prospect investment to close promptly after the annual meeting.

CANANDAIGUA, NY (JAN. 12) PR NEWSWIRE - Canandaigua Wine Company, Inc., (AMEX: CDG.A & CDG.B) reported sales and income increases for the first quarter of fiscal 1990.

Net sales for the first quarter ended Nov. 30, 1989 were $43,671,588 as compared to $40,245,150 for the first quarter the previous year. Net income was $1,189,837, or $.28 per share in the first quarter as compared to $635,877, or $.13 per share for the same quarter of the prior year.

The increase in net sales principally resulted from increased case goods sales of the "Wild Irish Rose" and "Cisco" brands and from continued growth in sales of California grape juice concentrate. Net income increased primarily because of an increase in net sales. The company also benefited from a continued reduction in selling, general and administrative expenses (including advertising).

Marvin Sands, chairman of the board of the company, said: "We are continuing on our course of expanding our product base, while at the same time, reducing costs and expenses. We are pleased with the results to date, and look forward to further improvement in the future."

Canandaigua Wine Company, Inc. is the fourth largest wine producer in the United States. The company owns and operates seven wineries in New York, California, and South Carolina. Its principal brands are "Wild Irish Rose " "Manischewitz," "Sun Country," "J. Roget," "Marcus James," "Cisco" and "Widmer."

WASHINGTON (JAN. 12) PR NEWSWIRE - Health and Human Services Secretary Louis W. Sullivan, M.D., today announced the appointment of Beny J. Primm, M.D., as associate administrator for treatment improvement of HHS' Alcohol Drug Abuse, and Mental Health Administration.

Dr. Primm most recently was executive director of the Addiction Research and Treatment Corporation and president of the Urban Resources Institute, both in Brooklyn, N.Y.

In his new position, Dr. Primm will assume a national leadership role in coordinating treatment programs for substance abuse. He will work with states, communities, health care providers and national organizations to upgrade the quality, improve the effectiveness and expand the capacity of existing services.

While Dr. Primm's primary responsibility will be to improve drug abuse treatment, he will also address the needs of people with multiple substance abuse problems as well as those with both addictive and mental health disorders. His goal will be to introduce the best and most recent scientific research findings into clinical practice and to identify areas of the service delivery system where special federal assistance is needed.

As executive director of the Addiction Research and Treatment Corporation since 1969, he directed programs providing multiple treatment services to some 2,000 patients with a history of drug abuse and related problems. He also was a co-investigator on numerous research projects on such topics as biochemical markers for alcoholism, immune system dysfunction, HIV infection and behavior patterns of drug abusers.

He was awarded his doctorate of medicine by the University of Geneva, Switzerland, in 1959. He served his internship and his residency in anesthesiology at Meadowbrook Hospital in East Meadow, N.Y.

CHICAGO (JAN. 12) PR NEWSWIRE - OutRight Industries, Inc. announced today it has extended until April 30, 1990 the expiration date of the 2,200,000 outstanding warrants to purchase shares of its common stock. The warrants were set to expire on Jan. 31, 1990. OutRight originally issued the Warrants in connection with its initial public offering in October 1986.

Two warrants entitle the holder to purchase one share of common stock upon payment of $1.00 and surrender of the warrants.

The company is not extending to April 30, 1990 the expiration date of an Underwriter's Special Warrant to purchase 110,000 shares of common stock. The Underwriter's Special Warrant was issued to RAF Financial Corp. (formerly Pittock Financial Corp.), the lead underwriter of OutRight's initial public offering. The Underwriter's Warrant will expire on Jan. 31 1990.

The terms of a second Underwriter's Warrant to purchase 220,000 shares of common stock which was also issued to RAF in connection with the initial public offering remain unchanged. The Underwriter's Warrant expires on Oct. 17, 1991.

OutRight Industries, Inc. manufactures and sells cleaning products and services in the retail and industrial markets. OutRight's common stock and warrants are traded in the over-the-counter market.

MIAMI (JAN. 12) PR NEWSWIRE - Meldeau International, Inc. of Boca Raton has filed a $153 million lawsuit against Goodyear Tire and Rubber Co. (NYSE: GT), alleging "intentional interference with business relations, slander, and conspiracy to fix prices and restain trade."

The suit, files in U.S. District Court by Meldeau attorney Chuck Kline of the law firm of White & Case, alleges that Goodyear of Akron, Ohio interfered with Meldeau's five-year agreement with Gummiwerke Fulda GMBH, a West German subsidiary of Goodyear to serve as exclusive U.S. distributor of Fulda high-performance tires. The suit charges that Goodyear used improper means to halt sales of Fulda tires through Meldeau with the intent to begin selling the tires through its own independent dealerships.

"As a direct and proximate result of Goodyear's actions, Meldeau International's U.S. distribution business has been destroyed and Meldeau International has lost the net income from the sale of tires under the five-year plan, the present value of which exceeds $51 million," the suit alleges. The antitrust action seeks treble damages, interest costs and attorneys' fees.

GOLDEN, CO. (JAN. 12) PR NEWSWIRE - Coors Brewing Co., a business unit of Adolph Coors Co. (ACCOB), today announced record beer sales for fiscal 1989, surpassing 1988's record year by more than 1.1 million barrels.

For the 53-week fiscal year ended Dec. 31, 1989, the company reported beer sales volume of 17,698,000 barrels, a 7 percent increase over the 16,534,000 barrels shipped during the 52-week fiscal year 1988. Shipments during the 13-week fourth quarter of 1989 also posted a record, increasing 32 percent, to 4,394,000 barrels from 3,326,000 barrels during the 12-week quarter a year earlier.

Peter H. Coors, president of Coors Brewing, said, "We are delighted with the strong performance of our brands in 1989, particulary Coors Light, which surpassed the 10-million-barrel mark before year-end. This phenomenal growth of more than 15 percent made Coors Light the fastest growing premium light beer in America last year, and all indicators suggest that this trend continues.

"We are also excited about the success of our new brands, Keystone and Keystone Light," Coors added. "These popular-priced brands, which were introduced nationwide last fall, strongly impacted our record fourth-quarter shipments.

"While we are extremely pleased by recent trends in beer shipments," Coors noted, "we expect intense price competition and higher packaging costs in the beer industry to place continued pressure on earnings."

#90012p0163 01/12/1990 ~PR Newswire

CUMBERLAND, RI (JAN. 12) PR NEWSWIRE - Valley Resources, Inc. (AMEX: VR) today announced that net income for the first quarter of fiscal 1990, the three months ended Nov. 30, 1989, amounted to $26,500 or 1 cent per share, compared with $78,000 or 2 cents per share (restated for the effect of the three-for-two stock split) for the same quarter last year. The decrease in first quarter earnings was the result of abnormally warm weather, partially offset by improvements in nonutility operations. Weather for the first quarter of fiscal 1990 (September - November), as measured by degree days, was 21 percent warmer than the prior year.

Weather conditions have changed dramatically since the end of the first quarter. Dec. 1989 was the coldest December on record and caused record sendouts for subsidiary Valley Gas. As a result, it is expected that December will show a substantial increase in earnings over the previous years. Contracts and supplies of peak shaving fuels are sufficient to meet current and future customer demands. Valley Gas' propane supplies were more than adequate despite the critical supply situation that existed in New England.

Net income for the twelve months ended Nov. 30, 1989 was $2,930,800 as compared with $2,859,600 for the period ended Nov. 30, 1988. Earnings per share were 76 cents and 75 cents (restated for the effect of the three-for-two stock split) for the twelve months ended November 1989 and 1988, respectively. Improved performance in Valley Propane and Morris Merchants is responsible for the earnings increase.

Valley Resources, Inc. is a Rhode Island holding company with five wholly owned subsidiaries: Valley Gas Company, a regulated natural gas distribution company; Valley Appliance and Merchandising (VAMCO), a merchandising, appliance, rental, sales and service company; Valley Propane, Inc., a retail propane gas sales and service company; Rhode Island Development and Exploration Company (RIDEC), an inactive company; and Morris Merchants, Inc., d/b/a/ The Walter F. Morris Company, a wholesale distributor of franchised lines.

#90012p0164 01/12/1990 ~PR Newswire

SCHAUMBURG, IL (JAN. 12) PR NEWSWIRE - Motorola, Inc. (NYSE: MOT) today announced the final phase of the transition plan for the next generation of chief executive office leadership effective Jan. 11, 1990. The fundamentals of the plan were first announced in June 1986.

The board of directors has elected George M.C. Fisher (49) chairman of the board and chief executive officer. Fisher had served as president and chief executive officer since January 1988.

The board elected Gary L. Tooker (50) president and chief operating officer of the corporation. Tooker had served as senior executive vice president and chief operating officer since January 1988.

Christopher B. Galvin (39) joins the chief executive office as senior executive vice president and assistant chief operating officer. By board election, he moves up from his former position as executive vice president and chief corporate staff officer, which he had held since January 1988.

Robert W. Galvin (67), Motorola chairman of the board since 1959, will continue to serve as a full-time officer of the corporation, but in a supporting role. His position will be chairman of the executive committee, a newly constituted committee and position of the board of directors.

Before the first phase of the transition went into effect July 1, 1986, Fisher had been senior vice president and assistant general manager of the communications sector. Tooker had been executive vice president and general manager of the semiconductor products sector. Prior to becoming chief corporate staff officer, Galvin had served as corporate vice president and general manager of the paging division.

Motorola is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include

two-way radio, pagers, cellular telephones and systems, semiconductors, defense and aerospace electronics, automotive and industrial electronics, data communications and information processing and handling equipment. Motorola is a winner of the first annual Malcolm Baldrige National Quality Award, in recognition of its superior company-wide management of quality processes.

#90012p0175 01/12/1990 ~PR Newswire

JERSEY CITY, NJ (JAN. 12) PR NEWSWIRE - Mascott Corporation (NASDAQ: DINE) today reported revenues of $599,800 for the three months ended Nov. 30, 1989, and revenues of $1,425,800 for the nine months ended Nov. 30, 1989. The company did not have operating revenues in the prior fiscal year.

For the three months ended Nov. 30, 1989, the company reported a net loss of $77,900 (1 cent per share), as compared with a net loss of $30,100 (1 cent per share) for the three months ended Nov. 30, 1988. For the nine months ended Nov. 30, 1989, the company reported a net loss of $498,300 (9 cents per share), as compared with a net loss of $36,300 (1 cent per share) for the nine months ended Nov. 30, 1988.

The company opened its first restaurant, Markers Restaurant & Bar, in March 1989 and opened its first Cinnabon (note) bakery franchise in September 1989.

Marc Gillman, the company's president, commented that: "The operating results reflect improving gross profit margins, offset by significant selling general and administrative expenses typically associated with recently opened businesses in our industry."

The company further announced that it is currently negotiating the purchase of a second restaurant in southern New Jersey and is negotiating for an acquisition of a leasehold for a second Cinnabon bakery to be located in northern New Jersey. These transactions are subject to the execution of definitive agreements, the receipt of necessary approvals and other conditions.

The company was established to own and operate restaurants catering primarily to local business clientele and to operate Cinnabon bakery franchises. The company currently operates Markers Restaurant & Bar and an adjacent take-out and delivery outlet located in Jersey City, and a Cinnabon bakery located in Paramus, N.J.

NOTE: Cinnabon is a registered trademark of Restaurants Unlimited, Ltd.

NEW YORK (JAN. 12) PR NEWSWIRE - NYNEX Enterprises has announced the creation of a new third-party logistics group designed to strengthen the company's external business focus and develop new markets beyond the NYNEX family of companies.

The new NYNEX Logistics Services division was launched Jan. 1. Joseph Timpanaro has been named vice president and general manager of the new group. Timpanaro, formerly vice president-business development, is charged with developing Enterprises' Third-Party Logistics Services on a national basis.

The new group is located at NYNEX Enterprises' Manhattan headquarters, 441 Ninth Ave.

As a third-party logistics provider, Enterprises offers a complete materials management package -- managing a client's products from the point of origin to the final destination.

Timpanaro calls the reorganization "a natural step in Enterprises' evolution as a full-service materials management provider.

"It illustrates the company's continuing commitment to build stronger customer relationships and provide a range of specialized products and services that truly sets us apart from the competition."

Enterprises' Third-Party Logistics Services portfolio includes:
-- Contract warehousing -- Inventory control/management
-- Transportation services -- Purchasing and procurement support
-- Customer service support -- Logistics information systems support

"As a third-party provider of integrated logistics services," Timpanaro says, "we will not own any inventory, but will manage its movement through the supply chain.

"What we provide the customer with is increased flexibility and capability lower costs and increased service levels. These four criteria are fundamentally the reason why clients decide to 'outsource' various elements of their logistic needs.

"By building on our experience in logistics and using the advanced capabilities of the NYNEX Expressway(SM) system," Timpanaro says, "we're positioning ourselves to become a major player in the external marketplace."

NYNEX Enterprises is a subsidiary of NYNEX Corporation (NYSE: NYN). Enterprises provides cost-effective integrated materials management and technical services for the NYNEX family of companies, including purchasing contracting, quality control, testing, inventory management and distribution.

SPRING VALLEY, NY (JAN. 12) PR NEWSWIRE - Kenneth Sawyer, the newly elected president of Par Pharmaceutical, Inc. (NYSE: PRX) today issued the following statement in accepting a sentence resulting from two former officials of Par and its subsidiary, Quad Pharmaceuticals, Inc. providing illegal gratuities to an FDA employee in September 1987:

"While we do not welcome this sentence, we accept it as one means to demonstrate our disdain for the behavior involved and our sincere regret that it occurred. We believe that this type of conduct is totally unacceptable, and is in no way representative of the corporate philosophy of either Par or Quad. We accept this sentence because of our sense of responsibility for the acts of our employees, even though those acts were unknown to anyone else at either company.

"This sentencing brings to a close an extremely unpleasant and regrettable episode in our history. While Par may have other legal issues before us that we will address, we can now devote our attention to demonstrating to our customers, the government and the public, our continued commitment to manufacture and distribute only the highest quality pharmaceutical products and to conduct our business in accordance with the highest standards of integrity.

"The recent additions we have made to Par's senior management and the extensive reviews and audits that we are conducting on our products and product applications are but some of the steps we are taking in order to restore our position as a leading supplier of generic products to the consumer and hospital markets. Additionally, the companies have established safeguards to ensure that incidents such as occurred in these matters will never be repeated, and have established ethics programs for their employees. We are determined to continue to take whatever steps may be necessary to ensure public confidence in the quality of our products and the management of the company. We strongly believe that we have the talent and commitment to achieve this goal."

DALLAS (JAN. 12) PR NEWSWIRE - Hoechst Celanese has decided that its Specialty Chemicals business unit ultimately will be located in the corporation's Dreyfus Research Park at 2300 Archdale Drive in Charlotte, N.C.

Last October, Hoechst Celanese said it planned to relocate its Specialty Chemicals headquarters to Charlotte from several other sites, mainly Portsmouth, Va., and Somerville, N.J.

Tom Kennedy, group president, chemicals, has told employees at both locations the consolidation at Dreyfus Research Park will not occur for several years. New facilities there will have to be planned and constructed. In the interim, the Specialty Chemicals unit will use leased quarters at a convenient location in Charlotte.

The relocation of employees to Charlotte will begin this year, probably in the summer, according to company officials. Approximately 200 positions are involved.

The Dreyfus Research Park is a campus-like complex, with 453,000 square feet of floor space under roof on a 128-acre site. Personnel there serve the Textile and Technical Fibers units of Hoechst Celanese's Fibers and Film Group.

Hoechst Celanese, a subsidiary of Hoechst AG of West Germany, is a FORTUNE 100, $6-billion (sales) corporation with leading positions in chemicals, fibers and film, advanced materials and the life sciences.

CONTACT: Herb Reed, 214-689-4712 (Dallas), or Jim Allen, 704-554-2224 (Charlotte), both of Hoechst Celanese.

CHICAGO (JAN. 12) PR NEWSWIRE - Selfix, Inc. (NASDAQ: SLFX) today reported that net earnings increased 16 percent for the second quarter and 10 percent for the six-month period.

For the quarter ended Nov. 30, 1989 net earnings were $649,597, compared with $557,094 for the second quarter last year. Earnings per share were $.18 (based on 3,532,052 shares outstanding) compared to $.18 (based on 3,066,200 shares outstanding for the previous period). Net sales for the quarter increased to $8,158,172 -- a 9 percent increase over previous second quarter sales of $7,510,161.

For the six months ended Nov. 30, net earnings increased to $1,563,830 from $1,418,776 in the previous year. Earnings per share were $.44 (based on 3,534,027 shares outstanding) compared to $.51 per share (based on 2,771,976 shares outstanding for the previous period). Net sales for the six-month period increased to $17,425,589 -- an increase of 12 percent over the previous first-half sales of $15,601,915.

Chairman of the Board Meyer J. Ragir cited new product introductions and capital improvements as keys to continued growth in sales and earnings through fiscal 1990. ''Selfix has broadened its SPACEWORKS home organization category in both the high and low end with a home entertainment center and a collection of value-priced, wall-mounted space-savers. Due to increased demand for our Shutters, Inc. products, we have embarked on a 24,000-square-foot plant addition at our Hebron, Ill., facility.'

The company obtained funding through a $4,000,000 Industrial Revenue Bond by the Illinois Development Finance Authority.

Selfix was founded in 1952 and was acquired in 1962 by Mike Ragir and his wife, Norma. The company's headquarters and principal manufacturing operations are a 200,000-square-foot facility on the Southwest Side of Chicago. The company also maintains satellite facilities in Canada and the United Kingdom in addition to the Hebron plant.

In October 1988, Selfix Inc. became a public company.

WOODSTOCK, GA (JAN. 12) PR NEWSWIRE - North Georgia National Bank today

announced that it has been capitalized at more than $6.1 million.

The bank's capitalization was completed by year-end with proceeds from its initial offering of common stock.

Construction of the NGN building will begin in the near future in the Parkway 575 Business Center at I-575 and Highway 92 in Woodstock. The site is adjacent to the new Parkway Medical Center and across the street from the new Woodstok Post Office.

Opening of the two-story bank facility is scheduled for early summer. "We are excited about the start of the project," said Donald D. Howard, president and chief executive officer of North Georgia National. He was the former president and CEO of the successful Northside Bank in Roswell, organized in 1987.

NGN will offer a full range of commercial and consumer banking products, including checking accounts and interest-bearing accounts together with commercial, installment and real estate loans, credit cards and other banking services.

"North Georgia National's startup coincides with the strong growth of south Cherokee County and the Woodstock area," Howard said. "Our bank will serve an area that is projected to become the fastest growing area of metro Atlanta and Georgia. More than merely providing banking services, we are going to sell relationships and service the customer's individual requirements as well as business needs."

Cherokee County's population more than than doubled between 1960 and 1986, increasing from 31,059 to 73,800, official Census Bureau figures show. This year the population is expected to reach 104,640 and reach 211,733 in 2000, according to the North Georgia Area Planning and Development Commission. The projected rate of growth between 1980 and 2000 exceeds that of Gwinnett County, which in recent years has been the fastest growing county in the nation.

Even stronger growth is anticipated for the Woodstock primary service area of North Georgia National Bank. This area is expected to increase from 29,874 in 1980 to 173,154 in 2000.

A major factor in the primary service area's projected growth is the Towne Lake project near Woodstock. Towne Lake covers 4,000 acres and ultimately will provide housing for 40,000 people.

#90012p0191 01/12/1990 ~PR Newswire

PHILADELPHIA (JAN. 12) PR NEWSWIRE - United Valley Bank (UVB) announced today its year-end operating results for 1989. UVB closed its first full year with operating profits of $262,011 - a swing of more than $839,800 from opening losses in 1988.

United Valley Bank also reported significant increases in assets, deposits and loans, which doubled in 1989. Total assets increased 195 percent to $74,088,711. Deposits increased 225 percent to $63,651,965. UVB's loan portfolio similarly increased 211 percent to $46,787,633.

UVB officers are pleased with the bank's performance in the early stages of the company's development. Board Chairman Jack Hoopes, pointed to the bank's operating profit as an indication of promised future growth for United Valley.

Hoopes said, "Even with the inclusion of the questionable Pennsylvania State Shares Tax in our fourth quarter operating results, which seriously diminished actual net income, United Valley Bank posted positive numbers for the year." UVB's 1989 net income decreased from $262,011 to $66,211 after applying the embattled State Shares Tax to the new bank's balance sheets.

Hoopes added, "The final income figure of $66,211, as affected by the shares tax, does not reflect United Valley's real performance for the year."

Tom Lynch, president of United Valley Bank, attributed UVB's profitability in only its second year to the bank's highly competitive rate structures and unique business banking system. Lynch stated, "As a small financial services institution, UVB is afforded the flexibility to tailor our products to the needs of small to medium-sized businesses."

Lynch also credited the enthusiastic participation of UVB's board of directors in helping to develop the bank's rapidly expanding customer base. Lynch explained, "Our board is comprised of successful businesspersons and entrepreneurs who understand the distinct needs of developing firms. At UVB, we have built upon their designs to create a truly customer-oriented banking program."

United Valley Bank is a full-service, FDIC-insured commercial bank with offices in Wayne, Pa., and Center City Philadelphia.

#90012p0207 01/12/1990 ~PR Newswire

NEW YORK (JAN. 12) PR NEWSWIRE - The U.S. Air Force expects to conclude negotiations in April with its contractors for the Advanced Tactical Fighter (ATF), ending a disagreement over compensation for an extension in the program.

In an Aviation Week exclusive, military editor Patricia A. Gilmartin and national affairs editor David F. Bond report that Lockheed, which is teamed with Boeing and General Dynamics, has signaled its intent to accept the Air Force's offer to provide $52 million to extend the period of pre-development ATF word from December 1990 through April 1991.

A competing team, led by Northrop and its partner McDonnell Douglas, had

not responded to the Air Force offer by midweek. Northrop complained that the decision to extend the ATF program has damaged its competitiveness, but the Air Force rejected that argument, according to Bond and Gilmartin's exclusive report. Under current plans, the Air Force will select winning contractors by May 1991 for the $67 billion program to procure 750 Advanced Tactical Fighters.

Aviation Week & Space Technology, published weekly by McGraw-Hill, is the leading journal for the worldwide aviation, aerospace and defense industries. The magazine's current issue also spotlights these key developments:

- McDonnell Douglas Transport Makes First Flight: The first McDonnell Douglas MD-11 transport made a successful initial flight this week, launching an aggressive flight test program aimed at certifying the aircraft with two of its three engine options by October or November.

Los Angeles Bureau Chief Bruce A. Smith reports on the details of this major milestone in the MD-11 program. Because of myriad delays, McDonnell Douglas is studying the possibility of increasing the aircraft's production rate to 1.25 aircraft per week to speed deliveries to customers.

- Pan Am Cash Crunch Delayed: Pan American Word Airways has enough cash to survive through March and may not need to complete negotiations with a buyer until next fall, according to industry financial officials surveyed by Aviation Week transport editor James T. McKenna.

McKenna reports that Pan Am Corporation's stock rose last week on speculation that American Airlines was considering acquisition of Pan Am. But financial officials have since discounted the possibility of a transaction between the carriers. McKenna quotes one financial official as saying, "American is waiting for Pan Am, to collapse so it can go in and pick up the choice pieces."

#90012p0209 01/12/1990 ~PR Newswire

HAMILTON, BERMUDA (JAN. 12) PR NEWSWIRE - Sea Containers Ltd. (NYSE: SCR) announced today that, in furtherance of its recapitalization plan, it has signed an agreement with Itel Corporation (NYSE: ITL) to sell its entire tank container leasing and forwarding business for a cash purchase price of approximately $110 million, subject to approval by Sea Containers' shareholders at the special general meeting called for Feb. 24, 1990 to vote on the proposed recapitalization plan.

Sea Containers also advised that it has agreed to sell the Boxer class vessels Maersk Fiero and Maersk Tauro to Norwegian buyers for approximately $17 million. These sales are in the ordinary course of business and are not subject to shareholder approval.

James B. Sherwood, president, said that the asset sales program had now reached $867 million approximately 80 percent of the $1.1 billion target. He said that negotiations to sell certain of the company's port interests were progressing satisfactorily and $110 million should be achieved.

Negotiations for sale of part of the company's hotel interests and three additional vessels are also well advanced and should exceed $100 million which would effectively complete the asset disposition program. The company expects to announce these remaining sales in the first half of February, before the Feb. 24 meeting.

Sherwood said that the company's wholly-owned subsidiary, Sealink British Ferries Ltd., had yesterday signed an agreement with the French National Railways to acquire 49 percent interest in Societe Proprietaire des Navires (SPN), a French partnership which has been formed to own and operate the vessels currently operated by the Armement Naval Division of the French railways on routes between France and England. The ships will be manned and managed by another French company, Societe Nouvelle d'Armement Transmanche, in which Sealink British Ferries will not have a shareholding but to which they will provide consultancy services.

Pooling arrangements between Sealink British Ferries and Armement Naval will be transferred to this new company and cannot be terminated before Dec. 31, 1995, although it is expected such arrangements will continue indefinitely. Sherwood indicated that the Armement Naval business was profitable and should make a meaningful contribution to Sealink British Ferries' profits. SPN will be purchasing the Fiesta, one of the new jumbo ferries now under reconstruction in Germany, which will be manned by employees of Societe Nouvelle d'Armement Transhmanche.

WASHINGTON (JAN. 12) PR NEWSWIRE - Peter Temple has been named vice president and general manager of WLVI-TV, the Gannett-owned independent station in Boston.

The announcement was made today by Ron Townsend, president of Gannett Television (NYSE: GCI).

"With Peter's more than 13 years at independent and network-owned television stations and the strong management team already in place at the station, the opportunities in Boston are endless," Townsend said. "We expect, with Peter's leadership, WLVI will make even greater strides in the '90s and beyond."

Temple, 39, had been vice president and station manager of WNYW-TV, the Fox-owned independent station in New York, since 1987. During his two year association, Temple was responsible for the day-to-day operations of WNYW which more than doubled its output of local news and information programming. As a result, the station made television history as the first New York independent station ever to outdeliver a network-owned station in total audience during a ratings period.

From 1985 to 1987, Temple worked with Lorimar-Telepictures. He was senior vice president-marketing and administration for Lorimar Syndication (1987); senior vice president-video retailing, Lorimar Television (1986-1987) and vice president-domestic distribution (1985-1986).

Before he joined Lorimar, Temple was associated with CBS-TV's local and network operations for almost 10 years. As vice president and station manager of WCAU-TV in Philadelphia from 1983 to 1985, Temple was responsible for sales, programming, promotion and operations. He was vice president, planning and administration for the CBS-owned stations (1982-1983); station manager of WCBS-TV in New York (1981-1982); director of planning and administration of WCBS-TV (1978-1981); director of planning, CBS Television Network (1978); and director of planning of WBBM-TV in Chicago (1976-1978).

A native of the Boston area, Temple earned his MBA from the Harvard Graduate School of Business Administration and his bachelor of arts degree in American history from Middlebury college in Vermont.

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA TODAY, 35 non-daily newspapers and USA WEEKEND, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannet also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

NEW YORK (JAN. 12) PR NEWSWIRE - Dan Buckley has been named group vice president of classified advertising for The New York Times Company (AMEX: NYT) Regional Newspaper Group in Atlanta. John R. Harrison, president of the group, made the announcement today. Buckley replaces Dean Welch, who resigned.

"Dan brings a very strong advertising background to this critical position " Harrison said. "He will be an important resource for the classified advertising professionals at each of our publications."

Buckley's primary responsibility will be to work with the publishers and classified advertising managers of The Times's 35 regional newspapers to help develop and strengthen their classified advertising in the automotive real estate and employment categories.

Most recently he was advertising director for The Gainesville Sun, a member of The New York Times Regional Newspaper Group. He began his newspaper career in 1971 as an advertising salesman with The Atlanta Journal and Constitution.

WILSON, NC (JAN. 12) PR NEWSWIRE - BB&T Financial Corporation (NASDAQ-NMS: BBTF) today reported record earnings for both the twelve months and fourth quarter ended December 31, 1989. For the year, net income rose 14.3 percent to $44.2 million, compared with $38.7 million reported last year. Primary net income per share was $2.29, up from $2.05 in 1988, while fully diluted earnings per share were $2.17 and $1.96 respectively.

For the three months ended December 31, net income totalled $11.3 million, an increase of 8.3 percent from the level of $10.5 million reported last year. Primary net earnings per share was $.58 and fully diluted income per share was $.55 compared with $.55 and $.52, respectively, in the final quarter of 1988.

On releasing earnings, John A. Allison IV, Chairman and Chief Executive Officer said, "The earnings of 1989 represent another year of strong performance at BB&T. We are proud of our record of accomplishment and progress, particularly in light of the dramatic and significant changes that occurred in the financial services industry in 1989. We are particularly pleased that our asset quality continues to be excellent at a time when many institutions are experiencing difficulties."

Assets at the end of December totalled $4.8 billion, an increase of 9.9 percent from $4.4 billion reported a year ago. Loans rose to $3.2 billion at the end of the fourth quarter compared with $3.0 billion last year, while deposits increased to $3.9 billion from $3.6 billion.

Through its subsidiary banks in North and South Carolina, BB&T Financial Corporation operates 191 offices in 105 cities. BB&T Financial Corporation common stock is traded on the NASDAQ National Market System and is listed under the symbol BBTF.

PITTSBURGH (JAN. 12) PR NEWSWIRE - Computer Research Inc. (NASDAQ: CORE) today reported a first-quarter net loss of $51,151 or one cent per share on revenues of $2,647,881 for the three-month period ended Nov. 30, 1989, compared to net income of $99,870 or 3 cents per share on revenues of $3,391,610 for the first quarter of the previous fiscal year.

James L. Schultz, president, said revenues decreased about 22 percent compared to the previous year due to a drop in revenues generated by the company's Computer Applications Division (CAD). Revenues from brokerage office accounting services were relatively equal to the first three months last year.

"We believe the drop in CAD revenues during the early fall reflected a temporary and short-term market softness," Schultz said. "We are optimistic that this segment of our business will rebound during the remainder of the year."

Computer Research provides computerized back-office accounting services for more than 90 securities broker/dealers and banks throughout the United States. Its subsidiary, Computer Applications Division Inc., supplies CAD/CAM (computer-aided design/computer-aided manufacturing) systems, equipment and training for engineers, architects, industrial designers, and educational institutions.

#90012p0228 01/12/1990 ~PR Newswire

TIMONIUM, MD (JAN. 12) PR NEWSWIRE - ExperTech Corporation has released NO-PEEK!, a software security program for IBM Compatible MS-DOS computers.

The camouflage PC screen program allows the computer operator to clear the display terminal screen with the press of a key to prevent onlookers and snoopers from reading sensitive information.

"NO-PEEK! looks as if you just finished working on a project and the computer is idle," noted Kathleen M. Harmeyer, president of ExperTech.

The display appears to be stopped at the DOS prompt, "C:1/4", as if nothing were going on at the computer. Whenever the intruder departs, the operator types in a password and the screen reappears just as it was. This will be useful for various types of financial, supervisory or idea generation professionals.

Harmeyer lists the specific values of the program: "Using NO-PEEK! is superior to other ad hoc means of covering the screen from visitors to a work area. Some users prefer to shut off the monitor each time a person enters eyesight range. This is hard on the electronics.

"Turning down the brightness, if a monitor has such a knob, can offend the visitors if they are colleagues. Feelings are spared with NO-PEEK! and

the data is nonetheless covered.

"Additionally, requirement of a password to return to the original program allows users to leave the vicinity of their computers in confidence. Because this product is used at the DOS level it is available to all programs which run under MS-DOS control."

Harmeyer is convinced: "This is a product that the marketplace has needed for quite some time."

ExperTech is marketing the program by mail order and it is available on 5.25 inch or 3.5 inch diskettes for $19.95.

WAKARUSA, IN (JAN. 12) PR NEWSWIRE - Holiday Rambler Corporation, a wholly owned subsidiary of Harley-Davidson, Inc. (NYSE: HDI), today announced the restructuring of its Recreational Vehicle Division. The restructuring involved the consolidation of Holiday Rambler corporate functions to the RV Division. This action will improve the company's ability to meet new challenges within the recreational vehicle industry, H. Wayne Dahl, president of Holiday Rambler Corporation, said.

Effective immediately, the Recreational Vehicle Division has been restructured as follows: Fred E. Emmert (49), vice president, sales, marketing and distribution; Anthony J. J. Dibiagio (41) vice president, manufacturing operations; James V. Stover (49), vice president, product definition; Michael R. Myers (38), vice president, controller; Richard E. Bond (36), vice president, general counsel and secretary; and Hugh J. Ogren (39), vice president, human resources. These functions will report directly to Dahl.

The consolidation follows the resignation of Donald J. Walter, president of Holiday Rambler's Recreational Vehicle Division, in late 1989, Dahl said. "Donald Walter's resignation, for personal reasons, afforded us the opportunity to consolidate our top management functions to better face the challenges of the changing recreational vehicle industry," Dahl said.

"Today's RV industry needs to improve response time to customer needs and to improve the quality, reliability and price competitiveness of its products," Dahl said. "These top management changes should strengthen Holiday Rambler's position in the RV market and better prepare us to meet industry challenges head-on."

Dahl reported that there were no changes within other Holiday Rambler subsidiaries, including the Utilimaster specialized commercial vehicle operation. All subsidiaries will continue to report to him, Dahl said.

Holiday Rambler Corporation is a leading producer of premium recreational vehicles, specialized commercial vehicles and a diverse range of related products.

MILWAUKEE (JAN. 12) PR NEWSWIRE - Wisconsin Toy Company, Inc. (NASDAQ/NMS: WTOY), a Milwaukee-based toy wholesaler and operator of Toy Liquidators, Toys Unlimited and Everything's A Dollar retail outlets across the United States, announced today that sales and earnings for the third quarter ended Nov. 30, 1989, achieved new highs.

The firm reported record sales for the first nine months of its 1990 fiscal year although earnings for the period were lower than in the comparable period in the previous fiscal year, due to reduced earnings from previous quarters.

Net sales were $22,622,000 for the three-month period ended Nov. 30, 1989, a 28 percent increase over the $17,643,000 for the comparable period in 1988. Net income for the period was $1,947,000 or $.42 per share compared to $1,678,000 or $.36 per share for the third quarter last year.

For the nine month period ended Nov. 30, 1989, net sales were $45,475,000, a 17 percent increase over the $38,922,000 reported for the same period in 1988. Net income was $2,267,000 or $.49 per share compared to $2,819,000 or $.61 per share reported last year.

WASHINGTON (JAN. 12) PR NEWSWIRE - The Federal Aviation Administration (FAA) has awarded a $138,972,000 contract to the Federal Systems Group of TRW, Inc. (NYSE: TRW) for technical support and assistance in managing the agency's Advanced Automation System contract and other automation programs.

The Advanced Automation System is a $3.5 billion program to bring a high level of automation to the control of air traffic, with computers doing much of the routine, repetitive tasks while the air traffic controller

makes the basic control decisions. The prime contractor is the IBM Corporation.

Under the contract awarded to TRW, which is known as the System Engineering and Technical Assistance (SETA) contract, TRW's Federal Systems Group of Fairfax, Va., will provide technical expertise and oversight assistance to help the FAA solve technical problems that arise in connection with the Advanced Automation System.

The contract lists 28 areas in which TRW experts can be called on for help.

Among them are man/machine interface, software engineering, fault tolerance, system modeling and performance analysis, and design and operational evaluation.

Among the other automation programs covered by the SETA contract is the agency's Voice Switching and Control system, an automated system for voice communications within FAA's air traffic control system.

#90012p0237 01/12/1990 ~PR Newswire

DETROIT (JAN. 12) PR NEWSWIRE - Detroit Edison Company (NYSE: DTE) sold a near-record 40.5 billion kilowatt-hours (kWh) of electricity during 1989 -- its second-highest yearly total ever and just 1 percent below the record set in 1988. December sales also were near a record at 3.3 billion kWh, or just 2 percent below the peak 1988 level.

Use of electricity in 1988 was fed by the unusually warm weather throughout the year. However, colder-than-usual weather last month led to a December residential sales record of 1.06 billion kWh.

Sales to commercial customers last year totaled a record 8.5 billion kWh, nearly 3 percent higher than in 1988. Commercial sales in December also were at an all-time high of 723 million kWh and 0.4 percent above those for December 1988. Detroit Edison added 3,400 commerical customers in 1989.

Residential and industrial sales for 1989 were 1.7 percent lower than record 1988 levels. While there were more residential customers in 1989, they used less electricity -- 11.5 billion kWh -- because of the more normal weather in 1989.

1989 industrial sales of 18.7 billion kWh were affected by sharp reductions in use of electricity by auto and steel manufacturers. For

December, industrial sales totaled 1.4 billion kWh, the second-highest December total ever, but still down 6.4 percent from record sales in December 1988.

CLEVELAND (JAN. 12) PR NEWSWIRE - White Consolidated Industries, Inc., Cleveland, Ohio has acquired the outdoor products business of Allegretti & Co., which is headquartered in Chatsworth, California.

Allegretti, with about 1,100 employees and sales in excess of $70 million, is one of the leading U.S. manufacturers of portable electric garden products. The product range includes blowers, grass trimmers, edgers and hedge trimmers.

The company's factories in Chatsworth, El Paso, Texas and Juarez, Mexico have a combined annual production of 1.8 million units. These products are marketed via Sears, Roebuck & Co., mainly under the Craftsman brand name, as well as through other sales channels under the Paramount brand name.

The Allegretti operations will be coordinated with the WCI's Poulan/Weed Eater business, which manufactures similar gas and electrically powered products.

WCI is a wholly-owned subsidiary of AB Electrolux, Stockholm, Sweden, with 1989 sales in the United States in excess of $4.3 billion.

Electrolux president and CEO, Anders Scharp, commented on the purchase: "We consider this purchase an excellent complement to our garden products line. The addition of Allegretti's products enables us to offer a complete range of portable gas and electrically powered garden equipment. In light of increasingly stringent demands for environmental protection, this complement to our product range (which includes battery powered products) is a highly favorable development. The merger of Poulan/Weed Eater and Allegretti will generate a number of important synergies with respect to product development, production and distribution."

Electrolux is the global leader in outdoor power products.

TYLER, TX (JAN. 12) PR NEWSWIRE - DeltaUS Corp. announced today that it has substantially completed its Plan of Reorganization under the provisions of Chapter 11 of the U.S. Bankruptcy Code and has emerged from the Chapter 11 process approximately one year after filing a petition for reorganization on Jan. 31, 1989.

Under the terms of the reorganization plan, as approved by the U.S. Bankruptcy Court, 100 percent of newly issued shares of stock of DeltaUS Corp. and substantially all of the stock of Delta Overseas Drilling Co. (formerly a subsidiary of DeltaUS Corp.) were sold to Gordon P. Getty for a total of $13,500,000. Pursuant to the Court Order confirming the plan, all of the previously existing stock of DeltaUS Corp. was cancelled.

Proceeds from the stock sale, along with the contribution of certain assets, were combined and distributed in accordance with the provisions of the plan to discharge all of the outstanding bank debt and virtually all other pre-petition obligations of DeltaUS Corp., as well as to provide funds to the company for payment of reorganization expenses.

Following the completion of the reorganization plan, DeltaUS established a new credit facility with First City, Texas - Dallas Bank which provides the company with necessary letters of credit for ongoing operations and also provides a working capital line of credit of up to $2.75 million based on a borrowing base formula. Presently, the company has no bank debt.

For future operations, DeltaUS Corp. will be merged into Delta Drilling Co. and the new entity will retain and conduct all activities under the name Delta Drilling Co., which has been used by the company for its ongoing contract drilling operations for nearly 60 years or since its inception in 1931. The company expects the merger to occur and become effective within a few days.

NEW YORK (JAN. 12) PR NEWSWIRE - The Dime Savings Bank of New York, FSB (NYSE: DME) today announced that its board of directors has declared a regular quarterly cash dividend of $.15 per common share. The dividend is payable on March 8, 1990, to stockholders of record on Feb. 6, 1990.

Harry W. Albright Jr., chairman and chief executive officer of the Dime, said, "We are particularly pleased to be declaring our sixth consecutive dividend, especially in light of the estimated net loss of approximately $110 million anticipated for the fourth quarter of 1989 and the estimated net loss of approximately $92 million for 1989, which we announced in mid-December. Despite these losses, the bank continues to be in full compliance with all applicable federal regulatory capital requirements. The actions taken in the fourth quarter of 1989 are designed to benefit the Dime in 1990 and beyond. This, in turn, should enable us to continue our current dividend policy and to maintain a strong competitive position in our core markets."

The Dime, with total assets of approximately $12 billion, is the third largest thrift institution in New York State and one of the largest in the nation. The bank operates 50 retail banking offices in New York State and through its subsidiary, the Dime Savings Bank of New Jersey, an additional eight retail banking offices in central New Jersey.

#90012p0254 01/12/1990 ~PR Newswire
CHICAGO (JAN. 12) PR NEWSWIRE - There is a high probability that the retail units of Campeau Corp. will file for protection under Chapter 11 bankruptcy in the next few days, says an analyst with Duff & Phelps Inc., the investment research and financial consulting firm headquartered here.

"Bankruptcy possibilities become particularly evident when the Campeau board of directors announced that it was terminating its restructuring committee and setting up a separate, independent committee to oversee the U.S. retail operations," said Barbara J. Wedelstaedt, who follows Campeau for the High Yield Research Group at Duff & Phelps. "The bankruptcy will most likely be filed in the U.S., and the restructuring committee plans to hire a new chairman and CEO for the retail units."

The reorganization under bankruptcy will be complicated. Allied and Federated are two separate legal entities that share corporate management.

Debt is layered at separate levels of each company. In addition, federated holders would likely fair better based on asset coverage.

"Despite a 'better' bankruptcy outlook for Federated, bankruptcy is still the likely scenario with interest payments suspended and bondholders waiting perhaps years for any returns of principal on their bonds," Wedelstaedt said. "The outlook for subordinated holders of Allied's and Federated's LBO paper looks highly negative based on the liquidation asset/debt coverage."

Duff & Phelps will continue to update this situation as it unfolds.

CONTACT: Barbara J. Wedelstaedt of Duff & Phelps, 312-630-4652.

PHILADELPHIA (JAN. 12) PR NEWSWIRE - Hopper Soliday Corporation (NYSE: HS), a financial services holding company, today announced that its securities brokerage subsidiary had executed a letter of intent under which Kemper Clearing Corporation, a subsidiary of Kemper Financial Services, part of Kemper Corporation (NYSE: KEM), will provide securities clearing and some execution services for the brokerage firm.

The brokerage, W.H. Newbold's Son & Co./Hopper Soliday & Co., Inc., operates 20 offices in Pennsylvania, New Jersey, and New England and employs 450 people, including 225 account executives. Its W.H. Newbold's Son & Co. division was established in 1844, and its Hoper Soliday & Co. division was established in 1872.

Kemper clears for seven affiliated firms: Blunt, Ellis & Loewi, Inc., of Milwaukee; Boettcher & Co., Inc., of Denver; Prescott, Ball & Turben, Inc. of Cleveland; Bateman Eichler, Hill Richards, Incorporated, of Los Angeles; Lovett Underwood Neuhaus & Webb, Inc., of Houston; Gulfstream Financial Associates, Inc., of Boca Raton, Fla., and Invest Corporation, of Tampa, Fla.

Newbold's/Hopper will be the first non-affiliated firm clearing through Kemper. Newbold's/Hopper previously had an internal clearing operation.

James D. Lowry, chairman and chief executive officer of Hopper Soliday Corporation, said the agreement "is expected to improve our financial and operational efficiency and allow for measured growth."

Hopper Soliday Corportion's major subsidiaries are W.H. Newbold's Son & Co./Hopper Soliday & Co., Inc., which offers securities brokerage and public finance through two regional securities brokerage firms with 20 offices in Pennsylvania, New Jersey and northern New England, and Surety

Trust Company, which offers personal money management.

NORTH ANDOVER, MA (JAN. 12) PR NEWSWIRE - Software Services of America, Inc. (NASDAQ: SSOA; Boston Stock Exchange: SSA) today reported a net loss during its second quarter ended Nov. 30, 1989 of $621,145 or $.28 per share on 2,226,437 shares outstanding, compared to a net profit of $94,068 or $.03 per share during the same period a year earlier. Revenues for the second quarter were $233,699, compared with $3,075,361 in the prior year's quarter.

For the six month period, the company incurred a net loss of $837,804, or $.38 per share on 2,226,437 shares outstanding, compared to a net profit of $88,958, or $.04 per share during the same period the year before. Revenues were $1,019,513, compared to $3,786,227 during the first half the year before.

The major factor contributing to the losses and revenue decline is the company's substantial investment of time and other resources in its development of a complete branch automation system using IBM's new strategic consumer transaction (CT) product. In addition, expenses for professional fees were higher than in the comparable periods of 1988, but are expected to decline significantly in the near future.

During recent months, the company has made a substantial investment in developing a product and relationship with IBM that will position the company in the forefront of IBM's strategic direction for all future branch automation activity. During this time period, the company worked closely with IBM and, as a result, announced on Jan. 5, 1990, that the company will be releasing a complete branch automation system using IBM's strategic CT product.

Currently, Software Services of America is the only software company which is offering a branch automation application system using IBM's CT product and, accordingly, is well positioned to benefit from IBM's marketing capabilities.

The company expects it will take several months before anticipated benefits are realized from its ongoing relationship with IBM and the introduction of its new CT branch automation applications.

Software Services of America, Inc. is a developer of electronic banking

software, supporting branch automation and retail funds transfer systems, utilizing IBM mainframe computers and financial terminal systems. The company is also a remarketer of IBM computer hardware used in conjunction with its software products.

NORTHBROOK, IL (JAN. 12) PR NEWSWIRE - IMC Fertilizer Group, Inc. (NYSE: IFL) today reported net earnings of $21.9 million or 83 cents per common share for its second quarter ended Dec. 31, 1989.

That result represents a nine-percent improvement over the 76 cents per common share reported for the previous quarter, but well below the $1.40 per common share reported for the second quarter last year.

Net earnings for the company's first six months were $41.9 million or $1.59 per common share, compared with $68.5 million or $2.66 per common share for the same period a year ago.

Sales for the second quarter and first half were $263.2 million and $514.2 million respectively, compared with $310.8 million and $579.4 million for the comparable periods in fiscal 1989.

IMC Fertilizer Group, Inc. is the world's leading private enterprise producer and marketer of two basic crop-nutrient materials, phosphate and potash and a manufacturer of two other major fertilizer products, phosphate chemicals and anhydrous ammonia. The company also recovers uranium oxide for use by electric utilities.

#90012p0266 01/12/1990 ~PR Newswire

FORT WORTH, TX (JAN. 12) PR NEWSWIRE - Pengo Industries Inc., ("Pengo") of Fort Worth today announced that in regard to closing its First Amended Plan of Reorganization ("the Plan"), which was approved on Oct. 2, 1989, by the U.S. Bankruptcy Court in Fort Worth, where the consolidated bankruptcy proceeding of Pengo and Pengo Finance N.V. have been pending, the deadline in which to close its Plan has been extended from Jan. 16, 1990, to Feb. 28, 1990.

Pengo had requested the Court to grant this extension to allow time to

negotiate and document a loan from the Bank of New England to provide part of the financing necessary to close the Plan. On Dec. 27, 1989, Pengo executed a Loan Commitment with the Bank of New England whereby the latter agreed to provide $14 million of the approximate $17.2 million needed to fund the Plan. The commitment of the Bank of New England is contingent upon certain pre-conditions including executing satisfactory closing loan documents.

Under the confirmed Plan, which is participated in by a group of investors referred to as the Thomas Group and headed by Wilmer J. Thomas Jr., of Palm Beach, Fla., financing was to be provided by a bridge loan to be made by the Thomas Group. However, the Thomas Group was instrumental in obtaining the loan commitment described above and Pengo, upon satisfaction of the pre-conditions, will proceed to close the Plan using funds provided by the Bank of New England and the Thomas Group.

In granting Pengo's Motion to Extend the Closing to Feb. 28, 1990, the court also ordered that the $2 million promissory note provided for in the Plan for the benefit of Pengo's unsecured creditors shall be dated Jan. 16 1990, and interest on that note shall run from that date.

Pengo will use its best efforts to close the Plan as soon as possible, and will announce a closing date as soon as all documentation is completed.

Pengo is traded on the Pacific Stock Exchange under the symbol PGO.P. For further information regarding Pengo Industries, Inc., contact E. Wayne Mercer, vice president/general counsel, Pengo Industries, Inc., Water Gardens Place, 100 East 15th Street, Suite 450, Fort Worth, Texas 76102, 817-877-0388.

ABBOTT LABORATORIES EARNS $253 MILLION IN FOURTH QUARTER

ABBOTT PARK, IL (JAN. 12) PR NEWSWIRE - Abbott Laboratories (NYSE: ABT) achieved record sales and earnings for both the year and quarter ended Dec. 31, 1989. This is the company's 18th consecutive year of record sales and earnings.

Worldwide sales in 1989 increased 9.0 percent to $5.380 billion from $4.937 billion a year earlier. Earnings per share rose to $3.85, up 15.6 percent from $3.33 in 1988.

For 1989, Abbott's pre-tax earnings climbed 13.1 percent to $1.194 billion

from $1.055 billion last year. Net earnings were $860 million, an increase of 14.3 percent from $752 million in 1988. The record earnings were achieved at the same time research and development expenditures rose 10.4 percent to a record $502 million.

Earnings per share for the fourth quarter were $1.14, an increase of 15.2 percent from 99 cents in the fourth quarter of 1988. Net earnings were $253 million, up 13.8 percent from $222 million a year ago. Sales were $1.455 billion compared with $1.306 billion, an increase of 11.4 percent from the fourth quarter of 1988.

The rate of return on shareholders' investment also improved for the 18th consecutive year, rising to 33.1 percent from 33.0 percent in 1988.

The company last year increased the quarterly common dividend for the 17th consecutive year, to 35 cents per share, up 17 percent. Abbott has paid 263 consecutive quarterly dividends.

Sales of pharmaceutical and nutritional products were $2.785 billion in 1989 compared with $2.599 billion a year ago, an increase of 7.1 percent.

Sales of hospital and laboratory products were $2.595 billion, up 11.0 percent from the $2.338 billion reported in 1988.

Sales in domestic markets were $3.482 billion in 1989, an increase of 8.8 percent from the $3.199 billion in 1988. Domestic sales represented 65 percent of Abbott's worldwide volume in 1989.

Sales in international markets, including direct exports from the U.S., were $1.898 billion in 1989, an increase of 9.2 percent from the $1.738 billion reported in 1988.

Abbott Laboratories is a worldwide manufacturer of health care products employing nearly 41,000 people.

CLEVELAND (JAN. 12) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) today announced the appointment of Emanuel Fthenakis as president and chief operating officer of Banner. Banner also announced the appointment of its Vice Chairman Samuel J. Krasney to the additional post of chairman and chief executive officer of Banner's Aerospace Distribution Group.

Both Fthenakis and Krasney are directors of Banner and members of the

board's executive committee. Fthenakis will continue as chairman and chief executive officer of Fairchild Industries, Inc. which Banner acquired last summer.

Jeffrey J. Steiner, chairman and chief executive officer of Banner, said today's action was designed to further strengthen senior operating management for all Banner units at the highest level.

Fthenakis has been chairman and chief executive officer of Fairchild since 1985 and earlier held a number of other senior offices including president and executive vice president.

Krasney has been associated with Banner since 1968 and served as chairman and chief executive officer until 1985 when he sold substantial interests in Banner to Steiner. Krasney was then elected vice chairman.

Banner Industries is a leading supplier of aerospace products, industrial products and communications services and has a minority interest in Rexnord Corporation.

NEW YORK (JAN. 12) PR NEWSWIRE - Appointments to three major editing positions at The New York Times were announced today by Max Frankel, the newspaper's executive editor.

Adam Clymer, currently political editor, will be senior editor for weekends. He will oversee planning for main news sections on Sunday and Monday and their coordination with the content of The Week in Review. He will also manage the newsroom on weekends. He succeeds Mitchel Levitas, also a senior editor, who is beginning a series of special writing and editing assignments.

Daniel Lewis, now deputy national editor, will be the editor of The Week in Review. He succeeds Erik Eckholm, who is becoming projects editor for enterprise reporting.

Michael R. Kagay, who has been polling director on Clymer's staff, becomes

editor of news surveys. He will head the department that produces The New York Times's political polls, sports polls and the best seller lists for the Book Review.

Clymer, 52, joined the Times in 1977 after reporting from Moscow, New Delhi and Washington for the Baltimore Sun, and from Washington for the New York Daily News. From 1978 to 1983, he was the Times's national political correspondent.

Lewis, 51, joined the Times as an editor in 1978 after holding writing and editing positions at the Providence Journal, Newsday and the Boston Globe. He was deputy editor of The Week in Review from 1980 to 1985. For the last four months, on special assignment, he has supervised coverage of education and the environment.

Kagay, 47, joined the Times in 1987, having served as a polling consultant for the paper. He holds a Ph.D in political science from the University of Wisconsin and was a National Science Foundation post- doctoral fellow at the University of Michigan's Institute for Social Research.

From 1972 to 1982 he taught public opinion and survey research at Princeton University. He then worked as a vice president at Louis Harris & Associates.

SAN DIEGO (JAN. 12) PR NEWSWIRE - USAir (NYSE: U) will offer its successful, award-winning Fearful Flyers classes at San Diego International Airport beginning Tuesday, Jan. 16.

During the three-hour classes, which meet seven consecutive Tuesday evenings, participants will learn about aviation and stress management techniques to overcome their aviaphobia. The class will end on Tuesday, Feb. 27, with a one-hour graduation flight where each student is allowed on guest.

Clinical social worker Carol Stauffer and 40-year veteran pilot Capt. Frank Petee, currently USAir director-special projects and the co- pilot on USAir's first passenger flight in 1949, provide students professional expertise and instruction.

USAir's Fearful Flyer Program was developed in 1975 as a result of the number of people who are afraid of flying. Boeing Aircraft Corporation estimates that one out of every six Americans is afraid of flying.

Since the program's inception, over 2,000 participants have enrolled in the course and 97 percent have successfully overcome their phobia. Classes have been held in numerous cities throughout the United States, including Los Angeles and San Diego.

PITTSBURGH (JAN. 12) PR NEWSWIRE - Ralph F. Hagemeier, executive director of PARTNERS Health Plan of Western Pennsylvania, said today he is delighted with the announcement that Aetna Life & Casualty Co. is becoming the sole owner of PARTNERS National Health Plans.

"This is a very positive development," said Hagemeier. "As a division of The Aetna, that means PARTNERS now has access to the financial support that is so vital in today's market."

A former general manager of employee benefits for the Pittsburgh office of Aetna Life & Casualty for six years, Hagemeier spent nearly 30 years with Aetna before joining PARTNERS last November. "I know Aetna is committed to managed care and I couldn't be happier or more confident for our future success," he said.

Hagemeier emphasized that there will be absolutely no change in the day-to-day operations of PARTNERS Health Plan of Western Pennsylvania. "A few months down the road," he added, "we'll simply become employees of The Aetna."

PARTNERS Health Plan of Western Pennsylvania provides health care benefits to more than 24,000 members through a network of 20 hospitals and over 1,400 physicians in Allegheny, Butler, Beaver, Washington and Westmoreland counties. Formerly Physicians Health Plan of Western Pennsylvania, an 80 percent interest in the HMO was purchased by PARTNERS National Health Plan about 18 months ago.

#90012p0294 01/12/1990 ~PR Newswire

ERIE, PA. (JAN. 12) PR NEWSWIRE - Spectrum Control, Inc. (NASDAQ: SPEC), a worldwide manufacturer of electronic components, announced that today is the effective date of the S-3 registration statement previously filed with

the Securities and Exchange Commission for a rights offering to Spectrum Control, Inc. shareholders that would raise approximately $6.7 million, if all of the rights were exercised.

The company is offering 5,429,785 rights and 2,714,892 warrants, which are received by those shareholders who exercise their rights and purchase their stock. The rights and warrants are transferable and freely tradeable.

Shareholders of record on Jan. 12 will receive the rights to purchase common stock. Spectrum Control will offer to every holder of record of its common stock, rights to subscribe for one share of common stock, at a purchase price of $1.25 per share, for every share held today, the record date. Shareholders who exercise their rights will also receive, for each right exercised, a warrant for one-half share of common stock at a purchase price of $3 per share. Warrants may be exercised only for a whole number of shares; no fractional shares will be issued.

The subscription offering and the rights will expire on Feb. 12, 1990, unless extended by the company for up to an additional 10 business days.

If the holder of rights elects to purchase part of all of the shares of common stock to which he or she is entitled, they may subscribe for additional shares of common stock and warrants at the subscription price, to the extent that all of the rights have not been exercised.

The proceeds of the stock offering will be used for general corporate purposes, including repayment of certain company indebtedness.

Spectrum Control reported sales of $32 million for fiscal year ended Nov. 30, 1989, compared to $29.8 million in 1988. The company said it is optimistic that fiscal 1990 will be a turnaround year as Spectrum's order backlog at Jan. 1, 1990 stood at more than $25 million.

#90012p0296 01/12/1990 ~PR Newswire

BOSTON (JAN. 12) PR NEWSWIRE - Citing the strong need for more natural gas in the U.S. Northeast, the Department of Energy/Office of Fossil Energy (DOE/OFE) yesterday authorized the importation of additional natural gas supplies to this region to begin as early as next fall.

Alberta Northeast Gas Limited (ANE) announced today that the DOE/OFE order authorizes it to import 397.1 million cubic feet of gas per day (MMcf/d) from Canada into the Northeast United States starting later this year.

The DOE/OFE stated in its order that in reviewing the export applications, they have determined that "the (ANE) import arrangements will provide long-term, reliable supplies of needed natural gas on market-responsive terms. In addition, the imports will enhance the energy mix and diversify the sources of energy supplies available in the Northeast, thereby stimulating yearly competition and promoting energy security."

ANE was formed in 1985 to purchase and export gas on behalf of a consortium of 18 local gas distribution companies in New York, New Jersey and New England. ANE plans to ship the gas via the proposed Iroquois Gas Transmission System, a new interstate pipeline to be constructed in New York State and Connecticut, and expansions of the Tennessee and Algonquin pipeline systems. These combined facilities will connect the TransCanada PipeLines system with growing markets in the U.S. Northeast.

The Federal Energy Regulatory Commission, in conjunction with the DEO, is currently completing the environmental review of the Iroquois/Tennessee project. A Draft Environmental Impact Statement was issued in November, and a final statement is expected to be completed this spring. The issuance of a satisfactory Final Environmental Impacy Statement for Iroquois was the only condition placed by DEO/OFE yesterday on the ANE authorization.

CONTACT: Michael S. Lucy, 617-227-8080; or Dan Delurey, 617-227-8080 (office) or 617-729-9341 (home), both of ANE.

#90012p0299 01/12/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (JAN. 12) PR NEWSWIRE - Today, Pan Pacific Petroleum Inc. (Vancouver: PPP) is pleased to announce an oil discovery on

the second exploration prospect, Harimau, in the Lematang Block, South Sumatra, Indonesia. This 280,000-acre area is under a 30-year contract with Pertamina, a state enterprise of the government of Indonesia, and is being explored in partnership with Bonham (Lematang) Ltd. The company, through its subsidiary, Enim Oil Company Limited, holds a 50 percent interest in this venture.

As of Jan. 9, 1990, the Harimau, after having drilled to total depth in basement rock at 7,900 feet, tested oil at the rate of 2,200 barrels per day flowing through a 3/4-inch choke, with 2,200 barrels per day of water, from depths of 7,212-7,304 feet in the Batu Raja limestone. The oil was 29.3 API gravity and was associated with a flow of 2,400,000 cubic feet per day of natural gas.

For the next exploration project, the company plans a short rig move of three miles WSW to the Kijang prospect. Good potential is expected below 7,200 feet in both the Batu Raja and the Talang Akar at Kijang.

At Harimau, management is pleased with the rates of flow. As soon as the monsoon rains are over, another rig will be mobilized, or the exploration effort will be interrupted in order to drill offset wells at Harimau. The Harimau location is about nine miles by road south from a pipeline connection at Prabumulith. In the drier season oil can be trucked to the pipeline, but it is more likely that a short pipeline will be constructed on our right-of-way alongside the road, so that the production can be marketed as soon as possible.

For further oil exploration, there are interesting prospects on the north flank of the Gajah and also at Siamang some distance to the south. However for the next few operation prospects, management feels that the best results will come in the Batu Raja and Talang Akar in the northeast part of the Lematang Block, within five to 10 miles of the Harimau success. The rig move in the wet season will thus be shorter, the seismic coverage is extensive, and our prospects are close to known oil production at Limau and Beringin.

Management is more confident now than ever of continuing successful exploration at Lematang. Our seismic work and regional geology are leading us to better defined prospects for future drilling. By year end, we expect production income from Harimau and also at least two more exploration successes.

The company is in a good cash position at this time. For the enhanced recovery effort at Tanjung where the company has a 50 percent interest in five oil fields under a 15-year contract with Pertamina, the waterflood team is being organized for a detailed plan of development by May 1990. These five oil fields have produced over 100 million barrels of primary oil.

#90012p0301 01/12/1990 ~PR Newswire

NEW YORK (JAN. 12) PR NEWSWIRE - The Fur Vault, Inc. (AMEX: FRV) today reported its results for the second quarter and six months ended Dec. 2, 1989. Revenues increased 7.4 percent for the quarter from $35,743,000 to $38,394,000 and 12.1 percent for the six months from $49,319,000 to $55,293,000. A net loss of $2,278,000, or $.18 per share was experienced in the second quarter compared to net income of $27,000 the previous year. For the six months, the net loss increased from $2,573,000 or $.21 per share to $4,684,000, or $.37 per share.

Comparable retail store sales decreased 15.2 percent for the quarter and 18.2 percent for the six months compared to 1988.

The increased revenue was solely attributable to the continued excellent growth of the Andrew Marc division offset by a reduction in the retail fur division sales which reflected a significant decrease in average unit prices due to intensive price cutting, as well as a shift in sales to lower priced furs such as shearlings, more than offsetting an increase in unit sales. No tax benefit for the loss incurred was recorded in the second quarter as the company had already fully utilized its available tax carryback.

CAMBRIDGE, MA (JAN. 12) PR NEWSWIRE - Jim Vincent, Biogen (NASDAQ: BGEN) chairman and chief executive officer, announced today the appointment of Irving H. Fox, M.D., C.M., to the newly created position of vice president medical affairs. Fox will be responsible for Biogen's worldwide clinical development programs.

Fox joins Biogen following a distinguished 14-year career at the University of Michigan. He held professorships in internal medicine and biological chemistry, and was program director of the Clinical Research Center at the University of Michigan Hospital since 1978.

According to Jim Vincent, "We are very pleased to have Irving Fox head our clinical development group during this exciting period for Biogen. Dr. Fox has a broad-based scientific background in clinical medicine, as well as consulting experience with a number of leading firms in the

pharmaceutical industry. His leadership and expertise in clinical medicine will support and complement our research and development capabilities as Biogen's pharmaceutical development programs expand to encompass broader clinical disciplines."

Fox is a graduate of the McGill University School of Medicine, Montreal, Quebec, Canada. He interned at the Royal Victoria Hospital then completed his fellowship training in the division of rheumatic and genetic disease at Duke University Medical Center. Fox serves on the editorial boards of the Journal of Rheumatology, Metabolism and the Journal of Laboratory and Clinical Medicine.

Biogen is a leading biotechnology company principally engaged in developing genetically engineered pharmaceuticals. As a result of its early research, Biogen now derives revenues from five products being sold by its licensees in various countries. Biogen currently directs its research and development into areas where the company has particular strength -- AIDS, inflammation and selected cancers.

SANTA FE, N.M. (JAN. 12) PR NEWSWIRE - Chevron Resources Company, the mining and geothermal subsidiary of Chevron Corporation, today announced that its Mount Taylor uranium mine near Grants, N.M., will be placed on standby. Although mining and production operations will end, ventilation and pump systems and hoisting facilities will be maintained. The company is continuing to discuss the possible sale of the mine with potential buyers.

The approximately 100 employees affected will be placed with other Chevron operations where possible or provided with a severance package.

The underground mine was producing at an average monthly rate of 125,000 pounds of uranium yellowcake, which is used as reactor fuel in nuclear power plants. Deteriorating uranium market conditions contributed to Chevron's announcement last August that the mine would be shut down unless Chevron could find a partner or sell the mine.

Ceasing production at the Mount Taylor mine is the latest action in a series of moves Chevron has made to strengthen its financial performance and streamline its operations worldwide. The company recently announced the decentralization of its Foreign Operations Staff to enhance international business opportunities.

#90012p0313 01/12/1990 ~PR Newswire

BRYN MAWR, PA. (JAN. 12) PR NEWSWIRE - Despite an 8 percent decline in fourth quarter earnings, Bryn Mawr Bank Corp. (NASDAQ: BMTC) recorded its sixth consecutive year of record earnings providing shareholders with a return of equity of 17.4 percent and a return on assets of 1.5 percent in 1989, it was announced today.

Net income was $4,077,000 for the year ended Dec. 31, 1989, a 12 percent increase over 1988 net income of $3,634,000. Primary earnings per share were $3.76 for 1989, compared to $3.35 for 1988, based on 1,084,110 average shares outstanding during each period.

Changes in two important areas affected earnings for the year and for the quarter. The Trust Department enjoyed a 19 percent increase in fees for trust services during 1989, a $285,000 gain net of tax. Contrasting to this positive influence on net income was the effect of an increase in delinquency in residential construction loans which was the major reason for the decrease in fourth quarter earnings. Non- performing loans, those loans on which scheduled interest and/or principal payments have not been made for 90 days or more, have increased from $3,612,000 at Dec. 31, 1988, to $6,713,000 at Dec. 31, 1989. The bank does not accrue interest on non-performing loans and this caused net income to be reduced by an additional $105,000 net of tax, in the fourth quarter of 1989 as compared to the same quarter in 1988.

Net income for the fourth quarter of 1989 was $916,000, or 85 cents per share, vs. fourth quarter 1988 earnings of $993,000, or 91 cents per share.

According to Robert L. Stevens, president of Bryn Mawr Bank Corp., "During the last half of 1989, the sales activity in the local residential real estate market has slowed, and this has directly affected the bank's non-performing real estate loans. Loans secured by residential real estate -- ground and houses under construction -- account entirely for the increase in non-performing loans. We are carefully monitoring these loans, and believe that our increased loan loss reserve is adequate to meet potential losses."

Total assets grew 5 percent from $281,222,000 at Dec. 31, 1988, to $296,413,000 for 1989. Loans grew 2 percent from $205,223,000 to $209,563,000. This growth reflects increased demand for loans offset by the effect of loan sales of $32,814,000 as well as $29,499,000 in loan commitments sold in the secondary market during the 12-month period.

A 76 percent increase in outstanding consumer loans from $28,865,000 at

Dec. 31, 1988, to $50,712,000 at Dec. 31, 1989, was primarily the result of the company's effort to expand its automobile loan portfolio with indirect auto financing through new car dealers. The investment portfolio decreased to $15,427,000 for 1989 from $17,929,000 at year-end 1988, reflecting the use of maturing investments to fund additional loan growth. A rise in deposits experienced at year-end 1989 was responsible for an increase in federal funds sold to $29,419,000 from $16,785,000 for 1988.

Total deposits rose 5 percent from $254,754,000 at Dec. 31, 1988, at $266,623,000 in 1989. Demand deposits grew 7 percent to $75,058,000 from $70,319,000. Savings and time deposits rose 4 percent to $191,565,000 in 1989 from $184,435,000 in 1988.

Total interest income for the year grew 13 percent from $24,845,000 in 1988 to $28,096,000 in 1989. Interest and fees on loans rose 18 percent from $21,576,000 in 1988 to $25,514,000 in 1989. Interest on federal funds sold decreased 18 percent from $1,188,000 in 1988 to $969,000 in 1989 and interest on investments decreased 23 percent from $2,065,000 in 1988 to $1,597,000 in 1989. Interest expense on deposits grew 14 percent from $9,617,000 to $10,997,000. Net interest income increased 12 percent from $15,228,000 to $17,099,000.

The provision for loan loss was increased by 43 percent over 1988, from $600,000 to $860,000. This increase reflects the effect of the continued maintenance of an adequate reserve for loan loss after considering the increase in non-performing loans and an expanded loan portfolio, as well as the effect of a write-down of a loan to the currently appraised value of the property involved. The reserve for loan loss stood at $2,835,000 as of Dec. 31, 1989, compared to $2,193,000 at same date in 1988.

Other income rose 19 percent from $4,050,000 in 1988 to $4,823,000 in 1989. Primarily responsible for this growth was a 19 percent increase in fees for trust services to $2,727,000 as compared to $2,295,000 in 1988. Other operating income also grew 19 percent from $1,755,000 to $2,096,000.

Other expenses grew 12 percent from $13,832,000 in 1988 to $15,502,000 in 1989. Salary and benefits increased 8 percent from $7,606,000 to $8,230,000. Occupancy expenses are up 29 percent for 1989 to $2,202,000 from $1,706,000 in 1988, a result of the cost increases associated with the acquisition of two new properties in 1988. One property is now the new home of the bank's Trust Department; the other, the future site of an expanded drive-up facility at the main office in Bryn Mawr. Other operating expenses are up 12 percent over 1988 levels.

NEW YORK (JAN. 12) PR NEWSWIRE - NYNEX Information Services Group today announced the acquisition of LeRoux, Pitts and Associates, Inc. (LPA), a company specializing in point-of-sale application software systems for banking, retail and government customers. The announcement was made at the National Retail Merchants Association annual meeting in New York.

"It's exciting to have a company of such high caliber and expertise join our team," said A.T. Engkvist, president, NYNEX Information Solutions Group. "LPA's electronic software capabilities are a key fit to NYNEX's long-term EFT marketing strategies and goals."

LPA provides comprehensive point-of-sale software solutions with customized Tandem-based application software, authorizer interface support systems, system and network management, terminal application software and merchant billing systems.

Florida-based LPA is already working with a team of experts on three major systems integration projects awarded to NYNEX last year. NYNEX won a $33.5 million contract with Port Authority of New York and New Jersey for a parking revenue control system at the three metropolitan airports, and is installing a similar system at the Dallas-Fort Worth International Airport.

NYNEX was most recently awarded a $1.2 million contract with New Jersey Transit Corporation to design, install and maintain an electronic revenue transaction authorization and accounting system for automated fare collection and distribution. The application software will be used on LPA's off-the-shelf Total Payment Software System (TM) package.

LPA's Total Payment Software System has 15 unique software modules. They include Credit Card Authorization, which supports the authorization of credit transactions at the point-of-sale; the Retail Electronic Payment System, a seven-module software system for supermarkets and other retailers; and the Money Order System, which provides electronic monitoring of money order transactions.

"LPA is committed to offering its customers the most advanced electronic point-of-sale software technology available today, tomorrow and for as long as our customers are in business," said Wayne LeRoux, president, LPA. "Becoming part of NYNEX will undoubtedly help us to achieve this goal, and, importantly, allow us both to offer quality, innovative EFT solutions to the marketplace."

The company has 40 employees and a customer base including four of the top 10 EFT transaction banks in the nation.

NYNEX Information Solutions Group, Inc., a subsidiary of NYNEX Corporation (NYSE: NYN), is a leading provider of EFT systems, application software, professional services, and systems network integration. Based in White Plains, N.Y., the company has 6,000 employees in 13 countries and more than 30 U.S. cities.

SOUTHFIELD, MI. (JAN. 12) PR NEWSWIRE - H.W. Kaufman Financial Group, Inc. (NASDAQ: HWKF) today announced a 21.4-percent increase in its annual dividend to 17 cents a share from 14 cents last year. The dividend will be payable Feb. 6, 1990, to shareholders of record as of Jan. 22, 1990. The company presently has 1.8 million shares outstanding.

Commenting on the increase, Herbert W. Kaufman, president and chief executive officer, said, "Preliminary indications show that 1989 will be a record year for H.W. Kaufman. The board of directors' dividend action reflects the excellent progress the company has made throughout the course of the year."

H.W. Kaufman Financial Group's primary subsidiary is Burns & Wilcox, Ltd., a national insurance underwriting manager and broker with 22 branch offices doing business in more than 40 states. Other subsidiaries are engaged in insurance premium financing and personal property and casualty insurance brokerage. The company is listed on NASDAQ under the symbol HWKF.

SACRAMENTO, CA (JAN. 12) PR NEWSWIRE - The Air Resources Board (ARB) today announced that it had reached an out-of-court settlement for $95,000 with Isuzu Motors Limited. The settlement was reached after a complaint by the ARB stated that Isuzu had provided 1985 California tune-up stickers for 20 new 1986 Isuzu Impulses that were not originally intended for sale in California.

While not admitting guilt, Isuzu acknolwedged that it had provided under the hood stickers, used only for new vehicles especially designed for sale in California. ARB investigators found those stickers placed over similar stickers used to identify new cars built for sale in other states

before any of the vehicles were sold.

In addition, Isuzu confirmed that the cars had not undergone California's unique assembly-line testing procedures, necessary for cars certified for sale in the state. However, Isuzu contends that the cars all met California's stringent anti-smog standards for motor vehicles.

As part of the out-of-court settlement, Isuzu agreed to revise its tune-up label control procedures to prevent future problems.

Jim Boyd, ARB executive officer noted, "This is a situation that shows how important it is for a manufacturer to maintain strict quality control in complying with anti-smog standards."

The 20 Impulses were originally sold to an Osaka, Japan distributor which later transferred them to Guam. The cars were later discovered at Sierra Motors, in Glendora, Calif.

An Island Imports representative placed the 1985 California tune-up labels over existing 1986 out-of-state tune-up labels after the cars were delivered to Sierra Motors' lot.

ARB investigators found the out-of-state stickers after being notified by the California Department of Motor Vehicles of possible irregularities in Sierra Motors' title applications which were revealed during a routine review.

NEW YORK (JAN. 12) PR NEWSWIRE - BFS Bankorp, Inc., the parent holding company for Bankers Federal Savings, FSB, New York City, today stated that it has from time to time received offers to acquire control of, or a controlling interest in, the company. Although the company has a general policy of not commenting on rumors or questions concerning mergers, acquisitions and other possible material corporate transactions, in light of recent disclosures contained in certain public documents filed by a shareholder group, the company wishes to make the following statement.

In late November, a current shareholder, First Capital Group, Inc., expressed interest in acquiring the company. In light of the company's consistently strong financial performance and the opportunities developing within the financial institution industry, the board concluded and notified the investor that the continued independent operation of the company would best serve the interest of stockholders and also the

communities and customers served by the bank.

In December, however, the same investor expressed continued interest in acquiring the company and indicated that in the absence of such an agreement, that it would run a slate of directors against those nominated by the company. Accordingly, the directors of the company have agreed to meet with this investor in the hope of avoiding pointless and unnecessary expense for both the investor and the company.

NEW YORK, (JAN. 12) PR NEWSWIRE - Lexington Precision Corporation (NASDAQ-NMS: LEXP) reported a net loss of $360,000, or 10 cents per common share, for the second quarter ended Nov. 30, 1989, as compared to net earnings of $641,000, or 16 cents per common share, for the quarter ended Nov. 30, 1988. Net sales for the quarter were $19,184,000, as compared to $12,791,000 in the previous year.

The net loss for the quarter ended Nov. 30, 1989 included net gains from sales of marketable securities of $323,000. Net income for the quarter ended Nov. 30, 1988 included net losses from the sales of marketable securities of $233,000. During the quarter ended Nov. 30, 1989, the company recorded a direct charge to stockholders' equity of $724,000 to reduce the carrying value of common stock held for long-term investment purposes to the lower of cost or market value.

The company reported a net loss of $965,000, or 25 cents per common share, for the six months ended Nov. 30, 1989, as compared to net earnings of $2,979,000, or 74 cents per common share, for the six months ended Nov. 30 1988. Net sales for the six months were $36,944,000, as compared to $25,549,000 in the previous year.

Results of operations for the six months ended Nov. 30, 1989 and 1988 included net gains from sales of marketable securities of $382,000 and $3,991,000, respectively. The gains from the sales of securities recorded during the six months ended Nov. 30, 1988, resulted primarily from the sale of the company's holdings of 301,100 shares of the common stock of Essex Chemical Corporation. During the six months ended Nov. 30, 1989, the company recorded a direct charge to stockholders' equity of $1,241,000 to reduce the carrying value of common stock held for long-term investment purposes to the lower of cost or market value.

The financial statements include the results of the business of Elastomeric Products, Inc. since Dec. 2, 1988, the date the company acquired EPI and the results of Wise Die Casting, Inc. since June 29, 1989

the date the company acquired certain assets of Wise Die Casting Corporation.

#90012p0358 01/12/1990 ~PR Newswire

BUTTE, MT (JAN. 12) PR NEWSWIRE - Montana Power Co. (NYSE: MTP) has filed with the Montana Public Service Commission (PSC) a proposal to adopt open transportation on its gas system and to unbundle its natural gas utility services and rates. Hearings are tentatively scheduled to begin in late July on the proposal which also would result in internal restructuring of MPC's natural gas utility.

MPC proposes to continue offering its traditional full utility service, including a firm supply of natural gas and firm transmission, to its core customers: 96,000 residential and 13,300 commercial and governmental customers. However, service to non-core customers -- other utilities and major industrials -- would be converted to transportation service. Non-core customers would be able to shop for and secure their own gas supply, which MPC would transport through its pipelines for a PSC-regulated fee.

MPC's core gas customers account for about 65 percent of its annual sales of 26 billion cubic feet of natural gas. Releasing non-core customers to arrange for their own gas supplies would reduce the utility's obligation to maintain a large base of reserves. MPC has proposed removing a portion of its reserves from rate base to balance its supply with remaining core customer needs.

The MPC proposal will require a reallocation of the company's cost-of-service which may shift costs by up to 19 percent to remaining core customers, but company officials predict the impact could be much higher to make up for the loss of major utility and industrial gas customers to bypass and alternative fuels if MPC's gas utility business is not restructured.

MPC says its plan will allow the utility to remain competitive by offering a greater number of regulated services, while reducing the risk of losing larger customers that otherwise would switch to other fuels or build their own pipelines.

MPC's natural gas restructuring plan, which will bring its gas utility business into step with industry trends, follows two years of discussions with gas producers, major customers and other interested parties. The company hopes for a PSC decision by year-end.

SAN FRANCISCO, (JAN. 12) PR NEWSWIRE - Chevron Corp. (NYSE: CHV) today issued the following statement in response to the court ruling that upholds Chevron's right to proceed with the key portion of its lawsuit against Pennzoil Co.

We are pleased that the court sustained Chevron's claim that Pennzoil's SEC filings contain misrepresentations about its intentions regarding the purchase of Chevron stock and that those misrepresentations violate the securities laws.

Chevron's attorneys are reviewing documents recently obtained from Pennzoil as part of the court-approved discovery in its lawsuit. In the ruling today, the court expressly recognized that Chevron must be given the opportunity to conduct the expedited discovery ordered earlier.

The portion of the lawsuit dismissed by the court will have no significant effect upon Chevron's continued prosecution of its complaint and its ongoing discovery.

On Dec. 7, Chevron filed suit accusing Pennzoil of violating federal laws. Chevron contends that Pennzoil has made false and misleading statements about its intentions in buying 8.8 percent of Chevron stock.

Chevron's suit alleges that Pennzoil is not a passive investor and that Pennzoil intends to force an extraordinary restructuring of the company to the disadvantage of Chevron and its stockholders.

KEARNEY, NJ (JAN. 12) PR NEWSWIRE - Goody Products, Inc. (NASDAQ: GOOD) announced today that its subsidiary, Opti-Ray, Inc., expects to sign an agreement on Tuesday, Jan. 16, 1990 providing for a $10 million secured loan with a group of lenders headed by the First National Bank of Boston. The loan will provide for Opti-Ray's seasonal financing needs as well as a significant portion of Goody's presently anticipated seasonal financing requirements. Goody will be negotiating with the same group of banks to obtain additional credit to meet the balance of its short-term financing needs.

Goody also reported that it expects to receive waivers or amendments on Tuesdays from its lenders to cure its noncompliance as of Dec. 31, 1989, with certain covenants of its present loan agreements.

The owner of a portion of the company's Columbus, Ga. Development Authority Revenue Bonds, that was previously unwilling to waive certain noncompliance with covenants as of Sept. 30, 1989, has sold its holdings to the other holder of the bonds, which is also expected to provide the necessary waivers.

Leonard Goodman, chairman and chief executive officer, said the company believes it has made meaningful progress in instituting major cost reductions, manufacturing overhead reductions, improved purchasing controls and automation of certain labor-intensive production activities.

Goody Products, Inc. is engaged in the design, manufacture and marketing of a wide variety of hair accessories and owns and operates four additional consumer products subsidiaries and divisions: Duray, a producer of cosmetic and travel accessories; Opti-Ray, a designer and marketer of high quality fashion sunglasses; Ace Comb, a manufacturer of premium quality combs, and Pretty Neat Products, a producer of plastic cosmetic organizers.

#90012u0200 01/12/1990 ~United Press International
(JAN. 12) UPI - The orbiting Columbia astronauts fired the shuttle's rockets three times Thursday in preparation for the planned rescue of a science satellite. The rescue of the Long Duration Exposure Facility is one of the main missions of Columbia's current flight, and is to take place Friday morning. If all goes according to plan, the shuttle will rendezvous with the satellite at an altitude of 196 miles, just west of Hawaii. The science satellite is currently on a collision course with Earth.

A Bush administration official on Thursday confirmed a report that federal anti-drug chief William Bennett is recommending the death penalty for drug kingpins... even if they're NOT involved in a murder. The recommendation is included in Bennett's new drug-fighting package that's to be presented to President Bush Friday. The official says the strategy will target Los Angeles, New York, Houston and Miami as ''high-intensity drug trafficking areas.''

A statement from leftist rebels in Colombia says the group will turn U-S interests in Colombia into ''military targets.'' In the statement sent to U-P-I's office in Mexico City, the group said it had ordered its forces to assume ''a complete combat disposition'' toward U-S interests. The reason for the threat was NOT specified, but it comes after weekend news reports saying two U-S warships were heading toward Colombia to monitor drug smuggling.

Official Radio Havana says Cuba has ordered a Czechoslovak journalist to leave the country aboard the ''first available flight.'' The order comes after Cuba accused the journalist of broadcasting ''distorted and provocative'' reports. Radio Prague International confirmed the expulsion of its Havana correspondent, and said the correspondent had reported that radical political change is imminent in Cuba. The incident is a sign of increasing political distance between Cuba and its longtime ally, Czechoslovakia.

#90012u0207 01/12/1990 ~United Press International
(JAN. 12) UPI - Officials in El Salvador say a moderate earthquake shook San Salvador Thursday night, but there were NO immediate reports of damage or casualties. The quake measured four-point-five on the Richter scale, and was centered about 144 miles south of the capital. A quake measuring seven-point-five on the Richter scale hit San Salvador on October 10th, 1986. That temblor left about 150 people dead and 10-thousand homeless.

A study released Thursday says at least one in four drivers under age 45 who are killed in traffic accidents in New York City had recently used cocaine. Cornell University medical researchers said that they found about 25 percent of drivers between age 16 and 45 had used cocaine within 48 hours of their fatal crashes.

#90012u0316 01/12/1990 ~United Press International

CHICAGO (JAN. 12) UPI - An overheated stove caused a fire that ripped through a basement apartment on the city's South Side Thursday night, killing all five occupants, including three children, officials said.

There were no smoke detectors in the one-story brick bungalow, an oversight that could have saved lives, said Fire Commissioner Raymond E. Orozco.

''There were no smoke detectors. It's a tragedy ... not a good way to start the year off,'' he said.

The victims, believed to be all from one family, included an unmarried couple, their two sons and a daughter, said city Department of Human Services spokeswoman Jacqueline Dawson.

Hospital officials identified the victims as Jo Ann Reed, 20, Eric Bradley 21, Eric Bradley, Jr., 2 months, Dominic Reed, 2, and Justin Bradley, 1.

It was determined the fire originated in a basement kitchen, when metal failed in an overheated stove and opened a regulator valve, causing flames to shoot out, said Fire Marshal Mike Cosgrove, of the Office of Fire Investigations.

Orozco said when firefighters arrived on the scene the fire was fully developed.

''On a preliminary search we pulled three people out of the basement,'' he said. ''Two other victims were found in the basement later.''

Also displaced by the fire, but uninjured, were six members of another family who lived on the first floor of the house. The family is now staying with relatives, Dawson said.

-30- 1613

#90012u0369 01/12/1990 ~United Press International

(JAN. 12) UPI - The Portland Trail Blazers won their sixth straight game Thursday night despite hitting just nine shots from the floor in the second half.

Terry Porter hit two free throws with 14 seconds remaining, lifting the Trail Blazers to an 82-80 victory over the Minnesota Timberwolves in a game marred by poor field-goal shooting on both sides.

The Blazers, 24-10, shot just 34 percent from the floor on the night, including a 9-for-40 performance after halftime. The Timberwolves were no better, shooting an erratic 31 percent.

''I guess that's what makes a good team,'' Porter said. ''Some teams are good enough to win even when they're not playing well, and we definitely were that tonight. Minnesota did a good job on defense. They didn't let us get our fast break going, and that's not when we're at our best.''

The Timberwolves tied the score 80-80 on Tony Campbell's three-point play with 2:16 remaining. But neither team scored the rest of the way until Porter drove the lane, was fouled, and hit the free throws.

Minnesota failed on its final possession when Scott Roth's 18-foot shot misfired at the buzzer.

''We did everything we wanted to do but make our shots,'' Minnesota's Tod Murphy said. ''It's not often you hold a team as good as Portland to 34 percent shooting.''

Campbell's 26 points and Portland's Clyde Drexler, with 18, were the lone players to score more than 12 points.

Minnesota, which lost its 15th game in its last 17 tries to drop to 7-27, outrebounded the taller Trail Blazers 56-53. Jerome Kersey had 15 rebounds for Portland while Randy Breuer, acquired last week in a trade with

Milwaukee, had 11 rebounds in his home-court debut with Minnesota.

The Trail Blazers won largely without the guidance of Coach Rick Adelman. Assistant John Wetzel directed the team after Adelman was ejected near the end of the first period while protesting a foul call.

Bullets 100, Heat 89

At Miami, Jeff Malone tossed in his 10,000th career point in the first half and then dropped in 22 of his 39 points in the third quarter to lead the Bullets. The Heat lost their 12th straight game, the second longest losing streak in the team's two-year history.

Nets 109, Hornets 101

At East Rutherford, N.J., Purvis Short scored 29 points to lead the Nets to their first three-game winning streak in three years. Short, making his second start of the year, hit on 13 of 24 shots as New Jersey handed the Hornets their third straight loss.

Nuggets 141, Magic 105

At Denver, Fat Lever scored a season-high 27 points and grabbed 14 rebounds as the Nuggets handed Orlando its 13th consecutive road loss. Denver, which had suffered a 31-point loss at Utah Wednesday, broke its three-game losing streak.

Sonics 98, Mavericks 87

At Seattle, Dale Ellis scored 29 points, including 11 during a decisive 26-7 run in the fourth quarter, to lead the SuperSonics. Ellis hit 7 of 10 shots from the floor in the second half to help snap Seattle out of a slump in which they had lost four of their last six games.

Rockets 90, Kings 87

At Sacramento, Calif., Akeem Olajuwon scored 10 of his 27 points in the fourth quarter as the Rockets ended a 10-game road losing streak. Houston rallied from a 16-point defict late in the third quarter for the victory.

BEIJING (JAN. 12) UPI - Authorities in southern China executed 31 common criminals after sentencing dozens of offenders at a public rally attended by 30,000 spectators at a sports stadium, an official newspaper received in Beijing Friday reported.

The Thursday edition of the Yangcheng Evening News, a state-run daily in the southern city of Guangzhou (Canton), said the 31 executed were ''offenders who severely endangered public order.''

Those executed had been convicted of crimes ranging from theft and rape to murder and drug smuggling, the newspaper said. There was no indication any of those sentenced had been convicted of political crimes.

The sentences were pronounced by court officials at a public rally in the city's Yue Xiushan sports stadium attended by 30,000 Guangzhou residents, the newspaper said.

Executions in such cases are generally carried out immediately at an execution site with a bullet to the back of the head.

Among the 31 executed were several with repeated offenses for burglary, robbery and assault. Seventeen were from other provinces, the newspaper said.

Officials of the Guangzhou Intermediate Court and five district courts present also pronounced sentences on 35 other offenders at the same rally. Those were not detailed.

#90012u0382 01/12/1990 ~United Press International

(JAN. 12) UPI - Defense Secretary Cheney says fiscal realities and ''changes in the nature of the threat around the world'' mean U-S defense budgets are going to be leaner in the years ahead. The comment came Thursday as Cheney announced new Pentagon management reform plans aimed at cutting 42-thousand people from the military and civilian payroll. The defense chief also says he'll recommend ''extensive'' military base closures in the fiscal 1991 budget that's to be presented to Congress January 29th.

A heroin bust at California's Long Beach Harbor netted 140 pounds of high-grade Southeast Asian heroin smuggled in a shipment of lychee nuts. Federal officials say the street value of the heroin is 100-Million dollars, and they say it's the seventh biggest such bust in U-S history. Three men were arrested in the operation last month, and federal officials say they expect additional arrests as they sift through evidence on the heroin smuggling ring.

Authorities say a record 570 people were killed in gang-related violence in Los Angeles County last year, and the number could go even higher. Police say five other deaths are still being analyzed, and could eventually be counted as gang killings. The 570 figure is far higher than the previous record 452 gang-related deaths that occurred in 1988. In 1987

the total was 387 dead.

The weather took its toll Thursday in various parts of the country. Rain slacked off in the Pacific Northwest following a once-in-a-century flood, but rivers kept rising as thousands were washed out of their homes. Strong winds gusting to 59 miles an hour blasted parts of the Midwest. And in Texas, at least 33 people were hurt and more than 100 vehicles damaged in a series of chain-reaction collisions in heavy fog on a bridge spanning Galveston Bay.

(JAN. 12) UPI - Ireland's foreign minister is to meet with Secretary of State Baker Friday to discuss developments in Eastern Europe. Foreign Minister Gerard Collins is also the new president of the European Council of Foreign Ministers. The meeting is part of a co-ordination of Western European and American policies on dealing with the emerging democratic systems of Eastern Europe.

Officials in Chicago say a fire ripped through a basement apartment on the city's South Side Thursday night, killing all five occupants. Fire and hospital officials say two infants were among the victims. There were NO smoke detectors in the one-story brick building. Fire officials say all the victims appeared to be from one family.

#90012u0410 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - President Bush, taking his agenda of ''unfinished business'' to Cincinnati, is continuing his campaign to prod Congress into quick action on his languishing legislative priorities.

Bush, who sounded a similar message in Orlando, Fla., on Monday, first was scheduled to extoll the benefits of education in visits with students participating in the Cincinnati Youth Collaborative and an assembly at Taft High School.

Then, in a speech to the city's Chamber of Commerce that aides said will preview in part his State of the Union address to be delivered in two weeks, the president planned to continue his drive to push Congress on his agenda - including legislative packages pending on Capitol Hill on crime, clean air, education and a move to cut the capital gains tax.

Mixed in with the message that ''it is time for Congress to act,'' Bush also planned to sound the familiar themes of fiscal responsibility, the continued need for economic growth and the reduction of the nation's budget deficit.

''A lot of familiar themes that you're going to hear toward the end of the month,'' White House spokesman Marlin Fitzwater said Thursday in previewing the trip.

On Monday, the message got a little tougher when Bush veered from his

prepared remarks to criticize congressional opponents of his proposed capital gains cut as ''demagogues who call this a tax cut for the rich.''

Aides said Bush considers the domestic proposals the White House was unable to get through the Democratic-led Congress in the last session as ''unfinished business,'' which still are priorities and considered by the president as ''promises unkept.''

The push by Bush, who prides himself on conciliation, signals a more aggressive posture towards Congress and is meant to press his message on lawmakers before they return to work Jan. 23.

Bush sends his fiscal 1991 budget to Congress Jan. 29 and will address a joint session Jan. 31.

Lingering on Capitol Hill from last session is Bush's anti-crime package, which he introduced May 15, proposed amendments to the Clean Air Act announced June 12, as well as education proposals that have languished since last April 5.

Bush fought a close but losing battle with Congress for much of 1989 to enact the capital gains tax cut and is expected to modify his proposal this year to extend the tax break to timber and real estate and set the maximum capital gains rate slightly above 15 percent.

#90012u0417 01/12/1990 ~United Press International
(JAN. 12) UPI - Philadelphia took a hat trick right in the mouth Thursday night for refusing to protect Al Secord in the NHL waiver draft last year.

The Flyers refused to promise Secord they would protect him in the NHL waiver draft, so he signed with the Chicago Blackhawks as a free agent before the season.

He might have made Philadelphia regret that decision when he scored three goals, two in the third period, to give Chicago a 5-4 victory over the Flyers, who lost their third straight home game.

''Every game is a big game for me,'' said Secord, who played in 34 games with the Flyers last season after he was acquired in a trade from Toronto. ''I sat out quite a bit early in the season. Lately, I've gotten an opportunity to play more and get (Coach) Mike Keenan's confidence. It's nice to know I have his confidence.''

The feeling is mutual.

''He was hungry for the win,'' Keenan said. ''He was shooting the puck

hard and shooting it well. He's found the mark and he's regained some of the confidence he once had.''

Secord broke a 3-3 tie at 6:07 of the third period with his 10th goal of the season, with a little help from Philadelphia goaltender Ken Wregget.

Secord launched a slap shot from just outside the blue line. Wregget gloved the puck but could not hold it, allowing it to fall to the ice behind him and trickle into the net.

''It was just one of those things,'' Wregget said. ''I went up to glove it and it tipped off of my glove. He got a heck of a shot off.''

The Blackhawks, who held a 2-1 lead entering the third period, improved their record to 19-0-2 when they lead after two periods.

''That's the kind of stat we had with the Flyers,'' said Keenan, who coached in Philadelphia for four seasons. ''It takes intensive effort, concentration and a lot of confidence. And a team has to be fit to play hard to be successful in the latter stages of any game.''

Philadelphia, meanwhile, dropped to 0-13-1 when it trailed going into the third period and lost for the sixth time in its last eight home games.

Bruins 3, Nordiques 1

At Boston, Cam Neely scored his 31st goal of the season and goalie Andy Moog kicked out 19 shots to lead the Bruins to their fifth straight victory. Randy Burridge scored a power-play goal in the first period and Ken Linseman added an empty-net goal with 19 seconds remaining. Tony McKegney spoiled Moog's bid for a shutout with 8:23 to play. Moog is 15-1-4 in his career against Quebec.

Islanders 8, North Stars 4

At Bloomington, Minn., Pat LaFontaine had a goal and had five assists to lead New York. LaFontaine leads the NHL with 39 goals and has at least one goal in 11 straight games. The win was the Islanders' fifth straight and 10th in 11 games and moved them into a tie with Philadelphia for second place in the Patrick Division.

Flames 5, Sabres 3

At Calgary, Alberta, rookie Paul Ranheim scored his 11th goal of the season at 9:14 of the final period to cap a four-goal Flames rally that gave Buffalo its sixth loss in a row. The Flames, who entered the final period trailing 3-1, took a 4-3 lead on a 25-foot slapshot by Ranheim.

Kings 3, Oilers 3, tie

At Inglewood, Calif., Luc Robitaille netted his 32nd goal of the season and assisted on Wayne Gretzky's tying score for the only goals of the third period, enabling Los Angeles to salvage a tie. Gretzky's 24th goal of the year came with 5:04 left in regulation after a Robitaille pass from behind the net.

(JAN.15) UPI - TV HIGHLIGHTS:

MONDAY, JAN. 15

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 and 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''MacGyver'' - MacGyver teaches a problem student the value of an education when the youth's illiterate construction-worker father is threatened by a corrupt foreman.
CBS, ''Major Dad.''
NBC, ''ALF.''
PBS, ''The Miracle Planet: 'The Third Planet''' - Shot on all seven continents, this six-part series explores the dynamic systems that make up planet Earth. The first program examines Earth's beginnings and looks at the series of events that resulted in qualities conducive to the emergence of life.

8:30 p.m.
CBS, ''The Famous Teddy Z'' - Al Floss, fearing that he's about to get his ''final salute'' when he hears he's been nominated for the ''Agent of the Year'' award, tries to convince the judges to vote for someone else.
NBC, ''The Hogan Family.''

9 p.m.
ABC, ''The ABC Monday Night Movie: 'Unspeakable Acts''' - A major child-abuse case that was won in part through the testimony of the victims is re-created in this powerful dramatization. Stars Jill

Clayburgh and Brad Davis.
CBS, ''Murphy Brown'' - The loving competition escalates between Miles and his more attractive, considerably taller, better-dressed older brother, Josh.
NBC, ''NBC Monday Night at the Movies.''
PBS, ''Eyes on the Prize II: 'The time has come''' - The series' second season documents the journey of black Americans seeking justice, power and identity from the mid-1960s to the mid-1980s and shows the impact this movement has had on all Americans.

9:30 p.m.
CBS, ''Designing Women.''

10:00 p.m.
CBS, ''Newhart'' - Joanna attains the ranks of a screen goddess - at least in the eyes of one man.
PBS, ''Martin'' - An original ballet/documentary film composed by Gordon Parks as his personal tribute to Martin Luther King, Jr. The piece evokes the spirit of the great leader by recalling significant moments in his life.

10:30 p.m.
CBS, ''Doctor, Doctor'' - Abe suspects Gail of having an affair and finds out the truth is far worse.

11:30 p.m.
CBS, ''The Pat Sajak Show.''
NBC, ''The Best of Carson.''

12:30 a.m.
ABC, ''ABC News Nightline.''
CBS, ''Night Heat'' - A detective from Colombia with a different method of operation and motive helps the precinct in busting a cocaine ring.
NBC, ''Late Night With David Letterman.''

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later With Bob Costas.''
PBS, ''Today's Japan.''

CORTLAND, NY (JAN. 12) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

BOSTON (JAN. 12) UPI - Bush administration officials told Nicaraguan Contra rebel leaders that most of their U.S. aid will likely end after next month's elections in the Central American nation, a published report said Friday.

Contra leader Enrique Bermudez said assistant secretaries of state Bernard Aronson and Richard Solomon told him earlier this week that, barring a surprise action by Nicaragua's Sandinista government, most aid would be cut off after the Feb. 25 elections, the Boston Globe reported.

''They are not going to abandon us totally, but they will reduce the money and allow its use only for purposes of repatriation,'' Bermudez told the newspaper.

''Basically, they told me that no other option will happen... unless the Sandinistas do something like kill all the opposition leaders at once and then hang them in a public square in Managua,'' he said.

The Bush administration has said publicly it will decide about future aid after determining whether the elections were ''fair and free,'' the newspaper said.

Adolfo Calero, another senior Contra leader, said the rebels feel betrayed by the end of funding from Washington.

''No one ever thought the United States was going to fail again as it did in Cuba, but the fact is we've had a Bay of Pigs in slow motion,'' Calero told the Globe.

#90012u0461 01/12/1990 ~United Press International

BEIJING (JAN. 12) UPI - A senior Soviet official said Friday after talks in Beijing that ''everybody agrees'' on a major United Nations role in a peace settlement for Cambodia, but foreign diplomats said progress remains elusive due to nagging disputes on details.

Soviet Deputy Foreign Minister Igor Rogachev spoke to reporters at the Beijing airport before returning to Moscow after a four-day visit for talks on Cambodia with Chinese officials. He met with Chinese Foreign Minister Qian Qichen Friday morning.

The meetings came amid a flurry of diplomatic activity on an Australian proposal designed to break the current deadlock on a peace settlement in Cambodia, and as the intensity of the guerrilla war there has increased in recent days.

Officials of the five permanent members of the U.N. Security Council, the United States, Britain, China, the Soviet Union and France, will meet in Paris next week to discuss Cambodia.

The three-faction Cambodian resistance armies have claimed major gains this week on the battlefield against the Vietnam-backed government of

Premier Hun Sen. The Phnom Penh government was installed by Vietnam after it invaded Cambodia in 1978.

Under the Australian proposal, the U.N. would form an interim administration in Cambodia to oversee a cease-fire until elections are held for a new government. The warring Cambodian factions and involved foreign nations have tentatively welcomed the plan.

''I don't know who can deny the role of the United Nations,'' Rogachev said of his talks. ''Everybody agrees.''

But while he said the Soviet Union is now ''in general of the same opinion'' as China that the United Nations ''should play a very major role'' in a settlement, he conceded he had not discussed details. China is the key backer of the resistance led by Prince Norodom Sihanouk.

Foreign diplomats familiar with the talks said the Australian initiative had bogged down over demands by Hanoi and Phnom Penh, backed by Moscow, that Cambodia's U.N. seat be vacated before theted Nations takes over.

The resistance holds the seat as the recognized legitimate government. Sihanouk has said he would only agree to vacate the seat on the condition that the Hun Sen government in Phnom Penh is first dismantled.

''There is agreement on the U.N. being in charge in one form or another,'' said a senior Asian diplomat. ''Beyond that they diverge. There has been progress, but I expect movement will be slow.''

Diplomats said, however, the U.N. administration proposal may ease a pivotal dispute: the refusal by Moscow, Hanoi and Phnom Penh to acknowledge any role in a transition government by the communist Khmer Rouge, strongest of the three resistance factions.

The Asian diplomat said the Soviets had shown ''indirect flexibility'' by acknowledging a role under the U.N. administration of Sihanouk's exile government, of which the Khmer Rouge is a part.

Moscow has steadfastly opposed a Chinese-backed solution to form a transition government made up of the three resistance factions and the Hun Sen government. The Vietnamese invasion in 1978 ousted the Khmer Rouge after a three-year reign of terror in Cambodia.

Vietnam officially withdrew its troops from Cambodia last fall after a decade-long occupation. The resistance has charged, however, that many Vietnamese soldiers remain in the country.

BUCHAREST, Romania (JAN. 12) UPI - French Foreign Minister Roland Dumas promised increased economic and technical aid for Romania and said France would press for additional strong support from the European Community.

Dumas, the highest ranking Western official to visit Romania since the ouster of dictator Nicolae Ceausescu, also said Thursday he is more convinced than ever the hard-line communist was toppled by a popular uprising, not a coup.

French and British news media have reported that several Romanians in the provisional government contacted French officials as much as six months ago, seeking help in overthrowing Ceausescu.

''The uprising was indeed a profoundly popular one. All the people of Romania rose and overthrew the tyrant,'' Dumas told a news conference in Bucharest.

Ceausescu was ousted Dec. 22 following pro-democracy demonstrations and with his wife was executed Christmas Day after a secret trial by a military tribunal.

Dumas said it is not surprising that organized opposition to Ceausescu existed long before demonstrators took to the streets of Timisoara and Bucharest last month.

France, which has supplied more food and emergency aid to Romania since the overthrow than any other country, has committed itself to helping the nation rebuild economically after decades of isolation and mismanagement, Dumas said.

The French official said he had no specific amount of aid earmarked for Romania but that France is already discussing a number of partnerships and joint ventures and will do its best to help Romania rebuild.

One economic project in the works is a Romanian development bank, toward which France has made a large donation, he said.

Paris also will press the rest of the European Community, meeting next week, to approve additional aid for Romania, he said.

France and Romania enjoyed close cultural and economic ties before the communists took power in 1947 and French influence is still evident in Bucharest, once regarded as the Paris of Eastern Europe.

After touring the capital and speaking with Romania's new leaders, Dumas said, ''These close cultural links have survived despite the long dark tunnel we have just come through.''

Besides economic and technical aid, the French government donated a large number of books to the central university library in Bucharest, the official news agency Rompres said. The library could obtain few western books over the past quarter-centuray because of Ceausescu's severe censorship policies.

Romanian Minister of Culture Andrei Plesu, in accepting the books, said they were ''as important to us as bread is now.''

(JAN. 12) UPI - Around the world... around the clock... the latest news from U-P-I.

The fourth day in space has started for the crew of the Columbia. The five astronauts are awake and ready to try to capture a falling science satellite. Commander Daniel Brandenstein and co-pilot James Wetherbee set up the space rescue yesterday by executing a series of rocket firings to nudge Columbia into the same orbit as the satellite.

Soviet President Mikhail Gorbachev plans to visit a Soviet military base in Lithuania today... possibly to emphasize that he expects Lithuania to remain part of the U-S-S-R. Gorbachev rejected Lithuania's immediate secession. However, he said said a law being prepared for introduction in parliament may give every republic the right to leave the Soviet Union.

A senior economist at the United Nations predicts world-wide economic growth will slow this year. Economist Goran Ohlin says developed countries' annual growth will fall below three percent this year, compared with slightly higher than three percent last year. He says Eastern Europe will make substantial demands on international resources.

The Agriculture Department says the Christmas cold wave will cut citrus production 25 percent this season. Florida, the nation's top orange-growing state, lost an estimated 29 percent of its crop. The Southeast had its coldest December since record-keeping began.

A sort of bionic lung has been developed. Researchers in Salt Lake City say an implantable device designed to take over half of the functions of the lung has been approved for experiments involving humans. Researchers hope the bionic lung will eventually lead to a permanent man-made lung.

(JAN. 12) UPI - An autopsy on a baby born in Milwaukee shows she was born

with enough alcohol in her bloodstream to make her legally drunk. The baby died Tuesday, five weeks after her birth. The mother had a blood-alcohol level of point-38 percent at the time she gave birth.

Chicago police are searching for the mother of a nine-year-old girl who was found stabbed to death. A message scrawled in blood and signed ''her mother'' was found on the wall near the child's body in an abandoned South Side building. The message also said ''NOthing can hurt her any more.''

Two of the Latin American nations whose presidents will attend a cocaine summit with President Bush say the meeting WON'T become a confrontation over the invasion of Panama. Peru, the most critical of the invasion, pledged to avoid the issue. So did Colombia, which will host the summit February 15th.

The board of the Campeau Corporation has stopped chairman Robert Campeau from running the almost bankrupt U-S retail operations. An independent committee will oversee U-S operations until a board of trustees is put in place. Campeau's, based in Montreal, owns Bloomingdale's and Jordan Marsh.

Paramount Pictures says it has established a satellite production operation in Europe. Paramount Production President Gary Lucchesi put it this way... ''To entertain the entire world, we must create motion pictures that reflect diverse points of view.''

There's new speculation about a reunion of the three surviving Beatles. The reunion might be at the 32nd annual Grammy Awards February 21st. Paul McCartney is due to receive a life-time achievement award. George Harrison is a nominee for album of the year with ''The Traveling Wilburys Volume One.'' And Ringo Starr received a nomination for his country single ''Act Naturally,'' with Buck Owens.

#90012u0700 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - Higher cost of energy and food helped push prices at the wholesale level up a strong 0.7 percent in December after falling the month before, the Labor Department reported Friday.

Analysts had expected producer prices to rise about 0.4 percent during the month.

The rise in the Labor Department's producer price index for finished goods a bellwether for future consumer prices, marked a rebound in wholesale prices, which fell 0.1 percent in November.

For the past 12 months, the index rose 4.8 percent, the largest price advance since 1981 when prices rose 7.1 percent. In 1988, prices rose 4

percent, the department said.

The department attributed last year's gains on rising energy prices, which had fallen the year before. Food prices also rose on the year.

Prices for consumer goods rose 0.8 percent in December after falling 3.3 percent the month before. Home heating oil prices jumped 7.1 percent, costing 33 percent more than the year before.

Gasoline prices remained steady, but natural gas prices rose 1.6 percent, the department said.

Food prices gained 0.5 percent in December after rising 0.8 percent the month before. Prices increased for beef and dairy products but eggs cost less. Pork, processed turkey and fish prices fell in December after rising in November.

Excluding food and energy prices, the index for consumer goods increased 0.9 percent, with strong price gains noted in tobacco products, which increased 4.5 percent after slipping in November.

Prices also rose for automobiles and light trucks, pharmaceutical preparations, soaps and detergents, periodicals, toys, sporting goods and gold jewelry.

For the year, prices for consumer goods, excluding food and energy, rose 4.5 percent, led by tobacco products, prescription goods, sanitary papers and household flatware.

Capital equipment prices gained 0.2 percent in December to end the year up 3.7 percent from the year before. Much of this increase was attributed to gains in motor vehicle prices.

The index for intermediate materials and supplies dropped 0.1 percent in December, led by downturns in manufacturing and construction materials. For the year, this index rose 2.4 percent, less than half the 5.6 percent increase of the year before.

Durable manufacturing materials dropped 1.6 percent in price in December, the largest monthly decline since April 1980. This index also fell 3.4 percent for the year.

Crude materials prices advanced 1.8 percent in December. Crude petroleum prices gained 2.2 percent during the month. For the year, prices for crude goods gained 6.9 percent, up from 3.1 percent the year before. Crude petroleum prices rose 35 percent last year, the largest price increase in 10 years.

-30- 2944

#90012u0707 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - Despite the holiday season, retail sales rose only 0.2 percent in December after advancing a revised 0.5 percent in November, the Commerce Department reported Friday.

Last month, the department's Census Bureau reported that retail sales grew 0.8 percent in November. Retail sales fell 1.3 percent in October.

All the Census figures are adjusted for seasonal factors but not for price changes.

Sales in the fourth quarter of 1989 were only 3.6 percent above the same quarter a year before. At the end of December, sales were 3.8 percent above their level in the same month in 1988, reflecting the so-called soft landing of the economy during the last quarter of the year.

Total sales for the 12 months of 1989 were $1.71 trillion, up 5 percent from the 1988 total, the bureau said. Adjusting for the effects of inflation, 1989 retail sales were virtually flat when compared to 1988, making little contribution to overall economic growth.

The rate of growth of retail sales in 1989 was the smallest since a 1.9 percent hike in 1985, Census said. In 1988, sales increased 7.1 percent after a 6 percent growth in 1987 and a 10 percent advance in 1986.

Excluding the automobile sector, retail sales advanced 0.4 percent in December, and were 5.9 percent above their December 1988 level.

Automobiles sales fell 0.7 percent in December after losing 0.4 percent in November. At the end of December, automobile sales were 3.2 percent below their level for the same month in 1988.

Overall retail sales of durable goods, big-ticket items designed to last three years or more, dropped 0.6 percent in December, and were 0.7 percent below their December 1988 level.

In the durable goods sector, furniture and home furnishings sales suffered a 1 percent loss in December. But building materials and hardware stores rung up in December 0.1 percent more than in November.

Retail sales of non-durable goods grew 0.6 percent in December after advancing 0.8 percent in November, and were 6.7 percent above their December 1988 level.

General merchandise stores sales fell 0.4 percent in December, food sales rose 0.6 percent, gasolines and service stations receipts advanced 1.3

percent, apparel and accessories stores sales grew 0.1 percent, restaurants receipts fell 0.9 percent, and drug store sales fell 1 percent.

#90012u0714 01/12/1990 ~United Press International

NEW DELHI, India (JAN. 12) UPI - The new government of Prime Minister V.P. Singh announced Friday it will support efforts to overturn the $470 million settlement between its predecessor and U.S.-based Union Carbide Corp. in the 1984 Bhopal gas leak disaster so that victims can sue individually.

Law Minister Dinesh Goswami told a news conference that the minority National Front government would back petitions before a special Supreme Court review panel that contest the agreement reached Feb. 14 on damages to be paid by Union Carbide.

The accord was negotiated by another tribunal of India's highest court. The review panel was asked by lawyers representing several groups of victims to reconsider the judgement.

Goswami said the government supported contentions that the settlement was unconstitutional because it barred victims of history's worst industrial disaster from exercising their individual rights to sue Union Carbide for criminal liability.

''The government is of the considered view that the constitutional and legal rights of the victims to seek such judicial remedies as are available to them under the law of the land ... cannot be bartered away,'' Goswami said in a prepared statement.

He said neither the former government of Prime Minister Rajiv Gandhi ''nor any other party'' had the power to ''extinguish this inalienable right of the victims.''

Furthermore, he said the National Front, even before taking power Dec. 2 following late November parliamentary polls in which it toppled Gandhi's Congress (I) Party, had considered the amount of $470 million ''inadequate.''

''The government is also of the view that human life in India is not so cheap that the worst industrial disaster of the world, which has affected the lives and health of (hundreds of thousands) of people, could be compensated by an amount of $470 million.''

The disaster occurred in the pre-dawn hours of Dec. 3, 1984, when 40 tons

of methyl isocyanate vaporized and spewed from an underground tank at Union Carbide's now-defunct pesticide plant in the Madya Pradesh state capital of Bhopal, 400 miles south of New Delhi.

The fumes spread across large areas of the sleeping lakeside city in a choking, blinding cloud.

Since then, more than 3,300 people have died. Doctors say that on average, at least five people continue to die every week from the lingering effects of the gas.

More than 200,000 people were injured and many remain partially or wholly disabled, a large number unable to work and requiring constant medical attention.

More than $1 billion in damage claims were filed in the United States against the Danbury, Conn.-based multi-national. The cases were consolidated and returned to India.

The Gandhi government, however, pushed legislation through Parliament giving it the sole right to represent the victims and in September 1986, it brought a civil suit against Union Carbide in Bhopal District Court charging that the leak was the result of the firm's negligence.

The former administration demanded $3 billion in compensation for some 500,000 people whose lives it said were affected by the disaster through the deaths or injuries of relatives, personal injuries, losses of income or other factors.

The Central Bureau of Investigation, India's equivalent of the FBI, also filed culpable homicide charges against former Union Carbide chairman Warren Anderson, the company, its Hong Kong-based Asian headquarters, its Indian subsidiary and seven officers.

The company responded with a counter-suit charging that sabotage by a disgruntled employee caused the disaster and claiming that the central and state governments shared some liability for the large numbers of casualties.

Gandhi defended his government's agreement to the Supreme Court-negotiated $470 million ''full and final'' settlement with Union Carbide by contending that the case would have dragged on in the courts for years to the detriment of victims, most of whom are poor.

Under the accord, the government agreed to drop its civil suit in return for payment of the compensation. The pact also quashed the culpable homicide charges and barred anyone from filing in the future civil or criminal liability suits against the company.

The settlement unleashed a storm of protests by victims and Congress (I) Party opponents, many of whom accused the party of taking payoffs in return for accepting the agreement. There is no evidence supporting the allegation.

#90012u0717 01/12/1990 ~United Press International

CAPE CANAVERAL, Fla. (JAN. 12) UPI - The shuttle Columbia's satellite rescue team caught up with a falling satellite Friday and readied the ship's robot arm to grab the 11-ton experiment package, saving it from a fiery plunge to Earth.

Commander Daniel Brandenstein, passing about 3,000 feet below his quarry after a 1.3 million-mile chase, took over manual control of Columbia for the final stages of the tricky rendezvous with the Long Duration Exposure Facility, an otherwise doomed satellite the size of a school bus.

''We're on the R-bar,'' radioed astronaut Bonnie Dunbar, indicating the shuttle was directly below the ''LDEF'' satellite and beginning to pull ahead, looping above the target in the final stages of the rendezvous.

Dunbar, floating beside Brandenstein at the rear of the shuttle's crew cabin, stood by to grab the 30-foot-long science package with the shuttle's $50 million computer-controlled robot arm, extended above the shuttle's empty payload bay like a space-age cherry picker.

The final phase of the rendezvous required Columbia to zoom below LDEF before climbing and looping above it in a graceful pirouette designed to put the shuttle 300 feet above its target. Brandenstein then planned to fire maneuvering jets to narrow the gap to a scant 35 feet.

With the 12-sided LDEF floating below the shuttle against the backdrop of the Pacific Ocean, Dunbar planned to use the mechanical arm to latch onto the satellite, 5 1/2 years after it was placed in orbit for what was to have been a 10-month stay in space.

The astronauts were scheduled to spend five hours photographing every square inch of the experiment package to thoroughly document its condition before placing it in Columbia's payload bay for the return to Earth.

With LDEF safely on board, Brandenstein, 46, Dunbar, 40, co-pilot James Wetherbee, 37, Marsha Ivins, 38, and G. David Low, 33, will conduct a series of in-cabin experiments for the remaining six days of the mission before gliding to a night landing Jan. 19 at Edwards Air Force Base, Calif.

Engineers with NASA's space station project and the Strategic Defense

Initiative - ''Star Wars'' - missile defense program are especially eager to get LDEF back on the ground to find out how a variety of high-tech materials stood up to the satellite's long stay in orbit.

Launched April 7, 1984, LDEF is equipped with 57 experiments, most of them passive in nature, including many that do little more than expose a variety of high-tech materials to the radiation, temperature extremes and vacuum of space in research to learn more about how to build longer-lived spacecraft.

Some of the samples, mounted on panels facing in the direction of LDEF's travel, may have been severely eroded and weakened by constant impacts with highly reactive atomic oxygen in the tenuous outer reaches of the atmosphere.

The five-hour photo survey before LDEF's berthing aboard Columbia was ordered to document the condition of all the experiments before they are subjected to the stresses of the shuttle's re-entry, which could cause additional damage.

The astronauts began the 49-orbit hunt for LDEF with a picture-perfect blastoff Tuesday from the Kennedy Space Center, 22 days behind schedule because of bad weather and problems with launch pad 39A.

Along the way, Brandenstein and company successfully launched a Navy Syncom communications satellite Wednesday, carried out extensive Earth photography and conducted a variety of medical and scientific experiments, all the while closing in on LDEF for a down-to-the-wire rescue.

In orbit 4 1/2 years longer than originally planned, LDEF was a victim of atmospheric ''drag,'' slowly falling from orbit because of friction with the outer reaches of the atmosphere.

At the time of Columbia's launch, it was losing a half mile of altitude per day and heading for a re-entry around March 9.

LDEF was to have been retrieved after just 10 months, but a series of shuttle launch delays - including the cancellation of a 1985 rescue flight that was to have been commanded by Brandenstein - combined to delay the capture until Friday, 2,093 days after LDEF's launch.

#90012u0726 01/12/1990 ~United Press International

(JAN. 12) UPI - Stock prices on the Tokyo Stock Exchange closed broadly lower Friday in slow trading, with the key Nikkei Average suffering its eighth worst single-day loss on record.

The Nikkei Average of 225 selected issues, which surged 473.62 points Thursday, tumbled 653.36 points to close at 37,516.77. The worst loss of 3,836.48 points was recorded Oct. 20, 1987.

The broader-based Tokyo Stock Exchange index of all listed major shares, which gained 20.33 points on Thursday, plummeted 27.66 points to 2,786.47. An estimated 600 million shares changed hands, compared with 629 million Thursday.

Declines widely outnumbered advances 629 to 327, with 176 issues unchanged. Brokers said investors drained their money from the market before a three-day holiday.

All financial markets in Tokyo will be closed Monday for the national holiday of Adults Day. Trading will resume Tuesday. Brokers said investors also were discouraged by falling bond prices and rushed to take profits.

Large-capital steels and shipbuildings such as Kawasaki Steel, Kobe Steel, Mitsui Engineering and Shipbuilding and Ishikawajima-Harima Heavy Industries ended lower.

Nonferrous metals, chemicals and constructions also were sold along with electricals, foods, drugs, textiles, trading houses, banks and electric powers.

Some high-prices issues were among the scattered gainers. Nippon Mining paced the actives, followed by Sharp Electronics, Mitsubishi Heavy Industries, Toshiba Corp. and Toyo Menka.

Elsewhere in Asia, stocks closed lower in light trading on the Hong Kong Stock Exchange as investors stayed on the sidelines ahead of several key reports U.S. economic reports.

The Hang Seng Index, which fell 12.48 points on Thursday, lost 19.58 points to 2835.94. Utilities fell 18.76 points, financials shed 17.55, industrials lost 24.06 and properties closed down 16.28 points.

Turnover amounted to 550 million shares, below the 648 million shares changing hands Thursday.

Investors were reluctant to take out large positions ahead of the release of the U.S. producer price index and retail sales for December.

Analysts said investors also shrugged off news of the end to martial law in Beijing, which is generally believed to be a cosmetic move by the Chinese government.

Stocks closed lower in active trading on the Singapore Stock Exchange as

profit taking continued to dominate trading.

The Straits Times Industrial Index, which eased 3.45 points Thursday, fell 6.9 points to 1559.17. The All Singapore Index dipped 2.36 points to 430.88.

Volume amounted to around 146 million shares, down from the 168 million changing hands Thursday.

Traders said the market lacked direction as investors had no fresh news to move prices.

But analysts said the underlining sentiment of the market was still bullish. "The market is expected to continue to rise even though it is entering a period of technical adjustment now," he said.

Singapore Airlines (foreign shares) paced the declining issues, followed by Singapore Land, Development Bank of Singapore and Far East Shipping.

ASEAN Fund led the advances, followed by SPK Sentosa, National Iron, Parkway Holdings, Tong Meng and Cold Storage.

In Australia, stocks closed sharply higher on the Sydney Sharemarket led by a rally in gold issues.

The All Ordinaries Index, which added 5.9 points Thursday, climbed 17.8 points to 1713.7.

The resources end of the market paced the advance as the All Resources Index climbed 15.6 points to 982.9 and the All Industrials Index gained 19.8 points to 2671.2. Volume amounted to 107 million shares, up from the 99 million traded Thursday.

Brokers said the market again demonstrated independent strength, improving despite a further sharp fall in Tokyo.

The market was driven by the improving gold price, resulting in a 31.8 point, or 2.4 percent, jump in the Gold Index to 1824.4.

Among some of the top golds, GMK added five cents to $1.08, Highland gained nine cents to $1.04, Homestake added five cents to $1.62 and Placer Pacific gained five cents to $3.50.

#90012u0730 01/12/1990 ~United Press International

LONDON (JAN. 12) UPI - Stock prices were sharply lower at midday Friday on the London International stock exchange as investors reacted to the sharp

decline in Tokyo.

The key Financial Times 100-stock index, which added 5.3 points Thursday, was down 34.9 points to 2,383.0. The narrower top 30 industrial average lost 27.5 points to 1,913.0.

Volume amounted to around 260 million shares, compared with 334 million shares traded during the same period Thursday.

Analysts attributed much of the market's decline to prices tumbling in Tokyo where the key Nikkei Average lost 653.36 points to close at 37,516.77.

Analysts also said investors showed growing concern that British wage pressures were developing at a worrisome rate.

The wage problems surfaced Thursday when some 32,000 Ford workers in Britain rejected a 10.2 percent wage offer.

Among the most widely traded stocks, Ferranti International Signal PLC lost $3.50 to $33.50 after announcing a pretax loss of around $25.56 million. The electronics company also did not declare its regular dividend.

Elsewhere, Grand Metropolitan lost 24 cents to $10.10, Imperial Chemical Industries lost 42 cents to $18.50 and Glaxo lost 32 cents to $15.52.

-30- 1405

#90012u0762 01/12/1990 ~United Press International

(JAN. 12) UPI - When a group of Jewish leaders from the Synagogue Council of America met with President Bush to mark the observance of Hanukkah late last year, they privately asked the president to monitor the potential rise of anti-Semitism in the emerging democracies of Eastern Europe.

''We are confident,'' they said in a letter handed Bush, ''that you will strive to assure that the newly emerging freedoms in Eastern Europe do not produce renewed outbreaks of anti-Semitism in that part of the world.''

The Synagogue Council, which represents the rabbinic and congregational arms of the three major Jewish religious denominations in the United States, isn't the only group concerned.

Rabbi James Rudin of the American Jewish Committee raised the same point.

''A big question of the 1990s,'' he said in a recent column, ''will be what kind of attitude toward Jews and Judaism will these newly 'liberated' Catholics (in Eastern Europe) bring with them.

''Will it be the traditional anti-Semitic pre-Vatican Council Two Catholicism, or will it reflect the enormous positive changes that have taken place within the Catholic Church during the past 25 years?''

Early indications are mixed as traditional nationalism, which in the past has shown strong anti-Semitic tendencies, has mixed with pluralism.

Even before the crumbling of the Soviet empire, events in Poland - especially the controversy surrounding the Carmelite convent at the Auschwitz concentration camp - suggested some of the anti-Semitic residue that remains in nations where conservative Catholicism is strongly linked to nationalist aspirations.

During the dispute, Polish Cardinal Jozef Glemp appeared to fan the flames of anti-Semitism when he accused Jews of inciting anti-Polish sentiments and appealed to stereotypes of Jews, such as controllers of the mass media that have been used to justify anti-Semitic actions.

Other incidents have also sparked concern. In Hungary, some voices have called for the rebirth of the Arrow-Cross Party, the facist party of the 1930s; in the Soviet Union, anti-Semitic signs and handbills have appeared; and in Romania, the nation's chief rabbi worries ''neo-fascist'' exiles may begin returning home.

To counteract such possibilities, the American Jewish Committee is launching a program to combat anti-Semitism and to promote democracy and pluralism in Eastern Europe.

''Democracy and pluralism are the best guarantees of Jewish safety and it is our obligation, as the largest Jewish community in the world, to wage the battle on behalf of democracy and against anti-Semitism in the Soviet Union and the rest of Eastern Europe,'' said Sholom Comay, president of the AJC.

The project will include fact-finding missions to the area, an international conference on anti-Semitism, encouraging renewal of diplomatic ties between Israel and Eastern bloc nations, joint work with Christian groups, especially the Catholic Church, to counter anti-Semitism and lobbying the U.S. government on the issue.

''We will make the point,'' the committee said in a paper on the issue, ''that the American Jewish community supports (U.S.) assistance to movements working for democracy and pluralism, but will oppose assistance to countries where anti-Semitism becomes prevalent or receives encouragement from governments.''

#90012u0773 01/12/1990 ~United Press International
Analysis By ARNOLD SAWISLAK

WASHINGTON (JAN. 12) UPI - Over the years, a number of groups, ''special interests'' if you will, have exercised heavyweight influence on Capitol Hill.

During the middle and latter stages of the New Deal, labor unions held big time clout in Washington.

At the 1944 Democratic National Convention, word was passed that President Franklin Roosevelt had told party leaders to ''clear it with Sidney,'' meaning Sidney Hillman, head of the CIO Political Action Committee, before deciding any major issues, such as the vice presidential nomination.

Hillman supposedly preferred Vice President Henry Wallace for another term but in the face of strong party opposition agreed to Sen. Harry Truman of Missouri. Assuming that Wallace as president would have been less likely to oppose the Soviet Union than Truman, the decision had a decisive impact on the history of the last 50 years.

Labor lost its ''king of the hill'' status with the death of FDR and the end of World War II, which brought on a rash of major strikes. When Congress passed the Taft-Hartley Act over Truman's veto, it was clear Big Labor was no longer the pre-eminent lobby in Washington.

Other groups such as farmers and veterans also wielded major clout during the same period.

Agriculture gained its power much the same way as the New Deal itself by coalition. Legislators from cotton and tobacco states joined lawmakers from wheat and corn states in a ''farm bloc'' that dictated government agricultural policy.

The farm bloc held sway until the heavy cost of agricultural subsidies split its unity and issues, such as civil rights, made it difficult for the North and South to work together.

The veterans got their clout from sheer numbers. World War I vets had some power, but they had to fight for more than a decade to get a relatively small bonus in the 1930s and a health care system through the Veterans Administration.

But they did organize some strong groups, notably the American Legion and the Veterans of Foreign Wars, and when World War II called 12 million men and women into service, the vets had the numbers needed to impress the politicians. The GI Bill of Rights they got a broad and costly program of educational, housing and economic benefits may have been the most valuable

booty ever awarded to any army. The veterans' impact faded as they aged and prospered and as the veterans of Korea and Vietnam resisted established organizations.

At the same time, another group, old people or ''seniors'' gained influence.

While it might be argued that the old folks had power since the 1930s when Social Security was first enacted, it wasn't until Medicare and cost-of-living indexing was added to Social Security in the 1960s and 1970s that ''gray power'' really reached its zenith.

Now, with fractious repeal of the catastrophic illness insurance law, it is possible that the elderly will follow unions, farmers and veterans into the ranks of second-rate interest groups.

The seniors still are numerous and well-organized, but the struggle to pass the catastrophic illness measure and then to junk it the following year may have exposed such a wide schism and angered so many members of Congress that the elderly will lose clout.

The fact that the elderly lost a persistent and effective champion with the death last year of Rep. Claude Pepper, D-Fla., will only make it harder for the seniors to remain at the top of the lobbying hill.

#90012u0781 01/12/1990 ~United Press International

WEST BERLIN (JAN. 12) UPI - East German Prime Minister Hans Modrow went to parliament Friday, beset by thousands of demonstrators and horn-honking cabbies, and bowed to opposition demands by dropping his plans to form a new internal security force.

Modrow, considered a reform-minded communist, said the once-feared and now dissolved State Security Service, or Stasi, would not be replaced before the May 6 elections and that the practices of the hated force would not be repeated.

''The decision taken on an office for state security will be revoked,'' Modrow said in the statement carried by East and West German news outlets.

His announcement to the Volkskammer, or People's Chamber, in the heart of East Berlin met the wishes of several thousand East Germans who had gathered outside for a second day to denounce the plan for a new security force as a Communist bid to retain power.

New East German opposition groups had threatened to walk out of round-table talks with the government if the new force was formed before

the country's first free election. They feared the new agency, like Stasi, would be used against dissenters.

But despite Modrow's decision, threats to his communist-dominated coalition government remained. Three of the four non-Communist parties renewed their threat Friday to leave the coalition if the Communists tried to use their control of the national and local governments for electioneering.

The demonstrators outside parliament were backed by about 220 taxi drivers who staged a one-hour strike and honked their horns while circling the parliament building.

''We are of the opinion that the democratrization process is going too slowly,'' said Joachim Marquartd, chairman of the Berlin Taxi Drivers' Association.

The demonstrators, aside from opposing a new security force, also demanded dissolution of the Communist-dominated East German labor federation, formation of free unions and equal rights for all parties in the campaign for the free election.

Modrow spoke to the demonstrators as he entered parliament Friday and told them he understood their concern. He has said other political parties would receive support from the state, pending legislation on party financing.

Similar demonstrations were held Thursday in East Berlin, Erfurt, Gera, Rostock and Weimar.

In East Berlin, about 20,000 protesters formed a human chain around parliament Thursdday only hours after Modrow defended his beleaguered government and invited participation from opposition groups.

Thursday night, demonstrators, calling for German reunification and chanting ''Down with the Communists,'' pulled down three East German flags flying outside the parliament building and tore them to shreds.

Parliament speaker Guenther Maleuda at the opening of the Friday session condemned the defacement of the flags. He said the demonstrations interfered with parliament's work.

Modrow, widely considered one of the Communist Party's leading reformers, was elected by the Volkskammer to head the crisis-torn East German government Nov. 13 pending the election in May.

Since the Oct. 18 resignation of hard-line Communist Party leader Erich Honecker, and then his successor, Egon Krenz, two months later, the

Communist Party has given up its claim to sole control of the East German government.

Modrow's coalition government is comprised of the Communist Party and its former allies, known as the bloc parties. The Christian Democratic, Liberal Democratic and National Democratic parties had rejected Modrow's plan to form a new security police force.

Modrow had said the force was needed because of increased neo-Nazi activity. But the Neue Zeit, the official Christian Democratic newspaper, accused the Communists Friday of whipping up an ''hysterical campaign'' as part of their effort to retain power.

#90012u0801 01/12/1990 ~United Press International

(JAN. 12) UPI - The space shuttle gets ready to rescue a satellite... China issues new anti-protest rules in Beijing... another day in Lithuania for Mikhail Gorbachev... and there's speculation about a Beatles reunion. Those stories and more, next from U-P-I.

The shuttle Columbia has started the final phase of its space chase.

The crew of Columbia is trying to capture a falling science platform and return it to Earth safely. If the capture fails, the 11-ton satellite the size of a school bus will plunge to a fiery death in Earth's atmosphere.

The quarry is dead ahead after a one-Million 200-thousand mile chase. Commander Daniel Brandenstein fired Columbia's maneuvering jets for 11 seconds early this morning to begin homing in on the Long Duration Exposure Facility.

The flight plan calls for Columbia to pass about three-thousand feet below the satellite... zooming ahead of it and then looping back up and over it in a graceful pirouette to put the shuttle 300 feet above its target. Brandenstein then plans to fire maneuvering rockets to narrow the gap to a scant 35 feet.

With the satellite floating below the shuttle, crewmate Bonnie Dunbar plans to use Columbia's 50-foot robot arm to latch onto the satellite.

Engineers with NASA's space station project and the Strategic Defense Initiative missile defense program are eager to get the satellite back on the ground. They want to find out how a variety of high-tech materials stood up to the satellite's five and one-half years in orbit.

The city government in China's capital announced a tough new set of laws against demonstrations today.

The Beijing city government is forbidding demonstrations in and around Tiananmen Square. The ban comes one day after the lifting of martial law led to three incidents at the square.

Police detained two people who tried to lay a wreath at the square in memory of victims of the crackdown on last year's democracy movement. Beijing officials say the two are ''mental patients'' who will be released to their families. Foreign witnesses reported at least two other incidents in which police took people from the square during the day.

Buildings surrounding Tiananmen Square, as well as the international airport, train station, and ''important military installations'' are also off-limits to demonstrators.

A newspaper published in Canton says authorities in southern China executed 31 common criminals after sentencing dozens of offenders at a public rally. The rally was in a sports stadium, and 30-thousand spectators attended.

Those executed had been convicted of crimes ranging from theft and rape to murder and drug smuggling. There was NO indication any of those sentenced had been convicted of political crimes.

-30- 2955

#90012u0813 01/12/1990 ~United Press International

(JAN. 12) UPI - In diplomatic parlance, it's called a ''frank and businesslike exchange of views.'' And that sums up Soviet President Gorbachev's visit to Lithuania.

Lithuania wants indepndence from the Soviet Union... and Gorbachev is saying, ''NO''... or at least ''NOT yet.''

On the first day of a three-day visit to the Baltic republic... Gorbachev rejected calls for Lithuania's immediate secession... but says a draft law in a new Soviet constitution may give it, and every republic the right to leave.

In a whirlwind first day of meetings yesterday with officials and Lithuanian residents, Gorbachev promised Lithuania UNprecedented freedom in a new Soviet federation... but he made it clear he would NOT accept any unilateral secession by Lithuania, or any of the other 14 republics.

Gorbachev went to Lithuania to face down a revolt by the republic's Communist Party. He told intellectuals he is ''for self-determination all the way to secession.'' But he quickly added- ''Sovereignty is a natural desire, but in the framework of a federation. I believe this is possible.''

A Soviet consitution being drawn up would establish a new Soviet federation that would replace the current union of republics.

Today, Gorbachev is scheduled to visit a Soviet military base about 100 miles from the Lithuanian capital of Vilnius. Gorbachev's visit is the first ever by a Soviet leader to the Baltic republic.

The family of a Boston man who committed suicide after apparently killing his pregnant wife denies that the family conspired to cover up the slaying.

Charles Stuart's brothers and sisters denied through a lawyer yesterday that they conspired to perpetuate a deadly hoax in the murder-suicide case.

Prosecutors who initially targeted a black suspect in the October 23rd shooting of Carol Stuart plan today to reconvene a grand jury probing the bizarre slaying. Investigators now believe Charles Stuart shot and killed his wife in Boston's racially mixed Mission Hill neighborhood and then shot himself in the abdomen before calling police on his car phone.

Stuart claimed he and his wife had been robbed and shot by a black gunman. But authorities shifted their focus to the Boston furrier after his brother, Matthew, told police he was an UNwitting participant in the scheme.

At a news conference yesterday, Richard Clayman, a lawyer for another brother, Michael, said Matthew and Michael Stuart were the only family members who knew what occurred... until this month.

The attorney said the rest of the family did NOT learn that Charles Stuart killed his wife until three days before January 4th, when he jumped to his death from a bridge over Boston Harbor.

Clayman was flanked by four members of the family at the news conference he called.

#90012u0819 01/12/1990 ~United Press International

(JAN. 12) UPI - Organizers of the 32nd Annual Grammy Awards are claiming that there's a possibility of a reunion of the three surviving Beatles at the February 21st ceremonies.

George Harrison and Ringo Starr won a Grammy nomination... and Paul McCartney is one of four musicians slated to receive lifetime achievement awards.

Harrison, along with Tom Petty, Bob Dylan, Jeff Lynne and the late Roy

Orbison, received a nomination for album of the year with their collaboration on ''Traveling Wilburys Volume One.'' The Traveling Wilburys also were nominated for best rock performance by a duo or group with vocal. Starr received a nomination for his country single ''Act Naturally'' with Buck Owens.

A spokeswoman for the academy was NOT able to confirm rumors that producers plan to ask McCartney, Harrison and Starr to re-unite on stage.

Mike Greene, president of the National Academy of Recording Arts and Sciences, announced that McCartney and Miles Davis will be given lifetime achievement awards. Crooner Nat King Cole and pianist Vladimir Horowitz will be honored posthumously.

The nominations were announced yesterday in Beerly Hills by 19-time Grammy Award winner Quincy Jones, and four-time winner Olivia Newton-John. About six-thousand academy members will vote on 388 nominees in 77 categories to determine the winners.

Don Henley's ''The End Of The Innocence'' took the most honors for a single performer, including record and album of the year. He also earned nominations for song of the year and best male rock vocal performance.

Billy Joel's ''We Didn't Start The Fire'' and Bette Midler's ''Wind Beneath My Wings'' each received three nominations, including one for record of the year.

''The Living Years'' by Mike and the Mechanics and ''She Drives Me Crazy'' by Fine Young Cannibals also were nominated for record of the year.

-30- 2047

#90012u0823 01/12/1990 ~United Press International

(JAN. 12) UPI - The New York Times says today that Drew Middleton, who covered war and peace for the paper for nearly 50 years... died Wednesday night at his Manhattan home. He was 76.

The cause of death was NOT immediately known... although Middleton had been in frail health since suffering a heart attack three years ago.

At the outbreak of World War Two, Middleton switched from sports writing to war coverage. He first followed Allied Forces movements in North Africa and Europe. When the fighting ended, he turned to postwar diplomacy, covering peace conferences from both Allied and Axis perspectives.

Middleton witnessed numerous bitter battles and frequently wrote with considerable passion. In his 1973 memoirs titled ''Where Has Last July Gone?,'' he wrote... ''I watched at first hand the greatest military drama

of this century, the defeat at grievous cost of Hitler and Nazi Germany.''

In recent years, Middleton covered military affairs, winning recognition for his analyses of violent conflicts in the Falkland Islands and the Middle East.

#90012u0841 01/12/1990 ~United Press International

BEIJING (JAN. 12) UPI - The Beijing government announced tough new regulations Friday, effectively banning demonstrations in Tiananmen Square and elsewhere in the city a day after the end of martial law led to three incidents in the square in which police hauled off citizens.

In the most defiant incident Thursday, the first day of the end to nearly eight months of martial law, witnesses said two people were detained for trying to lay a wreath at the square in memory of victims of the crackdown on last year's democracy movement.

The Beijing Public Security confirmed the incident but said the two were ''mental patients'' who would be released to their families. Foreign witnesses reported at least two other incidents in which police took people from the square during the day.

Tiananmen Square, occupied by protesting students for weeks last year, remains the spiritual heart of Chinese dissent. The world's largest public plaza was reopened to the public Thursday for the first time since the army crackdown last June 3-4.

The regulations by the Beijing municipal government, in an announcement carried by the state-run Beijing Daily, effectively bans protests at the square and other sites in the city. The newspaper warned violators would be handled ''according to law.''

Buildings surrounding Tiananmen Square, the international airport, train station and ''important military installations'' are specifically off limits, according to the new rules, which partially duplicate martial law restrictions.

The regulations ban gatherings, rallies or demonstrations within 300 meters of designated areas, effectively barring would-be protesters from roads leading to Tiananmen Square and key government buildings.

The regulations extend to roads leading to Beijing's western university district, where last spring's massive protests took root.

In another sign of the continuing crackdown on dissent, the semi-official China News Service reported Friday a court in southern Guangzhou (Canton)

sentenced a 26-year-old teacher to 10 years in prison for spreading ''counterrevolutionary propaganda'' last June.

The report said Chen Zhixiang was sentenced for painting a 60-foot-long protest slogan on a streetside wall in Guangzhou that authorities said was intended to ''stir up the masses to overthrow the government.''

At Tiananmen Square in Beijing, eight armed paramilitary police remain at guard positions at the Monument to the People's Heroes, an obelisk at the square's center and the headquarters of last spring's protests.

The monument, as a memorial site, remains a sensitive spot for the government, which is anxious to prevent any new outbreaks of discontent amid recent rumblings of unrest among workers.

On Thursday, after martial law was lifted, foreign witnesses said an elderly man was taken from the square by police after screaming at them about the number of people killed last June. A woman was later hauled off after speaking to a British television crew.

Witnesses told United Press International a man and a woman were detained Thursday after approaching the monument with a funeral wreath reading, ''In memory of students and citizens who died by accident.''

The government has insisted that only about 300 people were killed, some by accident, in the army's assault on the square last June. Unofficial estimates put the number in the thousands.

The monument in Tiananmen Square, built to commemorate Chinese who died during the 1949 revolution, has served as a convenient focus for political dissent in the past.

The death of Premier Zhou Enlai in 1976 ultimately prompted an anti-government riot in the square in April of that year against the persecution of the Cultural Revolution, which ended a few months later after the death of Mao Tse-tung.

Similarly, last spring's movement was set off by the death of former reformist party chief Hu Yaobang. College students began their demonstrations with memorials by placing wreaths at the monument.

#90012u0953 01/12/1990 ~United Press International

NEW YORK (JAN. 12) UPI - Latest metal market prices as quoted Friday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.50-73.50 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 121.80 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $3.67-$3.87 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $499.00-$501.00; dealer-approx., $490.00-$502.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.00 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 322.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 68.00-68.75 c-lb.

#90012u0972 01/12/1990 ~United Press International

HOUSTON (JAN. 12) UPI - Continental Airlines has laid off about 175 people from the airline's operations nationwide in an effort to make the airline more efficient at a time of rising costs, a spokesman said.

Art Kent declined to give an exact number of layoffs because some furloughed workers will be transferred to vacancies in other departments or to areas where the company is hiring, such as reservations.

"The whole point was to get more cost-efficient," he said Thursday. "After

the merger in 1987, we added people to cope with the building of the airline. We have reached the point where it is obvious to us we are too fat in the middle."

Continental was created by the merger of four different airlines: Continental, People Express, New York Air and Frontier Airlines. "The restructuring is minimal, less than one-half of one percent of the total work force were furloughed," he said. Continental employs about 35,000 people, including 11,000 in Houston.

Kent said the airline is eliminating more positions than the number of people being laid off because some positions already were vacant. Some involved duplication of duties, he said.

The cuts do not involved employees involved in passenger service. "There were no pilots, no stewardesses, no gate agents and certainly no mechanics " he said.

Most posititions eliminated were administrative and ranged from clerk to managerial levels. There were no layoffs in Texas Air's other units, and Kent said no further work force reductions are planned. The cuts were effective Tuesday, but the airline did not announce them to the public.

"I suppose the number is really so small compared with the size of our company," Kent said. "We didn't think it was significant enough that we make a public announcement about it."

The layoffs came the same day that Continental slashed fares in Texas. Under its TexSaver program, the airline offering one-way fares as low as $9 for advance purchases and $39 same-day purchase to cities in Texas and neighboring states.

Kent declined to discuss the severance packages for the laid-off employees. Texas Air also owned Miami-based Eastern Airlines, which filed for protection under Chapter 11 of federal bankruptcy laws in March 1989 after its machinists led several unions in striking the airline.

Eastern, which had about 32,000 employees before the strike, has had a series of layoffs that reduced the total number of employees to about 20,000.

#90012u0974 01/12/1990 ~United Press International

TOKYO (JAN. 12) UPI - Japanese automaker Honda Motor Co. aims at global production of 2.5 million vehicles in the mid-1990 in line with its policy of manufacturing where there are needs.

"We have set a long-range target of manufacturing 2.5 million cars overseas and we hope to attain the goal in the mid-1990," Honda president Takashi Kume told a news conference Thursday.

"Preparations are making headway for increasing production in the United States and Europe," he said. "We plan to cover overseas sales by local production in the future." Honda's overseas sales in 1989 were estimated at about 1.2 million units.

With the completion of its second production facility in Marysville, Ohio, Honda's production in the United States and Canada will reach 525,000 units in 1990, he said.

Honda has agreed to invest $480 million in a long-term venture with the Rover Group of Britain under a new agreement extending their business collaboration for another ten years.

The company will expand its facility in Swindon, in southwestern England, to manufacture 100,000 Honda and Rover models, starting in late 1991. "We will consolidate our cooperation with the Rover Group in Europe. In April, Honda Motor Europe will start playing the lead role in our European operations," Kume said.

He said final arrangements for joint production with the Rover Group will soon be reached. "Basically, we plan to increase our imports from the United States, but it is too early to talks about imports of cars produced in Europe," he said.

The company sold in Japan 4,679 units of its best-selling Accord Coupe manufactured at its Ohio plant in 1989. In addition to increasing imports of Accord Coupes to 12,000 in 1990, Honda plans to start importing the station wagon version of the Accord in early 1991, the company said.

Kume said the company plans to export U.S.-built Accord station wagons to Europe as soon as possible. He predicted a further growth in domestic vehicle sales in 1990 and estimated demand this year at 5.7-5.8 million units.

Honda's domestic sales in 1989 grew 8.1 percent to 667,238 units, including imported Accord Coupes. Exports from Japan increased a slight 0.5 percent to 684,201 units because of expanding overseas production, the company said. The company targeted exports of 660,000 units in 1990, down 3.5 percent, and domestic sales of 667,238 units, up 8.7 percent.

Honda, the world's largest motorcycle maker, set its motorcycle sales target for 1990 at 1.235 million units, up 1.0 percent. Exports will be down 5.0 percent to 370,000 while domestic sales will be up 3.8 percent at 865,000 units.

#90012u0978 01/12/1990 ~United Press International
(JAN. 12) UPI - Mission Control at the Houston Space Center serenaded the Columbia's crew with new words to the song ''Let It Snow'' this morning. Mission Control told the astronauts to catch a falling satellite today and... in the words of their song... ''bring her home, bring her home, bring her home!'' The last major chore of the Columbia's mission is to catch up with and capture the science platform the size of a school bus.

Commander Daniel Brandenstein says the astronauts can see the satellite through a navigation instrument. And he says chances of capturing it are ''looking real good.''

A second Baltic republic wants to its wings. Latvia's parliament has voted to end the guaranteed rule of the Communist Party, following the example set by Lithuania. The vote in Latvia occurred as Soviet President Mikhail Gorbachev visited Lithuania, and rejected calls for its immediate freedom from the U-S-S-R. Gorbachev plans visits today to an industrial city, a collective farm and a factory producing televisions.

President Bush plans to visit Cincinnati today, his second trip out of Washington this week. Bush will address the Chamber of Commerce and also will meet with two groups of students in Cincinnati. The president is expected to deliver a message similar to the one he gave to the American Farm Bureau convention in Orlando, Florida, Monday... asking people to prod Congress into quick action on his legislative priorities.

Military officials say about two-thousand more G-I's who served in Panama are about to come home. The two-thousand are paratroopers. They are scheduled to jump from 20 C-141 ''Starlifters'' at Fort Bragg, North Carolina, this morning... unless the winds are too strong. More than 600 paratroopers returned to Fort Bragg Monday. They were sent to Panama to oust General Manuel Noriega's government. 23 American soldiers died in the invasion.

Chicago has lost its new ethics chief. He resigned following revelations that he is under investigation for possible campaign law violations. Chicago officials had hired Gary O'Neill of Baton Rouge, Louisiana, to head the Chicago Board of Ethics. It turns out O'Neill is one of 21 defendants in a lawsuit filed by the Louisiana Board of Ethics. They are accused of hiding the source of money contributed to a candidate for Louisiana insurance commissioner, Doug Green.

#90012u0983 01/12/1990 ~United Press International

CAPE CANAVERAL, FL (JAN. 12) UPI - The shuttle Columbia's orbital rescue team snared a falling satellite the size of a school bus Friday, grabbing the experiment-laden craft with the ship's robot arm to save it from a fiery plunge to Earth's atmosphere.

''We have LDEF!'' commander Daniel Brandenstein said as Columbia sailed over the Atlantic Ocean with the Long-Duration Exposure Facility firmly attached to the end of the $50 million Canadian-built robot arm.

''Congratulations on a job well done,'' astronaut Tammy Jernigan radioed from mission control in Houston.

Astronaut Bonnie Dunbar, working from the back of the shuttle's flight deck, used the mechanical arm to lock onto the Long Duration Exposure Facility satellite at 10:16 a.m. EST, capping a three-day, 1.3 million-mile orbital chase.

''It was an outstanding job,'' said flight director Granvil Pennington. ''The crew executed just a beautiful rendezvous. It looks like we have a really valuable piece of science there in our grasp.''

A quick inspection revealed a thin sheet of material taped over two experiments had pulled away and coatings appeared to be worn away after 5 1/2 years in orbit. Otherwise, the satellite appeared to be in good shape.

''Houston, I don't know if you can tell from the camera (view), but it looks like panels H3 and H12 have some loose foils curled away from the sides,'' Dunbar said. ''I don't know what kind of color you're getting, but a lot of the coatings look like they may be gone.''

The retrieval was a triumph for Columbia's crew and for hundreds of scientists back on Earth who are eagerly awaiting the big satellite's return next week, more than 5 1/2 years after it was launched on what was to have been a 10-month voyage.

Spectacular television views from space before the capture showed the cylindrical satellite floating below Columbia against the blue-and-white backdrop of the Caribbean Sea as the spacecraft raced along 206 miles up, barreling through space at more than 17,200 mph.

''You've made many scientists quite happy,'' Jernigan told the astronauts. ''Their LDEF experiments are coming home.''

With LDEF in hand, the astronauts planned to spend five hours photographing every square inch of the experiment package to document its condition before placing it in Columbia's payload bay for the return to Earth.

Brandenstein, 46, Dunbar, 40, co-pilot James Wetherbee, 37, Marsha Ivins, 38, and G. David Low, 33, will conduct a series of in-cabin experiments for the remaining six days of the mission before gliding to a night landing Jan. 19 at Edwards Air Force Base, Calif.

Engineers with NASA's space station project and the Strategic Defense Initiative - ''Star Wars'' - missile defense program are especially eager to get LDEF back on the ground to find out how a variety of high-tech materials stood up to the satellite's long stay in orbit.

Launched April 7, 1984, LDEF is equipped with 57 experiments, most of them passive in nature, including many that do little more than expose a variety of high-tech materials to the radiation, temperature extremes and vacuum of space in research to learn more about how to build longer-lived spacecraft.

Some of the samples, mounted on panels facing in the direction of LDEF's travel, may have been severely eroded and weakened by constant impacts with highly reactive atomic oxygen in the tenuous outer reaches of the atmosphere.

The five-hour photo survey before LDEF's berthing aboard Columbia was ordered to document the condition of all the experiments before they are subjected to the stresses of the shuttle's re-entry, which could cause additional damage.

The astronauts began the 49-orbit hunt for LDEF with a picture-perfect blastoff Tuesday from the Kennedy Space Center, 22 days behind schedule because of bad weather and problems with launch pad 39A.

Along the way, Brandenstein and company successfully launched a Navy Syncom communications satellite Wednesday, carried out extensive Earth photography and conducted a variety of medical and scientific experiments, all the while closing in on LDEF for a down-to-the-wire rescue.

LDEF, which was in orbit 4 1/2 years longer than originally planned, was a victim of atmospheric ''drag,'' slowly falling from orbit because of friction with the outer reaches of the atmosphere.

LDEF was to have been retrieved after just 10 months, but a series of shuttle launch delays - including the cancellation of a 1985 rescue flight that was to have been commanded by Brandenstein - combined to delay the capture until Friday, 2,093 days after LDEF's launch.

#90012u0990 01/12/1990 ~United Press International

(JAN. 12) UPI - A Boston lawyer was flanked by four people at a news

conference yesterday. The four are brothers and sisters of a white furrier Charles Stuart, who committed suicide, apparently after killing his pregnant wife and claiming a black man killed her. The lawyer, Richard Clayman, said the family did NOT conspire to perpetuate the racially explosive hoax. A grand jury will take up the case today.

Police in New Haven, Connecticut, have arrested a 15-year-old and are searching for other suspects in the shooting death of a woman who wanted to escape violence. She was killed in crossfire as she attempted to move with her children out of a drug-ridden neighborhood. Maria Jusino's three small children saw her collapse while loading their belongings into a van.

The Guardian Angels have set up a command post in East Palo Alto, California. The post is across the street from the home of Clara Roddy, who became an anti-drug crusader. The 60-year-old woman's bungalow was sprayed with gunfire New Year's Eve. A Guardian Angels spokesman says the vigilante group is going to shut down crack dealing on the street.

Federal officials report seven deaths from a blood disorder linked to the dietary supplement L-tryptophan. A total of one-thousand 46 cases of the blood disorder have been reported. The over-the-counter drug has been banned since November. The Centers for Disease Control says the new cases of the blood disorder show the evidence is mounting against the drug.

A federal judge in Los Angeles has ordered the maker of a diet pill called the Fat Magnet to stop making what the government calls ''false and misleading claims.'' The Federal Trade Commission says people would have to consume four and one-half bottles of the pills to absorb the calories in one pound of fat... if the claims were true. Plus, the F-T-C says there are side-effects.

#90012u0994 01/12/1990 ~United Press International

TOKYO (JAN. 12) UPI - China has asked Japanese banks to provide $2 billion in loans to ease its foreign exchange shortage, the national daily Asahi Shimbun reported Friday.

The Bank of China, in making the request, said it wants to use the standby credit pledged jointly by 67 Japanese financial institutions five years ago, according to the report.

Under an agreement concluded in July 1985, the Japanese consortium offered to provide loans of up to $2 billion, repayable in ten years at an annual interest rate of 0.25 percent above the London interbank offered rate for the first six years and 0.375 percent above LIBOR for the remainder, the paper said.

China, however, has refrained from using the fund, the paper said. The agreement is due to expire in July this year, it said.

China's foreign exchange reserves have fallen sharply since the military crackdown on the pro-democracy movement in Beijing last June and now are estimated at about $7.8 billion, down from $14.18 billion at the end of last September and from $18 billion in 1988, the paper said.

#90012u1018 01/12/1990 ~United Press International

LONDON (JAN. 12) UPI - Japanese Prime Minister Toshiki Kaifu, trying to show his country is ready to fulfill its world responsibilities, Friday discussed the momentous changes in Eastern Europe with Prime Minister Margaret Thatcher.

A Downing Street spokesman said their talks, which built on conversations in Tokyo in September, were ''extremely friendly, held in a good atmosphere.''

They discussed trade issues and how industrialized nations can be helpful as democracy reaches into the East Bloc.

Thatcher thanked Kaifu for his promise of $2 billion in loans, technology and aid to Eastern Europe, her spokesman said.

''If East European countries are seeking a market economy, freedom and democracy, then Japan as a country that shares similiar values should cooperate with them as much as possible in the interest of world peace and stability,'' Kaifu said in an interview with the British Broadcasting Corporation's Newsnight.

The Japanese prime minister is on an exhausting eight-nation tour, styling himself as an international statesman in anticipation of elections next month. His country has been criticized in the past for failing to meet its obligations as a world economic power.

Kaifu's next stop is Rome. He later heads to Poland and Hungary.

Thatcher and Kaifu discussed China, whose behavior is of particular concern to Britain in anticipation of relinquishing control of Hong Kong to Beijing in 1997. They praised the lifting of martial law this week, more than seven months after pro-democracy demonstrators were massacred by troops in Tiananmen Square.

Thatcher, who has criticized Japan in the past for its huge trade surplus, told Kaifu ''Britain's was the most open economy in Euopre, which was why Japan had invested here,'' the spokesman said.

Despite pledges to import more European Community goods, Japan's trade surplus widened to $22.8 billion in 1988, more than double the surplus of $11.1 billion in 1985.

Members of Parliament expressed objections to Japanese whaling fleets, which kill about 200 Minke whales in the Antarctic annually.

In Paris Thursday, President Francois Mitterrand, smoothing over a harsh attack on Tokyo by France's European Affairs minister, praised Japan's ''remarkable work dynamism and efficiency'' in talks with Kaifu, officials said.

Mitterrand also recognized that Japanese industriousness had given Japan a ''dominant position'' in world trade, but expressed concern that ''sometimes the Japanese market is not protected but it is impenetrable for reasons that belong to your culture.''

Kaifu replied that Japan had canceled customs duties on ''more than 1,000 products'' over the past six months. Japan, said Kaifu, was ''on the right road.''

PHNOM PENH, Cambodia (JAN. 12) UPI - Advances by Cambodian resistance forces and uncertain progress toward a political settlement have weakened the Cambodian government and may lead to a Cabinet shake-up later this month, Cambodian and Western sources said Friday.

''At the end of this month when the Assembly meets, Prime Minister Hun Sen will have to meet many criticisms,'' said Khieu Kanharith, editor of the

state-run newspaper Kampuchea.

''I think there will be some changes,'' Kanharith said.

Other political sources and Western observers in Cambodia agreed that Hun Sen's government was having political difficulty with more hard-line members of the ruling Communist Party.

Kanharith said Hun Sen was under fire for trusting Thailand and the West too much in negotiations for a political settlement of the conflict and for failing to improve the efficiency of his red tape-entangled government.

''We worry that a less able, less reasonable man will take his place,'' said a Western observer in Phnom Penh who asked not to be identified.

He said other top members of the ruling Communist Party did not seem to have the flexibility and ability of the 38-year-old prime minister.

Most sources said Hun Sen was likely to weather the storm, especially since a flurry of diplomatic moves this week revived the stalled peace process.

Official sources said Hun Sen made further concessions during peace talks conducted with Australian Deputy Foreign Secretary Michael Costello at the eastern Cambodian town of Svay Rieng.

''What is new is that we have agreed to discuss indirect Khmer Rouge participation in an interim authority as part of the CGDK (Coalition Government of Democratic Kampuchea - the three-part resistance coalition) '' said one source who asked not to be named.

''We still refuse to recognize the legitimacy of the Khmer Rouge as such '' he said.

He said much would depend on the reaction of the resistance groups to peace efforts by Costello and Indonesian Foreign Minister Ali Alatas. Alatas is set to meet Hun Sen this weekend.

Another crucial factor is the reactions of the U.N. Security Council which is scheduled to consider the Cambodian question next week in a meeting in France, he said.

The source said Cambodia wanted the council, which includes all the superpowers, to find a formula to allow Cambodia's U.N. seat to be vacated. It is currently occupied by the resistance coalition.

The peace talks, however, are not expected to help Defense Minister Gen. Tie Banh escape blame for failing to stop a resistance offensive in

western Cambodia.

#90012u1042 01/12/1990 ~United Press International
WEST BERLIN (JAN. 12) UPI - The East German parliament passed a law Friday to open up the economy to outside investment but limited foreign stakes in joint ventures to only 49 percent.

The law was passed by the Volkskammer (People's Chamber) unanimously with two abstentions.

West German Finance Minister Theo Waigel told an East Berlin news conference Friday the law does not meet the expectations of West German industry.

He said West German firms would be very disappointed by a 49 percent limit.

Waigel said to allow foreign control of joint venture companies would be to the advantage of the East German economy, which urgently needs foreign capital.

The limit was favored by those East Germans who fear a ''sell-out'' to West German industry.

-30- 963
#90012u1057 01/12/1990 ~United Press International
CAPE CANAVERAL, Fla. (JAN. 12) UPI - The shuttle Columbia's orbital rescue team corralled a falling science satellite Friday, grabbing the 11-ton spacecraft with the ship's fragile robot arm and saving it from a fiery death in Earth's atmosphere.

''We have LDEF!'' commander Daniel Brandenstein said as Columbia sailed over the Atlantic Ocean with the Long Duration Exposure Facility firmly attached to the end of the $50 million Canadian-built space crane.

''Congratulations on a job well done,'' astronaut Tammy Jernigan radioed from mission control in Houston.

Columbia astronaut Bonnie Dunbar, operating the mechanical arm from the back of the shuttle's flight deck, carefully grappled the LDEF satellite at 10:16 a.m. EST, capping a three-day, 1.3 million-mile orbital chase highlighting the most ambitious post-Challenger mission attempted to date.

''It was an outstanding job,'' said flight director Granvil Pennington. ''The crew executed just a beautiful rendezvous. It looks like we have a really valuable piece of science there in our grasp.''

LDEF, which was launched in 1984 to expose a variety of high-tech materials to the harsh space environment, clearly showed signs of wear and tear from its 5 1/2 years in orbit.

Brandenstein said the crew noticed pieces of material floating away from the satellite at one point and ''on the space end, some of the panels that had aluminum foil over them looked like they almost exploded, I mean they were just peeled back like a sardine can.''

The retrieval was a triumph for Columbia's crew and for hundreds of scientists back on Earth who are eagerly awaiting the big satellite's return to Earth next week to learn more about how spacecraft are affected by long-term stays in orbit - the primary reason LDEF was launched.

''You've made many scientists quite happy,'' Jernigan told the astronauts as they began a five-hour photo survey of the satellite. ''Their LDEF experiments are coming home.''

The rescue flight came in the nick of time. Left on its own, LDEF would have re-entered and burned up in early March, a victim of 5 1/2 years of friction with the outer reaches of Earth's atmosphere.

Brandenstein, 46, Dunbar, 40, co-pilot James Wetherbee, 37, Marsha Ivins, 38, and G. David Low, 33, will conduct a series of in-cabin experiments for the remaining six days of the mission before gliding to a night landing Jan. 19 at Edwards Air Force Base, Calif.

Engineers with NASA's space station project and the Strategic Defense Initiative - ''Star Wars'' - missile defense program are especially eager to get LDEF back on the ground to find out how a variety of high-tech materials stood up to the satellite's long stay in orbit.

LDEF is equipped with 57 experiments, most of them passive in nature, including many that do little more than expose a variety of high-tech materials to the radiation, temperature extremes and vacuum of space in research to learn more about how to build longer-lived spacecraft.

Some of the samples, mounted on panels facing in the direction of LDEF's travel, may have been severely eroded and weakened by constant impacts with highly reactive atomic oxygen in the tenuous outer reaches of the atmosphere.

The five-hour photo survey before LDEF's berthing aboard Columbia was ordered to document the condition of all the experiments before they are subjected to the stresses of the shuttle's re-entry, which could cause additional damage.

The astronauts began the 49-orbit hunt for LDEF with a picture-perfect blastoff Tuesday from the Kennedy Space Center, 22 days behind schedule because of bad weather and problems with launch pad 39A.

Along the way, Brandenstein and company successfully launched a Navy Syncom communications satellite Wednesday, carried out extensive Earth photography and conducted a variety of medical and scientific experiments, all the while closing in on LDEF for a down-to-the-wire rescue.

LDEF was to have been retrieved after just 10 months, but a series of shuttle launch delays - including the cancellation of a 1985 rescue flight that was to have been commanded by Brandenstein - combined to delay the capture until Friday, 2,093 days after LDEF's launch.

#90012u1059 01/12/1990 ~United Press International

(JAN. 12) UPI - The Chehalis River flowed peacefully into the Pacific Ocean before dawn Friday, ending a rain-fed nightmare that claimed at least six lives in Washington state and Oregon and caused millions in damage in the two states.

A combination of good weather and lower than expected high tides saved the sandbagged coastal city of Aberdeen, Wash., at the mouth of Grays Harbor, from serious flooding.

''The crest that reached Aberdeen was only 1 foot instead of 6-to-7 feet above flood level,'' said Rita Kepner of the U.S. Army Corps of Engineers. ''The river fanned out over low density population areas instead of high density areas. We were prepared for the worst and we feel very fortunate.''

Northbound lanes of Interstate 5 re-opened early Friday for the first time in several days and at least one southbound lane was to reopen later, said transportation department spokesman Rick Daniels. He said it was too early to gauge the extent of damage.

Weather Service - which issued flood warnings for 10 western Washington rivers during the week - canceled them all Friday morning. But it said much of the water that flowed over river banks during the week could take weeks to drain.

Gov. Booth Gardner planned to issue a disaster declaration for specified areas after a damage assessment. He flew over Thurston, Lewis and parts of Grays Harbor counties earlier.

''It is worse than the '86 flood by some degree and we declared a disaster ... so I don't think there is any question but what we will respond in that fashion,'' he said.

A Pacific storm system swamped Washington and Oregon Monday, at one point dumping more than 4 1/2 inches of water in Puget Sound in 24 hours, forcing thousands of evacuations from low ground in the two states and contributing to the deaths of at least six people, most by drowning.

Oregon's Gov. Neil Goldschmidt planned to fly over his state's north coast Friday and federal officials will do the same Saturday to determine if federal aid funds are justified.

Oregon's Nehalem River was still running high as adjacent counties began cleaning up mud and debris. A weak warm front spread light rain across northern Oregon but it moved out and left behind only light clouds.

A storm front threatened periodic rain through the weekend in northern and central California after record highs Thursday in the Central Valley, an 80 in Bakersfield and a 74 in Fresno.

Milder weather and calmer winds trailed a low-pressure system over Michigan that brought gale-force winds to parts of the Midwest and Great Lakes Thursday.

The weather service said the system was moving slowly eastward after winds up to 59 mph knocked out power for thousands, downed power lines and forced the closing of part of the Sears Tower in downtown Chicago.

The northern Great Lakes reported flurries and light snow through to southern Wisconsin. Temperatures ranged from the high teens to 27 at Milwaukee.

Wind gusts of 55 mph ripped the roof from a bowling alley in downtown La Crosse, Wis., on Thursday and took down the wall of a school under construction near Tomah, Wis. High winds tosses discarded Christmas streets into streets near Green Bay.

Skies were partly to mostly cloudy through Illinois, clear in Missouri. Northwest winds ranged from 14 mph at Springfield, Mo., to 28 mph at Moline, Ill., which recorded the high of 59 mph Thursday.

Ohio's snow belt near Lake Erie was peppered with snow Friday, the first seasonable weather in nearly two weeks. Commuting on Columbus area freeways was an adventure as snow removal crews acknowledged they were caught by surprise. Up to 3 inches was expected.

A weak cold front moved through much of Texas and Louisiana. Slightly cooler temperatures accompanied by a brisk northeast wind and drier air kept the fire danger high throughout Oklahoma, Texas and Arkansas. Several wildfires swept Oklahoma for the second day.

A low-pressure system moved across New England as falling temperatures and wet roads made driving risky.

Skies were partly cloudy over southern New England and forecasters wrned of ''black ice'' on some roads in Connecticut and Massachusetts.

Light snow fell over northern Maine, while haze covered southern parts of the Pine Tree State. Vermont reported cloudy skies and temperatures near freezing.

Snow fell in Maryland, West Virginia and western Pennsylvania and up to 2 inches was expected in the western mountains of Maryland. Up to two inches of snow fell in the northern and central mountains of West Virginia.

Fair weather continued over the South but colder temperatures were pushing out the spring-like weather.

WASHINGTON (JAN. 12) UPI - Barbara Bush completed radiation treatments on her eyes Friday but her doctors said it would be two to three months before she learns the results of the therapy.

''She's fine,'' said her press secretary Anna Perez, who reported that the radiation treatments were concluded.

The first lady has been suffering for a year from Graves' disease, a thyroid ailment, which has caused bloodshot watery eyes and double vision.

She began a series of 10 rediation treatments at Walter Reed Army Medical Center on Jan. 3, when daily doses of prednisone, a steroid medication, did not heal the condition and caused her to have side effects such as a fluctuation in her weight.

Her doctors say she will continue to be given lower doses of prednisone.

The radiation treatment is viewed as one of the last resorts before surgery is considered.

#90012u1138 01/12/1990 ~United Press International

ALEXANDRIA, Va. (JAN. 12) UPI - A federal judge Friday sentenced Richard Fowler to serve two years in prison for obtaining secret Pentagon documents to help Boeing Co. gain lucrative defense contracts.

U.S. District Judge Albert Bryan sentenced Fowler, 64, to two years on each of 39 counts of conspiracy, mail fraud, using classified information in his own reports and conveying the information to the Seattle-based aerospace giant. The sentences are to run concurrently.

He could have been sentenced to 300 years in prison and fined $255,000 for the Dec. 7 conviction.

The sentence came two days after the fired senior analyst was jailed for refusing to tell a federal grand jury who gave him the secret Defense Department budget documents at the core of the case.

Before sentencing, Fowler, of Springfield, Va., told the court he was merely doing his job.

''I'm here for doing a job that I was hired to do by one of the Fortune 500 companies,'' Fowler said in an emotional appeal.

Fowler said neither he, Boeing, nor the government were aware that what he was doing was criminal.

But Bryan said Fowler was too smart a man not to know he was improperly using classified documents. The judge also rejected Fowler's defense that it was an accepted practice because other contractors were doing it.

The judge delayed Fowler's prison term pending the outcome of the contempt proceedings. Fowler could be forced to remain in jail for the length of the grand jury - nine months - unless he complies with Bryan's order to answer the question.

Fowler waved to his crying family as he was escorted from the courtroom to return to the Alexandria Jail.

A onetime Pentagon budget officer with top security clearance, Fowler has consistently refused to name his sources even though he maintained the information was readily available to other contractors and the practice of obtaining the reports was commonplace.

Defense attorney Cary Feldman said the conviction would be appealed.

U.S. Attorney Henry Hudson said he hopes the case sends a message to other contractors that such activity would not be tolerated.

The prosecution, who dubbed Fowler the ''linchpin'' of the conspiracy, argued that classified information never was meant to be seen by defense contractors and that Fowler knew his actions were illegal because many documents were clearly marked not to be released to contractors.

Boeing, which fired Fowler in 1986, pleaded guilty in November to two counts of illegally obtaining documents and agreed to pay $5.2 million in fines.

During Fowler's trial, witnesses described how Fowler obtained the reports during the six years he worked at Boeing and gave them to selected senior officials.

A longtime Boeing clerk said she was told to set up a secret library to store the documents and once took home the reports and burned them in her fireplace to prevent Boeing security from learning of their existence.

WASHINGTON (JAN. 12) UPI - The Soviet Union bought 497,750 metric tons of U.S. wheat Friday at cut-rate prices, closing out a week in which the Kremlin more than doubled its purchases of American wheat, the Agriculture Department said.

Soviet grain buyers have purchased a total of 1.77 million tons of American-grown wheat, the equivalent of 64.9 million bushels, so far this fiscal year.

The latest sale was worth about $73.7 million, based on Chicago prices. Like a sale of 480,000 tons reported on Tuesday, the transaction was made through the Export Enhancement Program, the major U.S. export subsidy program.

The new sale came one day after the Agriculture Department renewed its estimate the Kremlin would import 37 million tons of grain during the current marketing year. The imports were projected to include 24 million tons of feed grains, 12 million tons of wheat and 1 million tons of miscellaneous grains.

For several months, the Kremlin has focused on purchases of feed grains, such as corn, and purchased relatively small amounts of wheat.

Since the fiscal year opened last Oct. 1, the Soviet Union has purchased 11 million tons of U.S. corn, 795,000 tons of soybean meal and 217,900 tons of soybeans.

The Soviet Union was the No. 1 export market for U.S. corn and wheat in fiscal 1989, buying 21.7 million tons worth nearly $3 billion.

#90012u1191 01/12/1990 ~United Press International
ELIZABETH CITY, N.C. (JAN. 12) UPI - The stepson of a wealthy textile mill executive says he offered a college friend $50,000 and a Porsche in exchange for killing his parents.

Christopher Wayne Pritchard, 21, testified Thursday that he first thought of killing Leith Peter Von Stein and his mother, Bonnie Lou Bates Von Stein, in their Washington, N.C., home for his share of a $2 million estate.

But Pritchard said James Barlett Upchurch III was the man who fatally beat and stabbed his stepfather and injured his mother in the July 25, 1988, attack.

Upchurch, 21, of Blanch is charged with first-degree murder in the slaying of Von Stein, an executive with National Spinning Co.

Pritchard of Winston-Salem and Gerald Neal Henderson, 22, of Raleigh both pleaded guilty to aiding and abetting murder and agreed to testify against Upchurch.

Upchurch could be given the death penalty if convicted. Pritchard and Henderson, who will be sentenced following Upchurch's trial, face life prison terms.

Pritchard, who says he was in Raleigh at the time of the killing, said he promised both Upchurch and Henderson fancy cars and cash if they helped him kill his parents.

''I would give him a car and $50,000 - a Porsche,'' Pritchard said.

He said he told Henderson ''for his involvement, I would give him $50,000 and a Ferrari.''

The three young men were students at North Carolina State University in Raleigh when plans for the killing were drawn, said Pritchard.

The idea of killing his parents surfaced when the friends were drinking, said Pritchard. He said he was not doing well in school and his parents had talked about his withdrawing from the university.

Pritchard said he later became heavily involved in drugs and considered the idea more seriously.

Initial plans called for setting up a late-night house fire by making it appear a fuse had exploded, he said. On July 24, 1988, Pritchard said he secretly brought Upchurch to Washington and fed his family hamburgers laced with sleeping pills.

But the after the family retired, the two men were unable to break the fuse to ignite the fire, he said.

A second plan was devised on July 25 in which it would appear his parents were slain in a house burglary, said Pritchard. He and Upchurch went to a K-mart in Raleigh, where Pritchard said he spent about half his weekly $50 allowance from his parents on a hunting knife.

Henderson then drove Upchurch back to Washington, said Pritchard, who learned about the attack in a 4:45 a.m. call from his sister.

#90012u1243 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - The Iran-Contra prosecutor wants documents seized during the U.S. invasion of Panama to explore Reagan administration contacts with deposed Gen. Manuel Noriega, and the Justice Department Friday promised to cooperate.

David Runkel, spokesman for Attorney General Dick Thornburgh, said the Justice Department received a call late Thursday from the office of special Iran-Contra prosecutor Lawrence Walsh.

At a staff meeting Friday, Runkel said, Thornburgh directed aides to provide Walsh with ''the fullest cooperation of the department in this matter.''

Walsh's spokeswoman, Mary Belcher, said she could not comment ''on what may or may not be an investigative matter.''

But Walsh reportedly is hoping that Noriega's files might shed new light on a number of Iran-Contra details, including Noriega's contacts with President Bush when he was vice president.

Walsh also is apparently interested in Noriega's contacts with other Reagan administration officials, including former national security adviser John Poindexter and his White House aide, Oliver North.

The Justice Department's promise of cooperation is significant because Walsh and Thornburgh have fought an increasingly bitter battle over the use of intelligence information in Iran-Contra trials.

The entire Iran-Contra case against former CIA official Joseph Fernandez was scuttled late last year after Thornburgh took the unprecedented step of forbidding use of some intelligence documents at the trial. Fernandez was the former top CIA official in Costa Rica during the Iran-Contra scandal, a crisis that overshadowed President Reagan's second term.

Walsh has accused the attorney general of trying to protect ''fictional secrets'' that are already on the public record from news stories and previous trials of Iran-Contra defendants.

''We'll cooperate if they (Walsh's office) want to send a team to Panama

'' Runkel said, where a huge cache of documents seized by American soldiers is being examined by about a dozen FBI and Drug Enforcement Administration agents, supervised by Justice Department lawyers.

The documents are being examined ''to determine if there is evidence of any violations of U.S. laws,'' Runkel said, but he declined to provide further details or characterize the information being found.

Runkel said ''I assume'' that if investigators find documents relevant to Walsh's mandate to prosecute Iran-Contra offenses, ''they will certainly be made available to him.''

Most of the documents remain in Panama and were found ''in various government and personal files'' after the recent U.S. attack, Runkel said.

Bush met Noriega at least twice - once when he was director of the CIA, in 1976, and then in 1983, when Bush was vice president.

Most of the questions about Bush's dealings with Noriega have centered on whether Bush knew of alleged drug trafficking by Noriega.

Previous Iran-Contra investigations have revealed Reagan administration contacts with Noriega about aiding the rebel Nicaraguan Contras after Congress prohibited such assistance.

During the presidential campaign, Bush said he had no ''hard evidence'' of drug activity by Noriega until he was indicted in Florida in February 1988.

Some former government officials have scoffed at Bush's claim, saying there was widespread U.S. government information about drug activities by Noriega but that the Reagan administration was more interested in the Contras and obtaining Central American intelligence from Noriega.

#90012u1250 01/12/1990 ~United Press International

HOMESTEAD, FL (JAN. 12) UPI - A biting bandit left his mark on his victims and stole money, food stamps and jewelry from at least 10 people in the past 20 days, police said.

The robber bit off a finger of a farm worker and the ear of a vagrant. Doctors sewed the ear back but not the finger.

The robber took food stamps from one victim and a watch from another. He nabbed $500 from one person and only $1.57 from another.

''The guy can bite and I'm not kidding you,'' said Ronald Maxwell, 70, who was bitten last week. ''He put me in the choke hold, just like those

wrestlers on TV.''

''This is a strange one, all right,'' said Detective Jim Pruneda. Police are watching a suspect, a former mental patient.

Bernard McIntyre, 25, who fell prey to the biter last week, said: ''He must be part Rottweiller. He's fast and he's tough.''

McIntyre said the bandit hit him in the head with a rock and then jumped him from a clump of bushes.

''I threw a left and he grabbed my finger in his mouth,'' McIntyre said. ''I hit him with a right, pulled my finger out and ran for it. He was right behind me. He was pretty fast, but I was faster.''

Police are frustrated because they lack a good description of the man.

''Right now, he is making a laughing stock out of us,'' Pruneda said. ''But we will get him.''

David Rothenburg, a forensic psychologist, said the bandit may suffer from a disorder aggravated by drugs, alcohol or acute stress.

''If something isn't working in his brain, then he's left with the resources he had earlier in his life. It's clear he's regressing into a form of infantile behavior, but biting a finger off is not simply an expression of childlike hostility,'' Rothenburg said.

The bandit may be leaving a mark on his victims that will make it easy for police to identify him if he is caught.

''Those bite marks are better than fingerprints,'' said Dr. Richard Souviron, a forensic dentist.

#90012u1286 01/12/1990 ~United Press International

BOGOTA, Colombia (JAN. 12) UPI - The deadline set by the cocaine gang that threatened to kill the kidnapped son of a top government official unless four prisoners were released expired Friday with no immediate developments.

''The Extraditables,'' a gang linked to Colombia's powerful cocaine trade, had threatened to ''execute the prisoner'' if the four were not released by Friday.

They kidnapped businessman Alvaro Montoya when he was driving home Dec. 20 to a luxurious neighborhood of Bogota. There was no word of his fate as the deadline passed.

Montoya is the son of German Montoya, presidential general secretary and the man who Colombian newspapers call the second most powerful in government behind President Virgilio Barco.

Attorney General Alfonso Gomez said the four people the kidnappers demanded be freed were not in government custody. Secret Police Chief Miguel Maza said authorities were ''working intensely in the search for Montoya and other kidnap victims.''

''The Extraditables,'' responsible for a number of spectacular murders and bombings, said they were using kidnappings to finance their activities. Police said it appeared the group lost its cocaine-based financing when an elite police unit killed drug kingpin Jose Gonzalo Rodriguez Gacha on Dec. 15.

Officials said the gang has kidnapped 14 people. The newspaper El Siglo reported 541 people kidnapped in Colombia, while a livestock association said 225 farmers and ranchers had been kidnapped.

There are at least six guerrilla groups operating in Colombia that use abduction as a weapon.

Police also said Friday they captured nine members of the ''Bogota Cartel '' a cocaine smuggling operation linked to the powerful Medellin Cartel.

The arrests were made Thursday by an elite anti-drug police unit in various residential neighborhoods in northern Bogota.

A ''war tax'' also took effect Friday in Colombia to help fund the government's battle against cocaine traffickers and guerrillas.

The 5 percent income tax was imposed on people who earn over a certain amount and will affect about 120,000 people, the government has estimated. The tax is suppose to raise some $34 million this year.

The extra money will be used to fund the armed forces and police, to buy investigation equipment and improve the judicial system.

Finance Minstery officials said the military and police budget rose to some $450 million in 1989.

Drug traffickers declared war on Colombia last August after President Virgilio Barco ordered a crackdown and renewed extraditions of suspected drug traffickers wanted in the United States. The crackdown was prompted by the apparently drug-funded assassinations of several judges and a leading presidential candidate.

-30- 2973
#90012u1287 01/12/1990 ~United Press International
(JAN. 12) UPI - Barry Sanders and Derrick Thomas, players who immediately filled voids and helped their teams improve markedly in 1989, Tuesday were named the NFC and AFC Rookies of the Year by United Press International.

Sanders, who gained a club record 1,470 rushing yards for Detroit, was a unanimous choice among 42 pro football writers covering NFC teams. Outside linebacker Thomas, who led Kansas City with 10 sacks, received 28 votes from AFC writers to defeat Denver running back Bobby Humphrey with 8 votes and Denver safety Steve Atwater with 6 1/2.

Sanders and Thomas were voted Pro Bowl starters as rookies.

Sanders entered the NFL after winning the Heisman Trophy at Oklahoma State and was an instant hit. He broke Billy Sims' 8-year-old team record for rushing yards and added 14 touchdowns to help the Lions go from 4-12 in 1988 to 7-9. Sanders was also Detroit's first 1,000-yard rusher since Sims in 1983.

He led the NFC in rushing, finishing 10 yards behind Kansas City's Christian Okoye for the league lead and earned a Pro Bowl start.

''I'm very competitive inside,'' Sanders said. ''Goals were not on my mind. The only expectations I have are what I expect of myself and that's basically to give 100 percent.''

Said Lions Coach Wayne Fontes: ''I expected him to play good, but as it turned out he's been great. The records did not seem to faze him at all. I've seen a lot of great runners, but I haven't seen one better. Great backs are great when they step on the field. Running is instinctive.''

Sanders missed training camp because he had not signed a contract, then gained 71 yards on nine carries in Detroit's opener against Phoenix. He just kept getting better.

''He's probably the prototype back of the '90s,'' Green Bay Coach Lindy Infante said. ''He's got all three - speed, power and great cutting ability.''

''The things he can do once he has the football in his hands are incredible,'' added Lions rookie quarterback Rodney Peete. ''He's a phenomenal player. I like to describe him as a quarterback running with the football because he sees the whole field.''

Thomas, a first-round draft pick out of Alabama, helped the Chiefs improve from 4-11-1 to 8-7-1 with 77 tackles, three fumbles forced and one

recovered. The Chiefs, third to last in the NFL with 23 sacks in 1988, had 36 this year and led the AFC in defense for the first time since 1969.

''My goal was to play in the Pro Bowl,'' Thomas said. ''But I didn't foresee myself being a starter this year. So that was above and beyond.

''But rookie of the year, that's what I was really shooting for. You only get one shot at that.''

Thomas had all 10 of his sacks with six games left, and he needed three to break the rookie record. He then drew more attention from opposing offenses while his teammates' sacks soared over the last six games.

''Everybody would have guessed I would have gotten the record, but I don't know if everyone would have guessed I'd be a starter in the Pro Bowl,'' he said. ''So you've got to give something to get something.

''I didn't pout around when I didn't get a sack for six weeks. Just because I wasn't getting any sacks didn't mean we weren't accomplishing anything.''

#90012u1308 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - The chief East German disarmament negotiator says East Germany, despite the political change toward pluralism at home, wants to remain in the Warsaw Pact alongside the Soviet Union for now.

Andre Wieland, the director of conventional force reduction talks in the East German foreign ministry, said during a visit to Washington this week that the Warsaw Pact is becoming ''a more democratic alliance.

''But this is not the time to dissolve the Warsaw Pact,'' Wieland said Thursday. ''I don't think this would be in the interest of NATO, either, because they would lose their negotiating partner - they wouldn't have anyone to talk to any more.''

The Warsaw Pact is the mutual defense agreement between the Soviet Union and its former satellites in Eastern Europe, all of which are now developing toward a pluralist political system. It was under the guise of the Warsaw Pact that the Soviet Union intervened in its satellite states previously, such as in 1956 in Hungary and in 1968 in Czechoslovakia.

Wieland said it is more likely that the political character of the Warsaw Pact will become more important and that the ''military pillar'' won't be the only thing binding the nations of Eastern Europe together.

Wieland was in Washington for talks at the State Department, the Arms

Control Agency, the Senate, the Pentagon and the National Security Council.

Even though economic pressures may be leading the United States toward cuts in troops stationed abroad and the Soviet Union has also drastically reduced conventional forces unilaterally in Eastern Europe, he believes it is still better to continue with formal negotiations between the Warsaw Pact and NATO.

He said he believes 5 percent cuts in coventional forces in Europe are too little, while 50 percent cuts at this time are unrealistic.

#90012u1333 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - House Armed Services Chairman Les Aspin, D-Wis., gave high marks Friday to the Pentagon's execution of the Panama invasion but criticized the political side of the operation.

''The military side, definitely an 'A,' clearly an 'A,''' Aspin said, grading ''Operation Just Cause'' in a report to House leaders.

But Aspin said ''the political part was not meshed'' well with the military operation. He cited the late entry of the State Department into the planning and missteps such as not broadcasting President Guillermo Endara's address to Panamanians on television.

Despite the successes of the Dec. 20 invasion, Aspin warned that future military intervention in Third World countries may not be as easy.

He noted the widespread access of U.S. forces to Panamanian military installations before the invasion and pointed out that 13,000 U.S. troops already were stationed in Panama.

Aspin also cited the good luck that no hostages were taken for long and that dictator Manuel Noriega quit fighting rather than retreat to the

countryside and wage guerrilla war.

Aspin criticized the Air Force's insistence on using F-117 fighters to drop two one-ton bombs in a field adjacent to a Panamanian Defense Force barracks at Rio Hato, west of Panama City. The Pentagon said the plane was needed for its accuracy and the objective was to surprise and disorient PDF forces, not to kill them before U.S. paratroopers landed.

''It looked to me like it was show biz,'' Aspin told reporters. ''Not to be too facetious, but we were trying to miss the buildings. We have lots of planes that can miss buildings. There's no question there could have been other planes used.''

He alleged that the Air Force really wanted to show off the F-117 to strengthen its position in 1991 budget negotiations.

Sen. John Warner, R-Va., ranking Republican on the Senate Armed Services Committee, conceded other planes might have been effective but the F-117's use was justified.

''Here is a clear example of careful planning,'' Warner said. ''It was determined we did not want to bomb the barracks and kill a lot of people. ... That bomb dropped within 15 feet of where it was supposed to go, and the remnants of that force in that house came out severely disoriented and were not able to perform their military responsibilities.''

Although a handful of hostages were taken, there were no incidents in which organized PDF forces publicly threatened to kill U.S. citizens if not given an exit from Panama.

But Aspin revealed that 347 people from a Brazilian plane that landed at Torrijos Airport shortly before the invasion were held briefly by Noreiga loyalists who were talked out of keeping the passengers hostage.

Aspin would not fault U.S. agents for not knowing precisely Noreiga's whereabouts. He noted that Noreiga knew he was being watched and went to great lengths to try to confuse the agents watching him.

Noriega took refuge in the Vatican Embassy in Panama City for about two weeks before he surrendered to U.S. authorities. Agents arrested Noriega and brought him to Miami for trial on drug trafficking and money laundering charges.

The one intelligence shortcoming cited by Aspin was that U.S. agencies had no idea Noreiga kept 80,000 weapons stockpiled throughout Panama.

Aspin also said he expects that Congress will examine the role of women in combat because of the fighting seen by a military police force led by a

female captain. Aspin said he is uncertain whether Congress will change the law keeping women out of front-line combat.

Warner said he does not forsee training large numbers of women for combat roles now filled by men, but he said women should be as prepared as their male conterparts to meet the threat of terrorists.

#90012u1345 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - The killing of six Jesuit priests in El Salvador was a carefully planned operation and points to the involvement of the military, two members of Congress said Friday.

Unless the government of Salvadoran President Alfredo Cristiani brings all those involved to justice, then U.S. military aid to El Salvador is in serious danger, Sen. John Warner, R-Va., told reporters.

Rep. Joe Moakley, D-Mass., said the international investigation into the killings of the priests, their cook and her daughter has made substantial progress.

''The nature and circumstances of the crime are such that the involvement of high level military officials, either in ordering the murders or in having prior knowledge of them, is likely,'' Moakley said in a prepared statement. ''I worry that the possibility of a cover-up remains.''

Warner, generally a supporter of U.S. policy in El Salvador, reviewed the investigation during a visit to Jose Simeon Canas University, the scene of the killings that occurred in November during the height of a leftist military offensive in San Salvador. Priests in El Salvador are often viewed by the military as supportive of the leftists.

''It is manifestly clear that this was a carefully planned operation,'' Warner said. ''It was not just an indiscriminate killing by a bunch of troops ravaging about in the darkness.

''They knew exactly how to get in. They knew where they were. They dragged them out, mercilessly slaughtered them, and then departed.''

Cristiani, the head of a rightist government, this week said the investigation indicates that the military was involved in the eight slayings. He has vowed to track down the killers and their leaders.

The United States is providing $80 million in aid to the Salvadoran military that President Bush says is fighting a leftist insurgency supported by Cuba and Nicaragua. But political support for the Salvadoran government has never been strong in Congress and may collapse if the

military, which is often accused of human rights abuses, is found guilty of the killings.

''Unless this particular case is pursued carefully and justice is meted out, there are convictions, the likelihood of further military assistance from the United States becomes doubtful,'' Warner said. ''This case will be the balance that could kill it, one way or another.''

TACOMA, WA (JAN. 12) UPI - A man apparently on his way to resolve a quarrel with his girlfriend crashed head-on into her car, killing the woman and critically injuring him, authorities said.

The accident occurred early Thursday on a dark, two-lane road between McChord Air Force Base and Fort Lewis. Barbara Czapiewski, 31, was crushed to death, authorities said. Henry Apo, 30, of Tacoma, was reported in critical condition at Tacoma General Hospital, a nursing supervisor said. The nature of his injuries was not available.

Also injured in the crash was Apo's sister, Lahapa, 22, who was riding in the girlfriend's car, apparently to the home of the man's parents, where he had just left.

''I don't think they had any idea who was in each other's cars,'' said John Reisch, an investigator with the Pierce County Medical Examiner, who was called to the scene of the crash at 2:30 a.m. Thursday. ''It was just a fluke thing.''

Lahapa Apo was stable but in serious condition in the intensive care unit at St. Joseph Hospital with cuts to her leg, a bruised heart and abdominal bruises.

Bill Kennedy, Czapiewski's stepfather, said she and Apo had dated off and on for about the past year.

''This is just speculation we've heard today but apparently they'd had some kind of disagreement over something,'' Kennedy said. ''He had been over at his mother's house but was on his way back to Barbara's place again to see her.''

Czapiewski is survived by three young children, a boy and two girls, from two previous marriages.

(JAN. 12) UPI - The shuttle Columbia is making its final approach toward an orbiting satellite that it must retrieve and return to Earth. NASA officials say the Long Duration Exposure Facility, an 100-ton satellite the size of a school bus... would fall to Earth in March if NOT for the shuttle crew. Astronaut Bonnie Dunbar will use the shuttle's 50-Million-dollar Canadian-built robot arm for this morning's attempt to snatch the satellite from its failing orbit.

A published report says the Bush administration has informed Contra rebel leaders that most of their U-S aid likely will end after next month's elections in Nicaragua. Senior Contra leader Adolfo Calero says the anti-Sandinista rebels feel betrayed by the end of funding from Washington. Says Calero... ''NO one ever thought the United States was going to fail again as it did in Cuba... but the fact is we've had a Bay of Pigs in slow motion.''

China is taking steps to assure that there will be NO repeat of last spring's massive pro-reform demonstrations in Beijing. The government today announced regulations that virtually ban demonstrations in much of the capital. Tiananmen Square, occupied by protesting students... remains the spiritual heart of Chinese dissent. The world's largest public plaza was re-opened fully to the public yesterday for the first time since the army crackdown last June that left hundreds dead.

A published report says lawyers for former Panamanian dictator Manuel Noriega will attend a closed hearing to discuss a government bid to move Noriega from a cell in the federal courthouse. The report says NO time was set for the hearing. Frank Rubino, a Miami lawyer representing Noriega... says he'll object to moving Noriega from Florida because it would make it difficult to meet with his client.

The Labor Department says wholesale prices jumped a higher-than-expected seven-tenths of one percent in December... sparked largely by higher energy and food prices. Analysts had expected producer prices to rise by about four-tenths of one-percent during the month. And the Commerce Department reports that retails sales rose a meager two-tenths of one percent in December. The department's Census Bureau reported retail figures grew eight-tenths of one percent in November after falling one-point-three percent in October.

(JAN. 12) UPI - A San Diego court affidavit says a self-proclaimed prophet has admitted to the ritualistic slayings of an Ohio family. An affidavit filed Sunday says an unidentified follower saw Jeffrey Don Lundgren kill at least one of the victims last April. Lundgren and 12 other suspects have been charged in the execution-style shooting deaths of

follower Dennis Avery, his wife and three young daughters on a farm in Kirtland, Ohio. Authorities say the Averys were killed as a spiritual cleansing to prepare the group for its trek to the wilderness and the second coming of Christ.

Soviet President Gorbachev is on the second day of a three-day trip to Lithuania... whose Communist Party has declared itself independent of Moscow. Gorbachev today visited an industrial city about 125 miles north of Lithuania's capital. He also met with farmers and managers on the collective farm before a scheduled trip to a factory that produces televisions. The Soviet leader yesterday rejected immediate calls for secession as ''simply NOT serious'' and promised Lithuania broader freedom in a new Soviet federation.

In the Philippines, opposition Senator Juan Ponce Enrile today was granted the right to call a witness he says will refute accusations that he was involved in last month's failed coup against President Aquino. Government investigators recommended the filing of the charges against Enrile after witnesses reported seeing about 100 rebel soldiers in the senator's residence on the first day of the coup attempt.

Reports say East Germans demanding further reforms are demonstrating for the second day outside the East German parliament. Several thousand people gathered in the heart of East Berlin as the People's Chamber met. They were supported by 220 taxi drivers, who honked their horns while circling the building. The 220 taxi drivers struck for one hour to take part in the demonstration. Said one driver... ''The democratrization process is going too slowly.

JERUSALEM (JAN. 12) UPI - The body of a suspected Palestinian collaborator was found axed to death Friday in the Gaza strip, while in the West Bank Palestinians hijacked and set fire to an Israeli bus, Palestinian and army sources said.

The body of Seis Eldein El Khuds, 40, suspected of collaborating with Israeli authorities, was found on the main street of the Bureij refugee camp in Gaza, Palestinian sources said.

In the West Bank city of Nablus, two masked Palestinians carrying knives forced an Israeli-Arab bus driver to turn onto a side road, ordered him and his Palestinian passengers to leave the bus and set it on fire, the sources said.

About an hour after the attack, in which no one was injured, the army closed off the area around the bus and searched for suspects. No arrests

were made, the sources said.

Late Thursday night the army sealed four homes of Palestinians suspected of setting fire to two buses carrying Palestinian workers to Israel last month, army and Palestinian sources said.

Thousands of Palestinians living in the occupied territories are bused daily to their jobs in Israel. Throughout the more than 2-year-old Palestinian uprising against Israel's occupation, Palestinian activists have attempted to stop the flow of Palestinian workers into Israel.

The four Palestinians, who lived in the West Bank Village of Silat El Harithiya, were also suspected of attacking Palestinians suspected of collaborating with Israel, the sources said.

Also in the West Bank Friday, soldiers shot and injured four Palestinians in clashes that broke out in Nablus and a nearby village after Moslem residents left Sabbath services held in local mosques, Palestinian sources said.

In the occupied Gaza Strip, during clashes between soldiers and Palestinians after Friday's religious services ended, five Palestinians were shot and injured, the sources said.

The army, however, reported no clashes or injuries Friday in the occupied West Bank and Gaza Stip.

Israeli authorities prevented several prominant Gaza residents from going to Egypt Friday to attend the Palestinian Cultural Festival that began in Cairo on Wednesday, Palestinian sources said.

Assad Saftawi, considered a candidate for the Palestinian delegation that is to meet with Israel as part of U.S. Secretary of State James Baker's five-point peace plan, was one of those prevented by the army from leaving Gaza for Egypt Friday, the sources said.

#90012u1426 01/12/1990 ~United Press International

JOHANNESBURG (JAN. 12) UPI - Factional fighting flared in the coastal province of Natal Friday, leaving 13 women and children dead in an arson attack on houses in a black squatter settlement, police said.

The incident occurred in the settlement of Cottonlands near the Indian township of Verulam, 15 miles north of Durban, an official police report said. Nearby Indian residents said they feared becoming involved in the fighting.

Six boys, four girls and three women died when their houses were torched in fighting between the conservative Zulu tribal organization of Inkatha and the more radical anti-apartheid umbrella United Democratic Front.

A local businessman, who declined to be named, said three houses had been burned down and one man had his hands chopped off with a machete.

People in the area were armed with homemade firearms, he said.

''This place is terrible. There is fighting between Inkatha and the UDF, and the blacks are turning on the Indians,'' said an Indian resident.

''I think it is time for us to leave,'' he said, recalling a bloody anti-Indian riot by blacks in Durban in 1949, when 142 were killed and over 1,000 injured.

Internecine strife between Zulu Chief Mangosuthu Buthelezi's Inkatha and the UDF, which began in September 1987, has claimed the lives of around 2,000 people.

The violence is exacerbated by competition for work and scarce resources between established urban dwellers and new arrivals from the countryside who establish squatter settlements on the outskirts of black townships.

#90012u1430 01/12/1990 ~United Press International

PARIS (JAN. 12) UPI - Syria Friday expelled French Nazi hunter Serge Klarsfeld after he tried to demand the extradition to France of former Nazi Alois Brunner to face charges for crimes committed during World War II, Klarsfield's wife said.

Beate Klarsfeld told reporters Klarsfeld had hoped to obtain a hearing from Syrian President Hafez Assad after he obtained a business visa from the Syrian embassy in Paris and flew to Damascus.

But Syrian authorities decided to expel Klarsfeld after he applied for permission to organize a public conference on the theme of Nazi war criminals such as Brunner, the right hand man of Nazi SS Chief Adolf Eichmann, who have obtained protection from Third World governments.

France last year joined other European nations in formally asking Syria for the extradition of the fugitive Brunner, who is accused of helping deport 100,000 Jews from France, Austria, Greece and Czechoslovakia to death camps.

Klarsfeld's letter to Assad, which he was not allowed to deliver, called on him to ''make a gesture of good will'' by allowing Brunner, now 78, to

be tried.

Klarsfeld says Brunner lives with police protection in the Abu Rumaneh district of Damascus under the name George Fischer. Syria insists Brunner is not in the country.

In 1981, he lost four fingers when someone sent him a one pound parcel bomb from Vienna. Fischer sometimes tells his neighbors he used to train German shepherd dogs for the Syrian army and that he instructed the Syrian security apparatus of President Amin Hafez in interrogation techniques.

Klarsfeld traveled to Damascus in 1982 to publicize his contention that Fischer is Brunner but he arrived without a visa and was turned back at the airport.

This time he was kept incommunicado in his hotel for two days before Syrian police arrived early Friday and took him to the airport, his wife said.

#90012u1442 01/12/1990 ~United Press International

BANGKOK, Thailand (JAN. 12) UPI - A Thai army helicopter crashed in a rainstorm Friday in southern Thailand, killing all nine people aboard including a senior general, officials and army television reported.

Army television said the U.S.-made Bell helicopter crashed in a rainstorm in Nakhon Sri Thammarat 490 miles south of Bangkok.

''The bodies of the nine people on board have been found,'' the television report said.

Among the dead Lt. Gen. Yutthana Yaemphan, commander of Thailand's southern military region, and his wife, it said.

Yutthana, as chief of one of the country's four military regions, has played a role in combating Moslem separatist guerrillas and in arranging a political settlement with Communist forces in the south.

Officials in Nakhon Sri Thammarat said the aircraft lost contact with ground officers only 10 minutes after takeoff.

''Acting on information from local people who reported hearing an

explosion, local policemen and soldiers searched Khiam Mountain'' where the wreckage was found, the television report said.

The Aviation Department said the helicopter was a Bell-212 operated by the Thai army.

It said there was heavy rain in the area at the time of the crash.

Pitak Chailikit, an official of Air Safety Division, said the helicopter had been headed for Surat Thani provincial airport about 90 miles from Nakhon Sri Thammarat.

#90012u1461 01/12/1990 ~United Press International

(JAN. 12) UPI - TODAY'S PEOPLE:

BARBARA FINISHES RADIATION: Barbara Bush has finished her 10 radiation treatments on her eyes but doctors say it will be two or three months before they can determine how effective the therapy was. ''She's fine,'' said Anna Perez, the first lady's press secretary. The first lady has been suffering for a year from Graves' disease, a thyroid ailment, which has caused bloodshot watery eyes and double vision. She began a series of radiation treatments at Walter Reed Army Medical Center on Jan. 3 when daily steroid doses did not heal the condition and caused side effects such as a fluctuation in her weight.

MIKE AND HIS MOVIE: Mike Moore, who premiered his controversial film ''Roger & Me'' in Detroit Thursday night, says it's ironic that Warner Bros. is distributing the movie. ''Here we have the largest media congolmerate distributing an anti-corporate film,'' Moore said. ''That's because they think they are going to make money.'' The documentary shows how General Motors' layoffs hurt Moore's hometown, Flint, Mich., and takes a mocking approach to GM Chairman Roger Smith. ''The vast number of people are sick and tired of what's going on,'' Moore said. ''After 10 years of Reagan and Bush, people are working harder to earn less. People must become interested in relevant issues. Otherwise you won't see 'Roger & Me' on the screen three weeks from now. It will be over.'' But if the film succeeds, Moore says, it will be ''GM's worst nightmare come true.''

UNIQUE SALUTE TO KING: The nation's capital got a sneak preview Thursday night of an original ballet-documentary film on the life of Martin Luther King Jr., produced by photographer, writer and director Gordon Parks. Several hundred guests, including Parks, Martin Luther King III and Sen. Nancy Kassebaum, R-Kan., were on hand at The National Gallery to view the hourlong film ''Martin,'' which will be broadcast over most PBS stations on Monday, the national holiday honoring the slain civil rights leader. ''My father, had he lived, would have been 61 on Monday,'' King III said.

''When I think of all the tributes that have been done, this is a unique and special tribute. A ballet is non-violent and graceful.'' Parks, 78, who said he had the idea for the work 20 years ago, received a standing ovation and he tearfully thanked those attending. ''I don't know whether you noticed or not but I'm blushing,'' he said. ''It's very nice of all of you to come. My doctors came in case I collapse, two of my ex-wives are here ... everybody's here.''

GLIMPSES: The 23rd annual Polish Winter Festival starting Thursday in Kiamesha Lake, N.Y., will include a Lech Walesa look-alike contest. The winner gets a free round trip to Poland ... Lucie Arnaz says her father, Desi Arnaz, was the funny one in the family - not her mother, Lucille Ball. ''As far as doing the physical stuff, she was the queen,'' Lucie says in an interview that will air on ''The Joan Rivers Show'' Monday, ''but I get my humor from my dad. He's a naturally funny kind of guy ... so that's kind of depressing that he ended up a drunk.'' Lucie describes Lucy as a ''control freak'' who ''had to be in charge 24 hours a day.''

-30- 3377

#90012u1491 01/12/1990 ~United Press International

MIAMI (JAN. 12) UPI - A lawyer for a co-defendant in the drug-trafficking case of deposed Panamanian dictator Manuel Antonio Noriega was attacked Friday outside his home by a man with a crowbar.

Meanwhile, lawyers met in a closed hearing before U.S. district Judge William Hoeveler Friday to discuss a government bid to move the former strongman from a holding cell in the federal courthouse. But because of a gag order issued by Hoeveler, none of those attending the meeting would discuss it.

Also, one of Noriega's attorneys said he had hired a prominent New York criminal defense lawyer to help with the case.

Michael O'Kane, who represents Noriega co-defendant Daniel Miranda, said he was attacked by a man who had been hiding in the bushes in front of his Miami home. He said he did not think the man was trying to rob him.

''I was carrying some papers, this (brief)case, some keys and portable telephone, and he did not steal anything,'' O'Kane said. ''He had his hand raised from the moment I saw him in the bushes. There was no attempt to steal anything.''

O'Kane was on his way to a bond hearing for his client when the man hit him in the head with a 1-foot-long crowbar wrapped with duct tape, he said. He and a motorist chased the man and then called police.

A police spokeswoman said detectives were questioning an unidentified

suspect but no charges had been filed.

O'Kane said he did not know whether the attack was related to his role in the Noriega case.

''I don't know why it happened. I just think it's not a usual thing - you walk out of your house and get hit in the head,'' O'Kane said. ''If someone feels they can get back at Noriega by attacking the lawyers for his co-defendants, then that is a misguided effort that will not help.''

O'Kane, wrapped in a bandage and bearing a cut on his head, eventually showed up in court and successfully argued that Miranda should be granted bond.

U.S. Magistrate Peter Palermo set bond for Miranda at $1 million, including a $100,000 property bond and the rest in cash. Miranda, a pilot, is charged with flying $800,000 in drug profits from the United States to Panama.

Miranda, one of 15 people indicted on drug charges with Noriega in Miami in 1988, remained in jail, pending an appeal of the bond by prosecutors, who argued that the defendant would be at high risk to flee and a danger to the community. No date was set for the appeal hearing, which would be before Hoeveler.

Because of the gag order, it was uncertain Friday afternoon whether Hoeveler had decided to allow federal officials to move Noriega from south Florida.

Defense attorney Frank Rubino would not answer questions about the hearing but did say he had hired David Lewis, whose specialities include secret document acquisition, to help with Noriega's defense. He said he planned to hire between four and six of the nation's top defense lawyers.

During an earlier court hearing involving Noriega's housing situation, U.S. Attorney Dexter Lehtinen said U.S. marshals would probably want to move Noriega to a more secure prison.

Federal authorities reportedly favor moving Noriega to the federal prison in Atlanta because it is the closest high security prison to Miami.

Rubino said earlier he would object to moving Noriega because it would make it difficult to meet with his client.

Noriega has been held in an underground cell known as the ''submarine'' since he arrived in Miami Jan. 4. He surrendered to U.S. forces in Panama Jan. 3, 10 days after he took refuge in the Vatican Embassy in Panama City following the U.S. invasion of the Central American nation.

Noriega and 15 others were charged in a 12-count drug trafficking indictment returned Feb. 4, 1988, by a federal grand jury in Miami. If convicted, Noriega faces a maximum penalty of 145 years in prison and $1.1 million in fines.

He was indicted the same day by a grand jury in Tampa with two others for allegedly arranging to smuggle nearly a million pounds of marijuana into the United States from 1982 to 1984.

In a private hearing Thursday, the government raised the issue of national security for the first time in the case against Noriega and asked that O'Kane be discipline for revealing classified information, the lawyer said.

Government attorneys claimed O'Kane compromised government secrets in a motion filed Monday on behalf Miranda that included a map of a National Security Agency listening post in Panama City known as ''The Tunnel.''

O'Kane told Hoeveler he took the map from a Panama City phone book. The judge took no action against O'Kane.

DETROIT (JAN. 12) UPI - General Motors Corp.'s top management, faced with the prospects of severe competition and profit pressures in the early 1990s, is once again calling for massive spending cuts on a wide range of fronts - including incentives for salaried workers to retire or quit early.

GM spokesman Terrence Sullivan said Friday such initiatives were under way, but declined to identify how much money the giant automaker has targeted in savings. Published reports said GM is aiming at reducing its North American operating budgets by at least $1 billion this year.

"This is an added intensity to accelerate the reduction of our short- and long-term cost objectives," Sullivan said. "After looking at our sales last year and our future outlook, there is a realization ... that we better get more aggressive in our cost efforts."

GM saw its share of the total U.S. vehicle market dwindle to 34.6 percent last year despite spending $40 billion in modernization programs during the decade. Sullivan said that part of the initiative would involve white-collar staff reductions that are to start March 1.

Selected workers under 53 years of age will be offered, by mutual consent only, bonuses to quit GM early under a program that ends June 30. Workers over 53 will be offered similar incentives from April 1 to Sept. 1, he said.

"We haven't really done anything like this since 1988," he said. "So there may be some people who find this of interest, as long as it is mutually agreeable."

GM would also restrict new hiring to those with key technical skills, Sullivan said. GM currently has about 107,000 salaried workers in its North American operations. Company executives said last fall they hoped to reduce GM's U.S. salaried work force by about 25 percent during the next five years.

However, GM chairman Roger Smith said at the time any jobs reductions would be made largely through attrition. GM is also looking for ways to slash costs in other areas, like travel expenses and advertising budgets, which Sullivan called "discretionary" areas.

But a more critical area is new products, some of which have been delayed nearly two years, like the replacement for the Chevrolet Camaro and Firebird cars until mid-1993.

Sullivan stressed that no product programs that the company considers critical to GM's future are being adversely affected. "But there are some areas where you can defer or re-time things," he said.

GM, like other U.S. automakers, has been forced to idle several car and truck assembly plants during January and part of February to trim bloated stocks of unsold vehicles.

The sharp decline in production is likely to cut into overall profits for the quarter despite a strong performance by GM's overseas operations and its non-automotive subsidiaries. Also in jeopardy are GM's cash reserves, which as of Sept. 30 stood at $9.1 billion, down more than $1 billion from the end of 1988.

There were reports that with only eight months before the expiration of its national labor agreement with the United Auto Workers union Sept. 14, GM did not want to get caught with a revenue shortfall if negotiations collapse and a strike occurs. In that case, GM could be faced with weeks or months of no income from its U.S. vehicle operations.

WASHINGTON (JAN. 12) UPI - Rates for 30-year fixed mortgages fell 0.03 percentage points this week while adjustable-rate mortgages rose by 0.06 percentage points, the Federal Home Loan Mortgage Corp. said Friday.

The agency, which buys mortgages from lenders and packages them as securities for sale to investors, said interest on fixed-rate loans fell to 9.80 percent this week, from 9.83 percent the week before. Adjustable-rate mortgages averaged 8.41 percent, up from 8.35 percent last week.

The fixed-rate average is for a 30-year loan covering 80 percent of a home's cost. The average adjustable-rate mortgage also is for 30 years but for 75 percent of the home price.

#90012u1559 01/12/1990 ~United Press International
WASHINGTON (JAN. 12) UPI - U.S. and Soviet officials said Friday they have agreed to pursue seven new joint environmental research projects, including studies of ozone depletion in the Arctic, climate change and radioactive contamination from the Chernobyl nuclear plant accident.

At a news conference ending a three-day meeting with Environmental Protection Agency officials, Soviet environmental officials also provided a rare glimpse of the massive pollution problems facing their nation, as detailed in the Soviets' first-ever government report on the state of their environment.

In compiling the unprecedented report - which they gave to U.S. officials - Soviet officials said they learned 103 of their cities had intermittent air pollution levels 10 times higher than government health limits.

They said 68 cities had ''rather steady'' air pollution violations that were prompting emergency efforts by the government to reduce harmful emissions.

As in many U.S. cities, the Soviets said automobile exhaust - not industrial emissions - was the primary cause of air pollution.

The Soviets said their automobile pollution was especially worrisome because their cars run on leaded gasoline and thus emit high levels of the toxic metal. They said the Soviet government was working on a crash effort to ban use of leaded gasoline by 1996 or 1998. The United States already

has largely phased out leaded gasoline.

The Soviets also briefly alluded to severe shortages of drinking water around the Aral Sea, saying supplies were being pumped in to that region from far away. The Aral Sea has been greatly depleted by intensive agricultural irrigation over many years.

Soviet officials said there also were serious water contamination concerns in the region around the Chernobyl nuclear plant, which released massive amounts of radioactive material in the 1986 accident that destroyed the facility.

In addition to government officials, the Soviet delegation included leaders of citizen environmental groups, who strongly emphasized their independence from the government, saying they worked with state agencies on pollution problems, but also expressed their own opinions.

One citizen activist, Maria Cherkasova, secretary of the Socio-Ecological Union, said the meeting with EPA officials left her with the feeling that American authorities did not fully appreciate the seriousness of the Chernobyl accident.

''Even now, the American side does not realize the full extent of the tragedy,'' she said through an interpreter.

One of the new U.S.-Soviet research projects will examine the impact of radioactive contamination from Chernobyl on marine life in the northern Black Sea, which receives most of the runoff from the region around the nuclear plant.

Robert Dyer, an official in the EPA's Office of Air and Radiation, said the project would examine sublethal effects of radioactive contamination - such as genetic damage - on aquatic micro-organisms. Dyer said the project was the first joint U.S.-Soviet research effort focusing on environmental effects of radioactive pollution.

The other new U.S.-Soviet research projects include joint evaluation of ozone levels over the Arctic; study of permafrost and other aspects of Arctic ecology; increased cooperation on monitoring of pollutants linked with global warming; wetlands management; historic preservation; earthquake detection.

The meeting marked the 12th time U.S. and Soviet environmental officials have gotten together to review implementation of a 1972 agreement signed by President Richard Nixon and General Secretary Leonid Brezhnev in which the two countries pledged to cooperate in 12 areas of environmental concern.

Altogether, U.S. and Soviet scientists are now pursuing 45 joint environmental research projects.

SEATTLE (JAN. 12) UPI - Dale Ellis, the Seattle SuperSonics leading scorer, was arrested for alleged drunken driving after a one-car accident early Friday left him with two broken ribs and a collapsed lung.

A team spokesman said Ellis, who scored 29 points Thursday in a 98-87 victory over Dallas, will be sidelined indefinitely.

Lt. Hans Kwast of the Washington State Patrol said following the investigation of the 2 a.m. accident in downtown Seattle, Ellis was arrested on charges of driving while intoxicated and reckless driving.

In Washington, drunken driving carries a maximum penalty of one year in jail and a $1,000 fine, and a minimum penalty of one day in jail and $250 in fines, plus court costs.

The State Patrol reported the accident occurred as Ellis was driving from Mercer Street onto the Interstate 5 northbound on-ramp. His 1989 Mercedes Benz hit a metal barrier separating the main lanes from the express lanes, swerved into the express lane and hit a wood and metal control arm.

Ellis, 29, suffered a collapsed lung and had blood in his lung, the State Patrol said. A nursing supervisor at Harborview Medical Center said Ellis in satisfactory condition Friday morning.

A patrolman reported Ellis was not wearing a seatbelt at the time of the accident, which caused an estimated $20,000 in damage to his car.

Coach Bernie Bickerstaff and Sonics President Bob Whitsitt declined comment on the latest in a string of problems for Ellis.

Last June Ellis was fined $346 and placed on informal probation for a year after being found guilty of assaulting his wife and resisting arrest during a domestic dispute Jan. 8, 1989.

According to King County records, Ellis also has had at least nine moving violations in the past three years, including three for speeding.

Ellis scored 11 points during the winning stretch over the Mavericks Thursday. He hit 7 of 10 shots in the second half. In the first half, the Sonics shot just 35 percent from the field.

''I don't have an explanation for first half,'' Ellis said after the game.

''We had the shots, we just weren't getting them down. The defense got us back in the game. We wanted to pick up the tempo to start the fourth, and it worked.''

Earlier in the week, Ellis was ejected during road losses to Dallas and Houston.

EDISON, NJ (JAN. 12) UPI - A comatose woman whose abortion became the focus of a bitter fight between her family and abortion opponents is now able to talk, and her physician said Friday the procedure may have quickened her recovery.

Nancy Klein, 32 of Long Island, underwent the abortion in a desperate bid to improve her chances of recovering from a coma following a car accident.

''I think it (the abortion) certainly helped facilitate her recovery and her rehabilitation,'' Dr. Caroline McCagg, medical director of the Center for Head Injuries at the Robert Wood Johnson Jr. Rehabilitation Institute, said.

She said Klein is able to feed herself, move around in her wheelchair and recognizes family members.

''This is a long slow process,'' McCagg said. ''But what's nice about her progress is that although it's been slow, it's been very steady.

''She is a very stubborn, a very gutsy gal and she is pushing very hard to get better,'' McCagg said. ''Her big goal is to get home and so anything that's related to getting home she will hang in there and do.''

Klein lapsed into a coma after suffering brain damage in a car accident on Long Island Dec. 13, 1988.

Doctors determined an abortion would greatly improve her chances of

recovery, but abortion foes launched a bitter legal battle in an attempt to gain guardianship over Klein and the fetus to stop the operation.

Anti-abortion activists took the matter to the state Court of Appeals. The state's highest court, however, sided with Klein's husband, Martin, and ruled doctors could perform the abortion.

The U.S. Supreme Court refused to hear the case.

After the Feb. 11 abortspital in Manhasset, Nancy Klein was transferred to the rehabilitation center.

#90012u1600 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - The FBI, accused for years of widespread discrimination against its women and minority employees, quietly negotiated three out-of-court settlements with black workers who filed bias suits, the Justice Department said Friday.

The negotiations were handled by the FBI. Attorney General Dick Thornburgh was notified but was not involved in the deals, Thornburgh's spokesman told reporters.

Although three cases were settled, the FBI has not made a deal in a fourth major lawsuit - by Donald Rochon, a black FBI agent in Chicago.

The FBI is responsible for investigating the nation's civil rights laws, but it has been accused for years of sexual and racial harassment of its own female and minority employees.

$A federal judge in Texas found in 1988 that the bureau systematically discriminated against Hispanic employees in promotions and assignments.

The three settlements involve:

-Leadell Lee, a black agent in Chicago who has worked for the FBI for 17 years and is now assigned to the Riverside, Calif., office.

-Gertie Mae Armstrong, a clerical worker in the agency's Omaha office who was allowed to transfer to an FBI office near Dayton, Ohio, her childhood home.

-A case brought by a group of employees in the FBI's identification division in Washington, which oversees the agency's library of fingerprints.

In each case, few details were available because part of the settlements

prohibited discussion of the deals. The FBI refused to discuss the cases.

Rep. Don Edwards, D-Calif., said he was glad the FBI settled the three cases but now should negotiate a deal with Rochon, the Chicago agent whose allegations of serious harassment has made him a symbol of discrimation problems at the federal agency.

Rochon's charges have been partly upheld during various administrative inquiries. He said he has been harassed by white agents in the Chicago office and death threats were made against his family.

Significantly, both Lee and Armstrong worked with Rochon and Armstrong told a reporter she strongly supports the discrimination allegations contained in Rochon's suit.

The FBI issued a terse statement Friday saying it could not comment on individual cases but ''there is no trend of settling cases to avoid litigation of discrimination claims or for any other reason.''

-30- 2563

#90012u1602 01/12/1990 ~United Press International

CHICAGO (JAN. 12) UPI - Directors of UAL Corp., parent of United Airlines, ordered Chairman Stephen Wolf to distance himself from negotiations on a new employee-led buyout because he was "more of a hindrance than a help," a source close to the board said Friday.

Directors Thursday instructed Wolf to step aside and let UAL's legal advisers, the New York law firm of Davis, Polk & Wardwell, and its financial advisers, First Boston Corp., to take charge of the negotiations.

The source said the company's largest union, the International Association of Machinists, apparently was "unwilling or unable" to work with Wolf. Union officials, however, could not be reached for comment Friday.

The IAM demanded Wolf's resignation and called for an investigation of his actions following the collapse last October of a $6.75 billion, $300 a share employee-led buyout bid, which would have given employees a 75 percent stake in the company. Wolf and a group of senior UAL managers also took part in the bid, which would have given them a ten percent stake in UAL.

IAM opposition was regarded as one of the major factors in the failure of that deal, which collapsed for lack of financing. Wolf also was reported to have problems with the Air Line Pilots Association. The pilots' union has been pushing for an employee buyout of UAL for more than two years and took the lead in failed $6.75 billion takeover plan.

"Wolf was becoming an issue," the source said."He was becoming more of a hindrance than a help in the negotiating process."

Fred Dubinsky, head of United's ALPA chapter, complained that Wolf was demanding too much from the union. An ALPA spokesman said Wolf was seeking as much money for the pilots for the new buyout plan as he had for the $6.75 billion, $300 a share proposal. The union spokesman would not say what price was being considered for a new bid, but it is widely rumored to be between $225 and $240 a share.

The ALPA spokesman said Wolf and Dubinsky have not spoken since before Thanksgiving and there have been no substantive negotiations on a new buyout proposal since before Christmas.

Wolf Thursday sought to rally employees to work out a buyout plan and avert imposition of a recapitalization plan sought by an investment firm that has threatened to seize control of the UAL board.

"If we allow the ... imposed recapitalization to go forward and the balance sheet to become highly leveraged, we will not be able to fund our growth plans," Wolf said in a letter to employees.

"If we are forced into a leveraged recapitalization, our financial position will change from our being a high-cost carrier with a strong balance sheet to a high-cost carrier with a weak balance sheet and high interest. In short, the worst of all worlds," he wrote.

Wolf met with a group representing non-union employees to discuss their possible role in a new buyout bid.

A UAL spokeswoman refused to comment on Wolf's letter and the new effort to work out an employee-led buyout. She also declined comment on the the board's order that Wolf to remove himself from negogitations with the unions.

A standoff between ALPA and the IAM has been the main stumbling block in efforts to draft a new employee-led buyout. The standoff has prompted the UAL board to instruct the company's financial advisers to draft a recapitalization plan for consideration at a Jan. 25 board meeting.

Condor Partners, a New York investment group that controls 11.8 percent of UAL stock, had threatened to mount a campaign to seize control of the UAL board of directors if UAL directors failed to find a buyer or begin pursuing a recapitalization by Jan. 8.

With no bid on the table Monday, UAL directors held a telephone conference and agreed to instruct First Boston to draft a recapitalization plan.

#90012u1619 01/12/1990 ~United Press International

BOSTON (JAN. 12) UPI - A grand jury probing the Carol Stuart murder met Friday in its first session since her husband jumped to his death from a bridge into Boston harbor Jan. 4 as his elaborate robbery hoax unraveled.

District Attorney Newman Flanagan, who convened the special panel Nov. 15, said it may take weeks or months for the panel to review the case fully and pinpoint a motive.

Investigators believe Charles Stuart shot his pregnant wife in the head, killing her, and it would turn out, their unborn son, and shot himslf in the stomach to hide the Oct. 23, 1989 crime.

He then made a call for help over his car phone that was recorded on a police emergency line and drew the nation's sympathy with his tale of being robbed and shot by a black man, a lie that heightened Boston's inner city tensions.

Authorities are investigating evidence that Stuart committed the murder in order to collect $660 thousand in insurance he had taken out on his wife's life, money he reportedly intended to use to buy a restaurant.

The Boston Globe has reported that Stuart was about to receive a check for $480,000 from the Prudential Insurance Co., and held two other policies totalling $180,000.

While neither Flanagan nor his aides would comment on the specifics of the secret grand jury proceedings, those waiting in his office Friday to testify before the panel included state police civilian dispatcher Gary McLaughlin, who fielded the 911 call and launched a frantic search to find the Stuart car. Also present were Carol Stuart's brother, Carl DiMaiti; and an unidentified childhood friend who Stuart reportedly asked to help kill his wife weeks before the shooting.

As he left the courthouse, McLaughlin refused to say what he told the grand jury. He told reporters that in retrospect, he had no reason to be suspicious of Stuart's conversation with him the night of the killing.

The panel also is expected to consider the roles of Charles Stuart's youngest brother, Matthew, and a friend, John McMahon of Revere. Matthew Stuart has told police he met his brother in Boston's Mission Hill neighborhood the night of the killing, and Charles tossed him a bag containing a handgun, Carol Stuart's handbag and jewelry. McMahon was with him in the car.

On Thursday, a lawyer for another brother, Michael Stuart, told reporters that Charles Stuart tried last fall to draw Michael and Matthew into his murder scheme. Lawyer Richard Clayman said Michael did not take the conversation seriously.

Matthew Stuart went to police on Jan. 2 and told them of Charles was the perpetrator - not a victim - of the crime. He said he did so after his brother had identified a black man, Willie Bennett, as the assailant in a Dec. 28 police lineup.

Following his brother's revelations, police sought to arrest Charles Stuart, but he jumped from the Tobin Bridge over Boston Harbor to his death the following morning.

Also on Friday, police divers searched again in the Pines River in Revere for Charles Stuart's watch and ruby ring, believed tossed into the water on the night of Oct. 23 by Matthew Stuart. Earlier divers recovered Carol Stuart's handbag, some personal items including makeup, and the handgun believed used in the crime.

RICHMOND, VA (JAN. 12) UPI - Douglas Wilder, grandson of slaves and one-time political maverick, was poised Friday to take office as the nation's first elected black governor and claim his place as the leader of Virginia's ''new mainstream.''

Democrat Wilder, 58, was scheduled to take the oath of office from retired Supreme Court Justice Lewis Powell at noon Saturday during a ceremony on the State Capitol grounds.

Donald Beyer, a Northern Virginia car dealer and political novice who defeated the widow of a popular Republican governor, will be inaugurated as lieutenant governor. Attorney General Mary Sue Terry, also a Democrat, will be installed for a second term.

Wilder, whose razor-thin Nov. 7 victory over Republican Marshall Coleman prompted a recount that was resolved less than a month ago, led the third Democratic sweep of the state's top office in a decade.

Aided by his pro-choice stand on abortion, Wilder was considered the front-runner through much of the campaign, a sharp contrast to the underdog label he wore in 1985 when he was elected lieutenant governor.

His win in November made him the first black to win a governorship, although a black briefly served as Louisiana's governor during Reconstruction.

Once best known for shaking up the Virginia political establishment with his high-profile attempts to abolish the state song ''Carry Me Back to Old Virginia'' because of its references to slavery, Wilder has reshaped his political image over the past decade.

Wilder now basks in the moderate political climate established by former Gov. Charles Robb, now a U.S. senator, and outgoing Gov. Gerald Baliles. Despite Wilder's well publicized altercations with them, both Robb and Baliles have placed their imprimatur on Wilder and plan to attend the weekend festivities that are expected to attract 70,000 people from around the state and nation.

''I represent Virginia's new mainstream,'' Wilder declared during the campaign.

For weeks, the one-time Capital of the Confederacy has been abuzz with planning for the inaugural weekend - the most expensive in Virginia history - and speculation such entertainers as Bill Cosby and Barbra Streisand would appear. Wilder spokeswoman Laura Dillard said Friday she does not think either would attend, but said Jesse Jackson, who has been

invited, may be present.

In the wake of recent bombings linked to white supremist groups, police are also taking extra precautions, but authorities said Friday Wilder had not been threatened.

''The possibility of a bombing is always a concern, but there are no threats,'' said Maj. Howard Lang of the State Capitol Police. With the number of spectators expected to approach 20,000, Lang said, ''Crowd control is our biggest concern.''

He said bomb-sniffing dogs and a metal detector will be used to screen the thousands who plan to crowd onto Capitol Square.

Wilder was born in Richmond on Jan. 17, 1931, the next to youngest of eight children, and named for two famous black Americans, poet Paul Lawrence Dunbar and abolitionist Frederick Douglass.

Wilder's parents owned their own home and he has described his youth as one of genteel poverty.

After graduation from Virginia Union University in 1951, Wilder was drafted into the Army and sent to Korea, where he earned a Bronze Star.

On his return from the war, Wilder enrolled at Howard University Law School. After graduation, he returned to his hometown to set up a law practice.

He was first elected to public office in 1969, breaking the color barrier in the Virginia Senate.

(JAN. 12) UPI - 20 huge C-141 transport planes flying in a ''V'' formation streaked over Fort Bragg, North Carolina, this morning and the sky soon filled with two-thousand paratroopers of the 82nd Airborne Division. It was the largest mass return yet of troops from the invasion of Panama. Cheering relatives greeted the troops when they floated to Earth... all two-thousand landing within a 15-minute period.

East German Prime Minister Hans Modrow says a plan to form a new internal security force is being scrapped. Thousands of East Germans and horn-honking cabbies demonstrated outside parliament to protest the plan. Modrow announced the change before the People's Chamber. The feared State Security Service was disbanded in the democratic reforms that swept East Germany.

Retail sales advanced only two-tenths of one percent last month, despite the holiday season. The sales advance was held down because of auto sales, which fell seven-tenths of one percent during December. Excluding the cars retail sales rose four-tenths of one percent. The government says retail sales in the fourth quarter of 1989 rose three-point-six percent above the same quarter the year before.

A Labor Department reports shows that wholesale prices were up seven-tenths of one percent in December, after a decline the month before. Analysts had expected producer prices to rise only four-tenths of one percent during the month. The Producer Price Index for finished goods is the government bellwether for future consumer prices.

(JAN. 12) UPI - President Busy is flying to Cincinnati today in his continuing campaign to push Congress for action on his legislative package. First, Bush will extol the benefits of an education in visits with students at the Cincinnati Youth Collaborative and an assembly at Taft High School. This afternoon, he will address the Cincinnati Chamber of Commerce.

Chicago police are combing homeless shelters for a released mental patient suspected of killing her nine-year-old daughter and leaving behind a message written in blood. Police say Keisha Maxey was stabbed three times in the chest and left in an abandoned building. Police say that on the wall next to the child's body was a message scrawled in blood that read in part- ''The system or the powers of Satan, nothing can hurt her anymore.'' Police say the girl's mother, Brenda Maxey, was released this week from a mental hospital.

#90012u1713 01/12/1990 ~United Press International

NEW YORK (JAN. 12) UPI - A young doctor afflicted with AIDS was grilled relentlessly Friday as the defense tried to shake her story that she caught the disease by pricking her finger on a discarded hypodermic needle.

Taking the stand for the fourth day, Dr. Veronica Prego remained composed

as defense lawyer Stanley Friedman pelted her with question after question concerning the night she claims she contacted AIDS.

Prego's lawyer protested the questioning, calling it ''psychological torture.''

Prego, 32, is suing the city Health and Hospital Corporation and Kings County Hospital, as well as two doctors for negligence and breach of confidentiality. The $175 million suit contends that an intern left the needle infected with blood from an AIDS patient on a bed and that Prego pricked her finger on it.

Prego, who Thursday described a roster of illnesses that she had suffered since contracting the disease, Friday grew increasingly frustrated and tired on the stand as Friedman questioned her.

At one point the proceedings were interupted while Prego took scheduled medication.

Trying to prove her memory was faulty, Friedman grilled Prego on the makeup of the room, and the various instruments and materials used in the blood draw.

''What did you see beside gauze pads?'' Friedman asked.

''I don't recall specifically,'' she answered.

''What does that mean specifically?'' Friedman shot back. ''Does that mean that you don't recall at all?''

Friedman said he hopes to prove that Prego herself drew the blood from the AIDS infected patient, not Dr. Joyce Fogel, as Prego contends.

Friedman's questioning also brought up the idea that even if Fogel drew the blood, Prego might have taken the needle from her while she was assisting her and left it carelessly on the bed herself.

''I believe she was careless in picking up her own debris,'' Friedman said later.

Though she tired on the stand, Prego remained composed throughout the questioning and skillfully blocked Friedman's line of questioning a number of times.

Friedman himself admitted he was impressed.

''You saw her demeanor on the stand,'' he told reporters. ''She's a fighter.'' ''He's badgering her in a way I think amounts to

psychological torture,'' said Prego's lawyer Susan Karten outside the courtroom when the trial ajourned for the weekend.

But Friedman called those accusations ''unfair.''

''Let me tell you I'm not badgering her,'' Friedman said. ''I have a lot of compassion for this woman. I don't like the job I have but I have a job to do.''

#90012u1731 01/12/1990 ~United Press International

EAST PALO ALTO, CA (JAN. 12) UPI - Two attackers tried to firebomb the bullet-riddled home of a 60-year-old woman whose stubborn neighborhood anti-drug crusade has made her a target of drug pushers, the Guardian Angels said Friday.

The red-bereted group, which has begun a 24-hour protective watch on Clara Roddy, said two beer bottles filled with gasoline and plugged with cloth wicks were hurled at her home Thursday night.

Both of the Molotov cocktails hit the house but failed to ignite.

Guardian Angel Justin Van Zandt said he and other members of the anti-crime group were unable to catch two people seen running away from the back of the house.

''Thank God for the Guardian Angels,'' Roddy, a feisty retiree who has been punched, shot at and threatened by drug pushers, said. ''It's crazy around here, but I feel much safer with them out there.''

Roddy was not told about the firebombing attempt until Friday.

''I just want (people in) the neighborhood to know they can be free by their own choice,'' Roddy said. ''All they have to do is work together. When we see these drug deals, we should all band together and stop them.

Police announced they would make no further comments about Roddy's situation unless there was a significant break in the attacks against her.

''Some of these incidents may be copycat type of things,'' Sgt. Ron Sibley a police spokesman, said. ''We may be dealing with juveniles. It (news reports) may be helping to keep them going.''

The Guardian Angels set up a round-the-clock watch at Roddy's home on Thursday from a command post across the street. They said they would increase their patrols from 12 to as many as 20 members.

The besieged Roddy lives in one of the most notorious streets of violence-torn and drug-infested East Palo Alto, a low-income community of 18,000 south of San Francisco.

The beleaguered 30-man police force has stepped up its patrols in the neighborhood and 20 agents of the FBI went door-to-door this week seeking leads on a New Year's Day shooting attack on Roddy's home.

Her home was hit at least 35 times by semiautomatic gunfire as she was watching TV and a bullet grazed her stomach.

Roddy said drug dealers have also sent her sprawling on the sidwalk with a punch in the face, flattened her car tires, broken her windows and threatened to blow up her house and kill her 37-year-old son, Darnell.

Van Zandt said the bombing attempt appeared to be ''very amateurish.''

A nearly empty 2 1/2-gallon gas tank and some wicks were found nearby and taken away by police as evidence.

The attackers apparently practiced making the indendiary devices nearby

where broken glass littered the street and neighbors said they had seen fires.

The Guardians said they were there ''because it can't be open season on anti-drug crusaders.''

For the past two years, Roddy, a retired telephone company employee, has complained about neighborhood drug dealing to the police, the City Council and the San Mateo County Board of Supervisors.

Bullet holes now festoon her living room, furniture, bedroom, kitchen, bathroom and her car.

''My life just doesn't seem to be my own any more,'' said Roddy, who since the New Year's shooting attack has emerged as a symbol of crime resistance.

''I hope we can move them out or that they convert,'' Roddy said of the drug dealers. ''I hope they don't find another place in the United States to sell their drugs. They need to get an honest job.''

#90012u1770 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - Environmental groups accused the government Friday of failing to enforce the Great Lakes Water Quality Agreement and urged Congress to pass a bill that will reduce toxics entering the lakes.

Nine organizations, including the National Wildlife Federation and the Sierra Club, wrote a letter to Secretary of State James Baker and Environmental Protection Agency chief William Reilly asking that the State Department and the EPA review existing federal programs for compliance with the agreement.

The United States and Canada signed the agreement in 1972, and a renewal of the pact in 1978 recommended that ''the discharge of any or all persistent toxic substances be virtually eliminated.''

But environmental activists said America has not fulfilled its obligations and urged several reforms to vigorously enforce the agreement.

EPA officials had no immediate comment.

Legislation is pending in the Senate to include Great Lakes air toxics control as part of reauthorization of the Clean Air Act.

''If this (congressional) action is not taken, women in the Great Lakes region may never be able to safely nurse their children or eat a fish dinner without fear of deadly PCB poisoning,'' said Melanie Griffin, associate represenatative of the Sierra Club.

The National Wildlife Federation has warned people - particularly women who intend to have children, pregnant women, nursing mothers and children - to avoid certain species of sport fish from Lake Michigan because they contain contaminants from toxics that could result in developmental problems in the exposed fetus or children.

Griffin noted that while the water quality agreement calls for controls of air toxics that significantly contribute to Great Lakes pollution, the EPA has ''regulated only seven of the hundreds of toxic air pollutants'' during the past 20 years.

Griffin said overall, about 25 percent of toxics entering the Lakes come from the air, while over 90 percent of some toxics entering Lake Superior and Lake Heron come from the air.

Diane Cameron, an environmental engineer with the Natural Resources Defense Council, said the problem of ''poison run-off'' is exacerbated by developers being allowed to build close to the Great Lakes.

''We cannot hope to save the Great Lakes if we continue to build right up to the lakeshore and if we don't take other steps to stop this poison run-off,'' Cameron said.

(JAN. 12) UPI - The Columbia astronauts today captured a falling 11-ton science satellite with the shuttle's robot arm... capping a three-day orbital chase. The rescue saves the L-DEF from a fiery death in Earth's atmosphere. It marked NASA's first space salvage since 1985 and highlights the most daring shuttle flight yet attempted since before the Challenger disaster.

The Miami Herald says lawyers for former Panamanian strongman Manuel Noriega are meeting today to discuss government efforts to move the ousted dictator from a federal courthouse cell. Defense lawyer Frank Rubino says that if Noriega is moved from south Florida, it will be difficult to meet with his client. Noriega faces drug-trafficking charges.

Some two-thousand paratroopers from the 82nd Airborne put on a sky show this morning, floating to Earth in a colorful climax to their mission in Panama. About 20 C-141 transport planes streaked across the sky over Fort Bragg, North Carolina, in the largest return of U-S troops since the December 20th invasion that toppled Noriega's regime.

President Bush travels to Cincinnati, Ohio, today in a drive to press Congress into action on his legislative priorities. Bush took basically the same message to Orlando, Florida, earlier this week, campaigning for cuts in the capital gains tax... as well as pending measures on education, clean air and crime.

East German leader Hans Modrow bowed to opposition demands, abandoning plans for a new internal security force. Modrow says the now-dissolved State Security Service will NOT be replaced before May elections. The announcement is in line with the wishes of thousands of East Germans, who denounced the plan as a Communist Party bid to retain power.

#90012u1835 01/12/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 12) UPI - Interim President Ion Iliescu, bowing to demands of thousands of demonstrators, declared Friday the Communist Party was now ''outlawed'' in Romania.

Addressing an estimated 10,000 protesters massed outside the headquarters of the ruling National Salvation Front, Iliescu also said the government will hold a Jan. 28 referendum on whether to reinstate the death penalty for former members of ousted dictator Nicolae Ceausescu's security forces.

He said the front would also set up a special committee to deal with other demands raised by opposition groups since the front replaced Ceausescu's communist regime three weeks ago and executed the dictator and his wife.

''The Romanian Communist Party is outlawed,'' Iliescu said, reading an official decree to the crowd. He said the front decided to take the step ''because of the demands of the people'' and ''because the Romanian Communist Party was used by the dictatorship as an instrument agains the people.''

It was not immediately clear what effect the decree would have on current and former Communist Party members, including a number of officials in interim government. Iliescu himself is a former secretary of the Communist Party Central Committee.

Iliescu's unexpected decrees addressed three of the main demands raised by thousands of demonstrators during several rallies Friday in Bucharest. His announcement of the abolition of the Communist Party was met with wild cheering and chants of ''The Communist Party is dead.''

Ten thousand demonstrators massed outside the provisional government headquarters in Romania's largest demonstration since the overthrow of Ceausescu Dec. 22.

In a six-hour rally that often seemed as confused as it was passionate, the crowd shouted slogans for democracy but also chanted ''Death for death'' in calling for the execution of members of Ceausescu's secret police, accused of killing thousands of pro-democracy demonstrators.

At one point the crowd jeered and whistled at Iliescu, who warned that Romania's democratic revolution must not be allowed to slip into anarchy.

''We must prove that we can stay alive in democratic conditions. If not it's going to become a dictatorship again,'' he said, shouting to be heard above the din.

The demonstration climaxed a day of rallies and religious services honoring the thousands killed in last month's pro-democracy revolution.

Crowds attending the earlier rallies shouted anti-communist slogans and some burned Communist Party membership cards. At one ceremony hundreds of people marched on the Communist Party headquarters in Bucharest and began banging on the doors.

There were no reports of violence or arrests.

The rally at Bucharest's Victory Square, which faces the headquarters of the ruling National Salvation Front, began in the mid-afternoon and swelled to include about 10,000 people by 7 p.m. The demonstrators listened to dozens of speakers who led them chant after chant, including ''Down with communism,'' ''We are the People,'' ''Freedom,'' and ''Death for Death.''

Iliescu and other government officials who addressed the crowd were only able usually to say a few lines at a time before their voices were lost in the chanting.

At times other people who climbed on the tank used as a speaker's platform would snatch the mircrophone away to demand explanations for the officials' former links to the Communist Party.

Ceausescu was ousted Dec. 22 pro-democracy demonstrations and was executed along with his wife Christmas Day after a secret trial by a military tribunal.

Although the ruling National Salvation Front has repealed many of the most unpopular laws of the Ceausescu regime and has promised democratic elections in April, many Romanians distrust the new government because a number of its leaders are current or former members of the Communist Party.

In recent days more than 10,000 people have signed petitions in Bucharest calling for the removal of all communists from the government.

Earlier Friday at the Metropolie, the principle cathedral of the Romanian Orthodox church, about 500 people jammed the sanctuary and hundreds of others stood outside as a funeral mass was said.

Many wept openly and others lit candles and offered traditional gifts of bread and wine in honor of the dead.

A noon rally at University Square, in the heart of downtown Bucharest, drew an estimated 4,000 people and was equally somber for the first hour. Hundreds kneeled in dirty, two-week-old snow to pray while others stood in line to add to a huge bank of flowers and wreaths in the center of the plaza.

The mood shifted abruptly when an unidentified woman, standing near the flowers, shouted, ''Down with communism!'' and set fire to a Communist Party membership card.

Within seconds, dozens of others were doing the same, and the chanting began.

''We hate communists,'' went one chant. ''We are the people,'' ''Justice for the Securitate (secret police),'' and ''The revolution isn't over,'' were a few of the others.

When interim President Ion Iliescu appeared to place his wreath with the others, some in the crowd began jeering him while others greeted him with chants of ''Iliescu, Iliescu.''

Anti-communist chanting erupted at memorial rallies involving thousands of people at two other public squares in Bucharest.

At the Metropolie cathedral, the focus was on the healing the wounds of last month's fighting and on gratitude for the sacrifices of those who died.

A priest in the byzantine-style, 17th-century cathedral said those who died fighting the oppressive Ceausescu regime had ''sanctified our land'' with their blood.

''As Jesus sacrified himself for others, for the whole world, you have sacrificed yourselves for Romania,'' he said.

Mourners filled every seat and jammed the ailes and rear of the santuary, while hundreds of others stood outside. Many wept openly, while others sang along with the mournful chanting of the priests and choir.

At the back of the church a large table was piled high with bread, cakes, fruits, wine and even bottles of Pepsi-Cola, in keeping with the Romanian tradition of offering symbolic gifts of food for the dead.

Soldiers toting AK-47 assault rifles stood guard outside the church, and searched everyone entering the building for weapons.

In the middle of the service, a woman who had been standing in the courtyard began fighting her way through the crowd at the rear of the church, crying and demanding to be allowed inside.

''Am I not allowed to come to my own son's service?'' she said. ''My son is dead. I don't believe in anything anymore.''

#90012u1860 01/12/1990 ~United Press International

ANAHEIM, CA (JAN. 12) UPI - In the most aggressive expansion in its 35-year history, Disneyland unveiled a ten-year plan Friday to add a host of new attractions to the flagship of the Walt Disney Co.

"This is the '90s - the decade we re-invent Disneyland," Michael Eisner, company chairman and chief executive, declared at a news conference at the Disneyland Hotel, a quick monorail ride from the Magic Kingdom.

The ambitious Disneyland expansion plan calls for new attractions or elaborate stage productions to be introduced every year through 1996, and then again in 1999 with the opening of "Hollywoodland," a replica of Hollywood's golden age featuring four new attractions.

In addition, the Walt Disney Co. will build a second theme park - theme to be announced - either on property adjacent to Disneyland or in Long Beach, next to the Queen Mary. The plans involve the first major expansion of Disneyland since Bear Country, now called Critter Country, was added in 1972.

The renovated Disneyland might be unrecognizable to founder Walt Disney, who built the original park in 1955 as a showcase for his animated characters. "Walt Disney loved Disneyland because you could keep playing with it," Eisner said. "He knew it would never be completed as long as there's imagination left in the world."

Eisner would not divulge the total cost, but said the new theme park alone would probably reach up to $1 billion. "I can tell you the total cost is slightly less than the national debt and a lot more fun to think about," he said.

Plans are also in the works for expanding Disney World and Epcot Center as well as doubling the size of the recently opened Disney-MGM Studios park and adding new resort hotels, all in Orlando, Fla. "If those aren't good reasons to be a kid in the '90s, I don't know what are," he said.

The "Disney decade" will also see the opening of the first Disneyland in Europe, outside Paris, in 1992, and the expansion of the successful Tokyo Disneyland, Eisner said. "When we reach the end of this decade of expansion, we expect our theme parks and resorts worldwide to approach 100 million guests annually," he said.

While Mickey Mouse will remain Disneyland's star attraction, the thrust of the park's renovation appears to be the permanent incorporation of recently successful movie characters into the traditional Disney family, including the Muppets, Indiana Jones and Roger Rabbit.

"With apologies to Donald Duck, Kermit may be the most beloved children's character since Mickey," he said, referring to the saucy Muppet character Kermit the Frog.

However, several of the proposed attractions center on the unreleased Walt Disney Pictures film "Dick Tracy," an action-adventure movie starring Warren Beatty and Madonna that is set to open this summer.

Eisner hinted the new "Dick Tracy" attractions could prove a bad gamble if the film is unsuccessful, but said the Disney Co. is hoping it will become as big a money-making hit as this year's "Batman" and will produce a sequel before 1999.

He said current plans are to tie in advertising for the film with the opening of a Dick Tracy stage show at Disneyland this summer. The Disneyland expansion plans also include:

- In 1991, the opening of a first new attraction, "The Young Indiana Jones Adventure Spectacular," produced in collaboration with George Lucas and based on the Steven Speilberg film "Indiana Jones and the Last Crusade." Also, the first introduction of the Muppets at the park with a new daily stage show and parade.

- In 1993, the year Mickey turns 65, Disneyland will salute him with a year-long party and a new four-acre area called "Mickey's Starland" that will also feature an underwater attraction based on the film "The Little Mermaid." Also, opening of a new 3-D Muppet film.

- In 1994, the opening of a completely renovated Tomorrowland that will include a "Star Wars" adventure produced by Lucas called "Alien Encounter"; a new sci-fi 3-D film to replace "Captain E-O"; and a new attraction, "Plectu's Fantastic Galactic Revue," to replace the "America

Sings" - all interconnected by new "Sky Walks" that will create a second story.

- In 1995, Disneyland's 40th anniversary, the park will feature a year-long event that has not been planned. "I haven't the foggiest idea how we will celebrate," Eisner said. "But expect something spectacular."

- In 1996, opening of "Dick Tracy's Crime Stoppers" in which guests act like movie extras chasing bad guys through a comic book set.

- In 1999, opening of "Hollywoodland," which will feature a Roger Rabbit-inspired area called "Toontown" and four new attractions.

(JAN. 12) UPI - Just one day after China ended martial law, leaders banned protests in the capital's main square and other areas of the city. The ban announced today comes as witnesses reported two people were arrested for trying to lay a wreath in Tiananmen Square in memory of those killed during the brutal military crackdown on pro-democracy protesters in June.

The F-B-I reportedly is investigating threatening letters sent to several Ohio judges, including members of the state Supreme Court. A Columbus newspaper quotes an F-B-I spokesman as saying all the letters contain threats, but the spokesman would NOT say whether they were death threats.

The F-B-I is taking the letters seriously because mail bombings in December killed a federal judge in Alabama and a civil rights lawyer in Georgia and injured a judge in Maryland. Ohio Supreme Court spokesman Harry Franken says it's NOT unusual to get threatening letters, but he says the deadly mail bombings ''alert everybody more than usual.''

Frustrated police in Homestead, Florida, are trying to solve the mysterious case of the biting bandit. Authorities say the robber has left his mark on his victims and taken cash, food stamps and jewelry from at least 10 people in the downtown area in the past 20 days. The suspect has bitten off the finger of a farm worker and the ear of a vagrant.

BY VERNON SCOTT

HOLLYWOOD (JAN. 12) UPI - Kyra Sedgwick, who plays the fiery activist Donna opposite Tom Cruise in ''Born on the Fourth of July,'' gives her generation some high grades but mostly low marks when measured against the commitment of young people in the 1960s.

''Twenty years ago people my age (24) were more concerned about moral issues and humanity than they are today,'' she said. ''They believed they had the power to change things. I feel completely helpless and unable to change anything.

''I would love to have that passion and strong belief. They really did change things. They had a lot to do with stopping the Vietnam War. I believe that. I really do.

''They affected public opinion and forced government action.''

Sedgwick, the wife of actor Kevin Bacon and mother of a 1-year-old son, feels strongly about the ecology and environmental issues but laments the lack of passion for conservation among her peers.

''Young people are talking about becoming a less wasteful society and are more aware of how we're ruining the earth,'' she said, ''but there's still a feeling of helplessness.

''When Donna was growing up, John Kennedy and Martin Luther King were killed, and they were huge events. My generation isn't as shocked because everyone is being shot - the president, the pope. It doesn't mean anything to us.

''Political killings are not an out-of-the-ordinary thing, so my generation is less sensitive to that. We feel the bureaucracy has gotten so thick and the government so all-controlling that we've lost hope in believing we can change things.

''Yet I really think we are making a start about doing something about the key issue of the day - the environment.

''We are coming together, trying to shake up government policy. We are going to stop buying products that pollute the atmosphere. It means changing lifestyles in this country.''

Sedgwick said playing Donna developed her sense of awareness in the ability of ordinary citizens to make a difference in the conduct of their government.

''I learned a lot from Donna,'' she said. ''I had to convince myself that one young woman could change things. I had to instill that belief in myself before I could be convincing as Donna. Now I believe much more than I did.''

Unlike Donna, however, Sedgwick is not a political activist.

For one thing, she doesn't have the time. In addition to co-starring in ''Born on the Fourth of July,'' she recently completed playing the daughter of Paul Newman and Joanne Woodward in ''Mr. and Mrs. Bridge.''

When she isn't acting, Sedgwick accompanies her husband on his movie assignments. And, of course there is the baby to care for.

''I'm involved as deeply as I can be under the circumstances,'' she said. ''I've done some things for the Environmental Defense Fund and the Environmental Media Association.''

She believes if Donna were her age today she would be just as vociferous about environmental change as she was opposed to the Vietnam War.

''The people of her generation who are still around feel a little bruised

and battered, but they're still out there trying to make a difference,'' she said.

''Today's activists are not the same. They aren't into drugs like the activists of the '60s and '70s. They're more into physical fitness and health. I know I am.

''I like to think my generation is more thoughtful about planning for the future, that we're not just protesting but trying to find solutions to the problems we feel strongly about like abortion, AIDS and the ecology.

''There's no doubt I'm part of the yuppie generation. Nobody thinks of themselves as being yuppie, but I'm sure I am because I have all the things in life that define yuppies.

''I hope I have as much passion for issues as Donna did, but stopping a war is so much more tangible and dramatic. Her generation was baby boomers so it was a larger group. It gave them more power and strength.

''Donna's generation worried about nuclear weapons destroying all life on the planet. The nightmare of my generation isn't bombs. It's the slow, inevitable death of this world by pollution. I look at my son and worry about it every day.

''I think everyone should be terrified. My generation is gaining momentum to make changes to protect the ecology in the '90s - before it's too late.''

NEW YORK (JAN. 12) UPI - Subway gunman Bernhard Goetz made his first appearance in court Friday in a $50 million lawsuit filed against him by one of the four victims he shot aboard a subway car in 1984.

Goetz looked nervous and stuttered slightly in his appearance before state Supreme Court Judge Barry Salman in the Bronx borough of New York City in the civil case.

He told Salman that an order against him sought by Darrell Cabey's attorneys, asking for sanctions against Goetz for failing to appear in court several times previously, has ''no legal standing.''

Attorneys for Cabey, the shooting victim, agreed, but added that they thought getting Goetz into a courtroom was an accomplishment.

Famed civil rights lawyer William Kunstler, who is representing Cabey, told reporters that it was ''the first time they got Goetz into open court'' in the more than five years the sensational ''subway vigilante'' case has been in the courts. Goetz did not testify at his own trial.

''No one's heard from him except through unsworn statements,'' Kunstler said. ''I'm glad this time we're hearing from him with paper and not bullets.

''We felt those motions in essence were to get the doggie's (Goetz's) attention.''

Goetz, now 41, shot four teenagers, including Cabey, because he thought they were about to mug him aboard a subway car in December 1984. A jury in 1987 acquitted Goetz of attempted murder and assault, but convicted him of possessing and unlicensed gun.

In barely audible arguments Friday against the sanctions, Goetz said he had given ''valid reasons'' for not appearing in court to give a deposition about the lawsuit by Cabey, now 24. Most recently he sent word to Salman that he was suffering from testicular cancer.

Goetz, in a countersuit, has alleged in papers filed in state Supreme Court in Manhattan that Cabey, his mother, his lawyers and other parties have committed fraud, slandered and libeled him and intentionally inflicted emotional distress on him.

Cabey was in a coma for two months after he was shot. The young man is paralyzed from the waist down and brain-damaged, according to his attorneys.

Cabey alleged in his suit that Goetz shot him once, then leaned over and shot him again in the back. Goetz said in legal papers that Cabey and his attorneys tried to defraud him by reperesenting the injury to Cabey as more serious than it actually was.

Goetz was released from jail Sept. 20 after serving an eight-month sentence on the weapons conviction. Asked outside the courtroom whether he thought his first day in court went well, he said he thought it went ''OK.''

''It could have been better; it could have been worse,'' he said.

BOSTON (JAN. 12) UPI - While the Northeast is still reeling from its latest heating fuel scare, natural gas producers and pipeline operators from both Canada and the Southwest are aggressively pursuing a bigger share of the region's energy market.

A contingent of Oklahoma state government and industry representatives plans to visit Boston next week to solicit support for increased natural gas pipeline capacity between the two regions so the state's producers can sell more of their ample supplies in the Northeast.

Closer to a reality is the proposed Iroquois pipeline from Canada that its backers expect will be delivering enough gas just to New England by the end of next year to replace 17 million barrels of oil annually. By the end of 1992, that would rise to the equivalent of more than 20 million barrels, said Thomas M. Kiley, president of the New England Gas Association.

Kiley said construction should start by next January and be supplying fuel less than a year later.

Meanwhile, the Oklahomans say they can deliver plenty of gas for both home heating and electricity. All they need are purchase agreements from gas distributors in the Northeast in order to expand pipeline capacity, said E.L. "Bud" Stewart, energy advisor to Oklahoma Gov. Henry Bellmon.

Oklahoma gas is cheaper than that from Texas and Louisiana because it does not have the transmission capacity of its neighbors, Stewart said. However he said price should not be a key selling point because "eventually there should be an environmental premium" because gas is less polluting than either oil or coal.

Oklahoma has had enormous finds of natural gas in the past two years, said Bob Anthony, the state's chief oil and gas regulator, who also plans to visit Boston. "We just need to communicate that," he said.

The Oklahoma contingent hopes to meet with representatives from about 40 gas distribution companies in New England and the Middle Atlantic States in Boston Wednesday.

"We want to convince them that we do have the capacity for increased amounts of gas up there. But they have to increase their distribution system," Stewart said.

Besides the Iroquois proposal, there are 17 or 18 other pipeline plans now pending that would increase the amount of gas that could be shipped to the Northeast from either Canada or the Southwest, said Michael German, senior vice president of the American Gas Association in Washington, D.C.

Growth of gas consumption New England has been enormous over the past decade and is likely to continue apace. While gas consumption nationwide declined 20 to 25 percent over the past two decades, New England use grew by about 60 percent, said New England Gas Association's Kiley. "During the 80s we converted more than 100,000 homes from oil to gas in the six New England states," he said.

BY VERNON SCOTT

HOLLYWOOD - ''The Exiles,'' a new documentary film, shows how a small

number of men and women who fled to the United States from Nazi Germany changed the course of American history.

The two-hour drama is a testimony to the human spirit and the impact a small group of individuals can make on a country.

The exiles represented the cream of Europe's crop of scholars, intellectuals, scientists and artists. Most of them were Germans and Austrians with a sprinkling of French and Hungarians. Many of them were Jews.

Among ''The Exiles'' are psychoanalyst Bruno Bettelheim, photographer Alfred Eisenstaedt, University of Chicago president Hanna Gray, philosopher Hans Jonas and conductor Erich Leinsdorf.

There also were Nobel laureate economist Peter Selz, social scientist Hans Speier, engineer Mario Salvadori, physicist Edward Teller, film director Billy Wilder and publisher Helen Wolff.

Foremost of Hitler's unintentioned legacy to the United States, of course, was Albert Einstein. But there were others such as Thomas Mann, composers Arnold Schoenberg and Kurt Weill, and dramatist Bertold Brecht.

Richard Kaplan - who won an Oscar for best documentary in 1965 for ''The Eleanor Roosevelt Story'' - is the producer of ''The Exiles'' and he is having a difficult time finding a distributor for this serious and informative film.

''Nobody seems interested in theatrical release of important documentaries '' he said with a sigh. ''I'm delighted that another documentary, 'Roger & Me' is getting wide distribution, but it is a comedy, an entertainment.''

''The Exiles'' was shown last September on public TV in New York and received rave reviews, but movie audiences aren't easily persuaded to pay to see intellectual exercises, no matter how stimulating.

''We did zilch with 'The Eleanor Roosevelt Story' and it won an Oscar,'' Kaplan said. ''It makes you wonder why there is so little interest in documentaries in this country.

''The central theme of my film is the impact these people collectively had on America, how they changed the country in so many ways that we're not aware of.

''It's an amazing array of people. We include newsreel footage and interviews with those who are still alive. Many were brought here through a rescue operation mounted by Americans who saw their plight.

''The government wasn't terribly keen about getting these people into the United States, but in 1933 a new school in New York called The University in Exile brought a lot of scholars out of Germany.

''In 1940, when France fell, a young American named Varian Fry was sent to France by the Emergency Rescue Committee to bring back some intellectuals stranded in Marseilles. He spent 13 months there and rescued more than 2,000 people, among them some outstanding artists and scientists.''

So impressed with Fry was Kaplan that he is developing a dramatic feature film based on Fry's life.

''He is a man who helped save a culture, a Western European intellectual culture, which is quite remarkable,'' Kaplan said.

''These emigres truly changed the face of the United States, making this country less provincial, bringing new ideas and Old World concepts to a nation that had been isolationist.

''The exiles adapted to American culture, learned the language and contributed to its growth and knowledge. They also fell in love with the freedom and opportunity they found here. They flourished.''

One memorable bit of film has Salvadori saying of his arrival, ''I have landed on the moon. Nothing could be more different in terms of customs, in terms of personal relations, in terms of political ideas ... from what I had been used to look at and accept in my native country. And at long last, I said to myself: 'You have found your country.'''

''We interviewed as many of the surviving exiles as possible,'' Kaplan said. ''Almost all of them were over 80. I was amazed how active some of them remain. They're not thinking about the past. Their interests and energies lie in the future.

''In the film we let these people speak for themselves. They de-provincialized America in the 1930s and their influence has considerably enriched us to this day.''

(JAN. 12) UPI - The Chehalis River in the Pacific Northwest travels peacefully today into the Pacific Ocean, giving NO sign of the deluge that claimed at least six lives in Washington state and Oregon. The National Weather Service today canceled all flood warnings issued earlier in the week. A storm system hit Washington and Oregon on Monday... at one point dumping nearly five inches of rain on Puget Sound in 24 hours.

A published report says Bush administration officials have told Nicaraguan Contra rebel leaders that most of their U-S aid will likely end after next month's elections in Nicaragua. The report quotes Contra leader Enrique Bermudez as saying- quoting now- ''They are NOT going to abandon us totally, but they will reduce the money and allow its use only for purposes of repatriation.'' Bermudez reportedly says he was informed of the decision earlier this week by State Department officials.

One of the world's oldest known twins will be buried tomorrow in Charlotte North Carolina, on what would have been her 106th birthday. Centenarian Allie Grubb Hill died on Wednesday in a nursing home in her native Davidson County, where she and Maggie Grubb Lambeth were born to farming parents when Chester Arthur was president. President Bush sent a birthday card this week. The twins were hailed in their 103rd year as the world's oldest living twins by the Guinness Book of World Records.

#90012u2146 01/12/1990 ~United Press International

WASHINGTON (JAN. 12) UPI - Defense Secretary Dick Cheney announced an immediate worldwide civilian hiring freeze Friday to reduce the Defense Department's massive work force and cut its $300 billion budget.

The freeze will remain in place for the rest of fiscal 1990, which ends Sept. 30.

''As the armed forces are reduced over the long term in light of limited budgets, a changing world situation and future negotiated agreements, the department must make corresponding reductions in the size of the civilian work force that supports the armed forces,'' Cheney said in a statement announcing the freeze.

The hiring freeze came one day after Cheney announced a plan to slash the department's logistics and managament work force by 8,000 civilians and 8,000 military personnel in fiscal 1991, which begins Oct. 1, and by 18,000 civilians and 24,000 military personnel by the end of fiscal 1995.

He said he expects his streamlined management plan to save $2.3 billion next year and $39 billion over the next five years.

''The department is striving to achieve the reduction (in employees) by attrition rather than reductions in force, thereby minimizing economic dislocation of civilian employees,'' the statement said.

Cheney also ordered the assistant secretary of defense for force management and personnel to present to him by April 11 a long-term plan for reductions in the department's civilian work force.

''The hiring freeze applies to all Department of Defense civilians worldwide, including part-time and temporary employees,'' the statement said. ''The department currently employs 927,000 civilians worldwide on a full-time basis and another 123,000 on a temporary or part-time basis.''

#90012u2232 01/12/1990 ~United Press International

WASHINGTON (UPI) - The State Department said Friday that U.S. embassy personnel will begin returning to Bucharest next week, but it advised U.S. citizens to exercise caution in travelling to Romania.

In the travel advisory, the State Department said, ''Since the recent changes in the Romanian government, the security situation has stabilized throughout the country, although the potential for random violence remains.''

It added, ''There has been no direct threat to U.S. citizens.''

The department said all U.S. embassy personnel and dependents evacuated last month would return beginning Jan. 15.

In another new travel advisory, the department noted the lifting of martial law in Beijing, but the advisory added, ''Americans should be cautious about carrying into China documents, literature, and letters that might be regarded as objectionable by Chinese authorities.''

Some materials, the State Department said, have been seized by Chinese authorities.

LOS ANGELES (JAN. 12) UPI - New York real estate magnate Donald Trump is planning to build a major development at the site of the historic Ambassador Hotel in partnership with the landmark's new owners, a City Hall source said Friday.

It would be the flamboyant billionaire's first project in Los Angeles.

Trump will join Mayor Tom Bradley and City Councilman Nate Holden and officials from Wilshire Center Partners, the owners of the legendary inn, at a news conference Saturday to announce his plans, Bradley's press secretary Bill Chandler said.

No officials would publicly describe the project, but a source familiar with the plans said they are expected to mean the destruction of the 69-year-old former haunt of Hollywood royalty and American presidents, which gained notoriety in 1968 as the site of Sen. Robert Kennedy's assassination.

Another source, a City Hall insider, said Trump and Wilshire Center, who had been considering redevelopment of the site, have struck a deal for the project which could include plans to erect the nation's tallest skyscraper.

In a meeting Dec. 7 with Holden, who represents the mid-Wilshire district, Trump first disclosed plans to form a partnership with Wilshire Center to erect a development of high-rise office buildings and apartments.

Wilshire Center, a consortium of British and Irish developers and S.D. Malkin Properties of New York, acquired the hotel and its surrounding 23.5-acre site last summer for $64 million. Representatives of the private investors accompanied Trump at his meeting with Holden.

On the same day as the visit with Holden, Trump met with Bradley for about 15 minutes and mentioned he was interested in the hotel site.

Bradley described it as a ''courtesy visit'' during which several things were discussed, including the hotel site.

''He simply said he had an interest in the hotel,'' Bradley said. ''What those interests are, he didn't say, and I didn't press him for it.''

Holden said Trump was interested in ''revitalizing the area'' and discussed the need for a mixture of ''commercial, retail and housing'' structures.

The Ambassador was closed last January after several years of financial losses. Its future remains in limbo, caught between the new owners who want to develop the site, the Los Angeles Unified School District, which envisions building a new 2,000-student high school, and preservationists who don't want the landmark torn down and have filed a suit against the school board.

Holden, while not siding with the preservationists, has also campaigned against the school board's plans to acquire the site, saying a school would be unsuitable for the Wilshire Boulevard location.

Home of the Cocoanut Grove nightclub, the hotel was frequented by Hollywood celebrities and visiting politicians, royalty and business tycoons during its heyday from the Roaring '20s through the 1960s. But it fell into disrepair and ultimately stacked up huge financial losses for its owners.

Real estate analysts have been aware of Trump's interest in development deals in the western United States, especially Los Angeles and Las Vegas, where he has said he plans to buy or build a casino in the next couple years.

#90012u2292 01/12/1990 ~United Press International
WASHINGTON (JAN. 12) UPI - A Senate committee chairman has asked for an investigation of the process that will decide if a genetically engineered drug for dairy cows will be approved, it was disclosed Friday.

The drug, bovine somatotropin, is designed to encourage cows to produce more milk. At the moment, the Food and Drug Administration is supervising field tests of the synthetic hormone.

Development of the drug has been accompanied by questions if the drug is safe for humans and fears in some areas that a flood of cheap milk will drive small dairy farmers out of business. This week, a former FDA veterinarian accused the agency of accepting poor-quality data from the field tests.

Senate Agriculture Committee Chairman Patrick Leahy, D-Vt., has asked the General Accounting Office to evaulate the risk assessment methods being used by the FDA and to look at ''allegations made by FDA employees about the adequacy of the bovine somatotropin review.''

Earlier this week, an FDA official said the review of the drug was being conducted at the same standards required for all drugs. He rejected the complaint of poor-quality data.

Leahy wrote the FDA three times last year to suggest it should not make a final decision on bovine somatotropin until an independent scientific body such as the National Institutes of Health, could review the FDA's analysis. He said such an ''unprecedented'' step would allay public fears and answer questions about the safety of the drug.

Vermont, Leahy's home state, is one of the nation's major dairy states.

#90012u2303 01/12/1990 ~United Press International

NEW YORK (JAN. 12) UPI - The stock market ended the week with its steepest loss since the October mini-crash, as bad economic news and sharp selloffs in overseas markets made the celebrated ''January effect'' a distant memory.

The Dow Jones industrial average plunged 71.46 Friday to close below 2700, at 2689.21, for a drop of 84.04 points on the week, or about 3.0 percent. The 71-point drop was the biggest loss since the widely watched blue-chip indicator went into a 190.58-point freefall Oct. 13.

Among the broader market averages, the New York Stock Exchange composite index lost 6.32 points to close the week at 188.32. Standard & Poor's 500-stock index tumbled 12.37 to 339.93.

Declines pummeled advances 1,425-498 among the 2,133 issues traded this week. Big Board volume totaled 809,635,510 shares, compared with 690,074,430 a week earlier and 767,705,790 a year ago.

Analysts said they found it encouraging that Friday's plunge did not come on unusually high volume and there was no ''panic selling,'' even with computerized programs used to profit on brief price differences between stocks and stock index futures, playing a large part in the decline.

Two government economic reports before the market's opening Friday started the ball rolling downhill. Higher energy and food costs helped push prices at the wholesale level up a strong 0.7 percent in December after falling the month before, the Labor Department reported. Analysts had expected producer prices to rise about 0.4 percent during the month.

And despite the holiday season, retail sales rose only 0.2 percent in December after advancing a revised 0.5 percent in November, the Commerce Department reported, falling short of expectations of a 0.5 percent rise.

Most economists said the surprisingly sharp rise in producer prices just about quashed the chances that the Federal Reserve would loosen the reins on credit soon.

Some analysts said they felt the market was doomed even before it opened by selloffs in London and Tokyo, where the market posted its eighth sharpest decline on record.

Compounding all of the above were fears about the effect of a slowing economy on corporate earnings, which will be released over the next few weeks, and program selling.

''Not very much else could go wrong,'' said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. ''It's a banner day for bad news.

''The economy as measured by retail sales was softer than expected and with the slowing economy, corporate profits staring us in the face will be poor. At the same time producer prices were higher than expected. There's nothing good in this news,'' Johnson said.

He said the market's short-lived ''January effect,'' a seasonal rise in stocks after tax-related year-end selling, should have sent a signal to investors that something was wrong. The market has had only three winning sessions in January, the surge to record highs Jan. 2, a rise after a prime rate cut Monday and Thursday's reflex rise after declines Tuesday and Wednesday.

''The January effect had no conviction,'' he said. ''A small number of stocks were dragging the market up and volume has been low. There was a sense things weren't right when we came into this week and the news that came out today is likely to keep many investors on the sidelines through the fourth-quarter earnings reports.''

Analysts were somewhat reluctant to call the direction of the market Monday, but Alan Ackerman, senior vice president at Gruntal and Co., said, ''With the holiday Monday (Martin Luther King Jr.'s birthday) trading should be light. But it appears the direction is down. I don't think this is the end of the world, though.''

On the trading floor this week, Philip Morris was the most active NYSE issue, fell 3 3/8 to 38 3/4.

Citicorp followed, down 2 1/8 to 26 7/8. Pan Am was third, up 1/8 to 3 1/8.

The other blue chips gave up ground. AT&T lost 2 to 43 1/4, IBM dropped 1 7/8 to 97 7/8, General Electric fell 2 1/2 to 63 1/8, McDonald's lost 1 3/8 to 32 1/8, Exxon was down 1 1/8 to 47 3/4, American Express fell 1 1/2 to 33 and Sears lost 7/8 to 38.

Phone issues fell as did utilities generally. United Telecommunications lost 1 1/4 to 34 1/4 and Pacific Telesis was down 1 7/8 to 46 3/4.

On the American Stock Exchange, the Amex Market Value index fell 10.22 to close Friday at 372.23. Declines easily led advances 547-251 among the 969 issues traded.

Amex volume totaled 71,168,930 shares, compared with 53,640,240 traded a week earlier and 52,040,935 traded in the same week a year ago.

Texas Air led the Amex actives, losing 1 7/8 to 9.

The National Association of Securities Dealers index plunged 18.50 to end the week at 439.72.

#90012u2322 01/12/1990 ~United Press International
SAN FRANCISCO (JAN. 12) UPI - A federal judge Friday dismissed the bulk of Chevron Corp.'s antitrust suit against Pennzoil Co. and characterized the sole remaining claim of fraud as ''unquestionably weak.''

Chevron, suspicious of what it feared were hostile takeover intentions by Pennzoil, filed suit Dec. 8 accusing the Houston-based oil firm of a ''hidden agenda'' when Pennzoil purchased $2.1 billion in Chevron stock.

San Francisco-based Chevron accused Pennzoil of violating the Hart-Scott antitrust law and lying on a federal Securities and Exchange Commission filing, known as a 13D, about the purpose of its stock purchase.

Pennzoil said in the 13D filing it was merely a passive investor in the Chevron stock.

U.S. District Judge Thelton Henderson kept alive Chevron's claim that Pennzoil misrepresented its current and future intentions in the Dec. 7, 1989, SEC filing.

But Henderson wrote, ''Chevron's factual support (for the fraud claim) is unquestionably weak and certainly does not lead ineluctably to the conclusion or even demonstrate a probability that Pennzoil has filed a misleading Schedule 13D; at best it creates a suspicion.''

Henderson said, however, that he was not yet prepared to dismiss the claim.

He said Chevron should have an opportunity to review internal Pennzoil papers that led to the SEC filing.

Stephen Bomse, Pennzoil attorney said, ''All he has done is give them time to go on a fishing expedition to see what they can come up with.

''We have turned over all documents we had relating in any way to Chevron or Pennzoil interest in them,'' Bomse said.

The Pennzoil stock purchase amounted to an 8.8 percent stake in Chevron, the nation's fourth-largest oil company.

Pennzoil made the purchases from cash it received in a $3 billion settlement December 1987 with Texaco Inc. over Texaco's 1984 purchase of the Getty Oil Co.

Pennzoil, the nation's 24th-largest energy company, was left with $2.6 billion after legal fees and used the bulk of it to purchase 31.5 million

shares of Chevron stock.

Chevron has suggested Pennzoil was aiming to take over Chevron or force it to sell Pennzoil's coveted energy assets. Pennzoil has said it believes it could defer $800 million in federal taxes from the Texaco settlement by investing the money in Chevron.

Henderson's ruling came after the stock market closed. In a down day on Wall Street, Chevron's stock fell $2.125 to $64.25 and Pennzoil's dropped $1 to $84.25.

Chevron and Pennzoil are scheduled to square off again in court Jan. 17 over exactly which documents Pennzoil should turn over to Chevron.

#90012u2399 01/12/1990 ~United Press International

(JAN. 12) UPI - Army officials say a pilot managed to eject just before his Marine A-4 ''Skyhawk'' jet crashed in flames short of the runway at the Willow Grove Naval Air Station north of Philadelphia. An airbase spokesman says the pilot radioed that the plane had a fuel leak, just before the attack jet crashed, hitting a car dealership and landing next to a house. A hospital spokesman says the pilot's injuries are NOT believed to be life-threatening. The single-seat craft from Marine Air Group 49 was within three miles of the runway when it crashed.

A lawyer for a co-defendant in the drug case of ex-Panamanian dictator Manuel Noriega says he was attacked by a crowbar-wielding assailant near his Miami home. Lawyer Michael O'Kane represents pilot Daniel Miranda, accused of flying drug money for Noriega. O'Kane says the attack could be related to his role in the Noriega case. Miami police say they are questioning a suspect in the O'Kane attack. Noriega and 14 others are charged with drug trafficking.

The Justice Department promises to co-operate with the special Iran-Contra prosecutor who wants documents seized during the U-S invasion of Panama to explore Reagan administration contacts with Manuel Noriega. Lawrence Walsh reportedly is hoping the ex-dictator's files might shed new light on a number of Iran-Contra details, including Noriega's contacts with President Bush when he was vice president.

A memorial service for thousands killed in Romania's uprising turned into an angry demonstration against communism. The spontaneous protest ended with a march to Communist Party headquarters in Bucharest where hundreds of people pounded on doors and yelled anti-communist slogans. NO one was reported injured. The memorial service at Bucharest's University Square was one of several at churches throughout Romania in a national day of mourning for those killed in last month's rebellion against dictator

Nicolae Ceausescu.

-30- 2122
#90012u2416 01/12/1990 ~United Press International
(JAN. 12) UPI - Attorneys for the New York attorney general's office met today with Exxon officials to find out what the oil company is going to do to avoid a state lawsuit involving an oil spill off Staten Island. A spokesman says Exxon asked for the meeting after it was informed it will be sued if it misses a 48-hour deadline to accept liability for last week's leak of 500-thousand gallons of oil in the waterway between Staten Island and New Jersey.

California officials charge that strict enforcement of immigration reform laws leads to widespread discrimination against workers who look or sound foreign. A report by California's Fair Employment and Housing Commission criticized U-S immigration officials, accusing authorities of paying little attention to anti-discrimination provisions of the law. The 1986 law gave immigration officials power to fine employers up to 10-thousand dollars for knowingly hiring illegal aliens.

-30- 1091
#90012u2610 01/12/1990 ~United Press International
(JAN. 12) UPI - A dramatic rescue in space today by the shuttle Columbia. Astronauts aboard the spaceship used a robot arm to grab an 11-ton science satellite that otherwise would have fallen into the Earth's atmosphere and been destroyed. The satellite showed numerous signs of wear and tear, prompting one NASA scientist to say the satellite- quoting now- ''took a whipping.''

The skies above Fort Bragg, North Carolina, were colored this morning by two-thousand paratroopers who floated to Earth from 20 transport planes. Thousands of relatives were on hand to greet the soldiers during the biggest return of U-S troops since the invasion of Panama last month.

Anti-communist sentiment is on the rise in Romania. A solemn memorial service in Bucharest for the thousands killed in last month's uprising turned into an angry protest as hundreds of people began chanting anti-communist slogans. In recent days, more than 10-thousand people have signed petitions urging the removal of all communists from government.

Further unrest is reported in the Soviet Union. President Gorbachev's GOHRB'-ah-chawfz second day of a visit to the rebellious Baltic republic of Lithuania was topped off with news that the neighboring republic of Latvia has voted to end the guaranteed rule of the Communist Party. Gorbachev has called on Lithuanian secessionist forces to act judiciously.

Opposition groups in East Germany have forced Prime Minister Hans Modrow to back off a plan to form a new internal security force. Modrow had said that renewed neo-Nazi activity made such a force necessary. But he withdrew his proposal today when reform groups threatened to break off round table talks with communists.

-30- 1884

#90012u2647 01/12/1990 ~United Press International

(JAN. 12) UPI - The pilot of a Marine A-4 ''Skyhawk'' reported a fuel leak shortly before the single-seat support craft crashed in flames today short of the runway at the Willow Grove Naval Air Station north of Philadelphia. The pilot ejected before the plane smashed into an auto dealership. NO one on the ground was injured.

There's NO word whether a Colombian cocaine gang that kidnapped the son of a top government official has followed up on its threat to kill the man. The deadline set by the gang for the release of four prisoners expired today with NO new developments. Officials say the gang has kidnapped more than one dozen people.

Barbara Bush finished radiation treatment on her eyes today but doctors say it'll be two to three months before she learns the results of the therapy. The first lady suffers from a thyroid ailment that causes bloodshot eyes and double vision. A spokeswoman describes Mrs. Bush as ''fine.''

Aides say President Bush will preview his coming ''State of the Union'' address in a speech this afternoon before Cincinnati's Chamber of Commerce. Bush is expected to continue his campaign of pushing Congress to act on his legislative agenda- including his drive to cut the capital gains tax.

A woman who underwent an abortion while in a coma in a last-ditch attempt to improve her chances of recovering from a car accident is now able to talk and recognizes family members. A published report quotes family members and doctors of Nancy Klein as saying the 32-year-old woman is doing ''amazingly well.''

#90012u3013 01/12/1990 ~United Press International
(JAN. 12) UPI - A Marine ''Skyhawk'' attack jet crashes in flames but the pilot ejects... The Pentagon gets high marks for its execution of the U-S invasion of Panama... Soviet President Gorbachev tries again to calm a secessionist rebellion in Lithuania... And Romania abolishes the Communist Party... U-P-I details these top stories and more, next.

Pennsylvania officials say a Marine pilot did a great job of maneuvering his plane away from populated areas before ejecting from the failing craft.

Officials say the pilot was able to steer clear of a heavily populated residential section crowded with gasoline stations and restaurants.

But the pilot was NOT able to guide his craft away from all structures. The A-4 ''Skyhawk'' attack jet hit an auto leasing office and landed next to a home.

The pilot... hospitalized in stable condition... reported a fuel leak shortly before the crash one mile short of the Willow Grove Naval Air Station just north of Philadelphia.

One witness driving nearby says he saw a huge ball of flames that gutted at least four cars and left- in his words- ''a lot of debris, a lot of people running around.'' There were NO reports of any civilian injuries.

When the space shuttle Columbia returns to Earth, it will be carrying a rather big gift for NASA and hundreds of scientists.

Columbia's crew concluded a dramatic space chase today, using the ship's robot arm to grab a science satellite as it tumbled towards Earth.

The 11-ton spacecraft was pulled to Columbia's cargo bay, where astronauts spent much of the afternoon photographing it.

NASA says photos show the satellite has undergone some wear and tear from its longer-than-planned five-and-a-half years in orbit. In the words of one project scientist- ''the lady took a whipping.''

NASA is hoping to learn more about how spacecraft are affected by long-term stays in orbit.

The retrieval concludes a three-day, one-point-three-Million-mile orbital chase, highlighting the most ambitious post-Challenger mission yet.

-30- 2224
#90012u3028 01/12/1990 ~United Press International
(JAN. 12) UPI - Whistles, cheers and hugs greeted two-thousand

paratroopers who floated from 20 transport planes today to the ground at Fort Bragg, North Carolina.

The huge C-141 transports arrived just before dawn, flying in ''V'' formation. Just 15 minutes later all two-thousand men were on the ground, greeted by thousands of relatives and the sound of the 82nd Airborne Division band.

Lieutenant General Carl Steiner jumped with his men in the largest return of American troops since the U-S invasion of Panama last month.

Steiner praised the returning soldiers, while paying tribute to the 23 Americans who died fighting in Panama.

In Washington, the chairman of the House Armed Services committee, Les Aspin, also praised the military, giving the Pentagon an ''A'' for the operation.

But the Wisconsin Democrat says the political side did NOT mesh well with the military aspects.

Aspin also criticizes the Air Force's use of F-117 fighters to drop two bombs west of Panama City. He says the military was trying to show off the planes in advance of budget talks. In his words- ''We have planes that can miss buildings.''

Soviet President Gorbachev appears to be easing off his stand that the 15 republics that make up the Soviet Union will remain united NO matter what.

In comments made yesterday in Vilnius, the capital city of the rebellious Baltic republic of Lithuania, Gorbachev told intellectuals that he supports ''self-determination.'' But he added that a desire for sovereignty does NOT necessarily mean secession- an idea Lithuanian nationalist groups are promoting.

Gorbachev spent Day Two of his Baltic journey in an industrial city about 125 miles north of Vilnius.

His visit comes as the neighboring republic of Latvia followed Lithuania's lead and revoked a mandate that gave the Communist Party a monopoly of political power.

Also, labor unrest is reported in the capital of the republic of Georgia as workers demand independence from Moscow.

#90012u3055 01/12/1990 ~United Press International

(JAN. 12) UPI - East German communists continue toeing the line set forth by opposition groups.

Prime Minister Hans Modrow today responded to the call of reform groups and thousands of demonstrators by rescinding a parliamentary proposal to create a new internal security force.

NON-communists viewed Modrow's plan as a bid to lay the groundwork for a future communist takeover. The country's leading opposition organizations threatened to end round-table talks with the struggling Communist Party if it pursued the measure.

Talks are being held in Bolivia in advance of next month's drug summit in Colombia.

Officials at the meetings say cocaine-producing nations are NOT anxious to co-operate with the U-S military in intercepting planes and ships suspected of carrying drugs. A South American official says Bolivia, Peru and Colombia are discarding the tide of interceptions in international air and water space.

The issue caused a controversy that prompted the United States to delay naval exercises off Colombia earlier this week.

One source at the talks say the South American nations have made significant changes in the proposed U-S agenda and strategy for the anti-drug summit.

#90012u3076 01/12/1990 ~United Press International

(JAN. 12) UPI - Film director Michael Moore says his movie ''Roger and Me''- quote- ''will be G-M's worst nightmare come true'' if it succeeds at the box office.

If last night's Motor City premiere is any indication, and if Moore's prediction holds water, General Motors will be facing some restless nights in the near future.

A capacity crowd of 11-hundred-50 people came to the Detroit Institute of Arts to view the dark comedy about the city of Flint, Michigan, as it tries to survive its economic woes after a series of massive G-M layoffs.

The ''Roger'' of the title is G-M Chairman Roger Smith. In one sequence of scenes, he quotes Dickens at a G-M Christmas party as the camera trains on a Flint family being evicted on Christmas Eve.

Both G-M and Smith have declined public comment on the film, but privately

they have called Moore... the former editor of Mother Jones magazine... quote- ''a social radical.''

During the last 11 years, 32-thousand workers have been laid off. At last night's screening, Moore asked the audience to spread the message about what the movie is portraying.

#90012u3191 01/12/1990 ~United Press International

(JAN. 12) UPI - The Communist Party has been abolished in Romania. Interim President Ion Iliescu made the declaration today, bowing to the demands of an estimated 10-thousand demonstrators who massed in Bucharest.

South African police say factional violence erupted in a settlement 15 miles north of Durban. 13 women and children died in the fighting between a conservative Zulu tribal organization and the anti-apartheid United Democratic Front.

Palestinian sources say an Arab in the Israeli-occupied Gaza Strip was axed to death today for his suspected collaboration with Israeli authorities. Also, in the West Bank, Palestinians hijacked a bus and set it ablaze after forcing its occupants off.

The wife of French Nazi hunter Serge Klarsfeld says her husband was expelled from Syria today after he tried to demand the extradition of a man he says is a former Nazi. Syria has insisted that the man Klarsfeld is hunting is NOT in the country.

Two more young men were arrested today on assault charges in last April's so-called ''wilding'' rampage in Central Park. Both were charged with assaulting two male joggers during the two-hour rampage, which ended with the rape and beating of a woman jogger.

Normalcy is returning in the area surrounding Alaska's Redoubt Volcano. The 10-thousand 197-foot volcano remained quiet today and schools 50 miles east re-opened.

Authorities in Tacoma, Washington, say a man apparently was on his way to resolve a fight with his girlfriend when he crashed head-on into her car. The woman died and the boyfriend was critically injured in yesterday's collision.

Manuel Noriega may NOT feel like a lucky man, but Florida lottery players apparently have a lucky feeling about the deposed leader's prison number, 458. The figure became a popular lottery pick after appearing in a newspaper.

#90012u3465 01/12/1990 ~United Press International
(JAN. 12) UPI - Some 10-thousand demonstrators who had gathered outside the headquarters of Romania's provisional government cheered wildly when Interim President Ion Iliescu declared that the nation's Communist Party has been ''outlawed.'' Today's announcement capped a six-hour rally and also included word that Romanians will decide whether to reinstate the death penalty in a January 28th referendum.

The U-S Southern Command in Panama City is lowering its estimate of civilians killed during last month's invasion of Panama. A Southern Command spokesman says 202 civilians died during the assault... NOT 220 as reported earlier this week. The number of civilians killed in Panama has been a source of controversy, with former U-S Attorney General Ramsey Clark saying last week that several thousand Panamanian civilians may have died.

The Justice Department says the Federal Bureau of Investigation has quietly negotiated out-of-court settlements with three black workers who filed bias suits. The F-B-I is refusing to discuss the cases, with few details available because the settlement prohibited their discussion. The agency has been accused for years of sexual and racial harassment of its own employees.

A key supporter of U-S military aid to El Salvador says future assistance to the Central American country could be canceled if the government of President Cristiani fails to try all those involved in the November slayings of six Jesuit priests. Virginia Republican Senator John Warner says the attack was carefully planned.

East Germany's chief disarmament negotiator says East Berlin wants to remain a member of the Warsaw Pact, despite the country's move toward greater pluralism. Andre Wieland made his comments during a visit to Washington earlier this week, saying now is NOT the time to dissolve the Eastern European alliance.

-30- 2035
#90012u3780 01/12/1990 ~United Press International
(JAN. 12) UPI - In an unexpected move, Romania's interim government has bowed to the demands of reform forces on one key issue. More than 10-thousand demonstrators crowded outside the headquarters of the ruling National Salvation Front to hear Prime Minister Ion Iliescu declare the abolition of the nation's Communist Party. It's NOT immediately clear what today's decree will have on current and former Communist Party members.

For the second time in less than one week, President Bush had stern words

for Congress. Speaking before the Greater Cincinnati Chamber of Commerce, Bush said his agenda... including child care, clean air, the capital gains tax and his proposed war on crime... quote- is ''bogged down in the jungles of Capitol Hill.'' Bush warned lawmakers that the American public will NOT tolerate continued delays in the proposed legislation.

Manuel Noriega's defense team increased its size today with the hiring of prominent New York criminal defense attorney David Lewis. It is believed that Lewis has been retained because of his expertise in acquiring secret documents. Also today, the two sides met in U-S District Judge William Hoeveler's courtroom to discuss a reported government bid to move the deposed dictator from his Miami holding cell.

The nation's first elected black governor is about to take office. Douglas Wilder will be sworn in at Richmond tomorrow as the head of Virginia's government. Wilder's razor-thin victory in November was settled in a recount last month. Wilder says he represents the state's ''new mainstream.'' Police will screen thousands of guests with bomb-sniffing dogs and a metal detector, at the most expensive inauguration in Virginia history.

#90012u3811 01/12/1990 ~United Press International

(JAN. 12) UPI - A defense lawyer in an AIDS lawsuit in New York City today grilled a doctor who has AIDS, suggesting she pricked herself with the hypodermic needle that infected her. Doctor Veronica Prego remained composed under the barrage, on her fourth day on the stand. Prego is suing a New York hospital and two doctors for negligence for allegedly leaving the needle lying around.

A grand jury in Boston today began probing the death of Carol Stuart. Police believe Charles Stuart shot his pregnant wife in the head and shot himself in the stomach to cover up the October crime. The district attorney says the grand jury may take weeks or months to review the case and determine a motive. Stuart reportedly planned to collect 660-thousand dollars in life insurance he had taken out on his wife.

Disney officials today announced a 10-year plan to add a host of new attractions to Disneyland in Anaheim, California. Plans call for a new attraction every year through 1996. In 1999, Disney plans to open ''Hollywoodland,'' a replica of Hollywood's golden age. Disney also plans to build a second theme park in the area. Company chairman Michael Eisner says the cost is ''slightly less than the national debt and a lot more fun to think about.''

The U-S Customs Service says its agents at the border in Blaine, Washington, detained the bus carrying the road crew of country music star

Waylon Jennings and discovered a small amount of marijuana. Jenning's publicist in Kansas City, Missouri, says the bus was stopped for about 45 minutes. One member of the crew was fined 500 dollars and released after authorities found about one gram of marijuana in his briefcase.

#90012u4009 01/12/1990 ~United Press International

(JAN. 12) UPI - Defense Secretary Dick Cheney today announced an immediate civilian hiring freeze in the Defense Department. The worldwide freeze will last the rest of fiscal 1990, which ends September 30th. Cheney says he's ordered the measure because the armed forces face long-term reductions and the civilian force should shrink as well. The freeze comes one day after Cheney announced he'll cut 42-thousand jobs from the department by 1995.

South American countries are telling the United States it must pay more for the war on drugs. At a meeting in Santa Cruz, Bolivia, delegations from Colombia, Bolivia and Peru asked for BILLIONS of dollars in anti-drug aid. Those three countries are to meet at next month's drug summit with President Bush in Colombia. The South American nations also asked for funds to ''mitigate'' economic losses from reduced cocaine production.

NASA achieved one of its most ambitious goals since the Challenger disaster when the shuttle Columbia roped in an 11-ton science satellite today. Close-up shots of the Long Duration Experimental Facility showed that its five-and-a-half years in space have taken a toll on the satellite. One project scientist said the 12-sided orbital platform was- quote- ''bruised and battered.''

The pilot of the Marine A-4 Skyhawk plane that crashed today one mile short of Pennsylvania's Willow Grove Naval Air Station is being commended for maneuvering his plane to avoid a heavily populated area. A member of the military team investigating the crash says- quote- ''He couldn't have done a better job.'' The pilot is in stable condition. NO one was killed when the disabled craft smashed into a car leasing office and landed next to a home.

#90012u4040 01/12/1990 ~United Press International

(JAN. 12) UPI - Reports out of Thailand say the bodies of all nine people aboard a military helicopter that crashed today in a rainstorm nearly 500 miles south of Bangkok have been found. Among the victims of the chopper crash are the commander of Thailand's southern military region and his wife. Officials say the U-S-made Bell helicopter lost radio contact with ground officers only 10 minutes after takeoff.

Police in Warsaw say they arrested four demonstrators today after 100 members of a group calling itself the ''Inter-City Anarchists'' rampaged through the streets of the Polish capital. The anti-authoritarian group held an afternoon rally, and then stormed through Warsaw's government district, breaking windows as they proceeded to the Communist Party headquarters. There were apparently NO injuries.

The head of the Roman Catholic Church's legal aid office in El Salvador today called for the Salvadoran government to investigate... to determine who is in the right-wing death squads. Maria Julia Hernandez made her comments after testifying to a judge in San Salvador about a bombing that killed 10 people in the capital in October. Hernandez said her legal aid office concludes that right-wing death squads are responsible for the bombing.

#90012u4230 01/12/1990 ~United Press International

(JAN. 12) UPI - The crew of the Columbia captures a doomed satellite... Romania's president announced the Communist Party is outlawed... the Pentagon freezes the hiring of civilian employees... details of those stories and more next, from U-P-I.

The five-person crew aboard the shuttle Columbia is settling into a rather mundane routine after completing earlier today one of the space program's most difficult tasks undertaken since the Challenger disaster.

After a three-day, one-point-three-Million-mile hunt, Columbia nestled close to the Long Duration Experimental Facility and astronaut Bonnie Dunbar reached out and grabbed the 12-sided satellite with a 50-foot-long robotic arm.

The 15-Million-dollar catch was kept prone for five hours as cameras scanned it to see whether five-and-one-half years in space had taken its toll.

Although early indications suggested L-DEF had escaped relatively unscathed, closer examination proved the harsh environment of space had treated the 22-thousand-pound platform unkindly.

Still, Earth-bound scientists greeted the retrieval with enthusiasm. Project leader William Kinard referred to the snare as- quote- ''probably the biggest day we've had.''

The crew will spend the rest of the mission conducting experiments.

Romania today bowed to demands from the street and outlawed its Communist Party.

Some ten-thousand demonstrators had demanded the ruling today while massing outside government headquarters in Bucharest. It was the largest demonstration since the overthrow of dictator Nicolae Ceausescu last month.

Interim President Ion Iliescu gave the people what they wanted by declaring the Communist Party illegal... though it's NOT yet clear what effect the law will have.

Iliescu also announced a referendum this month on whether to reinstate the death penalty for former members of the security forces. Crowds chanted ''death for death''... seeking vengeance against security agents who opened fire on demonstrators last month.

In another concession, the president said the government would create a committee to deal with other demands raised by opposition groups.

-30- 2339

#90012u4259 01/12/1990 ~United Press International

(JAN. 12) UPI - Representatives of Colombia, Bolivia and Peru met with U-S officials today to discuss the war on drugs, and they asked the United States to pick up the tab.

The negotiators met in Santa Cruz, Bolivia, to prepare for next month's drug summit, which President Bush will attend in Colombia.

Sources say Colombia is asking for two-BILLION dollars in aid to fight its powerful cartels that control the world's cocaine trade. The requests of Peru and Bolivia were NOT available. But Peru estimates its anti-drug costs at 700-Million dollars this year, while the Bolivian tab is put at 400-Million.

The South American nations also asked for funds to ''mitigate'' the losses their economies would suffer from decreased cocaine production.

Officials also said the cocaine-producing nations would turn a cold shoulder to a U-S proposal to use the Navy to intercept planes and ships suspected of drug-smuggling.

President Bush complained today that his agenda is bogged down in what he called ''the jungles of Capitol Hill.''

Bush went to Cincinnati to tell the Chamber of Commerce there that Congress is slowing up some of his most important plans.

Bush focused on four areas- capital gains, child care, clean air, and crime.

The president said some proposals have been before Congress for the better part of a year. In his words- ''America's patience is running out.''

Bush also told the businessmen he seeks the removal of international trade barriers.

But Bush cautioned against calls for cuts in military spending in reaction to positive changes in Eastern Europe. He likened that to ''the next-of-kin who spend the inheritance before the will is read.''

After the speech, Bush arranged to fly back to Washington and go directly to the retreat at Camp David, Maryland, for an extended holiday weekend.

#90012u4277 01/12/1990 ~United Press International

(JAN. 12) UPI - The nation's first elected black governor will be inaugurated tomorrow in Richmond, Virginia.

Democrat Douglas Wilder- whose razor-thin margin of victory over Republican Marshall Coleman prompted a recount that was resolved less than one month ago- will take the oath of office from retired Supreme Court Justice Lewis Powell.

The one-time Capital of the Confederacy has been abuzz with planning the inaugural weekend for the past several weeks. The gigantic bash is reputed to be the state's costliest ever, and it is rumored that celebrities such as Bill Cosby and Barbra Streisand will be on hand as the leader of what he calls Virginia's ''new mainstream'' assumes his post.

A spokesman with Virginia's State Police say the biggest concern facing security personnel will be crowd control. An estimated 20-thousand people are expected to be on hand as Wilder is sworn in at a noon ceremony on the State Capitol grounds.

A court affidavit filed today in El Cajon, California, indicates that religious cult leader Jeffrey Lundgren admitted to his flock that he killed five members of an Ohio family and had members of his group bury the bodies.

Federal agents say the Avery family in Kirtland, Ohio, was killed in the belief that Lundgren's bizarre group could be spiritually cleansed and begin its trek into the wilderness in anticipation of Jesus Christ's second coming.

At least one of the 13 defendants allegedly involved in the execution-type slayings admitted seeing Lundgren shoot a member of the Avery family,

which had formerly been aligned with Lundgren's group.

Other defendants say their self-proclaimed leader was fond of carrying a Colt-45 pistol, the weapon believed to have been used in the murders.

Lundgren and four members of his cult remain in California, refusing to agree to be extradited back to Ohio. The formal extradition process is expected to take up to three months.

#90012u4370 01/12/1990 ~United Press International

(JAN. 12) UPI - The crew of the shuttle Columbia is now asleep, but ground controllers took charge of the shuttle's remote control T-V cameras to study spectacular lightning storms over South America. Earlier today, the astronauts successfully rescued a science satellite.

East German Prime Minister Modrow averted a potential crisis today when he canceled plans to form a new security force. Opposition groups had threatened to walk out of talks with the government if the new force was formed before the country's first free elections.

The U-S Southern Command says the number of civilians killed in last month's invasion of Panama is 202... NOT 220 as was earlier reported. But others have insisted the number is higher. Former Attorney General Ramsey Clark has said thousands may have died.

Energy Secretary Watkins says studies of the environmental impact of plans to clean up the government's 17 major nuclear weapons plants will assure that there will be ''environmentally informed decision-making.'' Watkins announced plans for the studies today.

Officials in West Palm Beach, Florida, say federal agents arrested four suspected members of the Irish Republican Army today. The arrests came after one of the suspects allegedly paid undercover agents 50-thousand dollars to buy sophisticated missiles.

Officials of LUZ International say plans for expansion of the world's largest solar power plant will move ahead as scheduled... despite a series of explosions and a fire this week that damaged the facility near Barstow, California.

-30- 1724

#90012u4381 01/12/1990 ~United Press International

(JAN. 12) UPI - The news on the economic front today wasn't very encouraging. The Labor Department says wholesale prices rose seven-tenths of one percent last month, mainly because of higher energy and food costs.

The increase fanned inflation fears.

And the Commerce Department says retail sales rose only two-tenths of one percent in December, despite the holiday season. In November, retail sales rose one-half of a percentage point. Sales fell in October by one-point-three percent.

Fewer black Americans are leaving the South, and some are even moving south from the North... and a University of Tennessee geography professor says he knows why. Charles Aiken cites sustained economic growth, family ties and a ''better racial climate'' as reasons.

In New York, subway gunman Bernhard Goetz made his first appearance in court today in a lawsuit filed against him by one of the four victims he shot in a subway car in 1984. The suit filed on behalf of Darrell Cabey is for 50-Million dollars.

The jury in the McMartin Pre-School molestation trial in Los Angeles recessed today for a three-day weekend without reaching verdicts on 13 remaining counts in the 65-count case. The jury is to return on Tuesday, which will be the 35th day of deliberations.

Some rather surprising results from a new survey. The poll says more than half the corporate chief executive officers questioned indicated they think they could get fair coverage from the media in a business crisis.

-30- 1653

#90012u4544 01/12/1990 ~United Press International

(JAN. 12) UPI - Romanian Interim President Ion Iliescu today declared his country's Communist Party ''outlawed.'' The announcement came in response to a rally of thousands of people who gathered outside the building housing the provisional government. Iliescu also tried to deal with the crowd's demands of ''death for death.'' He announced a referendum on whether to reinstate the death penatly for government security forces who shot demonstrators last month.

Those seeking independence for Lithuania today dismissed Soviet President Gorbachev's talk of a new law on secession. The head of a Lithuanian nationalist movement in Vilnius called the suggestion ''a propaganda trap.'' He says it's meant to fool people into thinking the Soviet Union is progressive. Gorbachev today is traveling through Lithuania, where he says he supports possible secession, but NOT right now.

Exxon fended off one legal battle today by agreeing to New York state's demand that the company fund an environmental study aimed at reaching a monetary figure for a 500-thousand-gallon oil spill off Staten Island. But the same spill prompted New Jersey officials to file a lawsuit that seeks

reimbursement from Exxon for damages- including the cost of all cleanup, removal and monitoring.

Japanese Prime Minister Kaifu is nearing the end of a grueling seven-country European tour. Today, he arrived in Rome on the fifth stage of the trip that's designed to dispel negative images of Japan as merely an economic powerhouse. It appears as if Kaifu is getting his message across. After recent talks in London, British Prime Minister Thatcher praised Japan for its promise to provide two-BILLION dollars in loans, technology and aid to Eastern Europe.

-30- 1903

#90012u4551 01/12/1990 ~United Press International

(JAN. 12) UPI - An Indian tribe in Louisiana today filed suit against the federal government for throwing the Indians off their land some 160 years ago. The Tunica-Biloxi tribe says it owns land in east-central Louisiana. The tribe cites deeds granted by the French and Spanish, who owned the territory in the early 1800's. The suit charges that fraudulent land surveys were used to cheat the tribes. The tribe seeks 110-Million dollars plus interest.

Sources say New York real estate baron Donald Trump will back a major development on the site of the Los Angeles hotel where Robert Kennedy was shot. Los Angeles Mayor Tom Bradley's spokesman says Trump and Bradley will announce the plans tomorrow. One source says the project will destroy the Ambassador Hotel, former home to presidents and movie stars. Trump has met with L-A City Councilman Nate Holden, in whose ward the project would lie.

Officials of the children's T-V show ''Sesame Street'' are unsure of the cause of death of Northern Calloway. The 41-year-old Calloway played David the owner of Mr. Hooper's store on the renowned show. Calloway performed on the show for 16 years before retiring last year. He died Tuesday at his home in Westchester, Connecticut.

Nearly three-dozen well-wishers showed up today at the University of Chicago Hospitals to say goodbye to 23-month-old Alyssa Smith, the nation's first live-donor liver transplant recipient. Alyssa's mother presented her daughter's doctor with an invitation to Alyssa's high school graduation in the year 2006. Mother and daughter are scheduled to head back to Schertz, Texas, tonight, where a large crowd is expected to greet them.

-30- 1840

#90013u0623 01/13/1990 ~United Press International

HARTFORD, CT (JAN. 13) UPI - General Electric Co. will unveil plans next

week to develop what is billed as the world's biggest and most powerful civilian jet engine, a company sokesman said Saturday.

''It will be the largest airline engine ever made'' to power the new generation of jumbo jets in the next century, said GE spokesman George Jamison.

He would not disclose any other information and said details of the major engine development program will be announced Tuesday in Cincinnati by Brian Rowe, senior vice president of General Electric's aircraft engines group.

GE's jet engine division is located in Evendale, Ohio.

A closed circuit telecast of the news conference will be aired in New York Boston, Washington, D.C., Paris, Munich and London, said Jamison at GE's corporate headquarters in Fairfield.

The planning and development costs were not disclosed, but the Hartford Courant said Saturday the turbofan jet, to be called GE90, would offer up to 95,000 pounds of thrust for the newest jets planned by aircraft manufacturers.

The newspaper said in a copyright story while GE would own the majority of the new engine, two European manufacturers - Snecma of France and MTU of Germany - have agreed to be partners in the venture.

The two firms are current partners with GE in engine development and hope to have the GE90 certified by 1994, the newspaper said.

Unidentifed industry sources told the newspaper the impetus for the GE90 was given by the recent announcement by Boeing Co. to go ahead with plans to build its super jumbo jet, the Boeing 777.

The GE90 would be significantly more powerful than today's wide-bodied engines built by GE and its two chief rivals - Pratt and Whitney of East Hartford and Rolls-Royce of Great Britain - which provide just more than 60,000 pounds of thrust.

It also would permit the proposed Boeing 777 and other planes to handle increased weight with only two engines rather than three or four on today's jets, saving fuel costs and providing greater operating efficiency.

''Its a major gamble,'' analyst Mark Bobbi of Forecast International of Newtown told the Courant.

''The goal is to leapfrog Pratt and Rolls Royce in thrust capability for the big commercial transports of the 1990s,'' said Bobbi.

GE's rivals sought to downplay the proposed GE90, saying Pratt's PW4000 and the Rolls-built Trent could be upgraded to between 72,000 and 80,000 pounds of thrust with some modifications.

Pratt spokesman Dave Long told the Courant the GE90 ''is a paper engine, a design concept. The requirement for an engine that size is somewhere down the road,'' Long said.

Rolls-Royce spokesman Bob Stangarone said the high-thrust Trent could be modified to match the power of a new GE engine, and, he said, airlines concerned with reliability might prefer an upgraded version of a proven angine to a new one.

#90014u0492 01/14/1990 ~United Press International

DETROIT (JAN. 14) UPI - General Motors Europe said Sunday it has signed a protocol with a Hungarian company in a pioneering deal that could lead to a joint venture to build cars and engines in Hungary beginning in 1992.

The protocol - which is a tentative agreement - was signed Saturday with the the state-owned firm RABA, GM spokesman Ron Theis said. The company manufacturers trucks, axles and diesel engines.

Under the arrangement, GM would become the first U.S, automaker to build cars in Eastern Europe. About 200,000 four-cylinder engines and 15,000 cars would be produced annually by about 880 employees at a plant in Szentgotthard, Hungary.

''We feel there is a viable untapped market in Eastern Europe,'' Theis said. ''It will have to be taken one step at a time.''

GM would have a 67 percent interest in the $150 million joint-venture and appoint the members of management.

Theis added that the joint-venture would affect GM in two areas, providing ''much-needed four-cylinder engine building capacity'' in Eastern Europe and giving the No. 1 automaker ''a vehicle assembly facility to serve Eastern Europe.''

The engines would be used in the Opel/Vauxhall range. Most of their production would be exported, with the remaining engines built into Opel Kadetts for sale primarily in Hungary and other Eastern Europe markets.

''General Motors is encouraged by recent political developments in Eastern Europe and the shift to freer market policies, especially in Hungary,'' said GM Europe President Robert J. Eaton, who signed the protocol with

RABA Managing Director Ferenc Romvari.

''As these markets continue to open up, investing in plants there is becoming a more attractive business proposition.''

Theis confirmed that GM is negotiating to begin similar joint-ventures in other Eastern Europe countries.

''We have a number of initiatives in various states of discussion in Eastern Europe,'' Theis said. ''This is the first.''

The protocol follows last week's announcement by Japanese carmaker Suzuki Motor Co. that it would begin a $138 million venture to build small cars in Hungary by 1992.

That joint venture, which will involve production of Suzuki's Swift car in Esztergom, 30 miles north of Budapest, is ultimately expected to produce 100,000 cars annually.

-30- 2526

#90014u0687 01/14/1990 ~United Press International

(JAN. 15) UPI - Rick Pitino left rugged New York City for the sedate Bluegrass State. Saturday night he acted anything but the role of a Kentucky colonel.

Pitino nearly came to blows with Louisiana State Coach Dale Brown during the first half of a Southeastern Conference game in Baton Rouge. If the former New York Knicks coach had any intentions of firing up his team, it didn't work.

Instead, 13th-ranked LSU rallied behind the confrontation and knocked off the Wildcats 94-81.

''That kind of got us riled up in the second half,'' Tigers center Stanley Roberts said. ''At the time though, we sort of backed down. We should have taken them out from there.''

Pitino accused Brown of shaking his fist first in a Kentucky player's face then in his. The coaches came together following a shoving match between guards Chris Jackson of LSU and Jeff Brassow of Kentucky.

After a heated exchange, Pitino went for Brown and had to be restrained by an official and a Kentucky assistant coach.

As for the game, Jackson, who leads the SEC in scoring at 29.5 ppg, knocked in 28 for LSU, which led by 17 points at halftime and then coasted.

--- AROUND THE COLLEGE SCENE ---

Elsewhere Saturday in the Top 20, No. 1 Kansas creamed Oklahoma State 91-77, No. 2 Georgetown held off DePaul 74-64, No. 3 Oklahoma routed Texas 103-84, No. 4 Michigan downed No. 15 Minnesota 87-83, No. 5 Missouri husked Nebraska 111-95, No. 6 Syracuse pounded Boston College 81-66, No. 7 Illinois dumped Northwestern 85-78, No. 8 Nevada-Las Vegas crumbled Temple 82-76 and No. 9 Georgia Tech bested North Carolina State 92-85.

Also, No. 11 Duke defeated Maryland 91-80, Purdue edged No. 12 Indiana 81-79 in overtime, No. 14 Arkansas clipped Texas Christian 93-79, No. 16 St. John's shaded Pittsburgh 71-70, No. 19 UCLA upended No. 17 Arizona 73-67, No. 19 Loyola Marymount outscored San Diego 19-112 and No. 20 Alabama burned Mississippi State 62-57.

At Lawrence, Kan., Rick Calloway scored 17 points and the Kansas defense harried the Cowboys, 8-5 and 0-2, into a 6:40 scoring drought. The Jayhawks, 18-0 and 2-0, led 57-56 with 14:26 left but Oklahoma State did not score again until a Royce Jeffries baseline jumper with 7:46 remaining.

At Rosemont, Ill., Alonzo Mourning scored 21 of his 26 points in the second half to rally the Hoyas, 13-0. Mourning hit a pair of free throws and David Edwards scored four points to give Georgetown the lead for good with less than five minutes left.

At Norman, Okla., Jackie Jones scored 22 points, grabbed 10 rebounds and blocked a school-record nine shots to lead the Sooners, 12-0. William Davis added 19 points for Oklahoma, which won its 38th consecutive home game.

At Ann Arbor, Mich., Terry Mills made two free throws with 27 seconds left and teamed with Loy Vaught down the stretch to carry Michigan. Mills and Vaught keyed a 11-0 run that gave the Wolverines control with four minutes to play. The Wolverines are 11-2 and 1-1 in the Big Ten, the Gophers 10-3 and 1-2.

At Lincoln, Neb., Doug Smith scored 31 points and Anthony Peeler added 29 to help the Tigers, 15-1 and 2-0 in the Big Eight. Lee Coward and Nathan Buntin each added 21 points for Missouri.

At Chestnut Hill, Mass., Stephen Thompson scored 23 points, Derrick Coleman had 20 and Billy Owens added 19 to help Syracuse improve to 12-1 and 3-1 in the Big East.

At Evanston, Ill., Marcus Liberty scored 26 points and sparked an early second-half comeback to lead Illinois, 12-1 and 2-1 in the Big Ten.

At Philadelphia, Larry Johnson made six free throws in the final 34

seconds to help the Runnin' Rebels record their 10th victory in 13 games. Johnson finished with 26 points.

At Atlanta, Brian Oliver made eight free throws in the final 1:54 and finished with 27 points to help the Yellow Jackets, 11-1 and 2-1, hold off the Wolfpack, 12-3 and 1-1.

At Durham, N.C., Christian Laettner scored 27 points and Alaa Abdelnaby added 22 to lead the Blue Devils, 12-2 and 3-0, to a victory over the Terrapins, 10-5 and 2-2. Duke Coach Mike Krzyzewski recorded his 214th victory, moving him past Vic Bubas into second place on the school's all-time win list.

At Bloomington, Ind., Tony Jones scored 21 points and Purdue rallied from a 16-point first-half deficit to post its first victory at Indiana since 1985. Purdue improved to 11-2 and 3-0 in the Big Ten. The Hoosiers fell to 12-2, 2-2.

At Fayetteville, Ark., Todd Day, who missed the first half because of a curfew violation, scored 17 points in the second half to lift Arkansas, 12-2 and 4-0 in the SWC.

At New York, Jayson Williams scored 16 of his 18 points in the second half and the Redmen, 14-3 and 3-1, overcame a pair of missed one-and-one free throw attempts by Boo Harvey in the last minute to hold off the Panthers.

At San Diego, Hank Gathers scored 32 points to spark Loyola Marymount, which improved to 11-3 and equalled the best start in school history.

At Starkville, Miss., James Sanders scored 13 points and David Benoit added 12 to help the Crimson Tide, 12-3 and 3-1.

#90014u0693 01/14/1990 ~United Press International

LAKE BUENA VISTA, Fla. (JAN. 15) UPI - Walt Disney Co. Chairman Michael Eisner Sunday revealed that Disney plans to sell time share vacations at its Florida theme parks.

Eisner gave no details about Disney's ''shared vacation ownership'' program but said 500 units would be built at the company's Florida complex and offered to time share investors.

Time share resorts sell the same piece of property, usually a condominium, to several investors but allow each investor to use it only a limited number of days per year.

Time share operations have been plagued by complaints of consumer fraud

and deception, high pressure sales tactics and mismanagement.

''There are a lot of things that had bad reputations. Amusement parks had bad reputations before Disney came into the process,'' Eisner said.

Disney is not the first theme park to implement a time share program.

Jim and Tammy Faye Bakker, founders of the PTL Club, sold time share vacations at their Heritage USA religious theme park in Fort Mill, S.C.

The oversale of ''lifetime partnerships,'' a form of time share, was the heart of the government's fraud case against Bakker. He was convicted last year of 24 fraud-related counts and sentenced to 45 years in prison and ordered to pay $500,000 in fines.

Bakker currently is imprisoned at the federal medical center in Rochester, Minn. Tammy Faye Bakker operates a small ministry from an Orlando music store.

''We didn't use the word time share, not that we're afraid to use it,'' Eisner said.

''We've hired the best people in the industry to work for us,'' he said. ''We feel that we can do it in a really attractive, honest and capable way and we're very excited about it,'' he told reporters.

Although some unscrupulous time share operations have given the industry a bad reputation, there are scores of legitimate and respected companies involved.

Marriott, the giant Washington, D.C. hotel chain, operates two time share properties in the Orlando area - Royal Palms and Sabal Palms at its Orlando World Center.

However, Marriott does not sell property - it sells points that can be cashed in at Marriott resorts worldwide.

Another well-known company involved in time share is IT&T, which operates a development at Palm Coast, near St. Augustine.

#90014u0878 01/14/1990 ~United Press International

DENVER (JAN. 15) UPI - The radar-like strikes of John Elway rebuffed two Cleveland comeback bids Sunday and propelled the Denver Broncos into the Super Bowl for the fourth time with a 37-21 AFC title victory over the frustrated Browns.

For the third time in four years, the Broncos stopped the Browns one step short of the NFL's main event. And Denver did so Sunday thanks to a championship performance from its quarterback.

Elway threw three touchdown passes and set up 10 more points with his own scrambling runs.

Despite a struggling afternoon by Cleveland quarterback Bernie Kosar, the Browns fought back from a 17-point deficit during a wild third period to close within 24-21 going into the final quarter.

But Elway promptly guided his team 80 yards, finishing the drive with a 39-yard touchdown throw to Sammy Winder. That gave the Broncos a 10-point lead and Denver's defense - which led the NFL in fewest points allowed this season - finished off Cleveland's chances with two fourth-period interceptions.

Elway's other touchdown passes were of 70 yards to Michael Young in the second quarter that gave the Broncos a 10-0 halftime lead and of 5 yards to tight end Orson Mobley during a 35-point third period.

Winder also scored on a 7-yard run in the third period that gave Denver a 24-7 lead and David Treadwell kicked three Broncos' field goals of 29 yards in the first quarter and 34 and 31 yards in the fourth period.

After being held scoreless in the first half, Cleveland produced three touchdowns in the third period on catches of 27 and 10 yards by Brian Brennan and a 2-yard run by Tim Manoa.

Twice during the unseasonably warm, sunny afternoon, the Browns staged comebacks that seemed to give them the momentum they needed to win their first Super Bowl trip.

The first of those comebacks came early in the second half when Kosar led the Browns 70 yards and hit Brennan with a 27-yard scoring throw that moved Cleveland within three points.

Elway and the Broncos, however, responded with two quick touchdowns - the 5-yard Elway throw to Mobley and Winder's 7-yard run - to apparently put the game away at 24-7.

Cleveland, however, came right back with two scores of its own, driving 72 yards with Brennan making a sensational catch for the touchdown and then getting an easy six points when safety Felix Wright plucked a Melvin Bratton fumble out of the air and carried it to the Denver 1-yard line.

To that point, this AFC title game was almost identical to the one these two teams played two years ago - one that was not decided until the final

seconds.

But this time Denver dominated the fourth quarter, not only scoring 13 points during the period but not allowing the Browns past their own 20-yard line. Elway finished with 20 completions in 36 attempts for 385 yards.

Denver must now face the one, last hurdle which has plagued the Broncos since they first became an NFL force in the late 1970s.

The Broncos' previous three trips to the Super Bowl have all ended in disaster - losing to Dallas in Super Bowl XII and then being blown out two straight years by the New York Giants and Washington in Super Bowls XXI and XXII.

The game turned on two plays in the first six minutes of the second quarter and one critical pass early in the fourth period.

After a series of poor throws, Kosar finally began to zero in on his targets as the second quarter got underway. Beginning at the Cleveland 20, Kosar hit Langhorne with a 9-yard throw and then drilled an 11-yarder to Webster Slaughter.

Those completions produced the first sustained drive of the game for the Browns and a 10-yard completion to Brian Brennan carried Cleveland to the Denver 44-yard line.

A touchdown at that point could have changed the complexion of the contest and it seemed as if the Browns were going to produce one when Langhorne broke into the clear.

If Kosar had led Langhorne, it would have been an easy touchdown. But even though the pass was underthrown, it seemed certain the Browns would have a big gainer. The ball hit Langhorne in the chest at the 8-yard line and he dropped it, leaving the Cleveland receiver slamming his fist into the dirt.

That drop led to a Cleveland punt and, four plays later, Elway hit Young with the biggest pass of the day.

Cleveland sent seven pass rushers after Elway, only to have the Denver offensive line do a remarkable job of keeping the heat off the quarterback.

Young, meanwhile, had bumped into Cleveland cornerback Frank Minnifield at the line of scrimmage and Minnifield fell down. Given the time to find Young, Elway fired the ball deep.

Young scurried down the sidelines with Minnifield in belated pursuit and was able to step out of a diving attempt at a tackle at the 10-yard line.

Then, with Denver clinging to a three-point lead in the fourth period, Denver faced a 3rd-and-10 at its own 43. Elway threw an incompletion, but was given another chance when Cleveland jumped offsides and on the next play he hit Vance Johnson with a 20-yarder that kept alive what turned out to be the decisive touchdown march.

(JAN. 15)

Basketball

Temple Athletic Director Charlie Theokas Sunday declared center Duane Causwell and Joseph Robinson academically ineligible for the remainder of the season. Causwell averaged 11 points and 8 rebounds in 12 games as a starter. Robinson, a walk-on freshman, played in two games this season. ... Senior Derrick Coleman of Syracuse was named The Big East Player of the Week after totaling 44 points and 32 rebounds last week in victories over St. John's and Boston College.

Football

Pittsburgh freshman defensive end Keith Hamilton will decide in the next two weeks whether he will transfer because of the recent firing of defensive line coach Frank D'Alonzo, who Hamilton calls ''a really good friend of mine.'' The Panthers are undergoing changes in their football program after the firing of head coach Mike Gottfried in December.

Golf

Australian Rodger Davis used an eagle at the second hole of a sudden death playoff to defeat Curtis Strange in the Daikyo Palm Meadows Cup in Australia. After hitting a driver on the par-5 18th hole, Davis struck a 3-iron which carried 260 yards and stopped 15 feet from the pin. Davis made the putt and earned $110,000.

Horse Racing

The $250,000-added Blue Grass Stakes for three-year-olds will highlight 16 stakes races worth a record $1,525,000 that will be run during Keeneland's 15-day spring meeting starting April 6 in Lexington, Ky. The 1 1/8-mile race will be run April 14, three weeks before the Kentucky Derby. Eighteen horses, including Alysheba, Gato Del Sol and Spectacular Bid, have used the Blue Grass Stakes as a stepping stone to victory in the Kentucky Derby. ... Minnesota Racing Commission chairman Ralph Strangis says he expects a deal for the sale of Canterbury Downs will be completed early

this week. Strangis attended a meeting Saturday at which a lawyer for New Jersey investor John Aglialoro outlined a proposal for the track's sale.

Luge

East Germany claimed all but one title in the European Luge Championships in Igls, Austria. In the team events Sunday, East Germany collected 138 points to win the title, followed by West Germany with 123 points. Georg Hackl of West Germany captured the men's singles title Friday.

Road Running

Paul Pilkington of Roy, Utah, captured the Houston-Tenneco Marathon in 2:11:13. Maria Trujillo, of Phoenix, came in first for the women, finishing the 26-mile, 385-yard event in 2:32:55. ... England's Mark King won the Scottish Cross Country Union centenary international 10-kilometer race in Irvine, Scotland. King clocked 32 minutes, 24 seconds to beat Sweden's Hakon Borjesson, who finished in 32:27.

Skiing

Austrian Richard Kroell, in his second year on the World Cup circuit, led an Austrian sweep of the top four places in a giant slalom in Val Badia, Italy. Kroell finished with an aggregate time of 2 minutes, 26.55 seconds. Guenther Mader was second down the Gran Risa course in 2:26.63. Hubert Strolz and double world champion Rudolf Nierlich tied for third in 2:26.77.

Soccer

Olympia of Paraguay moved into the semifinals of the Jawaharlal Nehru International soccer championship with a 1-0 victory over East Bengal of India. Olympia will next face Lingby of Denmark, which defeated Indian national champions Salgaonkar 3-0 in the opening match.

Tennis

Frenchman Yannick Noah defeated West German Carl-Uwe Steeb, 5-7, 6-3, 6-4, to win the $125,000 New South Wales Open in Sydney, Australia. Natalia Zvereva of the Soviet Union overcame Austrian teenager Barbara Paulus, 4-6 6-1, 6-3, in the women's final.

Track

Debbie Bowker is the women's leader with 20 points after the first two meets of the $200,000 Mobil Indoor Grand Prix. Bowker won the 1,500 meters Friday at the Hamilton Spectator Indoor Games and collected 10 points for her victory in the mile at the K of C Saskatchewan Indoor Games. Freddie Williams of Canada is the men's leader with 13 points. The 11-meet Grand

Prix will end at the Mobil Indoor Championships Feb. 23 in New York.

#90014u1233 01/14/1990 ~United Press International

SAN FRANCISCO (JAN. 15) UPI - The NFL's ''Team of the Eighties'' earned a chance to match the ''Team of the Seventies'' for Super Bowl success.

Joe Montana passed for 262 yards and two touchdowns Sunday to lift the San Francisco 49ers to a 30-3 rout of the Los Angeles Rams in the NFC Championship Game, giving them a chance to win their fourth Super Bowl.

The 49ers will try to match the Pittsburgh Steelers for the most Super Bowl titles Jan. 28 when they play AFC champion Denver in Super Bowl XXIV at New Orleans. The Broncos won the AFC title with a 37-21 victory over Cleveland Sunday.

San Francisco will also try to become the first team to repeat as NFL champions since the Steelers 10 years ago.

''Everybody has the same goal in mind,'' Montana said. ''This team rates pretty good, way up there. We had the extra pressure of having to come back and repeat. Then we had some injuries. To get past them into this position says a lot about the heart of this team.''

Montana Sunday passed Terry Bradshaw, the quarterback of the Steelers dynasty, by throwing his 31st career playoff TD pass. That passed Bradshaw's NFL record by one.

By hitting 26 of 30 passes Sunday, Montana set an NFC Championship Game record with an 86.7 completion percentage. He was not sacked and threw no interceptions for the second straight week.

Montana used eight different receivers and threw mostly short as the 49ers held the ball for 39:48.

''We were dropping people under their zones and being choosy where we threw the ball,'' Montana said. ''Our running game was just on and the offensive line had another heck of a game.''

Montana's first-half TD strikes of 20 yards to Brent Jones and 18 yards to John Taylor staked San Francisco to a 21-3 lead and the 49ers never looked back.

The 49ers have dominated the NFL this season, finishing the regular season with a 14-2 mark and rolling past Minnesota and Los Angeles in the playoffs under first-year Coach George Seifert, who was promoted from defensive coordinator after Bill Walsh retired.

''It's something this club wanted to do since the start of the year,'' said Seifert, who was given a Gatorade shower by his players on the sidelines. ''They want to go farther obviously and that will be their attitude after this celebration is over.''

Montana had the finest of his 11 pro seasons in 1989, setting a record with a passing rating of 112.4.

Only Bradshaw has quarterbacked four Super Bowl champions. Montana has already guided the 49ers to Super Bowl titles after the 1981, 1984 and 1988 seasons.

San Francisco also scored on Roger Craig's 1-yard run and Mike Cofer field goals of 28, 36 and 25 yards. Craig rushed for 93 yards on 23 carries, helping the 49ers roll up 442 total yards.

The Rams, who finished the regular season 11-5 and qualified for the playoffs as a wild-card, scored road upsets over Philadelphia and the New York Giants to advance to the conference title game.

Jim Everett, who threw four touchdown passes the past two games, struggled against the 49ers defense. He completed 16 of 36 for 141 and had three interceptions.

''I don't think I'd like to be the Broncos,'' Everett said. ''These guys are awfully good.''

The game marked the first time in Everett's 51 career starts that the Rams did not score in double figures. The Rams finished second to San Francisco in scoring with 426 points this season, but were shut down Sunday. Their only successful drive was a 44-yard march to Mike Lansford's 23-yard field goal 5:22 into the game.

The 49ers erased the Rams lead with 21 second-quarter points.

''We were overwhelmed,'' Rams Coach John Robinson said. ''The 49ers wre clearly the dominant team. This was as good a performance I've seen from a 49er team.''

The Rams had won their last two games at Candlestick Park, including a 13-12 victory last Oct. 1 when they held San Francisco without a touchdown. The 49ers won the rematch in Anaheim, 30-27 Dec. 3 to clinch the NFC West.

SAN FRANCISCO (JAN. 15) BUSINESS WIRE - Livingston & Co. has agreed in principle to acquire Melmon Tawa & Partners, a $6 million Palo Alto advertising agency.

In his announcement Monday, Roger Livingston, chief executive officer of Livingston & Co., Seattle and San Francisco, said: ''We like their work. We like their people. It's a terrific fit.''

Melmon Tawa's client list includes Frame Technology, Irwin Magnetics, StrataCom, Xilinx, and Chips and Technologies.

Livingston & Co. is perhaps best known for its Alaska Airlines work, which has brought the agency numerous awards including three Gold Lions at Cannes. Other clients include First Interstate Bank of Washington and In-N-Out Burgers.

The Melmon Tawa & Partners staff will move to Livingston's San Francisco offices at month's end. The acquisition will bring Livingston's billings to $50 million.

#90015b0025 01/15/1990 ~Business Wire

DAYTON, OH (JAN. 15) BUSINESS WIRE - NCR Corp. announced that Origin Technologies of Miami Beach, Fla., has entered into a joint marketing agreement to develop application software and installations for the NCR 5682 retail self-service terminal.

Estimated value of the alliance is $50 million over the next several years. The first 86 systems were installed in pilot programs with three national retailers in 20 states.

NCR's 5682 self-service terminal gives retailers an improved way to sell their products and services to consumers. Origin's application and design capabilities offer customers customized software according to the retailer's needs and specifications.

Using the NCR 5682 terminal, customers can begin transactions by inserting their magnetic card or by touching the screen. Magnetic cards can be used for security, for identifying cardholders, permitting access to restricted services and for payments.

"The self-service terminal is designed to help retailers lower their operating costs," said Tony Fano, vice president for NCR's retail systems division. "The 5682 provides consumers with the convenience of extended hours and the availability of products in a wider array of sizes, colors and price ranges.

"By using the self-service terminal, demonstrations and product explanations can provide a consistent and accurate message to the customer. In addition, the customer has the ability to purchase the product of interest independently."

Origin Technologies will be responsible for the planning and coordination of the installations, including site preparation and training of store staff.

Origin's software tools can provide the development of interactive applications in a very short period of time. Among the technologies used by Origin are interactive audio/video, image processing, computer graphics database and central station communications.

"We have spent over three years developing and testing our software tools " said Abraham Poznanski, chief executive officer of Origin. "These tools have been designed to allow for the customization of applications. In most cases, the initial installation can take place within four months of the date we begin work on the project."

LAGUNA HILLS, CA (JAN. 15) BUSINESS WIRE)--Advantage Life Products Inc. (NASDAQ:ADVT), exclusive retail distributors of CigArrest Smoking Cessation and Smoking Alternative products, Monday announced that record holiday sales significantly surpassed management's projections.

In addition to record year-end sales, K mart, Advantage's second largest customer, recently placed a $125,000 order consisting of 43,000, 12-count blister packs of CigArrest Gum.

This order reflects K mart's previous success with CigArrest Gum, which has resulted in the addition of the newest CigArrest Gum packaging format.

And, Wal-Mart, the nation's fastest growing retailer has recently created a permanent store location for CigArrest products following a substantial sell-through of their initial storewide order.

RICHARDSON, TX (JAN. 15) BUSINESS WIRE - CONVEX Computer Corp., in conjunction with Solution Systems Incorporated (SSI), announced Monday the availability of the Equity Timesharing plan.

The plan offers a method to build equity toward the purchase of a CONVEX

supercomputer while securing timesharing services that provide immediate solutions to a company's high-performance computing requirements.

Under the plan, a user would gain access to one of CONVEX's C Series family of parallel/vector/scalar supercomputers. SSI/CONVEX systems are available to users on either an interactive or batch basis from terminals, personal computers or in-house computers. (Most other supercomputers available to remote users are batch processors only.)

Equity Timsharing also allows frequent users to set aside 20 percent of their computer service charges to be used later as credits toward the purchase of a CONVEX system.

CONVEX offers a family of compact, air-cooled, 64-bit computer systems that deliver performance of up to 200MFLOPS and 224 MIPS as determined by the 32-bit Whetstone benchmark. The systems in the C Series run an enhanced version of the industry standard UNIX operating system and provide up to 2 Gigabytes of physical memory. More than 400 applications packages run on CONVEX systems.

SSI, based in Narberth, Pa., was formed in 1981 with the express purpose of providing remote computing services to the business and engineering/scientific communities on state-of-the-art equipment with a professional level of support.

CONVEX Computer Corp., a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical reserach, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology.

CONVEX, which is listed on the NYSE with the symbol CNX, has sold more than 550 systems in 33 countries. The installed base now represents more than a quarter of a billion dollars of cumulative revenues from nearly 350 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

#90015b0031 01/15/1990 ~Business Wire

WEYMOUTH, MA (JAN. 15) BUSINESS WIRE - Sheri Poe, president of women's

athletic footwear manufacturer RYKA Inc. (NASDAQ:RYKA), and Mark Itzkowitz president of Medallion Shoe Corp., Monday announced that an agreement has been signed for the purchase by merger of Medallion by RYKA for $3.6 million in a combination of cash and RYKA common stock.

The merger agreement also provides for the payment of up to $3.5 million over five years to the Medallion stockholders out of the earnings of Medallion. Medallion is a privately held marketer of its own national brands of women's and children's casual shoes and weather boots headquartered in Woburn, Mass.

In the year ended Nov. 30, 1989, Medallion had sales of approximately $27 million, and has experienced significant increases in sales for the past two years. The closing of the transaction is subject to a number of conditions including the completion of RYKA's previously announced proposed public stock offering.

Medallion's two major brand names are Danexx and Danelle. Danexx is a leading fashion weather boot for women and children and is presently sold in many major department stores and specialty retail stores in the U.S. and Canada. Medallion also recently introduced a new casual shoe line under the Danexx label. Danelle offers career and casual footwear as well as children's shoes under the ''Miss Danelle'' signature.

In addition, Medallion also designs and contracts private label footwear and bootwear for a number of top retailers and other prominent shoe manufacturers.

Medallion will function as an autonomous subsidiary. Itzkowitz will remain as president, and the management team of Medallion will remain intact.

RYKA Inc., designs, develops and markete high-performance fashionable athletic footwear for women. The company's principal products are multi-purpose aerobic cross-training shoes, aerobic shoes, walking and tennis shoes.

LONGMONT, CO (JAN. 15) BUSINESS WIRE - The board of directors announced Monday the appointment of Dr. Douglas J. Collier as president of EMCO. Collier replaces Jerry Rusnak, who resigned Jan. 3, 1990 after serving as the company president for the past three years.

According to the spokesperson, the appointment of Collier should facilitate EMCO's corporate restructuring which has been underway for the past eight months.

Doug Collier founded a national consulting practice for entrepreneurial business for a Big 8 accounting firm. Most recently he served as president of Midcontinent Airlines where he engineered a dramatic turnaround in airline profitability and operating efficiency.

According to Charles E. Miller, board chairman, final restructuring plans for the company's subsidiary operations, the Digital Valve Co. and Measurement Auditors Co., should be complete within 90 days, completing a twelve month process.

The board of directors is no longer pursuing the sale of the company. However, according to Miller, the company is reviewing several financing options for EMCO's subsidiary operations which are experiencing significant growth.

PALO ALTO, CA (JAN. 15) BUSINESS WIRE - Lincoln N.C. Realty Fund Inc. announced Monday that it had received a letter of intent from Silverstone Partners, a California corporation, indicating Silverstone's intent to purchase all of the issued and outstanding common stock and warrants of LNCRF at a purchase price of $9.75 per share and $.03125 per warrant.

These purchase prices are subject to reduction if any dividends are paid after Jan. 11 or if costs and expenses of LNCRF exceed $100,000.

The letter of intent states that the offer will be made on an ''any and all'' basis, subject to an as yet undesignated percentage being tendered and that the offer will be subject to numerous conditions, including the condition that the board of directors of LNCRF approve of the transaction.

Bill Garlock, president of LNCRF, stated that the board of directors will consider the letter of intent at the first available opportunity.

Lincoln N.C. Realty Fund Inc. is a real estate investment trust. Its securities are listed on the American and Pacific Stock Exchanges.

GOLDEN, COL (JAN. 15) BUSINESS WIRE - Coors Brewing Co. launches its new product, Coors Rocky Mountain Sparkling Water, this week in Colorado, Arizona and Northern California.

The new product marks the first time since Prohibition that Coors Brewing Co., a business unit of Adolph Coors Co., has sold a non-alcohol beverage.

Testing Coors Rocky Mountain Sparkling Water in the unusually competitive sales environment these test markets represent challenges the brand's ability to perform. Per capita consumption of bottled water in these areas exceeds the U.S. average.

Coors Rocky Mountain Sparkling Water has a powerful heritage which is one of its most important attributes.

Research verifies that consumers recognize the Coors heritage of having a pure water supply. In a recent study, the majority of consumers considered water from the Rocky Mountains to be the purest in the world.

Coors Rocky Mountain Sparkling Water will be packaged in 6.5-ounce, six-pack bottles and 28-ounce bottles. It is available in original, lemon lime and cherry flavors. These natural, essence flavors are extracted from fresh fruit. The bottles are made of clear glass with a blue tint and feature a baked-on label.

Television advertising for Coors Rocky Mountain Sparkling Water begins airing in Arizona Jan. 15, 1990, and in Colorado and northern California on Feb. 5, 1990.

CLEVELAND (JAN. 15) BUSINESS WIRE - Eaton Corp. Monday announced it has acquired a majority of the assets of Microflex Inc. NC, a developer of software products for transportation and other related industries.

Terms of the transaction were not disclosed.

Microflex is based in Winston-Salem, N.C., and is a leader in the development of micro-electronic diagnostic technology used in the automobile and trucking industries. The company will operate as a part of Eaton's Drivetrain Systems Division, which has headquarters in Galesburg, Mich., and Hounslow, U.K.

In commenting on the announcement, John S. Rodewig, Eaton vice president Truck Components Operations/Worldwide, said, ''With its software experience in truck maintenance systems, Microflex will be a valuable resource as we develop an integrated drivetrain systems capability. This acquisition will directly contribute to Eaton's goal of becoming the major global supplier of customer-specified integrated drivetrain systems and microprocessor-based components for commercial vehicles.'' Eaton had truck components sales of $1.3 billion in 1988.

Microflex founder Jon F. White II said, ''We expect to be a positive contributor to Eaton's drivetrain programs, while continuing to provide custom software services for the transportation industry. We are proud of our pioneering role in the introduction of a more universal diagnostic environment for the truck industry. We will provide support for Eaton systems, and we will respond to the industry's needs in the area of diagnostics.''

With 44,000 employees in 22 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles engine components, electrical equipment and controls.

The company's sales in 1988 were $3.5 billion, with income from continuing operations of $228 million, or $6.11 per share of common stock. For the nine months ending Sept. 30, 1989, Eaton had sales of $2.8 billion and income of $171 million, or $4.54 per share.

SAN FRANCISCO (JAN. 15) BUSINESS WIRE - Thortec International Inc. (NYSE:THT) announced Monday that it has successfully completed the sale of the assets, other than receivables, of its California Water Labs subsidiary, for $1,460,000 in cash.

This transaction is part of the company's ongoing financial restructuring program previously announced.

Thortec further announced that Arthur H. Stromberg has resigned from the board of directors. Stromberg had served as chairman and chief executive officer until June 1989 and since then as an outside director.

Thortec, through its subsidiary URS Consultants, is a multi-disciplinary engineering, architecture, planning and consulting firm providing services to governmental, commercial, industrial, educational and health care clients across the United States.

URS Consultants provides a diverse range of professional services to solve complex hazardous material, environmental, transportation and water treatment problems.

Thortec's subsidiary Mitchell Management Systems develops and implements computerized project management control systems for government agencies, major industrial corporations and the architecture, engineering and consulting community.

SAN FRANCISCO (JAN. 15) BUSINESS WIRE - Southern Pacific Transportation Co. said Monday it will increase railroad freight rates for all conventional intermodal shipments 7 percent effective Feb. 15, to help offset increased fuel and other costs.

George Woodward, SP's executive vice president of distribution services, described it as ''an appropriate increase, in light of improved intermodal service and equipment availability, and it will allow us to remain competitive with recent price increases announced in the trucking

industry.''

Woodward noted that diesel fuel price increases have affected both railroads and trucks. ''Many truck operators,'' he said, ''have established fuel surcharges which can have an uncertain impact upon rate levels for shippers. SP's simpler approach will make it easier for customers to plan their transportation needs.''

PALO ALTO, CA (JAN. 15) BUSINESS WIRE - As previously announced, Lincoln N.C. Realty Fund Inc. (ASE/PSE:LRF) has received a letter of intent from Silverstone Partners, a California corporation, indicating Silverstone's intent to purchase all of the issued and outstanding common stock and warrants of LNCRF at a purchase price of $9.75 per share and $.03125 per warrant.

These purchase prices are subject to reduction if any dividends are paid after Jan. 11 or if costs and expenses of LNCRF exceed $100,000.

The letter of intent states that the offer will be made on an ''any and all'' basis, subject to an as yet undesignated percentage being tendered and that the offer will be subject to the following conditions:

1. Complete review by Silverstone of the books, records, business and affairs of LNCRF;

2. Negotiation and execution of a definitive agreement;

3. Approval of the transaction by the LNCRF board of directors;

4. Silverstone arranging suitable financing (Silverstone states that it has received a proposal for financing from Wells Fargo Bank and Silverstone anticipates finalizing terms in the near future);

5. Receipt by LNCRF of confirmation as to fairness by LNCRF's investment bankers;

6. LNCRF obtaining legal title to the Lincoln Wrigley Creek project; and

7. Confirmation that no event of default exists with respect to outstanding loans extended by LNCRF.

Bill Garlock, president of LNCRF, stated that the board of directors will

consider the letter of intent at a special meeting on Monday afternoon, Jan. 15.

SAN FRANCISCO (JAN. 15) BUSINESS WIRE - The Pacific Bank achieved a record net income of $7,431,000, ($2.24 per share adjusted for a two for one stock split in March 1989) for the year ended Dec. 31, 1989, a 110 percent increase over earnings of $3,542,000 ($1.33 per share) for the previous year, it was announced by Norman C. Eckersley, chairman and chief executive officer.

At year end, the bank's assets were at an all time high of $676,497,000, an increase of 23 percent over the previous year. During 1989 deposits increased 25 percent to $598,740,000, and loans increased 34 percent to $519,665,000.

Eckersley said a significant milestone was attained last year when the bank's return on average assets ''reached 1.24 percent and a return on average equity of 16.7 percent, which attests to the maturity and very strong financial position of the bank.''

''In 1989 we made major strides in positioning the bank for future growth and expansion through a substantial increase in our capital base, improvements in facilities and services, and most especially, a vigorous program of developing new banking relationships and maintaining our valued longtime customers,'' Eckersley stated.

For the fourth quarter, net income was $2,033,000, (53 cents per share) a 233 percent increase over fourth quarter 1988's income of $610,000 (23 cents per share).

During the year the bank increased its capital by $15.5 million through a rights offering to existing shareholders and by the sale of 400,000 shares of common stock to clients and supporters of the bank, the latter being the first time the bank had offered stock outside of its original shareholders.

Other highlights of the year included strong performances by the bank's San Francisco branches and special divisions, including the trade finance, trust, metropolitan and insurance premium finance units. Also, the new subsidiary office in Hong Kong became profitable during 1989, in its first year of operation.

SANTA CLARA, CA (JAN. 15) BUSINESS WIRE - A new 256K bit Static RAM from Catalyst Semiconductor provides fast, low-power CMOS memory at rugged industrial temperatures (-40 degrees C to +85 degrees C), with the additional features:

-- single 5V supply (plus/minus 10 percent),

-- low power CMOS: 80mA maximum active: 100 micro Amps maximum standby,

-- 32K x 8 configuration,

-- access time: 85 ns max (CAT71C256-85),

-- immediately available in production quantities.

The new CAT71C256LPI is a low power 256K bit CMOS SRAM organized 32K x 8. With an access time of 85ns and extremely low power requirement during standby (100 micro Amps) the CAT71C256LPI is ideal for portable, battery-backed systems.

Because it is guaranteed over the industrial temperature range, this new SRAM is also ideal for all ruggedized systems and equipment. Its applications include:

-- Process control and industrial instrumentation

-- Test instruments and data acquisition systems

-- Workstations and single board computers

-- DSP, analytical and medical instruments

The CAT71C256LPI's 85ns access time allows systems to operate faster, since it will typically eliminate memory related wait states. It requires only a single 5 volt power supply and provides direct TTL input/output compatibility.

Catalyst was founded by B.K. Marya in 1985. The company introduced the world's first single chip Smart Card circuit in 1986. Catalyst is a major supplier of EEPROM, SRAM, EPROM, and Smart Card circuits.

MILPITAS, CA (JAN. 15) BUSINESS WIRE - Robert Cohn, president and chief executive officer of Octel Communications Corp. Monday announced that for the second quarter of fiscal 1990, ended Dec. 31, 1989, net revenues were $30,835,000, an increase of 51 percent over net revenues of $20,435,000 for the like three-month period in fiscal 1989.

Net income for the second quarter of fiscal 1990 was $4,413,000, or 26 cents per share, an increase of 55 percent over net income of $2,852,000, or 19 cents per share, for the similar period last year.

''Our revenues during the quarter continued to come from our traditional market segments -- including Fortune 1000 companies, telephone companies, cellular providers, smaller companies and international markets,'' said Cohn.

''During the quarter U.S. West began testing one of our new Sierra multiapplications voice processing platforms. We announced Sierra on Jan. 10th, and will begin shipments in April 1990.''

For the first half of fiscal 1990, ended Dec. 31, 1989, net revenues were $59,030,000, an increase of 54 percent over net revenues of $38,396,000 for the like six-month period in fiscal 1989. Net income for the first half of fiscal 1990 was $8,133,000, or 49 cents per share, an increase of 49 percent over net income of $5,470,000, or 37 cents per share, for the similar period last year.

Octel Communications Corp., based in Milpitas, designs, manufactures and markets voice processing systems, including the Aspen family with four models, and the VPC 100.

The company sells its products through major U.S. and international distributors and direct sales offices in Chicago, Dallas, Detroit, Houston Los Angeles, New York, St. Louis and San Francisco. The company has an OEM agreement with Hewlett-Packard Co. to distribute its full product line in Europe.

SUNNYVALE, CA (JAN. 15) BUSINESS WIRE - David L. Mosby, president of Softguard Systems Inc., announced the execution of a letter of intent to acquire all the outstanding shares in Smallframe Systems Inc., in exchange for Softguard common stock.

The acquisition remains subject to the approval of the respective boards, Smallframe shareholders and appropriate regulatory agencies.

A leading supplier of ''copy protection'' packaging for software publishers, Softguard has faced a controversial and rapidly changing

market that has led to mixed operating results since its public offering in 1984. Smallframe has shown attractive operating results over the past four years as a provider of a variety of micro-computer based voice processing products and services.

''This transaction brings to Softguard, proven management expertise, existing technology that can make possible new yet related products, and a broadened revenue base from which to build for the future. By combining the resources of the two firms, we assess that the resulting enterprise will be more competitive and prosperous than would otherwise be the case '' Mosby said.

Softguard Systems Inc. is headquartered at 710 Lakeway, Suite 200, Sunnyvale, Calif. 94086.

LOS ANGELES (JAN. 15) BUSINESS WIRE - Ralphs Grocery Co., a Delaware corporation whose common stock is held by Campeau-related companies, reaffirmed its separate structure Monday.

Byron Allumbaugh, chairman and chief executive officer, indicated, ''While we regret that such actions (the bankruptcy filings) were necessary by some Campeau companies, these actions do not affect Ralphs Grocery Co.''

Allumbaugh continued: ''Ralphs is a totally separate corporation that operates on a stand-alone basis. This means that Ralphs does not need funds from Campeau corporate entities and that Campeau corporate entities are prohibited from removing any funds from Ralphs.''

In a letter to all Ralphs' employees, Allumbaugh referred to a meeting held last Thursday with all of Ralphs' major vendors to discuss the situation. ''A panel of legal, financial and banking executives was assembled to answer any and all questions related to Ralphs' corporate structure.''

Allumbaugh continued, ''As a result of the meeting, we received strong support from the vendor community and we expect to continue purchasing under the same terms and conditions as we have in the past.'' Bankers Trust, Ralphs' lead credit bank, also expressed its support for Ralphs and the continued availability of credit lines to fund aggressive expansion and remodeling plans.

The message to employees was: ''It is business as usual at Ralphs. There will be absolutely no effect on our customers or the condition of our stores. We will continue to have one of the largest selections of any major supermarket in Southern California with our usual service levels and efficiency of operation.''

Finally, underscoring to Ralphs' employees the difference in the situation between other Campeau entities and Ralphs, Allumbaugh concluded by commenting on the major expansion and remodeling program which has occurred this last year and plans to continue to expand the business: ''Ralphs is recognized as a strong and financially viable company with a great future. With your dedication, we can continue to make the company the success it has always been.''

#90015b0150 01/15/1990 ~Business Wire

AUSTIN, TX (JAN. 16) BUSINESS WIRE - Communications Transmission Inc. (NASDAQ:CTIA) Monday announced that the net loss for its second fiscal quarter of 1990 (ended Nov. 30) was $15.1 million, or $1.52 per common share, on revenues of $96.9 million, bringing the total loss for the fiscal year to $26.5 million, or $2.69 per common share, on revenues of $196.5 million.

This compares with losses of $6.7 million (71 cents per common share) and $8.6 million (96 cents per common share) on revenues of $107.9 million and $220.3 million, respectively, for the comparable prior-year periods.

CTI's consolidated losses for fiscal 1990 include 100 percent of the loss reported by the company's subsidiary, ALC Communications Corp. CTI is required to report 100 percent of ALC's losses rather than the company's approximately 55 percent equivalent common stock ownership percentage in accordance with accounting rules in ARB 51, paragraph 15.

In the prior-year period, CTI was not required to report all of ALC's losses. However, for comparative purposes, if 100 percent of ALC's results had been included, the company's second-quarter and six-month fiscal 1989 losses would have been increased by $8.3 million and $13.3 million, respectively.

On Jan. 8, 1990, CTI announced that ALC and Telecom USA had entered into a letter of intent for a business combination of ALC into Telecom USA. Under the letter of intent, all outstanding capital stock of ALC would be converted into units of Telecom USA common stock and cash at a total value

of $3.00 per share.

CTI's ownership interest in ALC through its Series B and C preferred stock is convertible into approximately 17 million shares of ALC.

If a definitive agreement is reached and the required regulatory and shareholder approvals are obtained, the transaction could result in a substantial gain for CTI. Also, CTI would continue to supply ALC with the transmission capacity currently provided under long-term contracts.

#90015b0152 01/15/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (JAN. 16) BUSINESS WIRE - With the amalgamation of Strongbow Resource Corp. (a private company) and Consolidated Ramrod Gold Corp., the company has acquired two promising properties located in the United States: the Neel-Jacobsen gold prospect, which is in the same area as the company's Whitmore mineral claims in Wenatchee, Wash., and the Campo Seco gold prospect in California.

A detailed geological program, trenching and scout drilling will begin this spring on the Neel-Jacobsen and the Whitmore properties. Both of these properties are contiguous to Breakwater's Cannon Mine. A seismic survey and scout drilling program is to begin on the Sun mineral claims, located in the Carlin/Ivanhoe gold belt, Nevada, early this spring.

ITALY

An exploration permit covering the Valle Imperina gold, silver and base metals prospect has been granted to the company's Italian subsidiary, Ramrod Italia, s.r.l. A program of geological soil sampling and scout drilling is currently in progress. A scout drilling program on the Monteneve zinc-lead-copper-silver prospect is scheduled to begin once an exploration permit is in place.

PORTUGAL

The company is continuing to negotiate an exploration permit covering a gold and silver prospect located in northern Portugal.

GUATEMALA, CENTRAL AMERICA

Government approval of the transfer of the El Pino exploration permit to the company's subsidiary, Minas Ramrod S.A., has now been received. Transfer of the Todos Santos permit is in progress. Both of the permit

areas consist of zinc-lead-silver bearing breccia zones. A scout drilling program is underway on the El Pino prospect.

The company anticipates receiving results from the scout drilling programs currently in progress at the Valle Imperina property in Italy and the El Pino property in Guatemala within the next several weeks and will release them at that time.

The Vancouver Stock Exchange has neither approved nor disapproved of the contents of this press release.

DALLAS (JAN. 15) BUSINESS WIRE - Cybertek Corp. (NASDAQ:CKCP) Monday reported net income of $505,000, or 14 cents per share, for the third fiscal quarter ended Dec. 31, 1989.

The company reported a net loss of $181,000, or 5 cents per share, for the comparable period last year. Revenues for the third quarter were $5.7 million compared with $4.8 million for the third quarter last fiscal year.

For the first nine months of the current fiscal year, Cybertek reported a net income of $1.2 million, or 32 cents per share, on revenues of $17.2 million. The company reported a net loss of $243,000, or 7 cents per share, on revenues of $15 million for the first nine months of last fiscal year.

Vaughn W. Morgan, president and chief executive officer, noted that increases in revenues from its consulting and maintenance services

business and reduced operating expenses contributed to the improvement in earnings.

LAS VEGAS, NE (JAN. 16) BUSINESS WIRE - Thousands of people jammed the Rio Suite Hotel & Casino Monday following a ribbon-cutting ceremony for the grand opening of the first gaming property developed by MarCor Resorts Inc. (NASDAQ/NMS:MAAR).

The 430-suite hotel-casino, the first all-suite hotel-casino in the nation officially opened at 10 a.m. after a ribbon cutting by Nevada Gov. Bob Miller; Robert R. Maxey, president of the Rio; and Anthony A. Marnell II, chairman of the board of MarCor.

MarCor is the general partner in MarCor Resorts, L.P. V, which owns the 21-story Rio. MarCor, which has developed industrial, office and commercial centers, is now planning a major hotel-casino for property it owns in the Green Valley area of Las Vegas. The company is also considering developing a hotel-casino at ''Old Vegas,'' another site it owns.

''We're excited by the first-day success of the Rio and expect the hotel to be a huge hit with both tourists and Las Vegas Valley residents,'' MarCor President James A. Barrett Jr. said.

The Rio, located on Flamingo Road at Valley View, features a 44,000-square foot casino, lounge, bars, specialty shops and five restaurants, all in an exciting Brazilian Carnival theme.

#90015b0242 01/15/1990 ~Business Wire
SAN JOSE, CA (JAN. 16) BUSINESS WIRE - Corvus Systems Inc. Monday announced unaudited results of its operations for the second quarter of fiscal 1990.

For the quarter ended Nov. 30, 1989, Corvus reported net operating revenue of $2,091,000, a decrease of approximately 53 percent from sales of $4,425,000 for the comparable period in fiscal 1989.

The company posted a net loss for the current quarter of $282,000, or 1 cent per share, compared with a net profit of $213,000, or 1 cent per share, for the like period last year.

According to Corvus, the decrease in sales from the comparable period in fiscal 1989 was due to several factors, including price reductions to promote sales of the company's older networking products, the downsizing of the company and customer uncertainty as to the company's financial condition.

In addition, the company has reduced prices for certain of its products, principally hardware products, in response to increased price competition from other manufacturers of network products.

In announcing the results, Timothy R. Larkin, president and chief executive officer, said that Corvus has made no shipments to Amstrad Plc. during the second quarter and that second quarter sales to Control Data Corp. had been substantially lower.

According to Larkin, the lower sales to Control Data were primarily due to Control Data's sale of its education division to The Roach Organization Inc. in September 1989.

At this time, Control Data elected to reduce its existing inventory of Corvus products by selling principally from that inventory, and to scale back its new purchases of Corvus products. Larkin said that pursuant to an agreement between Corvus and Control Data executed in December 1987, Corvus had granted Control Data exclusive sales and marketing rights of Corvus products to certain educational customers.

Larkin announced that Corvus, Control Data and The Roach Organization have agreed that neither Control Data nor The Roach Organization would have exclusive sales and marketing rights for Corvus products in the educational market.

Corvus Systems Inc. was founded in 1979 and today has offices in Canada, the United Kingdom, France and the United States. Corvus develops and markets a full line of networking and connectivity hardware and software products that are marketed worldwide through a network of dealers, distributors and original equipment manufacturers.

YONKERS, NY (JAN. 15) BUSINESS WIRE - Codenoll Technology (NASDAQ:CODN)

and Soliton Systems, K.K. of Japan Monday jointly announced a distribution agreement under which Soliton will sell Codenoll computer local area network (LAN) systems in Japan.

The value of the contract is estimated at $3 to $5-million over the next four years.

Soliton is one of the leading network suppliers in Japan, which is a strong network market. The company has a growth rate of over 70 percent annually and is expanding its product and system offerings to prepare for further anticipated growth.

Codenoll is the leading supplier of Ethernet LAN systems using fiber optic cables, and has recently introduced network systems using the new, high-speed FDDI networking technology.

FDDI offers eight to 10 times faster data transmission than current LAN technologies and has been standardized by the American National Standards Institute (ANSI) and the Internatioanl Standards Organization (ISO).

Soliton Systems was founded in 1982 by a group of scientists and engineers who were instrumental in bringing the microprocessor revolution to Japan.

As the company's reputation grew, subsidiary financing became available from suh key sources as Nippon Steel Corp., Canon Corp., and the Hitachi Group. Today, Soliton enjoys close relations with virtually all of Japan's top electronics and industrial firms.

In 1984 Soliton became the sole distributor in Japan for the products of Bridge Communications, and later 3Com Corp. The strong engineering and support organization that Soliton built to supplement its sales team has enabled the company to become one of the key network oriented VARs in Japan. In 1988 the comapny formed a joint venture with 3Com to pursue further research and development of Japanese-oriented network products. Soliton is forecasting sales in excess of $30 million (U.S.) in its 1989 fiscal year and currently employs 70 persons.

Codenoll Technology has recently signed a number of other distribution and OEM agreements with companies such as Bull, Robert Bosch of Munich, West Germany and Eurolan of Milan, Italy.

STATEN ISLAND, NY (JAN. 15) BUSINESS WIRE - Atlantic Express Inc. (NASDAQ Symbols: ATEX, ATEXW) Monday announced it has acquired the operations of Weidhass Tours Inc., a tour bus and travel agency business based in Pennsauken, N.J. Terms of the acquisition were not disclosed.

Commenting on the acquisition, Domenic Gatto, president and CEO of Atlantic Express Inc., noted, ''The acquisition of Weidhass Tours, Inc. is part of our expansion program into the charter, tour bus and travel agency business. In July 1989, ATLANTIC began its expansion program by acquiring a charter and tour bus business with operations in New Jersey and Florida. We believe that these strategic acquisitions will enable ATLANTIC EXPRESS to capitalize on the rapidly expanding charter, tour bus and travel industries.''

Gatto continued, ''Weidhass Tours, Inc. currently generates approximately $4,000,000 in annual revenues. In addition to increasing ATLANTIC's revenue base, the acquisition will allow ATLANTIC EXPRESS, INC. to become a full-service transportation company.''

Atlantic Express Inc. is one of the largest contract bus carriers in New York City with a fleet of 1,500 buses currently transporting approximately 65,000 school children daily. The Company also provides charter and commuter bus transportation services. Atlantic Express Inc. operates an entertainment division presently consisting of the Showplace Bowling Center and joint venture interest in a ten-plex theatre complex in Staten Island, NY and an upscale restaurant in Piscataway, NJ. The Showplace center encompasses a 64 lane bowling facility with computerized, state-of-the-art equipment, an upscale restaurant, two cocktail lounges and additional retail space.

MENLO PARK, CA (JAN. 15) BUSINESS WIRE - Raychem Corp. announced Monday the election of Robert J. Saldich to the position of president and chief executive officer of Raychem, effective April 1.

Saldich was also elected a director of the company.

Paul M. Cook, chairman, CEO and founder of Raychem will retire on April 1.

He will remain chairman of the board of directors. Robert M. Halperin, president and chief operating officer of Raychem will also retire on April 1, and become vice chairman of the board. He will remain chairman of the company's Raynet subsidiary.

Paul Cook stated ''Saldich is a proven executive who knows the company's people, products and technical strengths intimately. He commands respect from all, inside and outside of Raychem.''

Saldich, 56, presently a senior vice president, has been with Raychem since 1964. He has been a member of the executive committee of Raychem since its formation in 1988, with responsibility for the telecommunications sector, central technology and manufacturing. He served previously as general manager of several Raychem divisions during his career, and was the first president of Raynet.

He said ''I am proud to lead a company with impressive strengths during a period of enormous opportunities and significant challenges.''

Harry O. Postlewait, 56, was elected a senior vice president of Raychem, and will become a member of the company's executive committee. Postlewait will assume responsibility for the telecommunications sector. He joined the company in 1964, became a vice president in 1971, and has been general manager of the telecommunications division since 1986.

Raychem is a broadly based materials science company serving international markets. The company develops and manufactures high-performance products for the aerospace, automotive, construction, electronics, electrical power process and telecommunications industries.

SALT LAKE CITY (JAN. 15) BUSINESS WIRE - Dayna Communications Inc. Monday announced new product offerings in its DaynaNET line of local area network operating systems for Macintosh and PC users.

Priced from $795 to $3,995 retail, the new DaynaNET models are available immedidately.

A specially adapted OEM version of Novell Inc.'s NetWare, DaynaNET uses a cost effective IBM compatible 286 or 386 computer as a dedicated server, and offers print and file services to Macintosh and PC users over LocalTalk and Ethernet cable systems.

Previous versions of DaynaNET supported only a single server over LocalTalk cables. DaynaNET is now available in the following configurations, all of which allow multiple server networks.

Model	Supports	Retail
DaynaNET 4L	2 to 4 users on LocalTalk	$ 795
DaynaNET 8L	2 to 8 users on LocalTalk	$1,795
DaynaNET 8LE	2 to 8 users on LocalTalk and/or Ethernet	$2,195
DaynaNET XL	2 to 100 users on LocalTalk	$3,595
DaynaNET XLE	2 to 100 users on LocalTalk and/or Ethernet	$3,995

Prices include the DaynaNET operating systems software and one DaynaTALK PC network interface card for the file server. All models of DaynaNET can be upgraded and Dayna will apply a generous credit for the model currently owned against the cost of the upgrade.

As a custom version of NetWare, DaynaNET contains all of the features that have made NetWare the leading network operating system in the PC market, as well as some added features beneficial to the Macintosh user. Dayna has tailored DaynaNET to meet the needs of the Macintosh market and the small to medium sized networks that characterize it. No knowledge of NetWare is needed to install or administer a DaynaNET network. Macintosh workstations on the network use AppleShare Workstation Software to interface with the operating system. This imparts the familiar Macintosh look to network operations such as logging in, choosing the server and printing. All administrative tasks (such as assigning users and their security rights) are performed from any Macintosh on the network through a single application.

DaynaNET is also compatible with DaynaMAIL, an advanced electronic mail system built on the MHS (Message Handling Service) protocol. DaynaMAIL for the Macintosh has been available since June 1989. The PC version of the product is expected to ship in the first quarter of 1990.

LONGMONT, COL (JAN. 15) BUSINESS WIRE - AT&T's UNIX Software Operation, Morristown, N.J., Monday announced that it has signed a software development agreement with Solbourne Computer Inc. of Longmont.

According to the agreement Solbourne will provide AT&T with its C++-based Object Interface (OI) Library, a graphical user interface (GUI) development system.

AT&T also will distribute the Solbourne window manager (swm), an X Window System manager developed with the OI Library and AT&T's C++ language.

Through the agreement, AT&T's UNIX Software Operation will license the OI Library and swm in source code form to other computer vendors, independent software vendors (ISVs), and distributors who can then provide binary versions of these products for any computer or workstation that supports the X Window System.

The OI Library is the first C++-based X toolkit to be made available through the UNIX Software Operation. Its collection of C++ 'objects' makes it easy for developers to implement GUI features such as windows, buttons and menus.

OI is unique in that it enables X application developers to construct a user-interface independent of a particular GUI. The OI C++ objects are generic in nature.

Current development versions of the OI toolkit demonstrate support of both the OPEN LOOK and OSF/Motif GUIs, and may be easily configured to conform to other GUI standards as they emerge.

Solbourne has created a number of software tools with its OI Library, including the Solbourne window manager (swm). All of Solbourne's C++ tools developed under OI may support either OPEN LOOK or OSF/Motif. The UNIX Software Operation intends to beta early versions of the software.

Solbourne Computer Inc. designs, markets and services a line of SPARC-compatible workstations and servers. The company introduced its first SPARC-compatible Series4 workstations in January of 1989.

GLENDALE, CA (JAN. 15) BUSINESS WIRE - MCBA Inc., a leading supplier of business application software for mini- and microcomputers, has announced the appointments of Robert Meisterling as marketing communications manager and Robert St. Amand as public relations director.

These appointments mark the first of a number of significant marketing and product announcements forthcoming from the Glendale-based company.

Meisterling will spearhead the advertising and promotional efforts at MCBA as well as supervise the in-house marketing communications and creative staff.

In 20-plus years in the advertising field, Meisterling has held copywriter advertising and public relations management positions for several companies including the Capital Record Club and Bishop Graphics (a developer of engineering design products).

Besides handling the traditional public relations functions, St. Amand will also be handling the company's trade show promotions and newsletter.

St. Amand's computer background spans eight years in the business applications arena and ecompasses systems design and marketing as well as public relations. Most recently, he served as a staff reporter for ''The International Trader,'' a Los Angeles-based financial newsletter.

MCBA is a privately held company founded in 1974, boasting 20 percent growth for fiscal 1989. MCBA is a leading supplier of mid-range accounting, manufacturing and distribution software with over 30,000 installations worldwide.

MCBA packages support an impressive array of hardware platforms and operating systems: Digital Equipment Corp. VAX, Wang VS, Hewlett-Packard 3000, a wide range of UNIX- and XENIX-based computers -- including NCR Tower, Altos and 286/386 compatibles -- and PC-MS/DOS Local Area Networks.

MCBA sells primarily through its authorized MCBA installer program and a network of international distributors. MCBA is located at 425 West Broadway, Glendale, Calif. 91204-1269. MCBA representatives can be contacted at 818/242-9600.

NEW YORK (JAN. 15) BUSINESS WIRE - Josephthal & Co. Inc. and Rosenbaum & Co., two New York-based investment banking firms, announced Monday that they have agreed to work together to raise permanent capital for middle market companies.

The primary focus of the joint arrangement will be private and public companies which need to raise $5 to $15 million in a public offering. Rosenbaum & Co. will originate and evaluate transactions on behalf of Josephthal.

Charles S. Slotkin, managing director of Rosenbaum & Co., stated, ''Josephthal's ability to raise permanent capital in the public market for emerging growth companies is unknown to most of the venture capital community and their respective portfolio companies. This underwriter provides an opportunity for potential issuers that have a successful operating history but are too small to attract the interest of the major bracket firms.''

Josephthal, based in New York City, was founded 80 years ago and is a member of the New York Stock Exchange. Josephthal is a full service investment banking firm which has 13 offices and over 200 stockbrokers throughout the eastern United States.

Josephthal has lead managed several successful common stock and convertible debt public offerings during the past three years. The firm's public offering transactions have involved a variety of manufacturing and service industries.

Since October 1987 the firm has lead managed four transactions. Its institutional and retail customer base has a strong appetite for companies that have a positive financial history and need additional permanaent capital to continue to grow.

Rosenbaum & Co., also based in New York City, provides private placement and other investment banking services to small and medium-sized companies. The firm has a successful track record in raising venture capital for companies which possess a strong management team and have a limited operating history.

AUSTIN, TX (JAN. 15) BUSINESS WIRE - HealthVest (ASE:HVT) Monday announced that it has made or has arranged to make interest payments to all of its lenders of approximately one-fourth of the amounts which were due in late December or early January.

HealthVest anticipates making additional interest payments upon receipt of the mid-January 1990 payment due from Healthcare International Inc. and receipt of the contingent payment due on the closing of the sale by Healthcare of its Southern Pines facility.

HealthVest's lenders have stated that the acceptance of payment of partial interest does not constitute a waiver of any of their rights or remedies under their loan agreements, including the rights to foreclose on their

respective collateral.

HealthVest has scheduled meetings with its lenders in late January regarding the possible restructuring of the debt owed to those lenders.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers and facilities offering other related health care products and services.

HealthVest is listed on the American Stock Exchange under the symbol HVT.

NEW YORK (JAN. 15) BUSINESS WIRE - Westvaco Corp. (NYSE:W), a major manufacturer of paper, packaging, and chemicals, reported Monday on the solid results that have been achieved through late 1989, dramatically reducing by 96 percent the generation of trace amounts of dioxin found in its pulp bleaching process at its Covington, Va.; Luke, Md.; and Wickliffe, Kentucky mills.

THe company has notified the Environmental Pretection Agency, the Food and Drug Administration, and state governments where the mills are located of the results and progress made.

John A. Luke, president and chief executive officer of Westvaco, said, ''We are pleased to report that dramatic reduction in 2,3,7,8-TCDD and 2,3,7,8-TCDF have been achieved since data were compiled for a joint paper industry/EPA Dioxin Study in July of 1988.

''These reductions were the result of Westvaco's early and voluntary commitment to make process changes designed to limit the formation of dioxin in the pulp bleaching process. We are pleased with our progress.''

Since the time samples were collected for the joint paper industry/EPA Dioxin Study in 1988, the three Westvaco mills have implemented a number of process changes which have resulted in reduced levels of chlorinated dioxins and furans in effluent, sludge, and final bleached pulps. In 1989 Westvaco was the first in the paper industry to announce a voluntary major capital investment program totaling over $30 million designed to reduce the extraordinarily small quantites of dioxin that were found in the pulp bleaching process currently practiced by the industry.

In addition, over the last two years, Westvaco has committed approximately $3 million from its research budget to continue studies of how dioxin is formed and the most effective ways to prevent its generation.

''Today, our cumulative investment for the total company for environmental protection approximates $330 million,'' Luke said. ''It is our firm belief that all of Westvaco's products are safe and do not represent any danger to human health. The same is true for our workplaces and our communities.

''Westvaco is in compliance with environmental standards at each of our plant locations, and we provide better performance than regulations require in a great many instances. We feel that the aggressive steps we are taking on our own initiative are consistent with Westvaco's long history of leadership in the protection of the environment.''

FREMONT, CA (JAN. 15) BUSINESS WIRE - Alantec announced Monday it has closed a $4.6 million round of venture capital financing, raising the company's total equity to over $6 million.

The new funds have been designated for working capital, and will be used to continue product development and to expand marketing of the company's initial internetworking products.

''We are pleased the financing community shares our belief that Alantec is positioned to assume a leadership position in the fast-growing market for local area network bridges and other internetworking products,'' said Michael Kalashian, Alantec founder and executive vice president.

During 1989, Alantec introduced the first bridges with logical filtering, an advanced technique for improving network performance and security. It also introduced the MultiLAN Switch, the first bridge that switches network traffic among several local area networks.

Along with TA Associates, the primary first-round investor, new second round investors are Accel Partners and Dougery, Wilder & Howard. Alantec completed its first round of financing in May 1988, raising $1.5 million.

Alantec internetworking products manage multiple-LAN networks. The

company markets through value-added resellers to managers of large networks within Fortune 1000 companies, government agencies and large universities.

ARNHEM, Netherlands (JAN. 15) BUSINESS WIRE - Akzo nv and AMP Inc. Monday announced a new 50-50 joint venture to manufacture printed wiring boards and related materials for the automotive, computer and electronic industries.

Under the agreement the new joint venture will acquire the business of the Additive Product Co., a 50-50 joint venture between Akzo and Kollmorgen Corp. established in early 1989. Akzo and AMP also will acquire all the related technology from Kollmorgen.

Akzo and AMP will pay Kollmorgen approximately US$50 million for the acquisition.

The new joint venture will be based in Melville, N.Y. It employs nearly 500 persons. The companies estimate that in the first year sales will reach US$50 million. Both Akzo and AMP expect sales to grow strongly in the coming years.

Another joint venture of Akzo and Kollmorgen, Akzo Electronic Materials Co. (AEMC), Schaumburg, Ill. will be discontinued. However, Akzo will independently remain in the gallium arsenide substrates business through Crystal Specialities International, a wholly-owned unit in Colorado Springs, Colo.

Akzo, (NASDAQ:AKZOY) is one of the world's leading chemical companies. In 1989 it had estimated sales of more than US$9 billion. It has operations in 50 countries where it manufactures and markets chemicals, man-made fibers, coatings and healthcare products. In the United States and Canada it employs more than 11,000 persons at 161 locations. The company is based in the Netherlands.

Harrisburg, Pa.-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. Its 1989 sales were $2.8 billion. It has 24,000 employees in nearly 160 facilities in the United States and 26 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges (symbol; ''AMP'').

INDIANA, PA (JAN. 15) BUSINESS WIRE - Biocontrol Technology Inc. (NASDAQ:BICO), a developer and manufacturer of biomedical devices, has named Fred E. Cooper as chief executive officer, according to management at the company.

He initially joined the company's board of directors in June 1989. Prior to his appointment, Cooper was involved in the successful start-up and operation of various companies, including Equitable Financial Management Inc., a Pittsburgh-based company principally involved in the equipment leasing business, and Security Financial Services Inc., a company involved in new business development, venture funding and financial management. He is a 1968 graduate of the University of Maryland's School of Business Management and Finance.

In his role as chief executive officer, Cooper will concentrate on the company's overall strategic planning and financial affairs. The company is currently developing a noninvasive glucose sensor which will measure glucose levels in diabetics without requring the taking of a blood sample.

''I am very excited about the potential for Biocontrol Technology,'' cooper said. ''The glucose sensor promises to be a very succesful product and we are positioning our company to be ready to enter the market as soon as possible.''

He added that the company expects to have its first stage of financing for the glucose sensor development completed in 30 days. T.J. Feola joined the company in November 1989 as vice president, director of marketing and sales, as part of the company's overall marketing strategy.

David L. Purdy will continue his role as president and chairman of the board. He said of the company's new management organization, ''With an effective management team in place, we are now structured to complete our development programs, take care of our financial matters, and aggressively enter the market.''

Biocontrol Technology shifted its emphasis away from pacemaker manufacturing and marketing approximately three years ago and began development programs for polyurethane heart valves, noninvasive glucose sensors, and vascular access devices.

ATLANTA (JAN. 15) BUSINESS WIRE - First Financial Management Corp. (NASDAQ/NMS: FFMC) Monday announced that it has changed the name of its Financial Services Group to Basis Information Technologies Inc. (BASIS).

In making the announcement, Patrick H. Thomas, chairman of the board, president and chief executive officer, said: "FFMC's roots as a company were providing data processing services to local, independent banks. The

Financial Services Group now consists of the original operations plus 16 acquisitions made over the last six years.

"This name change to BASIS is a milestone, representing the years of strategic acquisitions and growth, assembling a nationwide network of companies, products, services and professionals. BASIS will operate as a subsidiary of FFMC."

Joe Dziak, president of BASIS, said: "We are committed to develop and market the types of data processing and related information services that independent financial institutions need to compete effectively in the 1990s. Local institutions, in particular, face intense competition. They are competing not only with each other but also with major regional and national firms.

"The key to success of the local institution with its customer will be its ability to offer a breadth of services unmatched in the industry. BASIS will provide the products and services to make that possible."

According to Dziak, BASIS has already entered into strategic partnerships with leading computer and communications firms to develop and offer 21st century technology for its customers today. These alliances, he says, are evidence of BASIS' long-term commitment to better service, support and communication.

"Historically, the Financial Services Group has operated as a collection of companies, reflecting the acquisitions over the last six years," Dziak said. "Starting in April of last year, that collection has been undergoing reorganization along functional lines to better serve the needs of our customers."

Currently, BASIS provides data processing and information services to Main Street institutions - thrifts, banks, credit unions and mortgage services, most with assets under $1 billion. These services are provided through 24 data centers around the country.

"New technologies are being applied to make our centers more efficient and effective. We anticipate broadening the scope of what we do for our customers until we become, in effect, gateways for them to a broad variety of products and services that we will introduce over the next few years," Dziak said.

#90015b0710 01/15/1990 ~Business Wire

RALEIGH, NC (JAN. 15) BUSINESS WIRE - First Citizens BancShares Inc. reports record earnings for 1989, according to Lewis R. Holding, chairman of the board.

Consolidated net earnings for the year ended Dec. 31, 1989 totaled $27.1 million compared to $21.2 million for 1988, an increase of 28 percent. Per share income for 1989 totaled $2.87 compared to $2.19 in 1988, an increase of 31.1 percent.

Net income for the fourth quarter totaled $6.5 million, compared to $5.6 million earned during the fourth quarter of 1988, a 17.2 percent increase. Per share income for the quarter ending Dec. 31, 1989 was 70 cents, compared to 57 cents earned per share in the corresponding period of 1988, an increase of 22.8 percent.

Holding attributed the increase in year-to-date earnings to a substantially higher level of loan volumes, the maintenance of a constant interest rate spread and nonrecurring gains relating to the sale of mortgage servicing rights and First Title Insurance Co. The increase in fourth quarter earnings was due to an improved interest rate spread and larger volumes of loans and deposits.

Total consolidated assets of First Citizens BancShares and subsidiary at Dec. 31, 1989 totaled $3.7 billion compared to $3.4 billion at year end 1988, an 8.3 percent increase. Total deposits of First Citizens Bank as of Dec. 31, 1989 were $3.2 billion, compared to three billion at year end 1988, reflecting an increase of 8.2 percent.

First Citizens BancShares is the holding company of First Citizens Bank, which serves 73 North Carolina counties with 304 offices in 159 towns and cities.

#90015b0718 01/15/1990 ~Business Wire
CLEVELAND (JAN. 15) BUSINESS WIRE - National City Corporation today reported record 1989 net income of $263.3 million or $4.35 per share, compared with $233.2 million or $3.84 per share earned in 1988, an increase of 13.3 percent.

For the fourth quarter, net income reached an all-time high of $68.5 million or $1.13 per share, compared with $66.5 million or $1.10 per share for the same quarter a year ago.

These amounts include after-tax securities gains of $.03 per share in the fourth quarter of 1989 versus $.07 per share for the same period in 1988.

Excluding these gains, operating earnings per share increased nearly 7

percent in the fourth quarter compared with the year ago quarter.

National City's return on equity reached 18.4 and 18.6 percent, respectively, for the fourth quarter and full year 1989. Return on assets was 1.25 and 1.24 percent, respectively, for the same periods.

National City ranks among the 35 largest bank holding companies in the nation based on total assets, but ranks 15th based on earnings and on market capitalization, and is near the top of the industry based on return on assets and return on equity.

#90015b0725 01/15/1990 ~Business Wire

MARLBORO, MA (JAN. 15) BUSINESS WIRE - Data Translation Inc. (NASDAQ: DATX) Monday announced sales and earnings for the fourth quarter of the fiscal year ended Nov. 30, 1989.

Net sales were $9,953,000 and net income was $478,000 (15 cents per share) compared to net sales of $11,016,000 net income of $1,026,000 (33 cents per share) for the same period last year. This represents decreases from the comparable quarter in 1988 of 9.6 percent in sales, 53.4 percent in net income and 54.5 percent in earnings per share.

"While these results are disappointing compared to a year ago, given our expectations then, I am somewhat encouraged by the fourth quarter improvement over the third quarter, said Fred Molinari, president.

"Net sales increased by almost six percent and unit volumes returned to levels that we experienced earlier in the year as a direct result of our pricing strategies focused at market share. This, coupled with our cost reduction efforts, have enhanced our profitabilty performance."

The company also reported net sales for the fiscal year 1989 which ended Nov. 30, 1989, of $41,984,000 and net income of $2,435,000 (78 cents per share) compared to net sales of $38,680,000 and net income of $2,662,000 (86 cents per share) for 1988. This reflects an 8.5 percent increase in revenues and an 8.5 percent decrease in net income vs. the fiscal year 1988.

"1989 clearly came up short relative to what we had envisioned, however, there were many positive developments throughout the year," said Molinari. "We managed our business decisively and expeditiously, recognizing and

accepting short-term trade-offs for longer-term rewards. We implemented price decreases when it appeared revenue was falling. We executed a workforce reduction and curbed operational spending to control costs.

"We focused the company around five product lines and believe that these activities have already begun to positively impact our business and should continue to do so."

Data Translation Inc. designs, manufactures and markets high-performance data acquisition and image processing board products and software that serve the laboratory, medical and industrial markets. Its products are compatible with many widely used microcomputers, including those from Apple, DEC, IBM, Intel and Sun.

#90015b0734 01/15/1990 ~Business Wire

NORTH BERGEN, NJ (JAN. 15) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) disclosed Monday preliminary operating results for its third fiscal quarter ended December 31, 1989.

The company reported that sales are expected to reach approximately $225,000,000 for the third quarter with net income to be approximately $4,500,000 or approximately $.13 per share. Results for the quarter are expected to be released by the end of the month. Net sales for the three months ended December 31, 1988 totaled $216,827,000 with net income for that same period at $3,590,000 or $.09 per share.

''Sales for the quarter ended December 31, 1989 were very disappointing,'' commented Stephen L. Lane, President. ''As a result, due to weakening retail sales, we are concerned about the fourth quarter's level of profitability.''

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronics products. The range of the Company's products includes televisions, video cassette recorders, compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones and answering machines. Recently, through its subsidiaries, the Company has introduced a line of personal computers and peripherals. H. H. Scott, Inc., a wholly-owned subsidiary, designs and markets a line of high fidelity audio and video equipment.

MIAMI (JAN. 15) BUSINESS WIRE - American Bankers Insurance Group Inc. (NASDAQ: ABIG) was advised that a judgement against a former agent in California (and vicariously against the company), was upheld on appeal.

The company's counsel believes that the affirmation was in error. The company is filing a petition for rehearing. Potential exposure under the judgement should not exceed $6.6 million (plus interest).

The company believes, however, any ultimate liability will be reduced by certain credits it is entitled to as well as comprehensive general liability policies issued by other insurance carriers. These coverages have been asserted in a separate action and a mid-1990 trial date is anticipated.

Nevertheless, the company has recorded a reserve as of Dec. 31, 1989 of approximately $2.3 million as a result of this development.

KANSAS CITY, MO (JAN. 15) BUSINESS WIRE - US Sprint Monday said it will offer billing and collections services agreements to more that 1,300 independent telephone companies.

The agreements will be implemented through services provided by two industry billing and collections services groups -- Independent NECA Services (INS), and National Independent Billing Limited Partnership (NIBP).

US Sprint already has billing and collection agreements with the seven Regional Bell Operating Companies, Cincinnati Bell, Southern New England Telephone and several large independent telephone holding companies.

The agreements give US Sprint customers the option of having their long-distance charges appear as part of their monthly bill from their local phone company.

INS and NIBP will receive the rated message information from US Sprint and

distribute the message to the independent telephone companies so they can bill the customer. Included in the messages that will be billed by the independent telephone companies will be Casual Caller, 900 Service, PublicFON, operator assisted calls, and direct dialed (1-Plus) traffic.

Ron LeMay, US Sprint president and chief operating officer, said, ''We are extremely pleased to announce the offering of these agreements to the independent telephone companies. ''Our goal is to provide an offering that will satisfy a customer's need to have both long-distance and local charges on the same bill, and to give the local telephone company flexibility to choose between two billing services providers -- INS and NIBP.''

The billing and collection agreements will be implemented during January, February and March.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

OTTAWA (JAN. 15) BUSINESS WIRE - Users of the Digital Equipment Corp. (DEC) LAT protocol now can extend directly into other operating environments as a result of DEC's recent licensing agreement with Gandalf.

Under terms of the agreement, Gandalf will begin offering DEC's proprietary LAT protocol with its Starmaster network processor, replacing Gandalf's existing single host of VAX cluster connectivity packages. The Starmaster network processor already is hardware-compliant with all DEC Ethernet hardware.

Because the Starmaster system directly supports the LAT protocol, LAT users and hosts can economically connect to resources and users in SNA, Novell and TCP/IP netword environments over a variety of non-LAT local area networks and wide area facilities.

Gandalf plans to deliver its LAT-based connectivity option to customers this month. The license number is LATM-90016.

#90015b0755 01/15/1990 ~Business Wire

MEMPHIS, TN (JAN. 15) BUSINESS WIRE - Schering-Plough HealthCare Products announced Monday that it has formed two new marketing units and a dual sales force ''to prepare for today's market demands and tomorrow's growth opportunities.''

Executives in charge of each of the organizations will report directly to David E. Collins, president of Schering-Plough HealthCare Products. The business unit was formed last September by consolidating parent Schering-Plough's Personal Care Group of Memphis, with its' over-the-counter (OTC) pharmaceutical business of Kenilworth, N.J.

One marketing organization will focus on the company's OTC and sun care product lines, including such brands as 'Afrin,' 'Chlor-Trimeton,' 'Coppertone,' 'Coricidin,' 'Correctol,' 'Di-Gel,' 'Drixoral,' 'Duration,' 'Shade,' 'Solarcaine,' and 'Tropical Blend.' It will be headed by Fred J. Fritz, senior vice president for OTC and seasonal marketing.

Another marketing organization will focus on the company's foot care products, including the Dr. Scholl's line, 'Clear Away' Wart Remover and 'Tinactin.' It will be headed by Gerry Nobrega, senior vice president for marketing and advertising.

Dual sales forces will be headed by Ray Modjeski, senior vice president for sales. One will concentrate on the OTC and seasonal products and one will concentrate on the foot care products.

For its administrative headquarters site, Schering-Plough HealthCare Products said it had selected an office facility in Bernardsville, N.J., that will house up to 300 employees and open by June 1, 1990. The business unit's Memphis facilities will continue to serve as an operational headquarters.

Schering-Plough HealthCare Products stands fifth among the top 10 OTC and sun care companies in the United States by sales volume, with some 70 percent of its sales deriving from brands holding leading positions in their markets.

With estimated 1989 sales of more than $600 million, the business ranks No. 1 in such marketing categories as OTC nasal decongestants and sun care and foot care products.

The business unit's parent, Schering-Plough Corp., is a research-based company engaged primarily in the discovery, development, manufacture and marketing of pharmaceutical and health care products worldwide.

DENVER (JAN. 15) BUSINESS WIRE - ASARCO Incorporated is underwriting the local presentation of The Miracle Planet beginning the week of January 14 on KRMA Channel Six, Denver.

The Miracle Planet is a six-part series that will examine the development of the earth, the interrelationship of its systems, and its prospects for the future.

Commenting on Asarco's underwriting of the series, Richard de J. Osborne, the company's chairman, president and chief executive officer said, ''We are pleased to make it possible for KRMA to air The Miracle Planet in the first year of the 1990's in what has been termed the decade of the environment. Asarco's business is the mining and processing of the metals and minerals of the earth for the benefit of man. And we view our role as being responsible stewards of the earth's resources.''

ASARCO Incorporated, headquartered in New York City, is a $2 billion NYSE listed company and one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services.

Asarco employs approximately 200 people in Colorado. Asarco's operations in Colorado include the Globe plant in Denver, one of the company's chief by-products facilities, and the Leadville mine and plant. Leadville was one of the original boom-town mining camps of the 1870's. Today Asarco's Leadville mine is an important producer of zinc, lead, silver and gold. It is operated by Asarco under a joint venture with the Resurrection Mining Company.

Asarco and its associated companies, with facilities in Australia, Canada, Mexico and Peru, together in 1988 accounted for about 11 percent of Free World mine production of copper, 17 percent of silver, 14 percent of lead and 10 percent of zinc.

LOS ANGELES (JAN. 15) BUSINESS WIRE - James C. Dawson has joined Security Environmental Systems Inc. (NASDAQ: SENV), it was announced by Jonathon

Grossman, executive vice president and chief financial officer of the Los Angeles-based company.

Grossman said in making the announcement, ''Jim brings to SES an expertise that will help us build the transportation segment of our business. Already he has brought severl new accounts to us, and we anticipate that his association with SES will help strengthen the company's presence in the hazardous waste hauling field, as well as in the infectious wastes disposal field.''

Dawson comes to SES from Graphic Disposal Inc., where he was secretary/treasurer and chief financial officer. Prior to that, he had been the owner of Tri-Counties Industrial Waste Management Co., in Banning Calif. He has also been employed as a motor carrier specialist for the California Highway Patrol in both San Bernardino and Los Angeles.

From 1978 to 1984, Dawson was owner of J.S. Dawson Transport in Banning, Calif. Prior to owning this company, he spent four years as a commercial vehicle inspection specialist for the California Highway Patrol in Banning.

He holds an A.S. degree in Police Science and Administrative Law from Mt. San Jacinto Community College in San Jacinto, Calif., and is currently attending the University of California at Riverside. He also holds four certificates from the California Highway Patrol Academy.

Security Environmental Systems Inc. has, since 1972, been servicing the Western states in the incineration and steam sterilization of infectious medical wastes.

ASARCO Incorporated, headquartered in New York City, is a $2 billion NYSE listed company and one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services.

Asarco employs more than 400 people in Missouri. Asarco operates two mines, West Fork and Sweetwater, and the Glover smelter-refinery in the New Missouri Lead Belt. The Glover plant was built in 1966 and is located in Iron County, approximately 100 miles southwest of St. Louis. It is supplied with lead concentrates produced entirely by the West Fork and Sweetwater mines. The West Fork mine is in Reynolds County, and reached full production capacity in 1988. The Sweetwater mine was purchased by Asarco from Kennecott Corporation in 1986.

Asarco and its associated companies, with facilities in Australia, Canada, Mexico and Peru, together in 1988 accounted for about 11 percent of Free World mine production of copper, 17 percent of silver, 14 percent of lead and 10 percent of zinc.

PEABODY, MA (JAN. 15) BUSINESS WIRE - PictureTel Corp. Monday announced that in 1989 it shipped more codecs to cutomers worldwide than any other company in the videoconferencing industry.

PictureTel codec sales last year were more than 10 percent above those of its nearest competitor. PictureTel showed particular strength in the market's fast-growing low data rate (56 kb/s - 384 kb/s) segment, outshipping its nearest competitor by a margin of more than three to one in the first half of 1989 according to published industry reports.

A total of 570 PictureTel C-3000 codes were shipped in 1989, compared to 102 in 1988. Customers include: AMTRAK, Arthur Andersen Consulting, Bain & Company, Boeing, Bristol Myers, McDonnell Douglas, Merrill Lynch and Westinghouse in the United States, Kyocera Corp. in Japan, Nixdorf in Germany, ICI in Australia, Thompson and Bull in France, Telesat in Canada, and Italtel in Italy.

''PictureTel was the first codec vendor to design and market complete, integrated videoconfencing systems which can be rolled into any conference room,'' said Dr. Norman E. Gaut, PictureTel's chairman and chief executive officer, ''Almost half of our codecs have been sold in our videoconferencing systems in 1989. Next year, we expect to sell over 70 percent of our codecs as part of videoconferencing systems.''

PictureTel C-3000 codecs are software-based, a feature that protects our customers, investment and permits them to support multiple compression algorithms, including PictureTel's proprietary HVQ as well as the upcoming CCITT Px64 standard without changing codecs.

PictureTel Corp., (NASDAQ:PCTLD), headquartered in Peabody, Mass., develops, manufactures and markets software-upgradeable visual telecommunications products for use with public or private digital networks. The company dominates the low bandwidth videoconferencing industry with more than 66 percent of the U.S. market.

TORONTO, Ontario (JAN. 15) BUSINESS WIRE - Officeland Inc. (NASDAQ:OFLDF) Monday announced that its Board of Directors has approved a three-for-one stock split subject to shareholders' approval at the Annual Meeting of Shareholders scheduled for February 8, 1990.

Assuming approval, shareholders of record as of the close of business on February 8, 1990 will receive two additional shares for each one share held.

At August 31, 1989, there were 3,912,752 common shares of Officeland Inc. outstanding, and 4,071,336 shares outstanding on a fully diluted basis.

This proposed share distribution will increase the liquidity of the Company's common stock in the marketplace.

Officeland Inc. provides collection and office equipment brokering services to financial institutions throughout North America.

MILWAUKEE (JAN. 15) BUSINESS WIRE - Directors of Federated Financial Savings and Loan Association (OTC:FEDF) declared its 12th consecutive quarterly dividend.

The dividend of 9.0 cents per share is payable on Feb. 12, 1990, to shareholders of record on Jan. 22, 1990.

Federated Financial Savings has consistently paid dividends since becoming a publicly-held association in February 1987. The current payment represents an annualized yield of 4.5 percent based upon the current average price of $8 per share.

Federated Financial Savings is a publicly-held Wisconsin savings and loan headquartered in Wauwatosa, a suburb of Milwaukee, and has 10 branches in southeastern Wisconsin. Federated had $315 million in assets as of Sept. 30, 1989. It was previously announced that Hopkins Savings and Loan would be merging with Federated. The transaction is expected to be completed by this summer.

NASHVILLE, TN (JAN. 15) BUSINESS WIRE - Surgical Care Affiliates Inc. (NASDAQ/NMS:SCAF), Monday announced that it has acquired a majority interest in the Surgery Center of Albuquerque, formerly know as the St. Joseph Surgery Center, located in Albuquerque, N.M.

Joel C. Gordon, chairman and chief executive officer stated, ''We purchased our interest in the Surgery Center of Albuquerque from St. Joseph's Hospital. The center will be operated as a joint venture between SCA and 30 local Albuquerque physicians.''

The center currently uses four operating rooms, two minor procedure rooms and pre-operative and post-operative areas. The center is certified by Medicare and recognized by all third party insurance companies.

Gordon further stated, ''SCA is very pleased to have made this acquisition and we look forward to becoming an integral part of the Albuquerque medical community. New Mexico is a new state for the company and we are very excited about entering this Southwest market.''

The acquisition of this center brings the total number of centers owned and operated by Surgical Care to 26 located in 16 states. The expansion plans for 1990 call for adding another six surgery centers through a combination of new starts and acquisitions.

FRANKLIN LAKES, NJ (JAN. 15) BUSINESS WIRE - Becton, Dickinson and Company announced Monday the approval of an Employee Stock Ownership Plan (ESOP) which will be part of the Company's existing defined contribution Savings Plan.

The Company intends to issue approximately $60 million of a new issue of convertible preferred stock to the ESOP.

The ESOP will initially borrow funds from Becton Dickinson to acquire the preferred stock. This borrowing by the ESOP is expected to be replaced by permanent private placement financing guaranteed by Becton Dickinson.

The Company expects the terms of the convertible preferred stock to be finalized by the end of January. Becton Dickinson intends to use, subject to Board of Directors approval, the proceeds from the refinancing of the loan to the ESOP to purchase, at later dates, shares of its common stock.

Becton Dickinson manufactures and sells a broad range of products for use by health care professionals, medical research institutions, industry, and the general public.

BANNOCKBURN, IL (JAN. 15) BUSINESS WIRE - Leaf Inc., the maker of a wide variety of brand name candy, in cooperation with American Consulting Corp. has introduced a PC-based planogram development system, expressly tailored to the confectionery industry.

The system, called PLANNER, was introduced Dec. 1 at the NFBA Sales and Marketing Convention and Expo in New Orleans.

Aware that retailers and distributors need a system to aid them in reaching the full potential of planograms for the count goods category of the candy industry, Leaf worked closely with ACC to develop this specialized sales aid. PLANNER will be available Jan. 15, 1990, and is expected to create a new system of comprehensive profit oriented planograms.

PLANNER software is compatible with most IBM or compatible IBM computers. It does not require specialized personnel for successful operation. The data base for PLANNER is provided by distributors of confectionary products and reflects regional sales differences. Quarterly updates from PLANNER will insure planograms which accurately reflect current trends.

Leaf Inc. products include PayDay, Heath Bars, Milk Duds, and Jolly Rancher candies, as well as the Rain-Blo line of bubble gum.

STAMFORD, CT (JAN. 16) COMTEX - Dekalb Federal Savings Bank, a unit of Prime Bancshares Inc. of Decautur, GA, sold two properties, including its headquarters, to an affiliate of Taylor & Mathis of Decatur Inc. for about

$4.2 million.

Dekalb sold the land that includes its headquarters to Taylor & Mathis of Decatur L.P. for $1.22 million, according to a Securities and Exchange Commission filing.

Dekalb also sold 78,000 square feet of land near its headquarters to Taylor & Mathis of Decatur for $2.2 million.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 12, 1990.

#90015c0057 01/15/1990 ~Comtex

STAMFORD, CT (JAN. 16) COMTEX - Boston Edison Co. will take a $70 million pre-tax charge against earnings in the fourth quarter of 1989 under a settlement agreement that will end most of its legal and regulatory problems stemming from operating troubles at the Pilgrim Nuclear Power Station.

The company, which plans to report a loss for the year, said the settlement will result in an after-tax charge of $42 million, or $1.10 a share.

The Boston Edison board voted Dec. 21 to reduce its quarterly dividend to 38 cents a share from 45.5 cents, according to a Securities and Exchange Commission filing.

In announcing its decision, the board said it was aligning the company's dividend with its earnings prospects, and cited a weakening economy.

Boston reached an accord with three of Pilgrim's largest wholesale electric customers -- Commonwealth Electric Co. of Cambridge, Mountaup Electric Co. and the Municipal Board of Reading, MA.

But before the agreement, signed Jan. 9, can take effect, it must be approved by the Federal Energy Regulatory Commission and the Massachusetts Department of Public Utilities.

The legal troubles began for Boston Edison in 1987, when six of Pilgrim's largest customers sought to end longtime contracts to buy electricity following extended outages.

Under the settlement agreement, Boston Edison will pay the utilities a portion of the replacement power costs they incurred during the outages at Pilgrim.

Boston Edison will also pay a portion of the plaintiffs' legal bills resulting from the various suits.

Cash payments to the utilities will total about $45 million.

Boston Edison said it still has not reached an accord with a separate group of utilities that have long-term contracts for less than 3 percent of Pilgrim's output.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 12, 1990

STAMFORD, CT (JAN. 16) COMTEX - The office of the Ohio Supervision of Insurance on Dec. 26 approved Consumers Financial Corp.'s acquisition of two units of Investors Fidelity Marketing Programs Inc.

The two units are Investors Fidelity Life Assurance Corp. and Investors Consolidated Reinsurance Ltd. units. according to a Securities and Exchange Commission filing.

Consumers will pay Investors Fidelity $7.5 million and pay its executives and directors a total of about $1 million for no-compete contracts.

Consumers provides life, accident and health insurance in the midAtlantic and Southeastern United States.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 12, 1990

#90015c0059 01/15/1990 ~Comtex

STAMFORD, CT (JAN. 16) COMTEX - Southmark Corp. has submitted a plan to a Texas bankruptcy court under which it would return 240,000 Healthcare Services Group Inc. shares that it received in connection with Healthcare's acquisition of Southmark's American Services Co. unit in 1988.

Healthcare acquired American, which provides housekeeping and laundry services to nursing homes, for 950,000 of its common shares and $8.5 million face amount of subordinated debentures.

However, Healthcare stopped paying interest on the debenture when, after the acquisition, several of American's contracts with nursing homes did not begin as scheduled, according to a Securities and Exchange Commission filing.

Under the plan, submitted to the U.S. Bankruptcy Court for the Northern District of Texas, Southmark would be released from a guarantee it made on the service agreements.

Fees paid to Healthcare would be reduced by about $30,000 a week.

This 8-k Filing was submitted to the Securities and Exchange Commission on JAN. 12, 1990

GROUP LED BY WARREN DELANO JR OWNS 4,038,589 SHARES (61.50%) OF LEXINGTON PRECISION CORP (TICKER: LEXP) OF NEW YORK, NY.

ANNOUNCEMENT:

Delano's stakes in Lexington increased as the result of Lexington's sale of the preferred stock to L&D Woolens.

Effective Jan. 13, 1989, Lexington amended its restated certificate of incorporation to change its name from Blasius Industries Inc. to Lexington Precision Corp.

Delano holds options to purchase up to 20,000 shares at $1.62 per share according to the 1983 incentive stock option plan.

The preferred stock is convertible into common stock at $2.00 per share.

As a condition to the purchase of the preferred stock, the company declared and paid all dividends in arrears on its class B stock.

LATEST TRANSACTION:

On Jan. 11, 1990, Lexington sold to L&D Woolens LP, of whom Delano and Lubin are general and limited partners, 1,750,000 shares of 12 percent series C cumulative convertible exchangeable preferred stock for a cash price of $3,500,000.

PURPOSE:

Investment and to influence management.

SPENDTHRIFT FARM INC OF LEXINGTON, KY OWNS 1,000,000 SHARES (35.26%) OF

KENTUCKY HORSE CENTER INC (TICKER: HORS) OF LEXINGTON, KY.

ANNOUNCEMENT:

As part of an exchange agreement, Kentucky Horse Center bought a $1 million note that was payable to Spendthrift and dated December 1987.

Spendthrift also transferred to Kentucky its vendors' lien and the conditional guarantee, all in exchange for 1 million of the company's common shares.

Spendthrift then sold the shares under a put agreement with Kentucky and TVI Corp., Sheila M. McCarthy and Patrick J. McCarthy, David N. Judelson, Dr. C.F. Miller, George W. Veale, John T. Vaughan and Wilma Chesney Kennedy (the ''investor group'').

The purchase price was $650,000. Also, under a reorganization plan for Spendthrift, which is currently in Chapter II, 50 percent of its common stock will be owned by Kentucky.

Both companies will share the same officers and directors.

Finally, Spendthrift and Leslie Combs II, its founder, have been parties to civil proceedings of a judicial body regarding federal and state securities laws.

PURPOSE:

To allow Kentucky to purchase a note and the vendors' lien and conditional guarantee in exchange for 1 million of Kentucky's common shares, which were given to Spendthrift.

#90015d0030 01/15/1990 ~French/German News Agency

ABU DHABI (JAN. 15) - The United Arab Emirates (UAE) oil minister met here Monday with two senior Japanese officials seeking to boost relations between Tokyo and its main oil suppliers, official sources said.

Masaji Yamamoto and Naoki Kuroda, heads of energy and petroleum at Japan's Ministry of International Trade and Industry, arrived here Sunday on the last stop of a Gulf tour that has also taken them to Saudi Arabia and Kuwait.

An official source, without elaborating, said the two Japanese officials and UAE Oil Minister Mana Said al-Oteiba had discussed "increasing oil cooperation" between the two countries.

A Japanese diplomat had said earlier that Mr. Yamamoto and Mr. Kuroda were trying to secure oil sources for Japan in the 1990s "when oil from the Gulf Cooperation Council (GCC) is expected to acquire increased importance."

The GCC groups the UAE, Saudi Arabia and Kuwait - Japan's three main oil suppliers - with Bahrain, Qatar and Oman. The UAE was Japan's main source of oil in 1989, accounting for 25 per cent of the country's oil imports.

According to Gulf-based Japanese oil executives, Japan is offering the Gulf states a share in its downstream oil market in exchange for secure long-term crude-oil supplies.

Japan has a major stake in the Arabian Oil Company, which produces crude oil in the neutral zone between Saudi Arabia and Kuwait, and owns shares in oil companies in the emirate of Abu Dhabi.

The two Japanese officials have also met the Saudi and Kuwaiti oil ministers, Hisham Nazer and Sheikh Ali al-Khalifa, during their tour.

#90015d0140 01/15/1990 ~French/German News Agency

CAIRO (JAN. 15) - Libya's armed forces chief, Colonel Abu Bakr Yunes, arrived here Monday on an unannounced visit, airport sources said.

Egyptian officials declined to supply any details on the colonel's visit, which comes amid a gradual warming of ties between the two countries.

Libyan leader Colonel Moamer Kadhafi and Egyptian President Hosni Mubarak have met twice since October to discuss bilateral cooperation but failed to announce a resumption of diplomatic relations.

Libya remains the only Arab state that maintains no diplomatic ties with Egypt to protest Cairo's 1979 peace treaty with Israel. Syria re-establised relations last month.

#90015d0190 01/15/1990 ~French/German News Agency

BUCAREST (JAN. 15) - West Germany hopes the new Romanian leadership will provide guarantees of democracy that will encourage minority Germans to stay in Romania, West German Foreign Minister Hans-Dietrich Genscher said Monday.

Mr. Genscher said at a press conference here after arriving for a two-day visit that West Germany would "keep the door open" for any of Romania's 200,000 minority Germans who may wish to emigrate.

The West German foreign minister said he hoped minority Germans would be able to "freely decide whether to stay in Romania or to leave the country."

Everyone should be able to "freely make cultural and ethnic choices," Mr. Genscher said, adding that West Germany hoped people would stay in Romania.

Romanian Foreign Minister Sergiu Celac said new laws giving ethnic minorities democratic rights should "settle the emigration problem."

"To stay or to leave will be up to the individual," he said.

Romania's minorities, mainly ethnic Hungarians, Germans and Serbs, suffered under the forced assimilation policy of executed dictator Nicolae Ceausescu.

Mr. Genscher said he had been "very impressed" by the democratic intentions of Romanian officials. Improving the conditions of ethnic Germans was one of the main goals of his two-day visit to Romania, he said.

He said he planned to meet representatives of the German minority here later Monday and in Transylvania on Tuesday to learn more about their situation.

Mr. Genscher is expected to discuss West German aid to Romania during his

stay here. Besides meeting Mr. Celac, Mr. Genscher is due to hold talks with National Salvation Front leader Ion Iliescu and Prime Minister Petre Roman.

On Tuesday, Mr. Genscher will visit the western city of Timisoara, where the revolt which toppled Mr. Ceausescu began on December 17.

AMSTERDAM (JAN. 15) - Banque de Suez Nederland, the Dutch subsidiary of French banking group Indosuez, is to launch a friendly takeover bid for Dutch brokers Kooijman Effectenkantoor, it was announced here Monday.

The 44-million-guilder (24.4-million-dollar) offer at 30 guilders a share will be put to shareholders at the end of February at the latest, the presidents of the two companies said.

Kooijman shares were suspended after Wednesday trading in Amsterdam, when they closed at 21 guilders.

The new company, Suez Kooijman NC, will undertake all stock exchange transactions of Banque de Suez Nederland.

The Kooijman management, which holds half the firm's capital, will have a 10 to 15 percent stake in the new company.

#90015d0240 01/15/1990 ~French/German News Agency

GENEVA (JAN. 15) - The personal representatives of the heads of state of the G-15 group of third world countries began talks here Monday to prepare for the first ever G-15 summit to be held in May, diplomatic sources said here.

The fact that India was chosen as coordinator of the talks tended to support the theory that it would be selected to host the May meeting, observers said.

The G-15 group, set up at a meeting here in November, aims to focus on "South-South cooperation and consultation," and is to hold a summit every year.

Peru and Yugoslavia proposed setting up the group to form a third world force similar to the G-7 group of leading industrialised countries, which comprises the United States, Japan, Canada, West Germany, Britain, France, and Italy.

The G-15 members are Peru, Yugoslavia, India, Algeria, Argentina, Egypt, Brazil, Indonesia, Jamaica, Malaysia, Mexico, Nigeria, Senegal, Venezuela and Zimbabwe.

The meeting of the "sherpas", as the heads of states' representatives are known, was due to end Wednesday.

DAR ES SALAAM (JAN. 15) - Tanzania's state-owned tea exporting company, Brooke Bond Tanzanian Limited, earned 1,700 million Tanzanian shillings (9.2 million U.S. dollars) from tea exports last year, it was learned here Monday.

Brooke Bond chairman and managing director Malcolm Keeley said Pakistan emerged the main buyer of the Tanzanian tea, followed by Britain and the United States.

In 1989, Brooke Bond harvested 6.1 million kilos, out of which 5.8 million kilos, were exported.

National tea production had stagnated at 115,000 tonnes since 1985. But the production is expected to improve this year following a major rehabilitation of tea plantation estates in the major tea producing regions of Iringa, Kagera,

Mbeya and Tanga, to enable Tanzanian to raise its foreign exchange earnings from the tea sector.

Statistics show that 75 percent of tea produced is for export which in 1987 was bought by France, Japan, Kenya, Netherlands, Zaire, West Germany, Somalia,

South Yemen, Sweden, Thailand, Uganda, Soviet Union, United Arab Emirates, United States and Zambia.

Following the recent Tanzanian 'open-door" policy, several multi-national companies, including the British Lonrho, had switched their investments to the Tanzanian tea industry to boost production to bring the industry to second spot as major foreign exchange earner after coffee.

HONG KONG (JAN. 15) - Britain and Hong Kong are accused of serious human rights abuses against Vietnamese boat people in a report issued Monday by the human rights organization Amnesty International.

According to Amnesty, the procedures for determining who qualifies for refugee status are flawed and give rise to the prospect of deportation of people who face political and religious persecution back in Vietnam.

Even more damagingly, Amnesty has added it voice to those of other international organizations who allege that Vietnamese in Hong Kong are being assaulted and injured while detained in the colony's camps.

Douglas Hurd, Britain's Foreign Secretary who is visiting Hong Kong, declined to make any comment on the report, saying that he had not an opportunity to read it. Anita Klum, one of the report's authors, said it was delivered to the authorities last Thursday.

Geoffrey Barnes, Hong Kong's Secretary for Security, described Amnesty's criticisms as ''unfounded." The government was committed to "the operation of fair status determination with a view to identify any persons with a genuine claim to refugee status." He also rejected the allegations of brutality.

#90015d0340 01/15/1990 ~French/German News Agency

HONG KONG (JAN. 15) - British Foreign Secretary Douglas Hurd Monday promised an announcement "within weeks" on a faster pace of democratic reform for Hong Kong.

"We want to start a process of democracy in Hong Kong," Mr. Hurd told a luncheon meeting on the third day of a four-day official call on the British colony.

London would introduce in 1991 "a momentous change ... by taking the first steps in directly elected democracy," he said.

"These steps will be bigger that what was proposed originally by us only two years ago," he said, adding that an announcement would be made "I hope within weeks."

London's latest stance on the issue is expected to ruffle the feathers of Beijing, which resumes sovereignty here in 1997 and has persistently warned the colony against major political changes before the handover, analysts said.

"Frankly we are not interested in scoring debating points," Mr. Hurd said. But he added, "the system we establish before 1997 should be part of a process which will continue in years thereafter."

Beijing has maintained that Hong Kong's political reform should "converge"

with the Basic Law, a mini-Chinese constitution for post-1997 Hong Kong being drafted and scheduled for promulgation in March.

London's decision to "pre-empt" the content of the Basic Law was seen by many here as a way of flexing its muscles to the Chinese.

Hong Kong needed "our commitment.... I've come here to say you have it in full measure," Mr. Hurd said in his luncheon speech.

London decided in 1988 to open for direct election in 1991 only 10 seats in the 56-member local legislature, despite an outcry at the time that 50 percent of legislators should be returned by popular vote.

Whitehall's change of heart was prompted by local "demands and anticipation (which) is higher than used to be," Mr. Hurd told the luncheon hosted by the Hong Kong General Chamber of Commerce and British Chamber of Commerce.

The Basic Law has been the focus of the local call for more democracy, which has been intensified by the June 4 Beijing massacre which caused a near-freeze in relations between London and Beijing on the Hong Kong question.

While urging Beijing to pay "the closest possible attention" to views here on the Basic Law, Mr. Hurd said: "The British government has no intention of sitting back and letting the clock tick towards 1997."

"We will take ... difficult decisions when necessary."

Under a 1984 Sino-British pact, Hong Kong is to stay capitalist while enjoying "a high degree of autonomy" with an elected legislature for at least 50 years after 1997.

It did not say how the elections would be carried out, but the latest proposal by Beijing-appointed drafters of the Basic Law was that no more than 30 percent of a 60-seat legislature should be directly elected for at least 10 years after 1997.

Mr. Hurd said Britain would conduct a "tenacious and consistent" dialogue with China on Hong Kong, with the British adopting an attitude which would not be "hostile or subservient," "negative or defensive."

"We shall do all we can to ensure that Britain's final chapter on Hong Kong is an honourable one and one which ends successfully for you," he said.

The British foreign affairs chief also defended in his speech two Whitehall decisions made around Christmas: the granting of British passports to some 250,000 people here in a bid to encourage the recipients to stay on and the start of colony's forced repatriation of Vietnamese boat people.

While Hong Kong "naturally" wanted more British passports, the "political reality" back home has stopped Whitehall from doing so, he said.

He also reiterated that sending Vietnamese boat people home by force was an effective way to deter a "futile exodus" from across the South China Sea and urged understanding from other countries on the issue during the upcoming international refugee conference in Geneva.

PRAGUE (JAN. 15) - A high-ranking Chilean delegation began talks here Monday on reestablishing diplomatic relations between Chile and Czechoslovakia after a 17-year break, the official news agency CTK said.

The move would make Czechoslovakia the second East Bloc state after Hungary to resume ties with Chile.

All east European states save Romania broke off relations after a military coup in Santigao overthrew the socialist President Salvador Allende in 1973. Hungary renewed ties with Chile last week.

The delegation, headed by foreign affairs official Luis Winter, met with Czechoslovak Foreign Minister Jiri Dienstbier after arriving earlier in the day, CTK said.

The officials were also to discuss economic issues.

#90015d0510 01/15/1990 ~French/German News Agency

HARARE (JAN. 15) - The Sudanese government plans to meet with rebel leader John Garang's SPLA soon in Egypt, Sudan special envoy Brigadier Dominique Kassiano told newsmen in the Zimbabwe capital Monday.

Representatives of the government of General Omar el-Beshir had talked to the Sudanese People's Liberation Army (SPLA) twice last year, "and another meeting between the two parties will take place in Egypt in the near future," Brigadier Kassiano added.

That meeting, he said, will allow discussions on the integration of the rebels into the national army, the convening of a constitutional conference and holding of elections in which all parties would take part.

Brig. Kassiano, who earlier gave Zimbabwe President Robert Mugabe a special message from the Sudanese leader, said the purpose of his seven-man delegation was "to explain the efforts of the new military Command Council

in trying to solve the civil war".

The Sudanese delegation has already visited Mozambique, and will deliver a similar message to Zambia's and Malawi's Presidents.

Meanwhile, a separate Sudanese delegation arrived in Accra Monday, the Ghana News Agency reported.

Delegation leader Pio Yukwan Deng, a member of Sudan's Revolutionary Command Council of National Salvation, told reporters there he would present a message from Gen. Beshir to head of state Jerry Rawlings.

Mr. Deng said he hoped Colonel Garang would accept recommendations for a federal system of government for the country.

He said his seven-member delegation, which had already visited Chad, Niger, Nigeria and Togo, was delivering messages to African leaders explaining why the army took power from civilians last year.

It was also to inform African leaders about peace initiatives by the Khartoum government to end the civil war, he said.

He said the situation in the country was "calm" as food was now moving to the war-torn south. Schools had also re-opened, he added.

#90015d0550 01/15/1990 ~French/German News Agency

WARSAW (JAN. 15) - Solidarity head Lech Walesa called Monday for post-war Poland's first fully free elections to be held before time to try to speed up the pace of reform.

Mr. Walesa, in a statement from his office in the northern city of Gdansk, said reforms voted by parliament and government were "being implemented too slowly" by middle-level officials in the administration.

"Under these conditions, I see no other solution than to ask the Diet (parliament) and the government ... to advance the date of municipal elections," the statement received here said.

The elections would normally be this June.

The last municipal elections were held in June 1988 while the government was still communist-controlled. An administration led by Tadeusz Mazowiecki, an intellectual close to Solidarity, took over last August.

Rumours in Warsaw say Mr. Mazowiecki is to make a major speech Thursday and may announce a date for the elections then.

Mr. Walesa's intervention comes as life is becoming increasing difficult for Poles, traumatized by steep price rises for basic goods and powerless against an ossified administration inherited from the communists.

A student from Bialystok who led a campaign to dislodge the local party from its offices in the northeastern town said on television that the same government and police officials remained in office in the provinces.

Solidarity's regional committee for Wroclaw has meanwhile expressed lack of faith in local administrative leaders, whom it accused of being passive, the official news agency PAP said.

Mr. Walesa has on several occasions already sharply hit out at "bureaucrats",

accusing them of failing to implement reforms aimed at speeding up introduction of a market economy.

Farmers are among the most vocal in their discontent, demanding the government change course to avert bankruptcy of the agricultural sector.

#90015d0600 01/15/1990 ~French/German News Agency

PARIS (JAN. 15) - French state-owned aircraft engine maker SNECMA has shown a profit for the first time in three years, posting a 30 percent jump in sales last year to 13.4 billion francs (2.34 billion dollars) on Monday.

SNECMA president Louis Gallois said the company's 1989 profit would be between 50 and 100 million francs (8.7 and 17.4 billion dollars), attributing the reversal to the success of SNECMA's CFM 56 engines, used in Airbus A-320 and Boeing 737 airliners.

The company booked 808 firm orders last year for the engines, manufactured with General Electric of the United States in a joint venture, CFM International.

SNECMA now holds orders for 6,700 CFM 56's, of which 3,500 are still to be delivered. The CFM56-3C version of the engine, which had defects blamed for the crash of a British Midland Boeing 737 last January that claimed 47 lives, has been redesigned.

SNECMA had announced losses of 250 million francs (43.7 million dollars) in 1988 and 410 million francs (71.6 million dollars) in 1987.

The SNECMA group, whose subsidiaries include Societe Europeenne de Propulsion (SEP), Hispano-Suiza and Messier-Hispano-Bugatti, said its sales

rose to 21.5 billion francs (3.75 billion dollars) last year from 17.3 billion francs (3.02 billion dollars) in 1988.

Consolidated results are still to be released, but are expected to be good as every subsidiary has shown a profit.

Mr. Gallois said the company's order book was worth 36.5 billion francs (6.38 billion dollars) at the end of last year, compared to 35.8 billion francs (6.25 billion dollars) at the end of 1988.

He said the order backlog represented three years' production, adding that 75 percent were civilian orders and the remaining 25 percent military sales, for example the M88 engine for the planned French fighter Rafale.

"It isn't sure that the civilian market will continue to grow at the current rate -- that's an understatement -- and we must therefore make sure that we develop out military production," Mr. Gallois said.

But SNECMA's prospects for the 1990's are rosy, he said, with the company expected to take a share of at least 25 percent in production of a new engine to be launched by General Electric.

SNECMA will also boost research into hypersonic aircraft expected to take to the skies between 2020 and 2050. Mr. Gallois said SNECMA would form a consortium with SEP to "coordinate research into the concept," which could lead to ultra-high-speed rocket-like planes.

But he emphasized that "a passenger hypersonic aircraft will not be seen before at last 30 years and perhaps never".

The group plans to invest 850 million francs (148.6 million dollars) this year, compared to 630 million francs (110 million dollars) last year and 500 million francs (87.4 million dollars) in 1988, he said.

SNECMA is to broaden its product line with General Electric's new big aircraft engine, known for the time being as the GE-90.

GEC will have a 60-percent share in the program, but SNECMA will be a leading partner with at least 25 percent and a share in marketing. The remaining 15 per cent will go to other partners, Mr. Gallois said. Fiat and MTU of the Daimler Group are rumored to be well placed.

#90015d0620 01/15/1990 ~French/German News Agency

FREETOWN, Jan 15 (AFP) - The Sierra Leone currency was devalued by some 85 percent Monday, as part of efforts to keep the country's economy within the recommendations of the International Monetary Fund (IMF).

The leone was devalued from 65 to the U.S. dollar to 120.04, and from 106 to the pound sterling to 199.60, a drop in value of some 85 percent.

Economic observers said the decision was taken Friday, but the government did not officially announce it until Monday in a bid not to panic the financial market over the weekend.

The business community had been forecasting such a move for several weeks, but it will have a severe effect on the population, observers said.

Faced with delayed salary payments, Sierra Leoneans have already faced escalating costs of consumer goods in recent weeks, with items such as butter, sardines and bread rising by up to 40 percent.

Finance Minister Tommy Taylor Morgan said in a nationwide radio and television broadcast that his ministry would display the prices of essential goods in shops across the counry.

The devaluation was part of a package of moves to keep the economy within IMF recommendations introduced after the IMF put Sierra Leone on its blacklist in April for not repaying loans.

Mr. Morgan said last week that he would shortly present a mini-budget and said major economic decisions would be made to try to rein in inflation.

#90015d0730 01/15/1990 ~French/German News Agency

BRUSSELS (JAN. 15) - A showdown seems likely in the European Economic Community's executive over whether to allow a proposed takeover of Union de Transports Aeriens (UTA) that would give Air France virtual control over French international services and most domestic routes, EEC sources said Monday.

The Commissioner in charge of competition policy, Sir Leon Brittan, is seriously at odds with a colleague, Karel van Miert, in whether the proposed acquisition is an a priori breach of anti-monopoly rules, they said.

Under an accord announced last Friday, Air France is to pay 3.8 billion francs (662 million dollars) to Chargeurs SA for a 54.8 stake in UTA, which principally serves routes from France to Africa and Asia.

Acquisition will also give Air France, the state-owned flagship, majority control over Air Inter, Europe's largest domestic carrier.

In a statement issued here Monday, Sir Leon, a former Conservative minister

committed to liberalising the Community's highly regulated air transport market, said the takeover "raises fundamental questions under the Community's competition policy."

"In particular, there will be considerable concern about the protection of the consumer as air traveller in the single European market," he said.

Sir Leon reiterated a warning he made Friday that the Commission "will certainly undertake an investigation into the takeover" and take "any action which may be appropriate" if it saw a violation of EEC law.

In contrast, Mr. Van Miert, in an interview published with the French business daily Les Echos, contended that the acquisition would not undermine competition, as Air France, UTA and Air Inter "each cover different territory."

"So their union does not undermine competition, apart from a few exceptions such as the French overseas territories, the Paris-San Francisco route, Paris-Papeete etc, which we will examine," he said. Papeete is the chief administrative town of Tahiti, part of France's Polynesian territories.

A Commission source said Sir Leon was expecting to receive information from Air France and the French authorities "in the next few days" that would enable him to decide whether to send a formal letter of objection to the deal.

But any further action must be endorsed by the 17-member Commission, which ultimately can order the deal annulled if it sees a violation of competition law.

If submitted to a vote, such decisions must be approved by nine or more members of the panel.

The outcome "is by no means clear-cut," the official said.

Among factors weighing in the takeover's favour, he said, were awareness that action against it could also torpedo a proposed joint venture between Sabena SA of Belgium, British Airways and KLM Royal Dutch Airlines.

In addition, analysts noted, there is strong support in some EEC capitals, especially Paris, for creating European commercial giants that are able to compete on the same footing as U.S. and Japanese rivals.

At present, the Commission's legal powers against mergers are valid only after the deal has taken place, although in the past two years the executive has frequently used the threat of legal action against takeovers that are in the planning stage.

From September, it will have authority to vet all large mergers before they have taken place.

#90015d0760 01/15/1990 ~French/German News Agency

BELGRADE (JAN. 15) - Albanian leader Ramiz Alia on Monday denied Yugoslav reports that a state of emergency had been imposed in his country, according to the official Albanian news agency ATA monitored here.

Mr. Alia, the Albanian Communist Party's first secretary, accused Yugoslavia of interfering in Albanian affars.

"No state of emergency has been declared anywhere in Albania," Mr. Alia said in an address at the Enver Hoxha tractor factory in Tirana, "there have been no demonstrations" and "the domestic situation is healthy".

He accused Belgrade of "inventions" which, he said, aimed "to overthrow the popular leadership" in Albania.

The Yugoslav news agency Tanjug said Friday that measures equivalent to a state of emergency had been imposed in Albania, the only European state still ruled by a hard-line Stalinist regime.

"Such things," Mr. Alia went on, "are happening in Yugoslavia, where Kosovo province has been transformed into a veritable concentration camp, where violence and arbitrary actions reign."

Protest demonstrations were banned in Kosovo following bloody nationalist demonstrations there last March. The region borders Albania and is home to almost 1.7 million ethnic Albanians.

Mr. Alia accused Yugoslavia of interfering in Albania's internal affairs, and called for an end to what he called an "anti-Albanian campaign".

Albania, he said, "will remain an invincible fortress" and "will not deviate from the socialist path".

Press reports here earlier said three Albanian border guards defected to Yugoslavia recently after several soldiers were arrested for attending demonstrations last month in four Albanian towns.

#90015d0790 01/15/1990 ~French/German News Agency

LAGOS (JAN. 15) - Nigerian musicians Fela Anikulapo Kuti and Majek Fashek have joined a campaign for the release of lawyer Gani Fawehinmi, jailed for a year this month for criticizing the authorities.

Fela, the "high priest of Afro-Beat", promised Sunday to give part of the proceeds of a forthcoming European tour towards damages and interest of six million naira (800,000 dollars) imposed on the lawyer.

Mr. Fawehinmi was imprisoned for contempt of court after he called for the dismissal of a judge who told him to pay libel damages to two top intelligence officers whom he has accused of murdering Dele Giwa, a journalist blown up by a parcel bomb in 1986.

Fela's pledge came at a meeting which gathered hundreds of supporters of the prominent lawyer at his offices in a Lagos suburb, chaired by the octogenarian veteran of the Nigerian trade union movement, "Pa" Michael Amoudu.

Mr. Amoudu was arrested, like Mr. Fawehimni, in June last year for trying to organize a banned conference on the military government's austerity program. "Pa" was rapidly released on age grounds, but the lawyer was held in preventive detention for four months.

"I'm sorry for our justice system. It is a pity that a judge will jail Gani for one year for contempt," Mr. Amoudu said. "It is a shame!"

Alao Aka Bashorun, former president of the national order of lawyers, said: "We should impress upon the judiciary that the libel judgement against Gani was not a judgement against him but against the people."

-30- 1707

#90015d1050 01/15/1990 ~French/German News Agency

PRETORIA (JAN. 15) - South Africa is preventing aid reaching its nominally independent black Transkei homeland, according to reports here Monday.

South Africa's relations with the maverick territory, which could undercut its apartheid policies, have nosedived.

South Africa's failure to remit its quarterly 200 million rand (78 million dollar) payment this month, as reported by Transkeian sources, is expected to cause immediate liquidity problems, observers believe.

A foreign ministry spokesman here would not comment on the claims.

South African Foreign Minister Pik Botha earlier Monday countered charges by increasingly defiant Transkeian military ruler General Bantu Holomisa that agents in South Africa were trying to destabilize the homeland.

Gen. Holomisa had alleged in a Sunday newspaper that a plot existed to

assassinate him involving at least one South African policemen, who, with another suspect, was being held in the homeland's capital, Umtata.

Mr. Botha said the men's detention "is contrary to legal procedure, and it is trusted that the charges will be investigated by the police authority in terms of accepted practice."

South African President Frederik de Klerk and Gen. Holomisa had a heated meeting in Umtata last Thursday, according to sources, who said Mr. De Klerk had warned the Transkeian not to challenge Pretoria.

Mr. De Klerk is said to be insisting that the Transkei adopt civilian rule, abandon support for outlawed organisations -- particularly the African National Congress (ANC) guerrilla movement, and drop plans to reincorporate into South Africa.

Gen. Holomisa hinted at reincorporation last year, noting that the Transkei's "independence" was "artificial."

The Transkei was in 1976 the first of four homelands to accept "independence" from South Africa, part of the country's "grand apartheid" plan to confine black tribes to separate areas.

The homelands' status is not recognised by the rest of the world.

Any move by the Transkei to abandon its "independence" or openly support the ANC, battling Pretoria's policy of white minority rule, would "humiliate" the South African government, homeland sources have told Agence France-Presse.

"Such developments would send a signal that 'grand apartheid' is not working," a Transkeian officer said.

Gen. Holomisa has been winning increasing respect for his stands against Pretoria among anti-apartheid alliances, despite their complete rejection of the homeland system and its functionaries.

The military leader was feted at a rally in Umtata last year by long-jailed ANC veteran Walter Sisulu as "a man who can bring unity to our people," and is though to be gaining the respect also of jailed ANC leader Nelson Mandela.

Gen. Holomisa has strong support among Transkeians, and Mr. De Klerk was met last Thursday at the Umtata Ministerial Residence by a group of local anti-apartheid demonstrators.

#90015d1150 01/15/1990 ~French/German News Agency
BRUSSELS (JAN. 15) - The president of the European Free Trade Association (EFTA) appealed to the EEC on Monday to give top priority to an accord for forging a joint "economic space" between Europe's wealthiest trade blocs.

Swedish Prime Minister Ingvar Carlsson, on a one-day visit to Brussels, urged the Community to conclude an agreement with the six EFTA nations before it signed association accords with eastern Europe.

"It's better for the Eastern countries that we have a final settlement of EEC-EFTA relations and then we could concentrate on ways to support Eastern Europe," he said.

His appeal came four days after Polish External Trade Minister Marcin Swieciki announced his country intends to negotiate "a form of association" with the EEC that would enable it eventually to become a full EEC member.

EEC and EFTA ministers, after lengthy exploratory talks, agreed last month to launch formal negotiations for a so-called "joint European space" linking their 18 members.

The aim is to allow free circulation of goods, services, capital and people, and step up cooperation in research, the environment, education and other areas.

#90015d1210 01/15/1990 ~French/German News Agency
BEIRUT (JAN.15) - Differences between Iran and Syria are undermining efforts by Teheran to mediate between Shiite groups battling for strategic ground in southern Lebanon, political sources said here Monday.

Iran's Deputy Foreign Minister Ali Mohammad Besharati has been in Beirut since January 7 but several meetings with leaders of the pro-Syrian Amal and Iranian-backed Hezbollah militias have failed to produce results.

Amal and Hezbollah, vying for influence in Lebanon's Shia Moslem community, have fought since December 23 for control of the southern Iklim al-Touffah hill region, a key area close to Israel's self-declared "security zone."

The battle east of the port of Sidon has left at least 87 people dead and 275 wounded. Exchanges have become more sporadic in recent days due to a bid by 400 Palestinian guerrillas to create a buffer zone between the two sides.

Sources close to Mr. Besharati's talks here said his mediation efforts had bogged down due to Hezbollah's refusal to withdraw from three villages seized from Amal, a condition set by the pro-Syrian group for a cease-fire.

But the real reason for the stalemate is a conflict of interest between Iran and Syria, the two groups' backers, according to the political sources.

Iran and Syria had collaborated a year ago to reach a settlement between the two sides, which turned out to be short-lasting. On this occasion however,

Damascus has failed to make any statement to back Teheran's peace effort.

Pro-Syrian sources said Iran is working alone because its interests in the region do not fall in line with a new more open Syrian policy, marked last month by the renewal of diplomatic ties with Egypt after a 12-year break.

Teheran wants, through the fundamentalist Hezbollah, to establish an autonomous presence in southern Lebanon that would add weight to its stated goal of waging war against Israel, the sources said.

This policy goes against Damascus' stated aim of fully applying the Taif accord, an Arab League-sponsored agreement reached by Lebanese MPs in Saudi Arabia to bring stability to Lebanon after 15 years of factional strife.

#90015d1240 01/15/1990 ~French/German News Agency

PRAGUE (JAN. 15) - The Soviet Union and Czechoslovakia opened talks here Monday at Prague's request for the withdrawal of some 80,000 Soviet troops stationed in Czechoslovakia, the official CTK news agency said.

The first phase of the talks, currently taking place at the deputy foreign

minister level, are to last "at least two days," a Czechoslovak Foreign Ministry spokesman said.

The new Czechoslovak government has said it wants all Soviet troops out of the country but would be willing to maintain several military bases under Czechoslovak control.

The Czechoslovak delegation to the talks is led by Deputy Foreign Minister Yevgen Vacek and the Soviet team by his opposite number, Ivan Aboimov. The Soviet delegation also includes General Anatoly Kleimenov, the first deputy chief of staff of the Soviet army.

Prague has said it considers the treaty under which the Soviet troops are stationed in the country to be "null and void." It was signed October 16, 1968, less than two months after the Soviet-led invasion of Czechoslovakia.

At a Warsaw Pact meeting here on December 4, all of the countries involved in the 1968 invasion -- the Soviet Union, Bulgaria, Hungary, Poland and East Germany -- condemned it as an act of inteference in the internal affairs of a sovereign state.

On December 20, Soviet President Mikhail Gorbachev and Czechoslovak Prime Minister Marian Calfa agreed to work toward a "definitive" accord on the question of the Soviet military presence in Czechoslovakia.

An agreement could be reached "in the framework of a multilateral accord drawn up at the negotiations in Vienna" on conventional disarmament in Europe, the two leaders said.

A Czechoslovak Foreign Ministry spokesman said last Tuesday however that the outcome of the Vienna Conventional Forces in Europe (CFE) talks was not "determining, in that the withdrawal of Soviet troops from Czechoslovakia would not change the balance of military forces in Europe."

The spokesman, Lubos Dobrovsky, said the withdrawal of the troops could be carried out by the end of the year, but western military analysts believe that given the complexity of the Soviet military infrastructure in Czechoslovakia the withdrawal will take longer.

Most of the Soviet troops are based in Bohemia and northern Moravia along a line linking the cities of Mlada Boleslav to Olomuc. Their headquarters is at Milovice, located some 40 kilometers (28 miles) northeast of Prague.

Pressure for the troops to quit the country has been building here and on Sunday some 6,000 people demanding the withdrawal of the Soviet soldiers by August 21 -- the 20th anniversary of the 1968 invasion -- protested in Olomuc.

On Monday, Civic Forum members in the city of Vyskoke Myto, another important Soviet base in eastern Bohemia, sent a letter to President Vaclav Havel demanding the withdrawal of the troops.

A protest is scheduled in that city for January 23.

Last year, the Soviet Union unilaterally withdrew some 1,500 soldiers, 192 tanks and 20 combat aircraft from Czechoslovakia. Moscow has said it would pull out a further 3,800 soldiers this year.

#90015d1360 01/15/1990 ~French/German News Agency

AMMAN (JAN. 15) - The first stage of a major dam along the Jordanian-Syrian border has been completed at a cost of 3.5 million dollars, the Jordanian Ministry of Water and Irrigation announced Monday.

The two countries have finished building a 923-meter (1,009-yard) long canal to divert waters from the Yarmouk River for the filling of the Al-Wahda (union) dam, some 10 kilometers (six miles) east of the Israeli frontier, it said.

Tenders are to be issued in 1990 for the final stage of the dam's construction, including the building of a 100-meter (yard) wall and a thermal generating unit costing 350 million dollars, the ministry added.

The World Bank, U.S. Agency for International Development and Islamic Bank have already approved in principle the project's financing, said the ministry's department head for the Jordan Valley, Mohammad Bani Hani.

Construction, lasting four years, will begin next year, he said.

Jordan and Syria penned an accord in September 1987 to build the 225 million cubic meter (7.9 billion cubic feet) dam, which will permit Jordan to double its arable land area and provide the Zarka region northwest of here with 50 million cubic meters (1.7 billion cubic feet) of drinking water.

Syria will in turn plug into 75 per cent of the dam's electrical output.

LIGONIER, PA (JAN. 15) - A chimpanzee being moved from its cage attacked a veterinarian Monday and bit off his ear and part of one hand, police said.

Dr. John Kelliher was attacked as he helped William Holberg, a former zoo

keeper, transfer the 20-year-old male chimp and another to a transport cage.

The chimp released the veterinarian after Mr. Holmberg hit it with a large metal pipe, said state Trooper Clint Irvin.

Mr. Holmberg then pushed Dr. Kelliher, 43, into an empty animal cage and locked the door to protect him from the enraged chimp.

He borrowed a gun from one of the police officers who arrived on the scene and then shot the chimp four times. It remained alive until another officer shot it again.

Dr. Kelliher was taken to a hospital where he was listed in fair condition. Doctors amputed the thumb, fourth and fifth fingers on one of his hands.

He was also bitten on his face, head, scalp and forearm, authorities said.

NEW YORK (JAN. 15) - U.N. Secretary General Javier Perez de Cuellar Monday invited the leaders of the Greek and Turkish ethnic groups on Cyprus, Georges Vassiliou and Raouf Denktash, to hold ''extended'' direct talks.

U.N. spokesman Alexander Taukatch said the talks should begin February 12 at U.N. headquarters and last two weeks. However, the two sides have not yet replied to the invitation.

Perez had analysed the situation and concluded that direct talks would be a suitable way to achieve progress, Taukatch said.

The U.N. Security Council complained four months ago that efforts for a solution of the decades-old conflict had arrived at a deadlock.

It called on the two ethnic groups to continue working, together with Perez, on a draft agreement for the political future of the divided island.

Since 1988, when Perez started a new Cyprus initiative, the two sides have met four times without any success.

ALGIERS (JAN. 15) - Algeria's Minister for Mines Sadek Boussena has been named as the new president of the Organization of Petroleum Exporting Countries (OPEC), the APS news agency said here Monday.

The agency said that Mr. Boussena had been chosen to replace Nigerian Rilwanu Lukman recently, without giving a more precise date. Mr. Lukman was named as Nigerian Foreign Minister.

OPEC officials at the organization's headquarters in Vienna were not immediately available to confirm the appointment.

Mr. Boussena, who was the OPEC vice-president, takes over at a time when the oil markets are showing "great stability produced by OPEC's rediscovered cohesion and sustained demand," APS said.

JERUSALEM (JAN. 15) - Fifty-one Soviet children contaminated by radioactivity after the 1986 Chernobyl nuclear accident arrived here Monday for medical treatment, the Itim news agency reported.

The children, aged between five and 14, suffer from various blood diseases, loss of hair and anaemia. They arrived at Tel Aviv's Ben Gurion airport on a Soviet Aeroflot flight from Kiev accompanied by a Ukrainian television crew.

The Israeli trade union federation Histadrut and its counterpart in the Ukraine organised and financed the operation to bring the children to Israel for tests and treatment, the agency said.

BERLIN (JAN. 15) - East Germany's ousted hardline leader Erich Honecker could recover after a malignant tumor was removed from his right kidney last week, his doctor said Monday.

Professor Peter Althaus, head of the urology department of East Berlin's Charity Hospital where Mr. Honecker is being treated, told the East German news agency ADN that if the 77-year-old former leader's condition continues improving, he could be discharged within 10 days.

Mr. Honecker, ousted on October 18 after ruling with an iron hand for 18 years, faces charges of high treason, conspiracy against the constitution, abuse of power and corruption. But he has not been taken into custody because of his precarious health.

DAMASCUS (JAN. 15) - Syria told Turkey Monday its decision to halt the

flow of the river Euphrates was a contravention of international law which will cause damage to the environment.

An informed source said an official from the Syrian ministry of foreign affairs told the Turkish ambassador Monday evening that the Damascus government did not approve of Turkey's action which has deprived both Syria and Iraq of a major source of water.

The Syria government feels the decision contravenes international conventions and established rules of international law concerning joint utilization of shared river water resources, the source said.

Syria has told Turkey the restriction of the flow of the Euphrates was a ''precedent which is not justified.''

It will cause environmental damage to the river course and will ''badly affect'' potable and irrigation water and the generation of electricity, the Damascus government said.

Turkish President Turgut Ozal performed Saturday a ceremonial stopping of the river's waters at the Ataturk Dam.

The dam is the centerpiece of the Southeastern Anatolia Project (Gap), a plan to build 21 dams and 17 power stations on the rivers Euphrates and Tigris by 2012.

#90015d1820 01/15/1990 ~French/German News Agency

SAN SALVADOR (JAN. 15) - Former Salvadoran President Jose Napolean Duarte suffering from terminal liver cancer, was semi-comatose and in critical condition, his doctor said Monday.

Dr. Jose Luis Saca said Mr. Duarte, 64, is also suffering from bronchial pneumonia and described his condition as "extremely serious."

He is receiving "support treatment" of liquids, antibiotics and oxygen, said Dr. Saca, who has been supervising Mr. Duarte's health care since he was diagnosed as having liver cancer in May 1988.

"His liver is no longer functioning," said Dr. Saca, adding that the medical team treating the former president said Mr. Duarte was entering the "final" phase of his illness.

Mr. Duarte, who was president from 1984 to 1989, returned Sunday from Guatemala City where he had been for treatments over the last two months. He had also made several trips to Walter Reed Hospital in Washington.

He spent Monday with his wife, Ines, and his six children at his home in a wealthy residential neighborhood west of San Salvador.

#90015d1960 01/15/1990 ~French/German News Agency

ALGIERS (JAN. 15) - Arab foreign ministers charged with resolving the Lebanese crisis met here Monday and said they could continue their mission only with the removal of the "obstacle" created by Christian leader Michel Aoun.

Prince Saud al-Faysal of Saudi Arabia, Sid Ahmad Ghozali of Algeria and Abdellatif Filali of Morocco put the final touches on a report to be submitted to their heads of state that includes a proposal for an Arab summit on Lebanon.

Mr. Ghozali later told reporters that the triumvirate would definitely continue with its mission on Lebanon, "to help the Lebanese government extend its authority over the country with the cooperation of the Syrian government."

"But we cannot continue unless the obstacle is lifted," he added. "This obstacle, which threatens to put into question everything that has been built, is the rebellious attitude of General Michel Aoun."

"Many people tell us to continue while avoiding the use of force. But we need support that goes beyond words. How should a state that must extend its authority over all of Lebanese territory operate?" Mr. Ghozali said.

A peace plan drawn up by the three ministers and endorsed by the Lebanese parliament in October has not been fully implemented because of opposition by Gen. Aoun, who claims it legitimises Syria's military presence in Lebanon.

The Syrian-backed administration of President Elias Hrawi has, after earlier threats, pledged not to use force against the general, who with 15,000 Lebanese army regulars controls Christian territory north and east of Beirut.

Gen. Aoun refuses to accept Mr. Hrawi's authority, maintaining that his election in November, as called for in the Arab plan, was orchestrated by Syria and was an infringement on Lebanese sovereignty.

The three Arab ministers met here Monday with the Arab League envoy on Lebanon, Lakhdar Ibrahimi, who has held talks with officials in Beirut and Damascus in the past few days.

#90015d1990 01/15/1990 ~French/German News Agency
HONG KONG (JAN. 15) - Only three of the six giant panda bears born from artificial insemination in China last year have survived, the Hong Kong China News Service (HKCNS) reported here Monday.

Seventeen of the rare animals, kept captive in zoos throughout China, were artificially inseminated in 1989. But only five were successfully impregnated, resulting in the births of six infant panda bears, HKCNS said.

Only three of those survived the year, it said, citing officials.

The agency said the number of female pandas artificially inseminated last year was the highest since 1986. The pandas were artificially inseminated in an effort to preserve the endangered species, which mainly inhabits China's southwest Sichuan province.

Hu Jinchi, vice president of the Sichuan Provincial Zoological Society, said in March that fewer than 1,000 giant panda bears live in the wild in China.

Mr. Hu said that one-third of the 56 panda deaths which he had investigated since 1980 were caused by poachers and smugglers who valued the black-and-white bears' pelts.

#90015d2090 01/15/1990 ~French/German News Agency
SAN ANTONIO, TX (JAN. 15) - U.S. researchers for the first time have linked smoking and high blood cholesterol in men under 35 years old to hardening of the arteries, a research director said Monday.

"In this age group, smoking and cholesterol are about equally bad," said Dr. Henry McGill, one of the directors of the study. "What surprised me ... was the effect of smoking."

He presented the findings at the American Heart Association's annual science writers' forum. The study is one of the first to look at damage to arteries in young people.

Dr. McGill said that a 25-year-old man who smoked and had high levels of "bad cholesterol," or low-density lipoprotein (LDL) would have twice the artery damage of a non-smoker of the same age with low levels of LDL.

One-fourth of the subjects by age 34 already had what doctors call "raised lesions" in their arteries, marking the beginning of hardening of the arteries.

The findings were based on autopsies of about 300 white men, aged 15 to 34, who died violent deaths or in accidents.

The results of the studies support the belief of many cardiologists, including Dr. McGill, who believe preventing heart disease begins in childhood.

The study, which will eventually include 1,800 subjects, will explore the hardening of the arteries, which can cause a heart attack or a stroke and is linked to high blood pressure and diabetes.

#90015d2700 01/15/1990 ~French/German News Agency

VIENNA (JAN. 16) - Military chiefs from NATO and Warsaw Pact countries and others were meeting here Tuesday for an unprecedented seminar which could give the West insight into Eastern European thinking on defense.

For the first time, armed forces brass and experts from the two once hostile military blocs and neutral European countries will sit down and discuss their respective doctrines and organization.

The idea of such a meeting was first proposed by the Warsaw Pact in 1987 and concretized by the Vienna-based Confidence and Security Building Measures (CSBM) talks at the start of negotiations in March 1989.

The head of the U.S. delegation to the CSBM talks, John Maresca, said the military seminar should give the West a glimpse into how defense policies were evolving "in reponse to the rather dramatic evolution in the East."

More than 20 countries will be represented by their armed forces chiefs-of-staff, including the United States and the Soviet Union.

Organized as part of the CSBM negotiations involving the 35 members of the Conference on Security and Cooperation in Europe (CSCE), the seminar is expected to spawn a host of bilateral and multilateral encounters.

The CSBM talks, aimed at reducing the risk of an accidental outbreak of war, will be suspended for the length of the seminar which is to continue until February 5.

Meanwhile, parallel negotiations to reduce conventional arms -- the Conventional Forces in Europe (CFE) talks -- resumed here last week after an interruption of several weeks.

The seminar, something of an experiment, will not produce any final document or disarmament agreement. But analysts say it should reveal to what extent the recent political and economic upheaval in Eastern Europe

is being reflected in changes in military doctrine or strategy.

MOSCOW (JAN. 16) - Soviet leader Mikhail Gorbatchev on Monday expressed his desire for improved relations with Japan during talks with former Japanese foreign minister Shintaro Abe, the Tass news agency reported.

Mr. Abe, a leader of Japan's ruling Liberal Democratic Party, arrived here Saturday for a four-day visit at the head of an LDP delegation.

Mr. Gorbachev said he wanted to see Japan involved in formulating what he called the new policies of the decade "with the same dynamism it has shown in the economic sphere."

He said the world "could only benefit" from such energy.

Mr. Abe delivered a message from Prime Minister Toshiki Kaifu which Mr. Gorbachev promised to answer, Tass said.

He also presented the Soviet leader with an eight-point plan to improve bilateral relations in economic, scientific and technical areas.

Japan and the Soviet Union have remained divided over a territorial dispute involving the Kuril Islands, seized by the Soviet Union in 1945. The two have been unable to conclude a peace treaty following the Second World War.

KUALA LUMPUR (JAN. 15) - Malaysia's palm oil stocks were estimated at 1.06 million tons at the end of December, 7.64 percent down from 1.14 million tons at the end of November, Bernama news agency said Monday.

Crude palm oil stocks totalled 749,983 tons, down 11.37 per cent while processed palm oil stocks rose three percent to 305,409 tons, Bernama said, reporting figures quoted by the Palm Oil Registration and Licensing Authority (PORLA).

PORLA said Malaysia produced 530,912 tons of crude palm oil in December, down 16.79 percent from 638,055 tons in November.

A broker said that the PORLA figures were good news for the market which had estimated stocks at unchanged or a marginally lower level. He said the lower stocks were due to China's offtake of some 70,000 tons of palm oil.

PORLA drew criticism last year for alleged under reporting of stocks during

the second half. But the agency has denied tampering with figures to firm prices.

The authority later raised end-September and end-October stocks by almost 180,000 tons.

#90015d8600 01/15/1990 ~French/German News Agency

Frankfurt (JAN. 15) - West Germany imported 42.7 billion cubic metres of natural gas in the first eleven months of 1989, up 9.5 percent from the same period the year before, while the cost of the imports declined slightly, it was reported here Monday.

The Federal Office of Industry said the import bill amounted to 4.8 billion marks (2.85 billion dollars) through November, down from 4.9 billion marks in the first eleven months of 1988.

The Soviet Union, Netherlands, Norway and Denmark were the chief suppliers of natural gas to West Germany.

The office noted that the gas price developments ran counter to the petroleum import situation. In the first eleven months West German oil imports decreased 7.6 percent to 60.1 million tons, but the import bill rose some 14 percent to 15.4 billion marks.

BEIJING (JAN. 15) - International banking experts opened a three-day meeting behind closed doors here Monday to discuss monetary policy with Chinese colleagues, diplomatic sources said.

The International Conference on Central Banking (ICCB) was taking place at the Diaoyutai state guest house in the west side of the Chinese capital, off limits to the press, they said.

Richard Erb, deputy managing director of the International Monetary Fund (IMF), was to chair the meeting, with participants including Paul Volker,

former chairman of the U.S. Federal Reserve Board in the Reagan administration, and top Chinese economic officials.

The People's Bank of China, the nation's central bank and a co-sponsor of the meeting with the IMF and the U.N. Development Program, said last week the proceedings would be useful for Beijing in setting monetary policy.

It also stands to boost China's contacts with the world banking community,

seven months after foreign lendings were suspended following the violent suppression of pro-democracy unrest in Beijing, analysts said.

#90015d8660 01/15/1990 ~French/German News Agency

SEOUL (JAN. 15) - South Korean enterprises invested a total of 927 million U.S. dollars abroad in 1989, mostly in the manufacturing sector, up 93 percent over the year before, the central Bank of Korea (BOK) reported Monday.

The BOK report said North America took the lion's share of 434 million dollars invested in 84 projects, followed by Southeast Asia with 276 million dollars in 196 projects.

Next came Central and South America with 76 milion dollars in 34 projects,

Europe with 72 million dollars in 24 projects, Oceania with 40 million dollars in 23 projects, and Africa with 29 million dollars in seven projects.

In Southeast Asia, Indonesia proved the favorite country for South Korean entrepreneurs who invested a total of 138 million dollars in 57 different projects, mostly fibers and garment businesses, the report added.

South Korean investments in communist countries also became active under Seoul's policy of rapprochement with China and East Europe.

A total of 21.1 million dollars have so far been invested in communist-bloc countries out of 74.7 million dollars of projected investments approved by the BOK as of now, the report said.

Leading industrial group Daewoo plans to invest 45 million dollars to build a tourist hotel in Budapest, while Samsung Electronics Co. will invest 1.46 million dollars in a joint venture to build a colour television plant in Hungary.

Investment in the Soviet Union was modest last year with the Jindo Fur Company investing 400,000 dollars for a fur factory in Moscow.

For China, the BOK approved an investment of 14.3 million dollars in 18 projects mostly in the manufacturing sector last year, after approving 13.6 million dollars in 10 projects in 1988.

The report said South Korean entrepreneurs were increasingly investing abroad because of an unfavourable domestic business climate caused largely by rising wages.

#90015d8940 01/15/1990 ~French/German News Agency
LONDON (JAN. 15) - The freights market was in buoyant mood this past week with initial gains sparked off by the grains market, following news of more U.S. sales.

Later a dearth of tonnage in the coal and ore sectors maintained momentum, London traders said.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index (BFI) ended its first full trading week of the year up 39 points on the week at 1,658 points.

News of the latest bulk wheat purchases under the U.S. Export Enhancement Programme - China 300,000 tons and the Soviet Union 480,000 tons - boosted the grains sector.

Later reports of a Soviet purchase of a further 50,000 tons of wheat assured the market that Soviet charterers will be around for some time yet.

On the important U.S. Gulf to Japan grain route fixings were emerging at 15.00 dollars per tonne for 52,000 tonners, against the rate of 14.55 dollars reigning in the last week of 1989.

Similar sized vessels on the U.S. Gulf to Europe route were being paid between 27.50 and 27.65 dollars per ton against 26.75 two weeks earlier, and on the North Pacific to Japan route 16.55 dollars against the last reported rate of 16 dollars early in December.

#90015d8960 01/15/1990 ~French/German News Agency
VATICAN (JAN. 15) - Pope John Paul II is suffering from Asian flu and has had to cancel all his engagements and remain in bed, Vatican spokesman Joaquin Navarro said Monday.

The pontiff put off an audience with members of China's national circus, the spokesman said, although he insisted on making a previously scheduled visit to a parish in a suburb of Rome on Sunday evening.

"Don't be surprised if I don't embrace you," Pope John Paul told children who crowded around him, "but I have the flu and I don't want to pass it on to you."

It is the first time since the 69-year-old pontiff was wounded in an assassination attempt in 1981 that he has been forced to take to his bed because of illness.

The pontiff is the latest casualty of a flu epidemic which has swept through the Holy See and kept Vatican physician Renato Buzzonetti busy.

Vatican secretary of state Cardinal Agostino Casaroli is among the officials who have caught the bug. He has been in bed since Saturday.

The pontiff is scheduled to begin a demanding one-week trip to Africa later this month, visiting Cape Verde, Guinea Bissau, Mali, Burkina Faso and Chad.

#90015d9070 01/15/1990 ~French/German News Agency

PARIS (JAN. 15) - Experts from 36 countries and financial institutions began talks here Monday on setting up a bank to help Eastern Europe, with French President Francois Mitterrand urging participants to get the project off the ground rapidly.

The European Bank for the Reconstruction and Development of Eastern Europe was "of crucial importance for the future of the (European) continent," Mr. Mitterrand said in his opening speech.

It was up to the countries involved to "set up the institution best adapted to the Europe of tomorrow and beyond."

This task "will not be simple," Mr. Mitterrand said, noting that it was the first time since the Bretton Woods conference in 1944 that representatives of the international community, both east and west, had met to discuss this type of problem.

But he urged the need to move quickly or face the risk of being overtaken by events.

"I am urging you to proceed at a pace not usually seen in international negotiations," the French president added, proposing a second round of talks February 22 and 23 with the aim of reaching agreement on how the bank will work and formally signing an agreement in the spring.

During the Paris conference, due to end Tuesday, the participants will meet behind closed doors to discuss proposals worked out by the European Economic Community in the last few weeks.

The EEC sees the bank as a tool to help reforming eastern European countries move towards a market economy, and would see eastern Europe controlling 15 per cent of its capital, with the EEC holding a majority stake.

Several non-European countries, including the United States and Japan, have already expressed reserves on several aspects of the EEC plan, particularly what they see as too large a role for the Soviet Union, which would control 8.5 per cent, and the fact that it would be allowed to borrow from the bank.

#90015d9230 01/15/1990 ~French/German News Agency

LONDON (JAN. 15) - British wholesale prices rose 0.2 percent in December over the November level, the same level of increase as the previous month, according to provisional non-seasonally-adjusted figures released here Monday.

The December increase, one of the smallest this year, was in line with market expectations.

The December wholesale price level was five percent up on the same month in 1988, after a 4.9 percent year on year rise in October and November.

Raw materials and industrial energy prices were down 0.6 percent in December according to seasonally-adjusted figures, news which the Treasury described as excellent.

On a year on year basis, the December raw materials and industrial energy price rise was 4.7 percent down from 5.8 percent in November and 6.2 percent in October, good news for the government at a time when high wage demands have revived fears of a new wage and price spiral.

-30- 1108

#90015d9330 01/15/1990 ~French/German News Agency

LONDON (JAN. 15) - British retail sales rose 2.2 percent in December over the previous month's level according to seasonally-adjusted provisional figures released by the Central Statistics Office Monday.

Retail sales had fallen 0.4 percent in November over the October level.

The news, much better than market expectations of anything between a 0.5 per cent fall to a 0.5 percent rise, cheered the London money market.

The pound had risen to 2.8137 Deutsche marks at noon (1200 GMT), up from 2.8089 just ahead of the release of the figures.

It had been at 2.8369 earlier in the day after closing Friday at 2.7964.

The December retail sales level was 2.25 percent up from the same month last year, with the final quarter showing a 0.5 percent rise over the third

quarter of 1989 and 1.25 percent above the same period in 1988.

A Confederation of British Industry (CBI) report released Monday noted that Christmas spending got under way later than usual, and that many stores started the traditional January sales early because of a slump in consumer spending sparked by Britain' high interest rates.

The CBI remained relatively pessimistic on the prospects for 1990, while the Treasury said it considered the December figure "erratic."

#90015d9870 01/15/1990 ~French/German News Agency

SINGAPORE (JAN 15) - Chia Thye Poh, 49, Singapore's longest serving political detainee, will remain under detention on the island of Sentosa until he renounces communism, a senior cabinet minister told parliament Monday.

Home Minister Shanmugam Jayakumar said: ''The conditions on Chia will be lifted when the government is satisfied that Chia has renounced communism and poses no security risk. Until then Chia will remain in Sentosa.''

Chia, who has served 23 years in prison, was arrested in 1966 under the Internal Security Act which provides for indefinite imprisonment without trial.

He was accused of advocating violence to overthrow the legitimate governments of Singapore and Malaysia, but has repeatedly denied this.

Released from prison in May last year, Chia was banished to Sentos a under heavy restriction orders which state he canot leave the island, take part

in political activity or associate with former prison inmates.

Various human rights organizations, U.S. politicians and Amnesty International have demanded that the government release him unconditionally, but to no avail.

Opposition Member of Parliment Lee Siew Choh of the Workers Party Monday demanded the government end Chia's ''exile'' now that the outlawed Communist Party of Malaya (Cpm) had agreed to lay down their arms in a peace pact with Malaysia and Thailand.

Jayakumar said the Cpm had agreed to ''disarm but not disband'' and Chia had refused to denounce the Cpm.

''As long as the Cpm continues to exist, even without its armed units, the Singapore government must remain vigilant,'' Jayakumar said.

RIYADH (JAN. 15) - U.S. Undersecretary of State for Political Affairs Robert Kimmitt met here Monday with senior Saudi officials to discuss the situation in Afghanistan, informed sources said.

Mr. Kimmitt, who arrived Sunday accompanied by the U.S. special envoy to the Afghan resistance, Peter Tomsen, held talks with Defense Minister Sultan ibn Abd al-Aziz and Minister of Petroleum and Mineral Resources Hisham Nazer, they said.

Sources in Washington said the U.S. officials would be reviewing the situation in Afghanistan, where guerrillas have to date failed to overpower the Moscow-backed administration of President Najibullah a year after a Soviet troop withdrawal.

Last March, Saudi Arabia recognized the government of the opposition Afghan Mujahedeen, whose resistance movement Riyadh has supported for years.

Mr. Kimmitt is also to visit Pakistan and India.

#90015d9920 01/15/1990 ~French/German News Agency

LONDON (JAN. 15) - Several hundred workers went on strike at two British Ford auto plants on Monday following their refusal of a 10.2 percent pay rise offer, the management said.

Some 300 workers at the Bridgend plant in South Wales voted to strike Sunday, after about 1,000 workers at the Halewood plant in northwest

England took a similar decision Saturday.

Other Ford plants in Britain, where the company employs a total 32,000 workers, could follow suit later in the week.

Ford-UK unions had been asking for a pay increase coupled with a reduction of the working week.

They last Wednesday rejected a management offer of a 10.2 per cent pay increase this year, with a rise of two per cent above the inflation rate for the following two years, but with no provision for shorter working hours.

The two sides are to hold further talks in London on Wednesday.

#90015d9950 01/15/1990 ~French/German News Agency

GENEVA, Switzerland (JAN. 15) - U.S. arms control officials struck an upbeat note here Monday as they resumed talks with their Soviet counterparts to ban all nuclear tests over 150 kilotons.

A spokesman for the U.S. mission here said the mood was very optimistic.

U.S. officials expected the latest round to be the last so that the talks could be wound up before the next summit meeting between U.S. President Bush and Soviet leader Mikhail Gorbachev, scheduled for June.

The negotiations are aimed at hammering out verification agreements that would ban underground tests of more than 150 kilotonnes.

A first agreement, the so-called Threshold Test Ban Treaty (TTBT), was signed in 1974, followed by a Peaceful Nuclear Explosion Treaty (PNET) two years later.

The two pacts have never been ratified by the U.S. Senate, as verification procedures were considered insufficient.

Soviet head delegate Igor Palenykh and his U.S. counterpart Paul Robinson started off the sixth round at the Soviet mission for talks on a negotiating schedule.

A plenary session of the two delegations has been fixed for Tuesday, U.S. sources said.

Mr. Palenykh said he had come to Geneva with precise instructions for an agreement.

"The bulk of work on the protocol for the 1974 treaty has been done," he said, adding that the remaining "relatively small number of substantial problems" could be solved quickly.

The protocol referring to the 1976 treaty needed only minor amendments, according to the Soviet chief delegate.

An accord to ban underground tests of more than 150 kilotons will only be "the first step in the negotiations," as tests should ultimately be phased out, Mr. Palenykh said.

LISBON (JAN. 15) - Angolan government troops have ended an offensive against UNITA rebels in the south of the country in order to promote the peace process, a visiting Angolan ambassador said here Monday.

Daniel Chipenda, ambassador to Cairo, said in an interview with the Portuguese radio station TSF that the government "had only launched operations in Cuando Cubango province to counter UNITA activity."

He added that the Luanda government was keen to "continue the peace process" with the National Union for the Total Independence of Angola.

This began with a ceasefire accord in June 1989 that both sides have since accused each other of violating.

Mr. Chipenda implicitly denied reports here that the Soviet Union had put pressure on Luanda to halt its military operations.

The ambassador is in Lisbon, the former colonial capital, to meet members of the large Angolan community here and "explain to them President Jose Eduardo dos Santos's recent statements" on the peace process, he said.

Mr. Chipenda said it was important for "all Angolans abroad interested in the development of democracy in Angola to have a dialogue with the head of state."

In a year-end speech, Mr. Dos Santos had said the government planned to recognize socio-professional organizations and civic associations and to more clearly lay down the respective roles of the ruling MPLA party and the state.

The UNITA rebels led by Jonas Savimbi have been fighting the government since independence in 1975.

Meanwhile, UNITA forces ambushed a convoy carrying emergency food in the

southwestern Benguela province at the weekend, killing two civilians and destroying five vehicles of the United Nations Childrens' Fund (UNICEF), the ANGOP news agency said.

The rebels injured seven people and destroyed four other vehicles in the attack near Membassoco, the official Angolan agency, monitored here, added. It said the convoy had just delivered 214 tons of food aid to people in Ganda district.

ZARAGOZA, Spain (JAN. 15) EFE - Hundreds of people gathered in Zaragoza cathedral Monday for a memorial service honoring 43 Spaniards killed by toxic fumes in a discotheque blaze over the weekend as investigations continued into the cause of the tragedy.

Family, friends and neighbors of those killed early Sunday when the northeastern city's "Flying" disco caught fire were joined by civic leaders on the first of three days of official mourning declared across the region.

Some 130 people, mostly in their 30s and 40s, were in the nightclub when an electrical short-circuit apparently triggered the blaze.

The 28 male and 15 female victims were killed almost instantly after inhaling what is believed to have been hydrocyanic gas -- the same used for gas chamber executions -- which is produced when certain plastics and fabrics catch fire.

A judge charged with investigating the accident said Monday that, while initial blood tests had revealed levels of carbon dioxide sufficient to cause death, experts had not ruled out the possibility the victims had been overcome by hydrocyanic gas.

Judge Javier Seoane said samples had been sent to Madrid for further tests while he added that investigations were also underway to determine whether the discotheque was complying with safety regulations at the time of the blaze.

The owner of the discotheque, Faustino Martinez Sanchez, was questioned by police Sunday but was released after making a statement.

An elderly woman who was seriously injured in the fire was Monday reported to have regained consciousness after spending Sunday in a coma, although doctors said she was still in a very serious condition.

Three other people, including a fireman, were slightly injured in the

accident.

Authorities have declared three days of mourning in Aragon region, of which Zaragoza is the capital.

Firemen who rushed to the scene within minutes of being alerted said the majority of the dead were discovered on the upper floor of the disco.

According to experts, the victims would have lost consciousness within seconds.

A six-year-old girl and her 15-day-old baby sister lost both of their parents and two of their grandparents in the tragedy.

The children's father was part of a musical group which was playing that night at the disco. All but one of the band perished in the fire.

The only surviving member of "Imagenes" group, singer Benito Gomez, said in a radio interview Monday that the nighclub's carpet had been to blame for the tragedy.

"The carpet was to blame for everything. When it caught fire it produced a massive amount of thick black smoke," Gomez told Antena 3 radio station.

Most of the victims were buried Monday.

In 1979, 71 people were killed when Zaragoza's Corona de Aragon hotel caught fire. Four years later 81 people died in a blaze at the +Alcala 20+ discotheque in Madrid.

Spain's fire safety regulations were subsequently updated and Zaragoza's regulations were considered among the tightest in the country.

#90015p0006 01/15/1990 ~PR Newswire

PERTH AMBOY, NJ (JAN. 15) PR NEWSWIRE - Margaretten & Company, Inc. in 1989 originated more than $3 billion in home mortgage loans for the first time in its 80-year history, the firm reported today. Volume rose 17 percent to $3.014 billion in 1989 from $2.567 billion in 1988. The number of loans and the average amount of each loan also rose to record levels.

Margaretten, the mortgage banking subsidiary of Primerica Corporation (NYSE: PA), is the nation's largest originator of FHA-insured mortgage loans for single-family home purchases. The firm is also the largest originator of VA-guaranteed mortgages.

Conventional or nongovernment loans surged 47 percent to $1.629 billion in 1989 from $1.105 billion a year earlier. Government loans -- that is, FHA and VA mortgages -- amounted to $1.384 billion in 1989 versus $1.462 billion the previous year.

The average loan size increased to $86,000 in 1989 from $76,000 the previous year. Conventional mortgage loans averaged $100,000 each last year versus $89,000 in 1988. Government loans averaged $74,000 in 1989 versus $68,000 in the previous year.

Margaretten's record volume was attained despite widespread softness in real estate markets, and with fewer company offices operating fewer personnel, noted Felix M. Beck, chairman and chief executive. All the mortgage loans were originated by Margaretten; there were no bulk loan purchases.

Beck attributed Margaretten's success to the fact that "we continue to develop for the market more viable products, quality service and improving technology." Specializing in mortgages for existing homes, Margaretten in 1989 helped fill a vacuum left by thrift institutions in mortgage lending, Beck said.

During 1989, Beck pointed out, large numbers of savings and loan associations and other institutions withdrew from competitive activities and sharply reduced mortgage lending. "Margaretten, meanwhile, expanded service to home buyers and the real estate brokerage profession," Beck declared. "In so doing, we helped stabilize the industry in the states in which we operate."

Headquartered in New Jersey, Margaretten has branch loan offices in 15 states: Arizona, Colorado, Delaware, Florida, Georgia, Illinois, Maryland Minnesota, Nebraska, Nevada, New Jersey, North Carolina, Pennsylvania, Virginia and Wisconsin. The company plans to open its first loan office in New York next month.

#90015p0008 01/15/1990 ~PR Newswire

WESTPORT, CT (JAN. 15) PR NEWSWIRE - Famed actor Paul Newman's food company, Newman's Own, Inc., will donate its total profits of approximately $7 million for 1989 to a variety of charitable organizations around the country, it was announced by A.E. Hotchner, executive vice president and treasurer of Newman's Own. This will bring the total amount of profits donated to more than $26 million since the company was founded in 1982.

"What I particularly like about this unpredictable company of mine," Newman says, "is that we furnish people with wholesome food that they enjoy which enables us to take the profits we make and give them to the unfortunate people of the country who, because of poverty, sickness, old age or illiteracy, desperately need help. That's what makes this business such a kick -- this mutually beneficial recycling from the 'haves' to the 'have-nots'."

Over $600,000 of this year's profits will go to AIDS-related organizations.

AIDS organizations receiving donations include AIDS Project Los Angeles, American Foundation for AIDS Research, Boston City Hospital/Kids Fund (AIDS Respite), The Children's Hospitals in Boston and New Jersey/AIDS programs, Columbia University-Harlem Hospital Center, Department of Pediatrics, and Hale House in New York City.

Newman, in consultation with Hotchner and Ursula Hotchner, vice president of the company, selected the groups and organizations that are receiving money from Newman's Own, Inc.

This year's first time recipients include Camp Sunburst, a national AIDS project; the National Multiple Sclerosis Society; the March of Dimes; the Boys Choir of Harlem, New York; the Miami Project to Cure Paralysis; the Food and Hunger Hotline; and the Children's Health Fund in New York.

In addition, Newman's Own will continue to support such worthy organizations as Big Brothers/Big Sisters, Coalition for the Homeless, the Cystic Fibrosis Foundation, City Meals on Wheels, Literacy Volunteers of America, the Fresh Air Fund, the New York Times Neediest Cases, and

Memorial Sloan Kettering Cancer Center in New York.

In response to the charity needs in its local community, Newman's Own has donated funds to a variety of Connecticut-based organizations including: The Norwalk Hospital, the Project Return Girl's Home, School Volunteer Program (Hartford), the Connecticut Hospice, University of Connecticut's Children's Cancer Fund, Weston and Westport Emergency Medical Services, and the Greater Bridgeport AIDS Project. In addition, the Hole In The Wall Gang Camp in Ashford, Conn., established by Newman in 1988 for children with cancer and other blood-related illnesses, will receive a grant for a spring '90 seminar for health care professionals suffering from burnout. Nearly $8.5 million of the food company's profits have been donated to the camp.

Newman's Own, Inc., produces a line of all-natural food products: salad dressing, spaghetti sauces, popcorn and lemonade. Newman's Own products are also sold internationally in England, France, Germany, Scandinavia, Russia, Japan and Australia, among others.

TOLEDO, OH (JAN. 15) PR NEWSWIRE - Dana Corp. (NYSE: DCN) and TRW, Inc. (NYSE: TRW) have announced that they will work cooperatively in engineering and producing selected vehicle chassis systems for vehicle manufacturers. Dana, through its Parish Frame, Spicer Axle, and Spicer Universal Joint Divisions, engineers and manufactures frame, driveline, and related products. TRW, through its Steering Systems Group, engineers and manufactures steering and suspension components and systems.

In announcing the new arrangement, Vernon E. Oeschsle, group vice president, Dana North American Operations, said, "With this alliance, Dana and TRW can now supply automotive manufacturers with complete systems from simple drivelines to complex chassis assemblies to meet their vehicle design and packaging needs. By combining the expertise of TRW in steering and suspension systems with ours in drivelines, frames and other related chassis components, Dana and TRW have gained a unique industry position.

"To my knowledge, we are the only auto industry suppliers to offer such a complete engineering and production service ranging from initial conception to completed systems delivered to the vehicle manufacturer's assembly plant," Mr. Oeschsle added.

Chester O. Macey, vice president and general manager, TRW Steering Systems Group, said, "This arrangement allows the vehicle manufacturers to source

chassis systems from a single source. We bring together several related elements of a vehicle's chassis system, the driveline, frame and cross members, plus the steering and suspension systems. The benefit is that they have been designed together as a package, which eliminates the traditional three-way design exercises among two separate suppliers and the vehicle manufacturer. This will save time and money. Add to this design engineering synergy the fact that both Dana and TRW can manufacture product from worldwide operations, and you have all the ingredients for a flexible, low-cost, high-technology, world-class supply base."

Cleveland-based TRW is an international company that provides high-technology products and services primarily to the automotive, space and defense, and information systems markets. The company's 1988 sales totaled about $7 billion.

Dana is the largest independent automotive component manufacturer in North America and a global leader in manufacturing and marketing components and providing services for the highway vehicle, automotive distribution, truck parts distribution, mobile off-highway, industrial equipment, and financial services markets. Dana's 1988 sales totaled $4.9 billion

#90015p0022 01/15/1990 ~PR Newswire

NEW YORK (JAN. 15) PR NEWSWIRE - VeriFone Inc. announced here today the TRANZ 420, a mid-range portable transaction microcomputer that extends transaction automation into new markets. The TRANZ 420, introduced at the 79th annual convention of the National Retail Merchants Association, is a versatile transaction system that delivers cost-effective credit card verification and check guarantee. In addition, it can be programmed to perform specialized business functions, such as price verification, negative file storage, draft capture, order entry and inventory control.

The portable features of the TRANZ 420 permit transaction processing to take place in non-traditional points-of-sale.

The TRANZ 420 sets a new standard as a complete, portable transaction system. It features a fully integrated roll printer for receipt and report printing, which eliminates the need for an external printer and cables. The TRANZ 420 also features a small footprint, which means it requires less counter space. The built-in battery allows the system to operate without AC power, bringing the benefits of transaction automation to remote locations and allowing continued operation in the event of a power failure. The TRANZ 420 is capable of performing 200 transactions without AC power. With a special adaptor, the system can even be powered

by a motor vehicle battery. Intelligent Memory Cartridge

Memory can be expanded by inserting a self-contained memory cartridge that contains an additional 32 kilobytes of battery protected random-access memory (RAM). This feature extends the customer's return on investment by providing the power to expand existing applications and add new ones at a later date.

The TRANZ 420 is currently available in selected international markets and the first U.S. customer shipment will be within 90 days. The single unit U.S. reseller price is $545 with volume discounts available. A separate international price structure is also available.

VeriFone, based in Redwood City, Calif., is a leading supplier of Transaction Automation systems used to deliver Electronic Funds Transfer/Point-of-Sale (EFT/POS) and other financial retail services worldwide.

CONTACT: Tod Bottari of VeriFone, 415-598-5570; or Jeff Hansen, 415-354-4422; or Steve Schick, 415-354-4488 both of Regis McKenna, for VeriFone

#90015p0023 01/15/1990 ~PR Newswire

NEW YORK (JAN. 15) PR NEWSWIRE - VeriFone Inc. announced today the Payment Network Controller (PNC) 330, a Transaction Automation system for payment processing that accepts input directly from an electronic cash register (ECR) or other point-of-sale (POS) device. Introduced at the 79th annual convention of the National Retail Merchants Association, the PNC 330 has integrated features that allow for fewer data entry errors, faster customer transactions and easier end-of-day balancing.

The PNC 330 is connected to the ECR via an RS-232 point-to-point interface. Once the ECR is programmed to send the transaction input data to the PNC 330, entering the data from the ECR is equivalent to directly entering it through the PNC 330 keypad, eliminating the need for the operator to enter a special command sequence.

Once connected, the PNC 330 operates like an intelligent modem. After receiving the data from the ECR, the PNC 330 dials an electronic payment network to complete the credit authorization, debit transaction, check verification or other payment processing transaction. Once the PNC 330 has received the network response, it sends the data back to the ECR.

This connection of the ECR to the VeriFone payment network controller also greatly simplifies the process of end-of-day balancing. The ECR can remotely initiate balancing and settlement routines in the PNC 330. This

eliminates the need to manually balance both the ECR and the credit/debt authorization system.

The PNC 330 is the first VeriFone product to connect directly to the in-store ECR. This connection means that ECR developers will no longer be required to undertake the costly development of payment networks and applications. With the PNC 330, developers can take advantage of VeriFone's certified access to the payment networks that process VISA, Master Card and other transactions. Certification is the greatest barrier for entry into the integrated transaction marketplace. In addition, developers gain access to the large installed base of VeriFone applications.

The PNC 330 can also operate as a stand-alone system, allowing the user to enter transaction data via the keyboard, and can accept data entered through a PIN (personal identification number) pad or a bar-code wand. In addition, the PNC 330 is completely software compatible with the popular VeriFone TRANZ 330, and supports the network dialing protocols for the various established payment networks. Price and Availability

VeriFone's PNC 330 offers users a better price/performance solution than other completely integrated POS systems currently available. Unit prices for U.S. resellers range from $260 to $395, depending on quantity ordered. The PNC 330 is available immediately and is currently distributed in the United States only.

VeriFone, based in Redwood City, Calif., is a leading supplier of Transaction Automation systems used to deliver Electronic Funds Transfer/Point-of-Sale (EFT/POS) and other financial retail services worldwide.

EL SEGUNDO, CA (JAN. 15) PR NEWSWIRE - INFONET, leader in standards-based international value added network services, today unveiled its NOTICE 400 set of products and services based on the CCITT electronic message handling standard, X.400. NOTICE 400 is a modular offering aimed at multi-national companies needing cohesive, global electronic messaging capabilities. Customers will be able to pick and choose among the products and services to establish an international, X.400-based messaging resource tailored to their present and future needs.

The initial release of NOTICE 400 consists of NOTICE 400 PC, a software

product, plus such services as interconnects and gateways between public and private networks, X.25 wide-area packet-switched networking, a global X.400 Administrative Management Domain (ADMD), plus services linking X.400 messages with telex and facsimile systems.

NOTICE 400 PC is a software product that runs on IBM PCs and compatible systems. NOTICE 400 PC is also offered for international business enterprises and multi-national firms with sites requiring messaging software. NOTICE 400 PC gives users special office automation capabilities designed to maximize productivity. The software includes text editing, electronic filing and foldering, and local and remote directory maintenance features.

INFONET's ADMD service provides customers with several essential components for managing an X.400 messaging environment. It fully supports all business correspondence such as binary files, memos, EDI documents and graphics. It offers users several means of global information delivery through support of a variety of queue and traffic-management systems. Like INFONET's international value added network, the ADMD is available worldwide, all day, every day.

NOTICE 400 will serve users in North America, Europe, Asia Pacific and South America. There is no need for customers to have to replicate services for exchanging messages across national borders.

For customers who require a dedicated turnkey solution, INFONET offers a privately configured X.400 switch, which can be operated and managed at the customer's site or at INFONET.

In addition to the current set of products and services, INFONET will be offering a local-area network (LAN) version of NOTICE 400. NOTICE 400 LAN has a message transfer agent for direct LAN-to-LAN or LAN-to-host X.400 message exchanges

INFONET's NOTICE 400 PC is available now and sells for $350 in the United States. Site licenses are also available.

SIMSBURY, CT (JAN. 15) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) announced today that it had signed a letter of intent with Akzo N.V. and AMP Incorporated, pursuant to which Akzo and AMP, through a joint venture, will acquire Kollmorgen's interest in Additive Products Company, a partnership owned jointly by Kollmorgen and Akzo, and all of the assets of the graphics part of Kollmorgen's PCK Technology Division. Kollmorgen's Discrete Wiring Systems business will not be included in the new arrangement.

The purchase price for the assets to be acquired is estimated to be approximately $50 million, subject to certain adjustments. In addition, the Akzo-AMP joint venture will assume certain liabilities of the businesses.

Kollmorgen also announced that the other joint venture between Kollmorgen and Akzo, Akzo Electronic Materials Company (AEMC) of Schaumburg, Ill., will be concluded. However, Akzo will independently remain in the gallium

arsenide substrate business, through Crystal Specialties International of Colorado Springs, Colo. The Additive Products Company, PCK Graphics and AEMC are part of Kollmorgen's Electronic Interconnections segment.

The completion of these transactions is subject to the negotiation and execution of a definitive asset purchase agreement and related agreements, the parties obtaining any required governmental and regulatory approvals and the expiration of any required waiting periods pursuant thereto. The parties currently anticipate closing the transaction within approximately 30 days.

"These transactions represent a significant step in Kollmorgen's previously announced plan to sell our Electronic Interconnections segment " said James E. Swiggett, chief executive officer of Kollmorgen.

Kollmorgen Corporation has continuing operations in two business segments specializing in servo-motors and controls, and electro-optical instruments.

ST. PAUL, MN (JAN. 15) PR NEWSWIRE - Ecolab Inc. (NYSE: ECL) reported today that pursuant to its ongoing common stock repurchase program for up to $110 million of common stock, the company has purchased approximately 2.4 million shares an aggregate price of approximately $72.0 million. Included within such purchases is today's purchase of approximately 1.8 million shares from the Carlyle Group and their affiliates for an aggregate purchase price of approximately $55.3 million, or $30-3/4 per share, which was the price at which Ecolab shares were trading on the New York Stock Exchange on Jan. 11, 1990, when the parties initiated discussions about the purchase. As part of this purchase, the Carlyle Group and their affiliates agreed not to acquire additional Ecolab shares or otherwise attempt to influence Ecolab.

Ecolab is a leading worldwide developer and marketer of premium cleaning, sanitizing and maintenance services for the hospitality, institutional and residential markets. For the year ended Dec. 31, 1988, Ecolab reported sales of $1.2 billion and earnings of $44 million or $1.63 per share. Ecolab's shares are traded on the New York Stock Exchange and the Pacific Stock Exchange.

PITTSBURGH (JAN. 15) PR NEWSWIRE - Frank V. Cahouet, chairman and chief executive officer of Mellon Bank Corp. (NYSE: MEL), announced today that he will assume the additional title of president and expand the corporation's Office of the Chairman to eight members as part of a management reorganization plan.

The Office of the Chairman, which sets corporate strategies and policies and is responsible for overseeing day-to-day operations, will be staffed entirely from within Mellon Bank Corp. In addition to Cahouet, it will include as members the two other current office members -- Richard H. Daniel and W. Keith Smith -- and five other Mellon senior managers. Other than Cahouet, all Office of the Chairman members will carry the title of vice chairman of the corporation. Their appointments are effective immediately.

Cahouet, Daniel and Smith will continue as directors of Mellon Bank Corp.; Smith and Daniel also will join Cahouet as members of the board's Executive Committee. The five other vice chairmen are Thomas F. Donovan, David L. Eyles, Richard A. Gaugh, Martin G. McGuinn, and Jeffrey L. Morby.

Members of the Office of the Chairman and their responsibilities are as follows:

-- Frank V. Cahouet, chairman, president and chief executive officer, will have overall responsibility for management of the corporation. Cahouet also will retain direct management responsibility for the human resources and auditing functions.

-- Richard H. Daniel continues his current responsibility for the corporation's credit policy, credit review and loan workout activities, sharing that responsibility with David L. Eyles, who continues in his current role as chairman of the Credit Policy Committee.

-- W. Keith Smith assumes responsibility for the corporation's fee-based service businesses, including trust and investment, cash management, financial data processing and mortgage banking. He also assumes responsibility for the corporation's information management function.

-- Thomas F. Donovan continues to head Mellon's Philadelphia operations and assumes corporatewide responsibility for Mellon's middle market banking activities, which continue to be managed by Executive Vice President William J. Stallkamp.

-- Richard A. Gaugh continues to have corporatewide responsibility for the corporation's retail banking activities, which serve consumers and small businesses.

-- Martin G. McGuinn continues to serve as the corporation's general counsel and maintains responsibility for legal affairs and corporate affairs; in addition, he assumes responsibility for economics, strategic planning and facilities management.

-- Jeffrey L. Morby assumes responsibility for all wholesale banking activities, including corporate banking, capital markets, international banking, leasing and real estate. Morby previously served as a special consultant to the chairman and president and headed the corporation's strategic planning activities.

Cahouet also announced that Steven G. Elliott, currently executive vice president and head of the Finance Department, will become chief financial officer, a post which has been held by Smith. In that capacity, Elliott will be responsible for all finance and asset and liability analysis activities.

Cahouet's assumption of the title and role of president follows the announcement by Anthony P. Terracciano, current president and chief operating officer, that he will resign from Mellon on Jan. 31 to become chairman, president and chief executive officer of First Fidelity Bancorporation, Newark, N.J.

With assets of $31.2 billion at Sept. 30, 1989, Mellon Bank Corp. is one of the nation's 20 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, data processing and cash management.

DAYTON, OH (JAN. 15) PR NEWSWIRE - NCR Corporation (NYSE: NCR) reported today that fourth-quarter earnings per share reached an all-time high for any quarter and earnings per share also set a record for a full year.

Earnings per share in the fourth quarter grew 9 percent to a record $2.02, compared to $1.85 reported for the year-ago period. Net income for the fourth quarter was $147 million, a decline of 1 percent from the 1988 level of $149 million. In 1989, NCR acquired over 9 million common shares under its share-repurchase program. This program had a favorable impact on earnings per share but negatively affected net income. Fourth-quarter revenue of $1,788 million declined slightly from last year's revenue of $1,804 million.

NCR Chairman and Chief Executive Officer, Charles E. Exley Jr., said, "Revenue in the United States was up slightly while revenue from abroad showed a small decline reflecting the negative impact of the stronger U.S. dollar in year-to-year comparisons. On a local currency basis, revenue outside the United States showed growth over the previous year." Orders

The U.S. dollar value of worldwide orders in the fourth quarter was down slightly from the all-time record posted last year, and was the second-best quarter ever recorded by NCR. "Excluding the impact of currency changes on order backlogs," Exley said, "we recorded a gain in the U.S. dollar value of worldwide orders and set a new record for any quarter. We also achieved a record quarter for worldwide orders on a local currency basis, with the United States posting good gains and our operations outside the United States recording a modest gain."

Continuing the success noted in the prior three quarters, retail terminal systems achieved record fourth-quarter orders with strong, major-account activity occurring both in the United States and abroad. In the financial sector, an all-time record was established in the quarter for item processing orders. 1989 Full-Year Financial Results

NCR reported earnings per share for the full year of $5.38, an all-time record, up 1 percent over the $5.33 recorded last year. Net income of $412 million was 6 percent lower than the $439 million reported for 1988. Revenue for the year was $5,956 million, down 1 percent from the $5,990 million reported for 1988, but worldwide revenue recorded a gain when the impact of the stronger U.S. dollar in year-to-year comparisons is excluded.

#90015p0045 01/15/1990 ~PR Newswire

BOHEMIA, NY (JAN. 15) PR NEWSWIRE - Symbol Technologies, Inc. (NYSE: SBL) the leading manufacturer of portable bar code-based data collection systems, said at an analyst meeting today that it expects revenues for the fourth quarter of 1989 to be approximately $47 million, compared with revenues of $34.1 million in the corresponding year- earlier quarter. Earnings per share for the quarter ended Dec. 31, 1989, are estimated to be approximately $.05, subject to year-end adjustments. In the 1988 fourth quarter, earnings per share were $.01.

As forecast in the company's Oct. 30, 1989, earnings announcement, demand for scanner products in the fourth quarter declined as retailers voided installing scanning equipment during their prime holiday selling season. Fourth quarter portable data terminal sales also declined, due to reduced demand for traditional batch terminals.

For the full year 1989, scanner sales are expected to be up approximately 40 percent. Terminal sales are expected to be down on the domestic side and up significantly on the international side, with a slight improvement overall for the year.

The company expects scanner revenue in 1990 to grow at a rate in excess of 30 percent. Margins for scanning products are expected to be slightly lower than 1989 levels due to increased competition. Sales of terminals are expected to be flat and margins under pressure in the first half of 1990. However, the company said it believes that several new products could contribute significantly to accelerated revenue and profit growth in the second half of 1990 and beyond.

Symbol also announced Spectrum One(TM), its next-generation radio frequency (RF) data communications network, and the LRT 3800, the first hand-held product to integrate RF data communication with advanced scanning and portable data terminal capabilities in a single unit. The new DOS-based LRT 3800 allows the user to: (1) input data by scanning a bar code; (2) enter data using the top-mounted keypad; (3) transmit the data in real time to a point-of-sale terminal, personal computer or mainframe computer; and (4) display the results. The LRT 3800, which the company plans to make available in the second half of 1990, is the first Symbol product to incorporate Spectrum One technology.

Spectrum One, which was developed for a variety of bar code-based data-handling applications requiring high performance, is based on spread spectrum technology, an RF communications technique that does not require FCC licensing, and works well in harsh radio environments. A proprietary network protocol allows hundreds of low power portable terminals to communicate over a common network, at data rates of 60 kilobits per second with subsecond transaction response times. In addition, a unique cellular architecture provides for area coverage sufficient to blanket the largest retail, distribution or warehouse setting.

Symbol Technologies through its Bar Code Scanning Division develops, manufactures and sells equipment that employs laser technology to read data encoded in bar code symbols.

LAWRENCEVILLE, NJ (JAN. 15) PR NEWSWIRE - Imo Industries Inc. (NYSE: IMD) (IMO), today announced that its board of directors has authorized the company to purchase from time to time, in open market transactions, up to 1 million of its outstanding common shares.

The company presently has approximately 18 million shares outstanding. In commenting on the buy-back authorization, W.J. Holcombe, IMO chairman and chief executive officer, stated, "Our board believes that, based on current stock market and general business conditions, IMO shares are substantially undervalued and represent an excellent investment opportunity based on our performance expectations. The shares will be retained in the corporate treasury and used for employee benefits and other purposes. Merrill Lynch Capital Markets will act as the company's exclusive agent in the program.

"In mid-February, we expect to release our audited results for the fourth quarter and full year of 1989. Management believes that its fourth quarter 1989 will demonstrate an improvement over the fourth quarter of 1988. The full year results for 1989 will exceed those of 1988. Based on our existing backlogs and prospects in our served markets, we expect significant earnings improvement for the year 1990 compared to 1989."

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

FORT WORTH, TX (JAN. 15) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) announced today that it has extended to 5:00 p.m. New York City time on Jan. 23, 1990, the date by which it may accept for payment Series B notes tendered in response to its previously announced consent solicitation and offer to purchase. As also previously announced, all holders of Series B notes have tendered such notes pursuant to Western's offer. Western has offered to purchase such notes, which aggregate $115 million face amount, at $635 for each $1,000 of principal amount. The purpose of the extension is to provide the company time to consummate a contemplated offering of convertible subordinated debentures, the proceeds of which are intended to be used to consummate the tender offer. The offer was previously scheduled to expire Jan. 17, 1990. A registration statement covering the proposed convertible subordinated debenture offering was filed on Nov. 22, 1989, with the Securities and Exchange Commission.

The Western Company of North America provides pressure pumping services which include cementing, fracturing and acidizing, and offshore drilling internationally.

SOUTHFIELD, MI (JAN. 15) PR NEWSWIRE - Southfield-based Beauty Brands Group, operator of six cosmetics stores, said today that it is planning a major expansion program, opening as many as six stores in the Detroit area within the next year.

In addition, Donald Fox, president, said the company is completely remerchandising and reorganizing its six stores which were acquired from Special Cecille's earlier this year. The name of the stores already has been changed to The Cosmetic Counter at Special Cecille's.

"We have major plans for this part of our business," said Fox. "We are very excited about the opportunities and it is a perfect fit with our distribution business."

Beauty Brands distributes designer and domestic fragrances to independent drugstores. It has created a unique market niche for itself, filling any size order for drugstores in the United States. In addition, it offers a 100-percent guarantee, which means retailers can exchange unsold merchandise.

"Contrary to conventional wisdom, the independent drugstore market is growing," said Fox. "Our sales are reflecting this growth. We are providing a very special service which will prove more and more profitable."

Beauty Brands, a public company, is traded over the counter and is headquartered in Southfield.

VALLEY FORGE, PA (JAN. 15) PR NEWSWIRE - NovaCare, Inc. (NASDAQ: NVCR) announced the appointment of C. Arnold Renschler, M.D., to the position of president and chief operating officer, effective today. Renschler will report to John H. Foster, chairman and chief executive officer.

Renschler is a widely recognized geriatric authority. Most recently, Renschler served as president and chief operating officer of Manor Care, Inc. Manor Care owns and operates Manor Healthcare Corporation, the most respected and one of the nation's largest nursing home chains.

From 1979 until joining Manor Care in 1981, Renschler served as an assistant professor at Johns Hopkins University School of Medicine and, prior to that, maintained a very successful medical practice in northern Virginia.

"With Manor Healthcare as a significant customer, we have long known Dr. Renschler as the architect of the corporate culture and quality assurance programs which singularly differentiate that company," stated Foster. "Further," said Foster, "Arnold's healthcare background, executive leadership skills and personal sensitivity are a perfect complement to NovaCare's current operations and strategic direction. His arrival enables me to direct significantly more time to the long- term strategic development of the company and our industry. To say we are thrilled to have Arnold join us is an understatement."

"After evaluating the industry and after discussions with John Foster and his team, it is apparent to me that NovaCare is a rapidly growing $100 million company with a strong clinical base upon which to build a major rehab business," stated Renschler. "At Manor Care we recognized NovaCare as the best contract provider of rehabilitative therapies, a market that remains underdeveloped." Renschler further stated, "As a whole, the rehabilitative therapy industry is one of the most attractive segments of healthcare today. The personal chemistry among John Foster, his team and myself also played a significant role in my decision."

Renschler, age 48, received his B.A. degreee from Walla Walla College in College Place, Wash., and his M.D. from Loma Linda University School of Medicine in Loma Linda, Calif.

NovaCare, Inc., is the nation's largest provider of contract rehabilitation therapy services to the healthcare industry and the only provider of these services on a national basis.

ATLANTA (JAN. 15) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today announced major enhancements to its popular Young at Heart senior citizens' coupon program, allowing more flexibility in travel and reservations.

Travel now will be allowed on any day of the week. Reservations may be made in advance up to 338 days, but no later than 14 days in advance. Also, Young at Heart passengers now may receive their boarding passes for

both the originating and return flights when they begin their travel. In addition, other new options will add even more flexibility.

"Our Young at Heart program promises to be more popular than ever as these new enhancements offer the most liberal senior citizens' rules in both planning and travel opportunities," said Whit Hawkins, Delta's senior vice president - marketing. "We are pleased to respond to requests by our senior citizens' coupon customers who have asked for more flexibility in making their travel plans."

The Young at Heart coupons are offered in books of four coupons at $420 and eight coupons at $704. Booklets must be purchased and ticket coupons validated at least 14 days in advance of travel. The coupons may be used on any flight, subject to availability of seats offered at this fare.

Passengers who are holding the coupon booklets previously offered by Delta may convert to the new coupon program without any additional charges. Delta introduced its Young at Heart senior citizens' coupon program of travel opportunities at deeply discounted fares in 1986. Passengers may take part if they are 62 years or older. In addition to the coupons, Delta offers special discount Young at Heart fares, offering senior citizens (62 years or older) and one companion of any age a 10 percent discount off most domestic fares, including many deeply discounted fares.

IRVING, TX (JAN. 15) PR NEWSWIRE - The Quaker Oats Company (NYSE: OAT) has become the first corporate underwriter for CountDown USA, a major national heath promotion event conducted by Voluntary Hospitals of America Inc. As an underwriter, Quaker will assist with funding and promotional support for the next CountDown USA, which will be held in September 1990.

More than 700,000 Americans participated in the first two CountDown USA events, and VHA hopes to expand the scope and reach of this year's CountDown USA. This is the first year that VHA has sought corporate support for this program, and VHA is seeking at least three additional sponsors.

VHA's CountDown USA has been the only nationwide screening for high blood pressure and high blood cholesterol and probably the largest health screening event in the country. On April 26, 1989, more than 300,000 people across the United States were screened, counseled and, if necessary referred to a physician and further testing and evaluation.

"Quaker is committed to helping consumers make healthier choices," says

Mack Haning, VHA's senior director for corporate communications. "Supporting VHA hospitals as they educate their communities through CountDown USA is a natural next step."

Each corporate sponsor will provide direct support to participating hospitals to help defray CountDown USA screening costs, as well as funding for the national promotion, Haning said.

In return, the companies will be acknowledged in CountDown USA promotional and collateral materials.

VHA is a national network of 660 locally owned, not-for-profit hospitals and their 175 affiliates. VHA developed CountDown USA as a community service to focus attention on the causes and prevention of heart disease and stroke; to identify individuals at risk; to use health information to stimulate changes in individual health behavior; and to generate data concerning blood pressure and cholesterol that may be useful as a barometer of the nation's health.

The medical and administrative protocol for CountDown USA was developed in association with the National Heart, Lung, and Blood Institute.

RICHARDSON, TX (JAN. 15) PR NEWSWIRE - Convex Computer Corporation (NYSE: CNX), in conjunction with Solution Systems Incorporated (SSI), announced today the availability of the Equity Timesharing plan. The plan offers a method to build equity toward the purchase of a Convex supercomputer while securing timesharing services that provide immediate solutions to a

company's high-performance computing requirements.

"SSI is excited to offer the Convex solution to its customers," said Neil Kleeman, president of SSI. "The concept of timesharing has been around for a long time, but we are one of the first companies to recognize its effectiveness in making supercomputer technology accessible and economical to users who for whatever reason choose not to make an outright purchase of a system."

Under the plan, a user would gain access to one of Convex's C Series family of parallel/vector/scalar supercomputers. SSI/Convex systems are available to users on either an interactive or batch basis from terminals, personal computers or in-house computers. (Most other supercomputers available to remote users are batch processors only.) Equity Timsharing also allows frequent users to set aside 20 percent of their computer service charges to be used later as credits toward the purchase of a Convex system.

"An investment in timesharing should offer more than just computer time to users," said Kleeman. "Through this new service, scientists and engineers can not only gain access to a true supercomputer and the service to support it, but also build equity toward the purchase of a system at the same time."

Together SSI and Convex provide the most widely accepted scientific and engineering applications to assist users in computational fluid dynamics, finite element codes, thermal analysis and other areas. SSI services include assistance in porting code to the Convex system and providing modems and any other additional communications hardware that the user may require.

Convex Computer Corporation, a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high-performance systems.

PHILADELPHIA (JAN. 15) PR NEWSWIRE - Rorer Group Inc. (NYSE: ROR) said today that it is currently engaged in negotiations with another company regarding a possible strategic transaction.

Rorer said the objective of the negotiations is to enable Rorer to become a larger, stronger worldwide pharmaceutical company which would continue as a NYSE publicly traded U.S. company led by current management with

current shareholders retaining approximately a 32 percent position in the company's equity.

The transaction being negotiated is modeled on the Dow/Marion Laboratories transaction and would involve the other company acquiring approximately 68 percent of Rorer's outstanding common shares and obtaining substantial representation on the Rorer Board.

The transaction is being negotiated along the lines that each currently outstanding Rorer common share will receive cash, a contingent value right issued by the other company and residual equity in Rorer having a blended value in the aggregate of approximately $73 per share.

The company said that there is no assurance the negotiations will result in any agreement or that any transaction will be consummated if an agreement can be reached.

Rorer stated further that the negotiations present a unique strategic opportunity for Rorer and in no way constitute a decision to consider a sale of the company.

MONTREAL (JAN. 15) PR NEWSWIRE - Reynolds Metals Company's (NYSE: RLM) Canadian unit today announced it will construct a C$41.8 million plant to manufacture redraw rod, from which electrical cable is produced, in Becancour (Quebec) Canada.

The 80,000-metric-ton-per-year plant will employ about 40 people, and is expected to begin production in the fourth quarter of 1991. Construction will start as early as this spring after the required permits have been obtained.

According to Phil Gagnon, plant manager, the Becancour facility will supply part of Reynolds rod requirements for its four North American wire and cable plants, one of which has operated in La Malbaie (Quebec) since 1964.

The state-of-the-art plant will be built on a 14.8-acre site adjacent to the Aluminerie de Becancour Inc. smelter, in which Reynolds is a part owner. It will use molten metal from this reduction plant to produce alloy redraw rod used to manufacture electrical cable.

The molten metal will be transported between both plants on a private road

within their boundaries. In addition to assuring a convenient supply of molten metal, the rod mill's location will provide easy access for transportation by road and rail.

Reynolds is a worldwide producer of aluminum, fabricated aluminum products consumer products and precious metals, with eight plants in Canada, in addition to its interest in Aluminerie de Becancour Inc.

These include a large aluminum smelter at Baie Comeau which will become one of the largest aluminum making facilities in the world when a current expansion project is complete in 1991. Besides La Malbaie cable plant, it has other fabricating facilities in Cap-de-la-Madeleine (sheet, plate, foil and packaging), Ste-Therese and Richmond Hill (extrusions), Anjou and Rexdale (packaging and consumer products) and in Weston (building products). It has 3,750 employees in Canada.

CHICAGO (JAN. 15) PR NEWSWIRE - As a major long-standing customer of DeSoto Inc. (NYSE: DSO), Sears, Roebuck and Co. (NYSE: S) said today it supports the decision of DeSoto's board of directors to sell their U.S. consumer paint business and will cooperate in facilitating the sale.

Sears looks forward to doing business with new ownership of DeSoto's U.S. consumer paint business, a spokesman said.

Sears would expect that the same attributes that enabled Sears and DeSoto together to build number one market share positions for Easy Living and Weatherbeater paints would be present in any prospective purchaser intending to be a long term strategic supplier to Sears, he said. These attributes would include experienced management in paint manufacturing, sufficient capital to support new product research and development and quality improvement, management and organization capabilities to provide necessary servicing for Sears paint business to better meet the needs of its customers, and manufacturing efficiencies sufficient to meet its cost needs in a competitive marketplace, he added.

FORT WORTH, TX (JAN. 15) PR NEWSWIRE - URCARCO, Inc. (NASDAQ: CARS)

announced today that it has entered into a new secured revolving credit facility with NCNB Texas National Bank.

According to Clifton H. Morris Jr., URCARCO chairman and CEO, the new loan agreement provides for revolving credit loans to URCARCO of up to $45 million or a defined borrowing base.

Borrowings under this facility will be used to fund acquisition of used cars for inventory, establishment or acquisition of additional used car retail sales locations and other general corporate purposes.

Based on a current calculation of the defined borrowing base, the credit facility will provide access to borrowings by URCARCO of approximately $41 million. The credit facility is collateralized by the company's retail sales contracts and inventory and is scheduled for repayment on Jan. 31, 1992. This new facility replaces an $18 million secured revolving credit facility that was scheduled to mature in October 1990.

URCARCO, Inc. operates a chain of 17 "we finance" used car retail lots in Fort Worth, Dallas, Houston and Austin, Texas, selling quality used passenger cars and light trucks and typically financing customer purchases. The company became America's first publicly traded used car company on Nov. 15, 1989, when its stock opened on the NASDAQ Market System.

CHELMSFORD, MA (JAN. 15) PR NEWSWIRE - MRS Technology, Inc., the first company to develop a production lithography system specifically designed for the manufacture of color active-matrix flat-panel displays, today announced the sale of its Model 4500 PanelPrinter to the University of Stuttgart in West Germany.

The University of Stuttgart will use the PanelPrinter(TM) to produce active-matrix liquid crystal displays (AMLCDs) in its new research facility, the Institut fur Bildschirmtechnik (Institute for Advanced Display Technology). The Institute plans to research various advanced active-matrix display applications and materials, including direct view systems, projectors and image sensors. The director of the Institute is Dr. Ernst Lueder.

"Technological advances in electronic instrumentation, computers and high definition television have created a strong demand for sophisticated flat-panel displays," said Griff Resor, president MRS Technology. "MRS

Technology's products are an integral part of flat-panel development and production efforts at facilities throughout the world. We believe the PanelPrinter will provide a strategic advantage to researchers at the University of Stuttgart's new advanced display institute."

Demand for the Model 4500 PanelPrinter has risen sharply, particularly in the Far East and Europe. Recently, MRS Technology announced expansion plans for its production facility that will enable the company to meet increased worldwide demand. In addition to sales to display manufacturers, MRS Technology has sold a Model 4500 PanelPrinter to the David Sarnoff Research Center, a leading U.S. researcher in display technology.

The Model 4500 PanelPrinter is the first production lithography system specifically designed for the high volume manufacture of color, active-matrix liquid crystal displays. It is the only lithography system that meets the four essential requirements for the manufacture of AMLCDs: the ability to pattern large areas of substrate; high throughput; high resolution and high degree of control to maintain tight tolerances. These factors, as well as the PanelPrinter's built-in metrology software, are responsible for the University's purchase decision.

The University of Stuttgart's Institute for Advanced Display Technology is sponsored by the West German government. The Institute will occupy a new class 10 clean facility, now under construction.

MRS Technology was founded in 1986 by the developers of the first commercially successful wafer stepper production system for integrated circuits.

#90015p0082 01/15/1990 ~PR Newswire

MIAMI (JAN. 15) PR NEWSWIRE - Attorneys representing two families of the "Country Walk Case" has served ABC with a formal written objection to tonight's airing of "Unspeakable Acts." They have requested that it be postponed until a comprehensive forum can convene to discuss the harm sure to arise upon their clients.

"Unspeakable Acts" is a based-on-fact docudrama of a Country Walk child care facility that became one of the worst mass child abuse cases in the history of the United States. It resulted in the conviction and sentencing of Frank Fuster to six life terms plus 165 years, and of his wife Iliana, to 10 years -- and a new Florida law protecting the rights of children testifying in such criminal cases.

The state had the assistance of Miami psychologists Joseph and Laurie Braga, who helped the attorneys build their case agains the Fusters.

What is being disputed by some Country Walk parents are the ethics of ABC and the film's producers, the Landsburg Company, in making this movie while their children still suffer the after-effects of the trauma.

Based on the book "Unspeakable Acts," written by Jan Hollingsworth, ABC purchased the rights for the movie. Last summer, ABC held a press conference and vice president Wendy Rich, then an ABC movies-for-TV executive, suggests in certain terms that the film is being produced with the blessing of the families. Since then, Rich has apologized and admitted it was her misunderstanding.

Barbara Leininger, one of the parents said, "we were victimized by Hollingsworth and now by ABC. No one seems to care about us and our children. Somebody needs to stop these people."

Keith Haymes, the attorney representing the Leiningers, said, "it is their unequivocal statement for the record that no monies of any kind were received, nor have they assented in any respect to any public dissemination of their private details."

Joe Braga said, "these children will remember this for the rest of their lives."

Haymes, who will continue to fight the airing said, "when does a piece cease to have bon fide news value and become nothing more than a revenue generating adventure in sensationalism?"

#90015p0088 01/15/1990 ~PR Newswire

DETROIT (JAN. 15) PR NEWSWIRE - NBD Bancorp, Inc. (NYSE: NBD) today reported record Net Income for the year ended Dec. 31, 1989, of $258,808,000, or $3.59 per share ($3.46 fully diluted), an increase of 14 percent from the $227,156,000, or $3.21 per share ($3.06 fully diluted), earned in 1988.

Net Income for the quarter ended Dec. 31, 1989, of $66,464,000, or $.92 per share ($.89 fully diluted), was 8 percent higher than the $61,518,000, or $.87 per share ($.82 fully diluted), earned in the fourth quarter of 1988.

Per-share amounts have been restated to reflect the 3-for-2 stock split distributed on June 30, 1989, to shareholders of record June 2, 1989.

In commenting on 1989 results, Chairman and President Charles T. Fisher III stated earning assets averaged $21.9 billion as compared with $20.8 billion in 1988 and interest margin climbed to 4.15 percent as compared with 4.00 percent in 1988. The combined effect of asset growth and higher interest margin produced a 9-percent increase in Net Interest Income. In the fourth quarter of 1989, earning assets averaged $22.9 billion as compared with $21.4 billion in the fourth quarter of 1988, however, interest margin fell to 4.05 percent from 4.13 percent in the fourth quarter of 1988. The net result of higher earning assets and lower interest margin was a 5-percent increase in Net Interest Income.

Non-Interest Income, excluding Investment Securities Gains or Losses, increased 6 percent year-to-year and in the fourth quarter was up 5 percent as compared with the fourth quarter of 1988. Non-Interest Expenses increased 5 percent for the full year and 1 percent quarter-to-quarter.

The Provision for Possible Credit Losses in 1989 was $55.1 million as compared with $46.0 million in 1988. The fourth-quarter provision was $15.0 million in 1989 and $13.2 million in 1988.

Net charge-offs in 1989 were $57.2 million, or 0.38 percent of average loans and leases, as compared with $54.8 million, or 0.39 percent, in 1988. Net charge-offs in the fourth quarter of 1989 were $12.9 million, or 0.34 percent (annualized), as compared with $29.8 million, or 0.81 percent in the fourth quarter of 1988. Charge-offs in the fourth quarter of 1988 included $16.3 million from write down to market value of selected

less developed country loans. The Allowance for Possible Credit Losses at Dec. 31, 1989, was $235.8 million, or 1.54 percent of Loans and Leases as compared with $238.7 million, or 1.63 percent at Dec. 31, 1988. The Allowance at year end 1989 was equivalent to 193 percent of nonperforming loans and leases as compared with 317 percent at Dec. 31, 1988.

Nonperforming loans and leases at Dec. 31, 1989, were $122.0 million or 0.79 percent of total Loans and Leases. The comparable amounts at Dec. 31 1988, were $75.3 million and 0.51 percent.

NBD Bancorp, Inc. total assets at Dec. 31, 1989, were $25.8 billion as compared with $24.2 billion at Dec. 31, 1988. Loans and Leases were $15.4 billion as compared with $14.7 billion one year earlier. Deposits totaled $19.8 billion, an increase of $311 million during the year. Total Shareholders' Equity at Dec. 31, 1989, was $1.7 billion, an increase of $170 million from one year earlier.

Year-to-year changes include the acquisition on Aug. 31, 1988, of the $401 million-asset Charter Bank Group of Northfield, Ill.

#90015p0090 01/15/1990 ~PR Newswire

DES PLAINES, IL (JAN. 15) PR NEWSWIRE - DeSoto Inc. (NYSE: DSO) announced today that its board of directors had authorized management, with the assistance of Goldman, Sachs & Co., to solicit offers for the company's United States consumer paint business.

Richard R. Missar, chairman of the board, president and chief executive officer, stated that, "It is unfortunate that competitive circumstances have dictated the sale of the U.S. consumer paint business. However, given competitive pricing conditions and current levels of paint demand, the company does not believe that it can achieve its earnings objectives in this business while maintaining quality products at competitive prices."

The U.S. consumer paint business was marginally profitable on an operating income basis in 1988 but incurred operating losses in 1989.

The company believes the prospects for its remaining businesses are bright. Missar noted that, "The sale of the U.S. consumer paint business will permit the company to focus on its profitable detergent, surfactant and industrial coatings businesses."

The decision to sell the business followed extended discussions with Sears Roebuck and Co.; Sears is DeSoto's largest customer for consumer paint.

As a result of the discussions, it became evident to DeSoto that Sears' needs would be best served by purchasing from a supplier, unlike DeSoto, which has the capability of providing Sears with competitive prices and comprehensive marketing support over the long term. The decision also followed an 8 percent reduction, effective Jan. 1, 1990, in DeSoto's paint prices to Sears. Under the company's supply contract with Sears, DeSoto is required to match the lowest comparable bid to Sears for paint products.

DeSoto also announced that Sears has agreed to cooperate with DeSoto in the sale of the U.S. consumer paint business to a purchaser acceptable as a long-term strategic supplier to Sears.

The company intends to seek a purchaser for the U.S. consumer paint business who will retain DeSoto's consumer paint employees and provide them with increased opportunities for growth.

The assets to be offered include the company's facilities in Orlando, Fla.; Greensboro, N.C.; Columbus, Ohio, and Chicago Heights, Ill. Revenues from the U.S. consumer paint business are estimated to be approximately $175,000,000 for 1989 or approximately 43 percent of the estimated total revenue of the company for 1989.

The company is reviewing with Goldman Sachs the use of proceeds from the sale of the U.S. consumer paint business.

The company's board of directors also affirmed its rejection of the $50 per share offered by Sutton Holding Corp. as inadequate and not in the best interests of the company and its stockholders. In reaching its conclusion, the board considered the advice of Goldman Sachs that the $50 per share offer continues to be inadequate.

CONTACT: William Lamey Jr., vice president-finance of DeSoto, 708-391-9020, or Dean Dranias of the The Financial Relations Board, Chicago, 312-266-7800, or The Financial Relations Board, New York, 212-661-8030, for DeSoto

MEDINA, OH (JAN. 15) PR NEWSWIRE - RPM, Inc. (NASDAQ: RPOW) today announced that for the second quarter and six months of its 1990 fiscal year, which ended November 30, 1989, RPM attained all- time record levels of sales, earnings and earnings per share.

For the six-month period, sales increased 10 percent to $217,537,880 from record sales of $197,293,254 in the same period a year ago. Earnings increased 11 percent to $18,429,416, as opposed to the record $16,566,593 in last year's six-month period. Earnings per share gained 11 percent to a

record $.82, over $.74 earned last year.

RPM reported for the three-month period, sales gained 10 percent to a record $110,034,511 over the record $100,053,805 in the same period a year ago. Earnings increased 12 percent to $8,820,732, as opposed to $7,894,568 earned in last year's record second quarter. Earnings per share totaled a record $.39, an 11 percent gain over $.35 earned last year.

RPM commented that the Company remained on target for the six- month and second quarter period, and that most operating units performed at record levels.

As previously announced on January 5, 1990, RPM completed the acquisition of Kop-Coat, Inc., Pittsburgh, PA. RPM indicated that there would be little change in their 1990 fiscal year results from the Kop-Coat acquisition.

RPM also announced that on January 5, 1990, RPM Board of Directors declared the regular quarterly dividend of $.17 to be paid on January 31, 1990 to shareholders of record January 15, 1990. This quarterly dividend represents a 10 percent increase over the dividend rate of $.155 per quarter paid at this same time last year.

Based on the strong gains of the second quarter and six months, the Company expects record levels of sales, earnings and earnings per share for the fiscal year ending May 31, 1990, which will be RPM's 43rd consecutive record year in sales, earnings and earnings per share.

RPM, Inc. is a manufacturer of products serving the industrial marketplace with waterproofing and corrosion-control products, and also the do-it-yourself/homeowner and hobby and craft markets. RPM markets to approximately 75 countries annually and operates 36 plants in the United States, Canada and Europe. RPM shares are traded on the NASDAQ National Market System under the symbol RPOW. The fiscal year ended May 31, 1989, was RPM's 42nd consecutive record year of sales, earnings and earnings per share, with sales of $376,116,999, earnings of $24,243,325 and earnings per share of $1.08.

#90015p0095 01/15/1990 ~PR Newswire

CHICAGO (JAN. 15) PR NEWSWIRE - First Chicago Corp. (NYSE: FNB) today reported a 4 percent increase in fourth quarter operating earnings, and declared on Friday an 11 percent increase in the common stock dividend.

"We developed a strategy, set financial goals, and then by sticking to the

plan and working hard, we achieved our objectives -- despite a tough year for banking," said Chairman Barry F. Sullivan.

On an operating basis, which excludes tax benefits related to 1987's net operating loss, fourth quarter earnings were $115.1 million, or $1.66 per share ($1.61 fully diluted). In the year-ago quarter, operating earnings were $110.4 million, or $1.64 per share ($1.60 fully diluted). Common shares outstanding on Dec. 31, 1989, were 65.3 million, up from 62.3 million a year earlier.

Excluding tax benefits and adjusting for the gain on the sale of the business of First Chicago Investment Advisors (FCIA) and the third quarter special reserve items, full-year operating results were up 8 percent to $451.1 million, or $6.56 per share ($6.36 fully diluted). Operating earnings for 1988 were $417.3 million, or $6.57 per share ($6.37 fully diluted).

Operating earnings for the corporation's business lines -- the Global Corporate Bank (GCB) and the Superregional Bank -- were $61.2 million and $53.9 million, respectively, for the fourth quarter. Adjusted operating earnings for 1989 were $265.7 million for the GCB and $185.4 million for the Superregional Bank.

Return on target common equity in the fourth quarter was 14 percent for the GCB and 20 percent for the Superregional. Full-year adjusted returns on common equity were 15 percent and 19 percent, respectively.

"We significantly strengthened our reserves for troubled-country debt exposure to among the strongest in the industry and, at the same time, reduced that exposure in 1989 some $800 million -- $350 million in the fourth quarter alone," Sullivan said. TCD exposure is now $1.3 billion, down from $3.1 billion two years ago.

"Financial results for the fourth quarter exceeded our return on equity goal of 16 percent, and our capital ratios are stronger today than they were a year ago,"Sullivan noted. "Also, the board of directors demonstrated its confidence in First Chicago's future by increasing the quarterly common stock dividend to 50 cents per share from 45 cents."

Fourth quarter net income was $122.9 million, compared with $137.3 million a year ago, which included $19.1 million of incremental tax benefits related to the 1987 net operating loss. Net income per share was $1.77 for the quarter and $2.07 in the year-ago quarter. Full-year net income for the corporation was $358.7 million, or $5.10 per share, vs. $513.1 million, or $8.20 per share for 1988.

The corporation's return on assets in the fourth quarter was 0.94 percent and return on common equity was 20.6 percent. For the full year, return

on assets was 0.74 percent and return on common equity was 15.5 percent.

#90015p0097 01/15/1990 ~PR Newswire

PHILADELPHIA (JAN. 15) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) (Conrail) has filed with the Interstate Commerce Commission (ICC) the first electronic mileage tariff that shippers can access from their remote computer terminals.

Conrail also has filed the tariff in the traditional paper format. Shippers who subscribe to the paper tariff and have a personal computer with a modem will be offered free access to the electronic tariff, which also is accessible through a terminal and printer installed by Conrail in the public file room at ICC headquarters in Washington, D.C.

The tariff, ICC CR 9516-F, was issued today to be effective February 14 and provides the official distances between freight stations located on Conrail. It is used in conjunction with other tariffs to determine transportation prices for non-ferrous recyclables and some grain shipments and also to help determine compensation for some private railcar owners.

The electronic version of the tariff eliminates the necessity to research up to four separate references in the 283-page paper version, and then add up the numbers to get the mileage. Instead, the user of the electronic tariff enters the origin and destination freight stations; the computer then determines and reports the mileage.

"While the traditional paper tariff will be with us for a while, the electronic tariff offers significant benefits both to the railroad and its customers," said James A. Hagen, Conrail's chairman, president and chief executive officer. "It is easier and quicker to use, and automatically performs the necessary arithmetic, allowing shippers to analyze their transportation options quickly and more accurately."

Conrail filed the electronic tariff following a ruling by the ICC permitting such filings. During the past year, officials from Conrail and the ICC worked to develop an electronic mileage tariff that was acceptable to the commission. Conrail had filed the first demonstration electronic mileage tariff at the ICC in September 1988.

Shippers seeking information on the new tariff should contact A.J. McGee of Conrail at 215-977-1413.

CONTACT: Robert L. Libkind or Patricia Linskey, 215-977-4594, both of Conrail

LANSDALE, PA. (JAN. 15) PR NEWSWIRE - AEL Industries Inc. (NASDAQ-NMS: AELNA) announced today that its AEL Defense Corp. subsidiary has been awarded an option on the Ground Jammer contract by the U.S. Air Force Munitions Systems Division, Eglin Air Force Base, Fla.

This option award requires AEL to develop a third AN/MLQ-T4(V) Ground Jammer system, bringing the total value of the contract to $11.6 million. To date, AEL has developed one prototype and delivered four systems and is currently under contract to produce two additional systems.

The Ground Jammer system is an AEL-developed program designed to provide mobile system jamming capability. The design and development of the Ground Jammer system provides a training environment for U.S. Air Force personnel on simulated hostile radar jamming threats.

AEL is a leading supplier of electronic defense systems and subsystems. The company designs and manufactures sophisticated countermeasures, simulation and radar warning receiver systems; installs and integrates electronic and avionic equipment in military aircraft, and provides state-of-the-art antenna, microwave and integrated circuit components.

The Class A common stock of AEL Industries Inc. is traded in the Over-the-Counter market on the NASDAQ National Market System.

WASHINGTON (JAN. 15) PR NEWSWIRE - USA Today has appointed the advertising agency of Babbit & Reiman to handle its advertising account, announced Cathleen Black, publisher.

"It's clear that Joel Babbit and Joey Reiman understand USA Today, as both an editorial product and as an advertising vehicle, and embody the typical educated, youthful reader," Black said.

"In just 3-1/2 years, Babbit & Reiman has already been recognized nationally as a creative leader," she said. "We were first attracted to them when they worked on a project basis for our classified advertising section. In November, when they announced that they were about to open a New York office, we invited them to pitch the account. Since then they have absolutely inundated themselves in our business, and we were incredibly impressed with their creativity, energy and intelligence.

"We expect the advertising from Babbit & Reiman to help break new records for USA Today as we enter our eighth year and an exciting new decade," Black continued.

Babbit & Reiman replaces Lois Pitts Gershon Pon/GGK, which handled the account since February 1984.

With 6.3 million readers daily, USA Today is available throughout the United States, as well as in Guam, the Virgin Islands and Canada. USA Today's International Edition is available in more than 80 countries.

Gannett Co., Inc. (NYSE: GCI) is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, 35 non-daily newspapers and USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services and the largest outdoor advertising firm in North America.

WHITE PLAINS, N.Y. (JAN. 15) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) and US Cable Corporation today filed an application through Comment Cablevision for four cable television franchises in the United Kingdom's Manchester area.

Covering an estimated 790,000 homes, the franchise areas would include Manchester City, Trafford and Salford; Bury and Rochdale; Oldham and Tameside; and Stockport.

The Manchester applications mark NYNEX's first venture into the United Kingdom cable TV market.

NYNEX Corporation is the fourth largest telecommunications company in the United States, with 1988 revenues of $12.7 billion. NYNEX provides information products and services across the U.S. and internationally through its offices in 13 countries. Through New England Telephone and New York Telephone, NYNEX provides high quality telecommunications services to more than 13 million customers in the northeastern United States, utilizing 300,000 miles of fiber optic cable.

Based in Montvale, N.J., US Cable is one of the fastest growing privately owned cable companies in the United States, with 175,000 subscribers in over 100 communities nationwide. In December 1989, under its Comment Cable banner, US Cable won the 340,000 home Tyneside franchise, the third largest to be awarded in the U.K. to date.

NEW YORK (JAN. 15) PR NEWSWIRE - Bryant M. Yunker will join PaineWebber as managing director in charge of the firm's New York Stock Exchange specialist operations, it was announced today by Paul B. Guenther, president of PaineWebber Incorporated (NYSE: PWJ).

Yunker will report to James P. Mac Gilvray, managing director responsible

for PaineWebber's floor operations, specialist operations and correspondent services.

Yunker, who has 26 years' experience as a specialist, comes to PaineWebber from Marcus Schloss & Co., where he was executive vice president and senior managing partner of specialist operations.

Mac Gilvray said, "Bryant Yunker is one of the most talented and well-respected specialists on Wall Street. We're delighted to have him directing our specialist unit at the NY Stock Exchange, as we continue to build our operations in this important area."

In September 1989, PaineWebber acquired deCordova, Cooper, a New York Stock Exchange market maker that specializes in 34 listed securities. Renamed PaineWebber Specialist Incorporated, the unit makes a market in such well-known stocks as IBM, Tandy, Zenith, British Petroleum, Transco and Woolworth.

PaineWebber Incorporated is one of the nation's leading full-service securities firms, serving the investment and capital needs of a worldwide client base.

HOPEWELL JUNCTION, NY (JAN. 15) PR NEWSWIRE - Robert-Mark Inc. (AMEX: RMK) announced today that the company reported a net loss for the three months ended Nov. 30, 1989, of $486,000, or 11 cents loss per share, based upon 4,588,000 average common and common equivalent shares outstanding, as compared to a $455,000 loss, or 11 cents loss per share, based upon 4,338,000 average common and common equivalent shares outstanding in the

comparable quarter of 1988.

The net loss for the quarter is partly attributable to nonrecurring expenses associated with the company's assumption of the ongoing operations of RAMS Marketing Inc., as well as from the general slowdown in real estate sales in the company's market area.

The net loss was $1,572,000, or 35 cents loss per share, for the nine months ended Nov. 30, 1989, versus a net loss of $820,000, or 19 cents loss per share for the nine months ended Nov. 30, 1989.

#90015p0122 01/15/1990 ~PR Newswire

BOHEMIA, NY (JAN. 15) PR NEWSWIRE -- Symbol Technologies Inc. (NYSE: SBL) the world leader in barcode-based data systems, today introduced the LRT model 3800, the first hand-held product to integrate advanced radio frequency (RF) data communication with proven scanning and portable data capabilities in a single compact unit.

The lightweight LRT has been ergonomically designed to meet the needs of a variety of scan-intensive portable data applications in retail, distribution and manufacturing, where single-handed, full-function operation is essential. The system allows the user to input data by scanning a barcode; enter data using the top- mounted keypad; transmit the data in real time to a POS terminal, PC or mainframe computer; and display the results.

In developing the LRT model 3800, Symbol Technologies worked closely with several of its key customers, including Wal-Mart Stores and Haggar Apparel to refine product specifications and test the LRT. In addition, the company is working in tandem with software vendor Post Software International of Wake Forest, N.C. to develop applications software and host interfaces to the LRT.

In addition to the LRT, Symbol today introduced the LDT model 3805, which incorporates advanced scanning and portable terminal features in a compact and lightweight form identical to the LRT model 3800. The LDT, with up to one megabyte of RAM, provides a cost-effective, batch-oriented, data-collection solution for retail, distribution and manufacturing users who do not require real-time data collection.

The 16-bit, DOS-based LRT is the first Symbol product to incorporate the Spectrum One(tm) network, Symbol's high- performance wireless data communication network that can support hundreds of terminals. Based on spread spectrum radio frequency technology, Spectrum One networks provide reliable subsecond data communication without the cost and complexity of individual FCC site licensing.

Symbol Technologies also announced today the PS 1000 portable barcode printing system, the smallest barcode printer available. The lightweight printer, carried over the shoulder, is compatible with all Symbol Technologies portable data terminals for use in retail and industrial markets that require on-the-spot scanning, printing and labeling capabilities. The PS 1000 will be available Feb. 1, 1990, with a suggested retail price of $1,395.

Symbol Technologies, based in Bohemia, N.Y., is the only company to develop, manufacture and market hand-held laser scanners, portable data terminals and radio frequency devices.

HOLLYWOOD, FL (JAN. 15) PR NEWSWIRE - General Rent-A-Car added four new offices in January to reach 94 rental locations nationwide.

The company has expanded by more than 300 percent since it was purchased in May 1989.

General opened on Jan. 1 in Fresno and Sacramento, Calif., and in the airport terminal in Tucson, Ariz. On Jan. 15, a new facility opened in Margate, Fla. All General rental locations are corporately owned and

operated to ensure quality service and products.

Other recent openings include offices in Scottsdale, Ariz.; Dallas; Dillon Colo.; and Kissimmee, Lake Buena Vista, and Orlando, Fla. The Dallas and Orlando facilities strengthen General's already established operations in those cities.

Since May 1989, President and CEO F. Paul Silicato has more than tripled the company's original 28 rental locations. In addition, Silicato eliminated mandatory fuel charges and airport access fees, and extended the value of General rentals with unlimited free mileage and unrestricted interstate travel.

General Rent-A-Car's corporate headquarters are in Hollywood, Fla.

HAYWARD, CA (JAN. 15) PR NEWSWIRE - Bio-Response, Inc. announced today that is has entered into a definitive agreement to sell substantially all of its assets to Baxter Healthcare Corporation for a cash purchase price of approximately nine million dollars. Baxter uses the company's monoclonal antibodies in the production of its Hemofil(R) M clotting protein for the treatment of hemophilia.

It is expected that substantially all of the sale proceeds will be distributed to the creditors of Bio-Response, and that Bio-Response will cease operations following completion of the sale, which is expected to occur in the first quarter of 1990. Consummation of the agreement is conditioned upon, among other things, approval of the U.S. Bankruptcy Court. As previously announced, Bio-Response voluntarily filed for bankruptcy under Chapter 11 of the U.S. Bankruptcy Code in September 1989.

Bio-Response, Inc. is a bio-processing company engaged in the development and commercial application of technologies related to the large-scale manufacture of products derived from mammalian cells. The company provides monoclonal antibodies to Baxter and other firms on a contract-manufacturing basis.

Baxter Healthcare Corporation is the principal U.S. operating subsidiary of Baxter International, Inc. (NYSE: BAX). Baxter Healthcare, headquartered in Deerfield, Ill., is the leading international manufacturer and marketer of healthcare products, systems and services. It offers 120,000 products to healthcare providers in more than 100 countries.

#90015p0130 01/15/1990 ~PR Newswire

SAN JOSE, CA (JAN. 15) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations, announced the Radius TPD/21(TM), a new Macintosh and IBM PC/AT compatible 21 inch monochrome/gray scale display system.

The TPD/21's Macintosh resolution is 1152 x 882 pixels at 74 dots per inch; two full-sized pages. The maximum TPD/21 PC/AT resolution is 1280 x 960. The high refresh rates, 71 Hz Macintosh and 65 Hz PC/AT, assure a flicker-free image. The polished glass screen maximizes focus and brightness. The flat screen technology provides superior geometry.

In keeping with the Radius open architecture, modular design philosophy, the TPD/21 may be configured with a number of other Radius products; including monochrome and gray scale display interfaces, general purpose CPU accelerators and calibration devices. Each different combination of products creates a graphics display system specific to a particular application.

RadiusWare, the proprietary Radius System Software included with all Radius display systems, includes Tear-off Menus, Enlarged Menu Font, Screen Saver and Screen Capture. RadiusWare PC includes high resolution drivers for over one dozen popular PC/AT compatible applications, plus support for thousands of VGA compatible applications.

The TPD/21 has optimized ergonomic benefits by including an integral tilt/swivel base and front controls. A Display Resolution Switch sets either the Macintosh or PC/AT graphics mode. The TPD/21 display carries a full one year warranty.

The Radius Two Page Display/21 carries a suggested list of $1,795. It is compatible with all Radius Macintosh SE, SE/30, II and IBM PC/AT compatible Two Page Display Interfaces. The Radius Macintosh TPD Interfaces list for $595, a reduction of $100. The Radius TPD/PC Interface(TM) lists for $795. The TPD/21 is also compatible with the Radius GS/C Interface for the Macintosh II family. The GS/C Interface lists for $1,895.

The Radius Two Page Display/21 will be available Jan. 15, through all worldwide Radius Authorized Resellers and Radius Authorized VARS.

Additional Radius products include the Radius Color Display(TM) System, Radius DirectColor(TM) Series, Radius QuickCAD(TM) Graphics Engine, Radius PrecisionColor Calibrator, and Radius Gray Scale Display(TM) System for all Macintosh II computers. The Radius Full Page Display(TM) System supports the full line of Macintosh Plus, SE, SE/30 and II computers. Radius Accelerator 25(TM) supports the Macintosh SE. Radius Acclerator 16(TM) supports the Macintosh Plus and SE.

Radius Inc. is the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations. Radius products are available through a worldwide network of Radius Authorized Resellers.

SPOKANE, WA (JAN. 15) PR NEWSWIRE - Pegasus Gold Inc. (AMEX, Toronto:

PGU) today announced changes to the company's board of directors. James S. Redpath was appointed a director of the company. Redpath, of North Bay, Ontario, is founder and chairman of the J.S. Redpath Group of Companies, a global mining engineering and contracting organization, and president of RME Capital Corp., an investment company. He also serves as general manager of The North Bay Arts Center. An honors graduate in mining engineering at McGill University, Redpath has extensive experience in the mining industry and is the author of numerous technical papers on various aspects of mining.

Redpath was appointed to fill a vacancy created by the resignation from the board of James H. Foreman, a director and former chairman of the company. Foreman also served as president and chief executive officer of Pegasus from February 1987 through January 1989. Foreman's resignation is in keeping with his previously expressed desire to reduce his involvement with the affairs of the company.

Pegasus also announced that Stanton B. Bennett, vice president, secretary and chief legal counsel, retired Dec. 15, 1989. Bennett, 69, held those positions with Pegasus since September 1985. He also served as a director of Pegasus since 1985 and resigned from the board upon his retirement.

Lyle F. Beaudoin, Pegasus vice president of Business Development, will assume the responsibilities of general counsel and corporate secretary of the company. Beaudoin, 41, has been associated with Pegasus in that capacity since 1987. He will continue to report to John Willson and will retain his responsibilities for the company's Exploration and Business Development activities.

Beaudoin has an extensive legal and business background. A graduate cum laude of the Wayne State University Law School, he holds an undergraduate degree in business and political science from Western Michigan University. Before joining Pegasus, he held the office of corporate secretary and vice president for Cominco Ltd.

No action has as yet been taken to fill the vacancy on the Pegasus board created by Bennett's retirement.

Pegasus Gold Inc. is a major North American gold producer that currently produces over 300,000 ounces of gold from six mines in the western United States. The company also produces significant amounts of silver, zinc and lead. Pegasus Gold common shares are traded on the American Stock Exchange and The Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Vancouver Stock Exchange.

HORSHAM, PA (JAN. 15) PR NEWSWIRE - Robec, Inc. (NASDAQ: ROBC) announces the execution of an agreement to purchase certain assets and assume certain liabilities of EMS - Electronic Marketing Specialists, a subsidiary of EIL Instruments, Inc. EMS is a microcomputer distributor in Tustin, Calif. with offices in Seattle, San Francisco, Los Angeles, San Diego, Salt Lake City, Denver and Phoenix, and had sales of approximately $22 million for its most recent year ended Oct. 31, 1989. The consummation of the acquisition, which is expected to occur by early February, is subject to certain conditions.

Robec is a national, full service microcomputer distributor. Robec's strength is in providing value added services with product leadership as well as technical support. Actively involved in sales support and training for dealers throughout the country, Robec sponsors educational seminars emphasizing system networks, multiuser systems solutions and communications.

"The acquisition will extend Robec's reach into the west coast region. The joining of an experienced team of EMS personnel, and Robec's product line will blend the resources needed for EMS to continue its growth in the west," stated Robert H. Beckett, president and chief executive officer for Robec. "The combination of EMS and Robec will enhance Robec's national presence. These additional locations will extend Robec's distribution strategy of providing customers with local stock, local systems integration, local technical support, and lol? service across the USA."

With this acquisition, Robec Distributors will have 20 sales and stocking locations to serve the national microcomputer market.

MINNEAPOLIS (JAN. 15) PR NEWSWIRE - Cray Research Inc. (NYSE: CYR) announced today that the Taiwan National University has ordered a CRAY X-MP/14se supercomputer. This will be the first Cray Research system installed in the Republic of China (Taiwan).

Marcelo A. Gumucio, president and chief operating officer of Cray Research said, ''This order is especially exciting for us because it is our first from the Republic of China, and it signals continued success for our marketing efforts in the industrialized countries of Asia. Cray Research now has installations in more than 20 countries around the world, and 16 customers in the Pacific Rim and Japan.''

The purchased system was installed at the university's computer center in Taipei, Republic of China, during the first quarter of 1990. The university will use the system for computational support of scientific research projects there and at other universities and research institutes in the Republic of China, as well as to educate and train the country's academic community in the use of supercomputer technology.

This is the second system order obtained by Cray Asia/Pacific Inc., a Hong Kong-based subsidiary established in 1987 to market supercomputers in the countries of the Pacific Rim. In 1988, a CRAY-2 supercomputer was installed at the Korea Advanced Institute for Science and Technology in Seoul, South Korea.

Today, Cray Research has more than 250 systems installed at about 180 customer sites around the world, including 35 systems at 29 different universities.

Cray Research Inc. designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

SECAUCUS, NJ (JAN. 15) PR NEWSWIRE - Metromedia/ITT Long Distance today announced that it has signed a contract valued in excess of $33 million to purchase Northern Telecom RD-6C digital microwave radios. The equipment will be used to convert the existing analog microwave equipment on the Metromedia/ITT backbone to digital capabilities. The 1,800-mile Metromedia/ITT backbone extends from New York to Dallas with 126 microwave radio sites.

"The purchase and installation of Northern Telecom's digital microwave radio equipment is the first major step toward our goal of a completely digital network by the end of 1990," said Howard Finkelstein, president of Metromedia/ITT Long Distance. "We selected the Northern Telecom equipment because it provides excellent performance at a competitive price -- benefits that we will be able to pass along to our customers."

"Metromedia/ITT's decision to go with our digital radio clearly demonstrates a continuing commitment to service quality for their customers, as well as their recognition of digital as the technology to meet that objective," said John Taylor, group vice president, transmission Northern Telecom.

Installation is scheduled to begin in February, starting with the backbone segment between New York and Washington, D.C. A second phase will upgrade the segment between Washington and Atlanta. Installation will conclude with the area between Atlanta and Dallas, and is scheduled for completion during fourth quarter 1990.

Other cities on the backbone include Allentown, Pa.; Baltimore; Baton Rouge, La.; Charlotte, N.C.; Etam, W.Va.; Greensboro, N.C.; Harrisburg, Pa.; Houston; Lancaster, Pa., Newark, N.J.; New Orleans; Norfolk, Va.; Philadelphia; Pittsburgh; Richmond, Va.; Spartanburg, S.C.; Wilkes Barre, Pa.; and Winston-Salem, N.C. The new digital system has been designed to exceed the performance of North American long haul standards.

Metromedia/ITT Long Distance is the fifth largest long distance company in the United States, providing domestic and international telecommunications services to businesses, non-profit organizations and residential customers nationwide. The company offers a variety of long distance products including equal access, WATS-type alternatives, dedicated access WATS, and private line services, travel cards, in-bound 800 service, operator service, worldwide conference calling and a global weather hotline.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and

services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

NEW YORK (JAN. 15) PR NEWSWIRE - Lord & Taylor today announced the appointment of Richard E. Gellman, Ellen Weinberg and Carol Tylko-Hudson as divisional merchandise managers (DMMs) in the Fifth Avenue, New York store.

Effective immediately, Gellman is DMM for coats and suits, reporting to Barry Cohen, senior vice president, general merchandise manager. He joined the Lord & Taylor executive development program in 1981, and after several merchandising assignments, was appointed buyer of robes and loungewear in 1985. Since July 1989, Gellman has been buyer of moderate, better and Liz Claiborne Petite dresses.

Weinberg is DMM for accessories, reporting to Rhonda Brown, senior vice president, general merchandise manager. She joined the Lord & Taylor executive development program in 1983, and after several merchandising appointments, was appointed buyer of better traditional shoes in 1986. Since 1987, Weinberg has been buyer of salon shoes.

Tylko-Hudson is DMM for country sportswear and American woman's sportswear reporting to Kathryn Bufano, senior vice president, general merchandise

manager. She joined Lord & Taylor in 1984 as assistant buyer in moderate sweaters, and has since been promoted to buyer, first for Clubhouse Collections and then for Ann Klein II, Bridge Separates and Donna Karan.

ST. PAUL, MN (JAN. 15) PR NEWSWIRE - TSI Incorporated (NASDAQ: TSII), Shoreview, Minn., today announced that earnings for the third quarter of fiscal 1990 ended Dec. 31, 1989, will be significantly under the $544,816 or 22 cents per share in the third quarter of fiscal 1989. However, based on the size of its current backlog, TSI said it anticipates a very strong fourth quarter, which should result in record sales and earnings for the full year.

The company will be releasing its final third-quarter results in about two weeks.

TSI said weaker than planned new order growth during the early part of the third quarter affected shipments for the quarter resulting in reduced earnings. New order activity increased substantially in December, causing TSI's quarter-ending backlog to grow to $10,760,000, up $2 million from the beginning of the third quarter. The majority of this order backlog will be shipped during the fourth quarter ended March 31.

Financial analysts are estimating TSI's total fiscal 1990 earnings at 90 to 95 cents per share, compared to the 75 cents per share posted in 1989. TSI's management currently believes these estimates are reasonable.

TSI is a leading designer and manufacturer of precision measurement systems for fluid flow and particle research, environmental monitoring and control, and industrial process control. The company's stock is traded on the national market system under NASDAQ symbol TSII.

LOS ANGELES (JAN. 15) PR NEWSWIRE - Fries Entertainment, Inc. (AMEX: FE), an independent producer and distributor of television programming, theatrical features and home video, today reported substantial gains in revenues and earnings for the second quarter and six months ended Nov. 30, 1989.

Second quarter net income rose to $1,452,000 or 30 cents per share on revenues of $21,326,000 from a net loss of $426,000 or 9 cents per share on revenues of $9,311,000 for the same period last year.

For the half year, net income was $81,000 or 1 cent per share on revenues of $30,651,000 versus a net loss of $808,000 or 17 cents per share on revenues of $18,285,000 for the initial six months of fiscal 1989.

"Higher revenues and earnings are the result of the delivery of three major television projects: 'Small Sacrifices,' the highly rated mini-series with Farrah Fawcett for ABC, that has gained Golden Globe nominations for the series and its star; 'Neon Empire,' the major three-hour film for Showtime; and 'Lady in a Corner,' the NBC movie for which Loretta Young has been nominated for a Golden Globe," Charles W. Fries, chairman, president and CEO, said. "Overall home video and foreign sales continue to grow while domestic syndication returns remain flat," he added.

Fries noted that results for the second half of the year will be affected by delays in the television production schedules of several programs planned for completion in that period but which may not be delivered until early in the next fiscal year.

CONTACT: William J. Kwasniewski, executive vice president and chief financial officer of Fries Entertainment, 213-466-2266; or Hal LeVay of Porter, LeVay & Rose, 212-564-4700, for Fries Entertainment

#90015p0155 01/15/1990 ~PR Newswire

ATLANTA (JAN. 15) PR NEWSWIRE - Southern Bell customers in Georgia may soon have access to a new service that will allow them to protect their privacy and only "let in" by phone those callers they want to talk to.

Southern Bell has asked the Georgia Public Service Commission for permission to offer Caller ID as part of the company's TouchStar(R) service.

With Caller ID service and a special piece of equipment, customers will be able to identify the telephone numbers of incoming calls from the immediate local calling area.

"We believe Caller ID has great potential to reduce obscene and harassing calls," said Carl Swearingen, Southern Bell's vice president for Georgia. "In addition, it allows customers to have greater control over their telephone service."

If the Caller ID tariff is approved, the service will cost $7.50 a month for residence customers and $10 a month for single-line business customers. Customers who subscribe to the service will also need to purchase a separate display unit.

"Privacy and security are growing public concerns and we think that Caller

ID service helps address those concerns," Swearingen said. "Caller ID increases privacy and security for the person receiving calls. The telephone was never intended to assure anonymity for callers. It just happened because of the limits of technology in the past."

Swearingen noted that Call Tracing has been one of the most popular features of TouchStar service.

If approved, Caller ID service will initially be offered in Athens and in a number of areas in metro Atlanta. There are also plans to offer Caller ID, as well as the other TouchStar service features, throughout Georgia in the next two years.

#90015p0157 01/15/1990 ~PR Newswire

MURRAY HILL, N.J. (JAN. 15) PR NEWSWIRE - Airco Gases, the U.S. subsidiary of The BOC Group, today announced it has started up a 70-ton-per-day onsite oxygen and nitrogen generator at Nucor Corporation's (NYSE: NUE) newest plant. The new project is being commissioned at Crawfordsville, Ind., the first mini-mill to be used for casting thin-slab steel.

Nucor's Crawfordsville mill is expected to produce one million tons of steel per year. The thin slab casting process allows Nucor to make slabs two inches thick rather than the conventional 8-10 inches. The ability to produce thin slabs gives Nucor an entry into the sizable flat-rolled steel market that is currently the preserve of the large integrated steel mills. Nucor expects to be able to roll its two-inch slabs into hot-band as thin as 0.1 inches.

Airco has a long history of supplying oxygen to steel mills throughout the United States and is also the supplier to Nucor's Jewett, Texas, plant as a result of the recent acquisition of Amerigas. In all, Airco supplies oxygen from onsite facilities to seven domestic steel plants.

Nucor's Crawfordsville plant has attracted worldwide interest because of its revolutionary casting technology, which is expected to sharply reduce the cost of flat rolling steel sheets. Plant commissioning started last summer and some analysts believe that by 1993 there will be at least five mills in the United States utilizing the thin-slab technology.

Airco is a broad-based producer of industrial gases, specialty gases and gas technology. The company's primary products include liquid and gaseous nitrogen, oxygen, argon and carbon dioxide, helium, hydrogen and a variety of rare gases. Airco's parent company, The BOC Group, operates in more than 50 countries and had sales of $4 billion last year.

MONTREAL (JAN. 15) PR NEWSWIRE - Dominion Textile Inc. announced today it has been granted an option to purchase 2,750,000 common shares, or approximately 68.8 percent of Textiles Dionne Inc., a leading Canadian manufacturer. The option price for each Textiles Dionne common share has been set at .3125 of a Dominion Textile Common share.

The option was granted by the major shareholders of Textiles Dionne and may be exercised by Dominion Textile only pursuant to a public offer for all the outstanding shares of Textiles Dionne. Dominion Textile has agreed to make such an offer, subject to certain conditions being satisfied and regulatory approvals being obtained, on or before Feb. 28, 1990.

If an offer is made, all holders of Textiles Dionne common shares will be given the choice of receiving either $4.75 in cash or .3125 of a Dominion Textile Common share for each Textiles Dionne common share. The major shareholders have already agreed to receive Dominion Textile Common shares in payment for their shares in such an offer. If all shareholders elect to receive Dominion Textile Common shares, such an offer would result in the issue of a maximum of approximately 1,250,000 Dominion Textile Common shares. The total cost of the transaction will be approximately $19 million.

The public offer, if made, will be conditional on, among other things, obtaining not less than 90 percent of all the outstanding common shares of Textiles Dionne.

Charles H. Hantho, president and chief executive officer of Dominion Textile, said the Corporation was pursuing the acquisition of Textiles Dionne to support its strong North American position in sales yarn.

With plants in Saint-Georges de Beauce, Montmagny and Drummondville, Quebec, and 350 employees, Textiles Dionne manufactures spun yarn from cotton and synthetic fibres which is sold to manufacturers of apparel, home furnishings and industrial products.

Dominion Textile, based in Montreal, is a leading international manufacturer and distributor of textiles and textile-related products with

more than 40 manufacturing facilities and a presence in some 50 countries throughout the world.

HILVERSUM, THE NETHERLANDS (JAN. 15) PR NEWSWIRE - AT&T Network Systems International BV (AT&T-NSI) has received an order from the Polish PTT for the supply of digital switching equipment, it was announced today.

The order marks AT&T's entry into the Polish telecommunications market and should help the company build a close relationship with the Polish PTT.

The order, which calls for the delivery of 5ESS(R) international gateway switch to the Polish PTT in Warsaw, is a significant strategic success for AT&T. Valued at about $7 million, the order was won against competition from other leading telecommunications vendors.

The technology AT&T-NSI is to supply to Poland is in compliance with the directives of international export regulations.

"It is well known that telecommunications is an essential ingredient for a viable, growing national economy. With AT&T's technology, the Polish PTT will improve their telecommunications network," said J.A. Heck, president of AT&T-NSI.

"We are extremely pleased with the Polish PTT as a new customer; we will strive to develop a long-term relationship. Clearly, the Middle and Eastern European countries have a great need for the kind of systems and technology we offer, and our strategy is aimed at meeting those needs," Heck said.

In Warsaw, AT&T-NSI is to supply and install a standard 5ESS digital switching system, comprising 17 switching modules, with a total capacity of 7,710 trunk lines. The 5ESS international gateway switch for the Polish PTT provides efficient access to international telephone networks and can initially handle up to 60,000 telephone calls per hour, more than double the existing capacity.

The 5ESS-PRX switch will be manufactured and delivered by APT Nederland, the national subsidiary company of AT&T-NSI in the Netherlands. APT Nederland is also responsible for software development, installation of the switch and the training of Polish PTT engineers.

The installation of the switch will begin in September, while the official cutover is scheduled for the first quarter of 1991.

AT&T Network Systems International, with headquarters in Hiversum, the Netherlands, is AT&T's European holding company for public telecommunications equipment. The Italian telecommunications holding company, STET (20 percent), and N.V. Philips (15 percent) are shareholders in AT&T-NSI.

AT&T-NSI provided PTT authorities with products and technology for total network solutions. The product range includes public switching and transmission equipment, operations and management systems and cable systems.

Since the company was formed in 1984, AT&T-NSI has broadened its European base. The company now has national organizations for development, manufacturing and marketing in seven European countries and employs more than 5,500 people.

TORONTO (JAN. 15) PR NEWSWIRE - Midway Airlines today inaugurated service to its first Canadian destination, Toronto's Lester B. Pearson International Airport, from Philadelphia International Airport. Midway now serves Toronto with three daily non-stop flights from its Philadelphia hub. Through Feb. 15, Midway will offer an introductory one-way coach

fare of $69.

"We believe the start up of this service today in Toronto marks the beginning of a mutually beneficial relationship between Midway, the citizens of Toronto and of the Northeast region," said John P. Tague, vice president of marketing and planning. "We intend to earn the loyalty of business and leisure travelers with our attentive service, low fares and innovative marketing programs."

Toronto travelers can connect at Philadelphia International Airport with Midway flights to seven Florida cities, or to the airline's Midway Airport hub in Chicago for service to Midwestern and Western destinations.

With the introduction today of service from Philadelphia to Toronto, Midway has 45 daily departures to 14 cities from that hub. Plans call for more than 60 daily departures by the end of first quarter 1990, and 120 daily departures by 1992.

Midway Airlines offers coast-to-coast service from its hubs at Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, U.S. Virgin Islands and the Bahamas.

GRAND RAPIDS, MI (JAN. 15) PR NEWSWIRE - Old Kent Financial Corporation (OTC: OKEN) reported record earnings of $85.4 million for 1989, an increase of 10.7 percent over the $77.1 million earned in 1988. Fully diluted net income per share was $2.89 for 1989 compared to $2.63 for 1988.

Net income for the fourth quarter was $22.0 million compared to $21.7 million for the same quarter last year. Fully diluted net income per share was $.74 for the fourth quarter of 1989 compared to $.73 for the same quarter of 1988.

John C. Canepa, chairman, president and C.E.O. of Old Kent, said, "We are obviously pleased to report another year of record earnings. We have had an increase in earnings every year since the holding company was formed in 1972." According to Canepa, the record earnings for 1989 were primarily attributable to an 8.5-percent increase in average earning assets.

Net interest margin was 4.23 percent for the fourth quarter compared to 4.13 percent for the same quarter last year. For 1989, the margin was 4.10 percent compared to 4.12 percent in 1988. Return on average assets was 1.07 percent in 1989 compared to 1.04 percent in 1988. Return on

average equity was 15.06 percent in 1989 compared to 15.10 percent in 1988. At Dec. 31, 1989, book value per share was $21.33, a 9.8-percent increase over the book value of $19.42 a year ago.

Old Kent Financial Corporation is a bank holding company headquartered in Grand Rapids, with 17 affiliate banks and 182 banking offices throughout Michigan, and four banks with 12 banking offices in Illinois. Old Kent reported total assets of $8.1 billion at Dec. 31, 1989.

HOUSTON (JAN. 15) PR NEWSWIRE - Oceaneering International, Inc. (NASDAQ: OCER), today announced that its wholly owned U.K. subsidiary has finalized the acquisition of Sonsub Limited (Sonsub), a private U.K. company, through the purchase of all outstanding capital stock of Sonsub for the amount of 5,325,000 pounds sterling (approximately US$8.8 million). The purchase price was paid in cash from Oceaneering's working capital.

Oceaneering announced its intent to acquire Sonsub on Dec. 18, 1989. The purchase agreement was finalized following a due diligence review and the approval of Sonsub's stockholders and the board of directors of Oceaneering.

"Underwater intervention through Remotely Operated Vehicles (ROVs) is at the forefront of technology in our industry, and we are very pleased to have made this acquisition. The addition of Sonsub's excellent equipment and high-caliber staff will strengthen our position in the North Sea market, more than doubling our regional ROV fleet," stated John. R. Huff, president and chief executive officer of Oceaneering.

The acquisition adds 14 ROV systems -- ten large and four small vehicles -- to Oceaneering's worldwide fleet of approximately 40 systems. ROVs are unmanned submersible vehicles operated from the surface and are equipped with camera viewing systems, lights, sophisticated manipulator systems, and other tools which enable tasks to be performed in water depths up to approximately 8,000 feet. ROV technology is used widely in the offshore oil and gas industry and also utilized inside nuclear power plants, for telecommunications and aerospace companies, and to perform search and recovery operations for military entities.

Oceaneering, together with its affiliate companies, is the world's largest publicly owned underwater services company. Oceaneering supplies a comprehensive range of integrated technical services to a wide array of industries. Principal services are directed to the offshore oil and gas industry and include drilling support; subsea construction; production systems; facilities maintenance and repair; survey and positioning;

engineering; and specialized inspection, both offshore and onshore.

DENVER (JAN. 15) PR NEWSWIRE - Manville International B.V., a subsidiary of the Denver-based Manville Corp. (NYSE: MVL), and the Belgian company Recticel, announced today that they have formed Marec Isolatie, a partnership which will produce and market phenolic foam insulation products in Europe. Terms of the joint-venture were not disclosed.

Marec Isolatie will have the exclusive right in Europe to use the phenolic foam technology developed by Koppers Company Inc., of Pittsburgh. The technology is owned by Thermal Products International, based in Pittsburgh.

"We feel strongly that the European markets offer great potential for phenolic foam insulation products," said Jean Pierre Guibert, general manager for Manville's Paris-based Europe, Africa and Middle East (EAME) division. EAME is a division of Manville International B.V.

"This is the best foam insulation technology available and we are seeking to transfer the technology and its success in the United States abroad," added Guibert.

In January of last year, Manville purchased certain assets of the phenolic foam insulation business from Koppers, including the exclusive right to use the Kopper's technology in the United States and a production facility in Oak Creek, Wis.

The phenolic foam insulation technology offers much better value per inch in thermal efficiency than other foam insulations. Its superior performance characteristics allow designers to maximize control of heat flow in a minimum of space for a wide variety of construction applications.

Recticel is a subsidiary of the Societe Generale de Belgique, headquartered in Brussels. Recticel has worldwide activities in flexible and rigid plastic foams for a wide variety of applications, including building insulations, furniture and bedding.

Manville, founded in 1858, is an international manufacturing and natural resources company with two principal operating subsidiaries, Manville Sales Corp., headquartered in Denver, and Manville Forest Products Corp., headquartered in West Monroe, La. The company's primary businesses include paper and wood products, packaging, fiber glass and industrial insulation products, roofing systems and filtration and minerals. The corporation's headquarters is in Denver.

OAKLAND, CA (JAN. 15) PR NEWSWIRE - ECI Environmental Inc. (AMEX: ECI) today reported record operating results for the first quarter ended Nov. 30, 1989. The results are the first reported by the company since it completed the offering of 1.1 million shares of common stock on Nov. 21, 1989.

Revenues for the quarter were $6,530,000, up 71 percent from $3,825,000 recorded for the first quarter of fiscal 1989. Net income for the period was $406,000, or 12 cents per share, up from $8,000, or $.002 per share for the like period one year ago. Per share results are based on 3,497,000 weighted shares outstanding.

"Our strong operating performance is the result of several factors," stated Kurt P. Zimmerman, chairman. "First, revenues from our northern California operations exceeded expectations. In addition, our Burbank office continued its growth. Finally, our ongoing efforts to improve abatement program efficiencies and cost controls is resulting in pre-tax margins in excess of 10 percent."

Zimmerman noted that the company's balance sheet as of Nov. 30, 1989 was significantly improved as the result of the public offering. Long term debt has been eliminated while the company's cash position is in excess of $3 million. Working capital increased $7,315,000 to $10,556,000.

ECI Environmental is one of the largest asbestos abatement specialists in the western United States. The company primarily serves the California commercial market through offices in Oakland and Burbank, Calif.

CONTACT: Douglas Sherk, 415-243-8603, or JoAnn Horne, 212-986-5900, both of Morgen-Walke Associates Inc. for ECI Environmental Inc.

HAMILTON, Bermuda (JAN. 15) PR NEWSWIRE - Sea Containers Ltd. (NYSE: SCR) announced today that it had received an unsolicited offer from Temple Holdings Ltd. for the following parts of its business:

1. The Port of Harwich, excluding the development land, the Sealink Harwich/Hook ferry route and the charter of the M.V. St. Nicholas.

2. The Sealink ferry services between Dover and Calais, and Folkstone and Boulogne, along with the vessels St. Anselm, St. Christopher, Hengst and

Fantasia. Hoverspeed and the company's wave piercing catamarans are excluded.

3. The Sealink ferry services in the Irish Sea between Fishguard and Rossiare, Holyhead and Dun Laoghaire, and Stranraer and Larne, including the ports of Fishguard, Holyhead, and Stranaer, and all the ships employed in the services. The company's ports of Heysham and its interest in the Isle of Man Steam Packet Company are excluded.

4. The company's standard dry cargo and tank containers which had previously been agreed for sale to Genstar and Itel, subject to Sea Containers' shareholder approval.

James B. Sherwood, president, said that the Temple offer contemplates that Stena AB of Gothenbury would buy the ferry assets which are the subject of the offer and that Tiphook plc of the U.K. would buy the container assets. The total consideration being offered is approximately $1.1 billion in cash and Sea Containers' common shares, made up of $537 million for the containers and approximately $550 million for the ferry assets.

Sherwood said that the company's board of directors would meet on Jan. 18, 1990 to consider the offer but that, subject to certain clarifications and an acceptable form of contract, he is prepared to recommend acceptance.

Under the arrangements contemplated, Temple would agree to drop its hostile bid for the company and all litigation would be terminated. The asset sales would be presented to Sea Containers' shareholders for approval along with a modified recapitalization plan, the terms of which will be determined by the board at a general meeting to be held in March, with closing of the sales planned for shortly thereafter.

RYE BROOK, NY (JAN. 15) PR NEWSWIRE - MCI Communications Corporation (NASDAQ: MCIC) today announced it has added Japan, Taiwan and fourteen new cities in Italy to the list of locations from which overseas callers can use its MCI CALL USA service.

Effective immediately, MCI CALL USA service is available throughout Japan. MCI CALL USA calls from Japan are priced at $3.15 for the first minute and $1.28 for each additional minute. As with all CALL USA calls, there is a $2 surcharge for an MCI Card call or a $5 surcharge for a collect call.

The service is also available from Taiwan from special telephones at Taoyuan and Kaohsiung Airports. Taiwan calls are priced at $3.63 for the first minute and $1.47 for each additional minute. The usual surcharges apply.

MCI CALL USA service from Italy, previously available only from Rome and Milan, is now available from most major Italian cities, including Brindisi Florence, Formia, Genoa, Latina, Leghorn, Naples, Olbia, Padua, Perugia, Pescara, Pisa, Pordenone and Venice.

"The addition of Japan and Taiwan, as well as the expansion of service points in Italy, allows MCI to provide travelers, military personnel, and others living abroad an even more convenient, cost- effective and easy-to-use means of calling the U.S. from overseas," said Seth D. Blumenfeld, president of MCI International. "These enhancements make MCI CALL USA an essential business and travel tool."

MCI CALL USA calls can be placed collect or by using the MCI Card, Telecom Canada Card, or other Bell Operating Company (BOC) card. Prices vary by country, but are the same regardless of the day or time the call is placed.

In addition to Japan, Taiwan and Italy, MCI CALL USA is also available from Australia, Belgium, Brazil, Denmark, France, Greece, Hong Kong, the Netherlands, Singapore, Sweden, Switzerland and the United Kingdom.

MCI offers a complete range of domestic and international communications services. International capabilities include worldwide direct dialing, private voice and data networks, international 800 service, packet switching, transmission of radio and television, and messaging services. MCI's offices in approximately 50 countries are positioned to provide and support the full range of global telecommunications services.

NEW YORK (JAN. 15) PR NEWSWIRE - Donaldson, Lufkin & Jenrette Securities Corporation announced today an agreement with plaintiffs' counsel to settle all claims asserted against the underwriters of Residential Resources Mortgage Investments Corp. in a consolidated action which has been brought in the U.S. District Court for the District of Arizona.

The action, entitled Stein et. al. vs. Marshall et. al., has been brought as a purported class action against certain former officers and directors of Residential Resources, as well as the underwriters of its initial public offering. The action asserts various claims concerning the disclosure of information about Residential Resources.

The proposed settlement only involves claims brought against the underwriters. Pursuant to the settlement agreement, the underwriters will pay up to a total of $10 million on a per share, pro rata basis to a class of shareholders (as defined in the settlement agreement) who purchased Residential Resources common stock, from the date of its initial public offering to and including Jan. 10, 1989, the date on which Residential Resources filed for protection under Chapter 11 of the U.S. Bankruptcy Code.

The proposed settlement is subject to numerous conditions, including, among others, the certification by the court of a settlement class as contemplated in the settlement agreement, approval of the terms of the settlement and dismissal of the action. The settlement is by its terms not an admission of any liability for wrongdoing. The settlement agreement is expected to be filed with the court shortly.

Assuming the court so directs, copies of the notice containing further details about the terms of the settlement will be mailed or otherwise available on request to persons who purchased Residential Resources common stock during the subject time period.

Further inquiry concerning the terms of the proposed settlement should be directed to counsel for the plaintiffs, Wolf Haldenstein Adler, Freeman & Herz, 270 Madison Ave., New York, NY 10016, telephone 212-545-4600.

NEW YORK (JAN. 15) PR NEWSWIRE - Pan American World Airways is seeking United States government authority to serve Japan from Los Angeles, the carrier's largest west coast station.

In a filing with the Department of Transportation, Pan Am said it would provide Boeing 747 service in the Los Angeles-Tokyo market. Pan Am will be able to link Japan with New York, Miami, the Caribbean, Mexico and Latin America through its Los Angeles gateway.

In a separate request, Pan Am is also seeking authority to serve Nagoya, Japan from Los Angeles.

"Pan Am first began scheduled passenger service to Japan in 1947 when it introduced its round-the-world flights, and Tokyo later became the hub of the company's Pacific operations," said Peter McHugh, senior vice president-marketing at Pan Am. "We know the market well, and we still

enjoy excellent name recognition. We are confident that our solid background and proven track record in the Pacific will enable us to obtain permission to once again offer service to Japan."

Pan Am was the first carrier to offer scheduled service across the Pacific in November 1935 when Pan Am's "China Clipper" began airmail service between San Francisco, Honolulu, Midway, Wake, Guam and Manila. Passenger service began the following year, October 1936, when Pan Am's "Hawaii Clipper" began transporting passengers between San Francisco and Manila, following the same course as the "China Clipper."

Pan Am gave up its rights in the Pacific in 1986 when it sold its Pacific operations to United Airlines.

ARMONK, NY (JAN. 15) PR NEWSWIRE - Municipal Bond Investors Assurance Corporation (MBIA), the nation's leading insurer of municipal securities, announced today that it has opened regional marketing offices in San Francisco and Orlando, Fla. Heading up the offices will be two former employees of Bond Investors Guaranty Insurance Co. (BIG), Robert A. Potter and Robert C. Liden who are located in San Francisco and Orlando, respectively. Potter and Liden join MBIA as vice presidents.

MBIA Inc. also announced today that it completed the transaction to acquire the outstanding business of Bond Investors Guaranty Insurance Company through the acquisition of the stock of its parent company, Bond Investors Group, Inc.

"We are opening these satellite offices, the first in MBIA's 15-year history, in recognition of the increasing influence of regional municipal bond firms. These new offices will help increase MBIA's marketing presence and improve service to our clients in the Western and Southern regions of the country," said David H. Elliott, president of MBIA.

Potter was formerly vice president of new business development for Bond Investors Guaranty. Prior to joining BIG in 1986, he was a vice president of Fiser Financial & Investment Services and a public finance associate with Dean Witter Reynolds, Inc. Potter also held sales and marketing positions with Tratec/McGraw Hill and IBM. The new MBIA vice president graduated magna cum laude from Santa Clara University and received a master's degree in business administration from the University of California, Berkeley.

Liden was formerly southeastern regional manager/agent for Bond Investors

Guaranty. He previously served as senior vice president of Ziegler Securities, a Chicago-based municipal bond firm. Prior to that, Liden was in public administration, serving as city manager for Hazelwood, Mo. and assistant city manager for Glenview, Ill. He received a bachelor's of science degree from the University of Illinois and a master's degree in public administration from Northern Illinois University.

The new MBIA offices are located at 1750 Montgomery Street, San Francisco, Calif., 94111, 415-954-7144, and 20 North Orange Ave., Suite 1400, Orlando Fla. 32801, 407-843-7450.

MBIA Inc. (NYSE: MBI), through its wholly owned subsidiary, MBIA Corporation, is a leading insurer of new municipal bonds, bonds traded in the secondary market and those held in unit investment trusts and mutual funds. MBIA is rated Triple-A by Moody's Investors Service, Inc.

COEUR D'ALENE, ID (JAN. 15) PR NEWSWIRE - Hecla Mining Co. (NYSE, PSE: HL) today announced that it will record approximately $14 million in nonrecurring charges and write-downs in the fourth quarter of 1989. These write-downs, when coupled with a loss from operations, are expected to result in the company reporting approximately $16 million in losses for the fourth quarter of 1989.

For the year, the company expects to record a net loss of approximately $25 million, of which approximately $17 million are one-time charges and write-downs.

Hecla Chairman and Chief Executive Officer Arthur Brown said the fourth quarter charges primarily reflect a loss of approximately $9 million on the disposal and write-down of Sunshine Mining Co. common stock, acquired in 1984 in connection with the sale of Hecla's interest in the Sunshine Unit Area. In addition, the charges include a re-evaluation of certain nonoperating property and plant assets and accounting adjustments related to reclamation.

Commenting on 1990, Brown said, ''Expanded gold production with Yellow Pine coming on line and improved performance at the silver operations point to better results in 1990.''

Hecla Mining Co., headquartered in Coeur d'Alene, Idaho, is a leading domestic producer of newly mined silver and gold, and a supplier of premium ball clay, kaolin and specialty aggregates. The company has operations and projects in 12 states and four Canadian provinces.

SAN DIEGO (JAN. 15) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced that it has established a European marketing, distribution, and service network for its X-ray inspection and process monitoring systems for electronics manufacturers.

IRT has signed a distribution agreement with Electronic Instruments, a well-established manufacturer and distributor of electronic design, production, and test equipment. Electronic Instruments is based in Brussels, Belgium and Paris, with subsidiaries in Munich, West Germany; London; Milan, Italy; Stockholm, Sweden; Zurich, Switzerland; Rotterdam, The Netherlands; Madrid, Spain; and Lisbon, Portugal.

In Europe, IRT introduced its CXI automated X-ray systems for electronics circuit board manufacturing at the Productronica electronics show in Munich, West Germany, in November 1989.

IRT, the industry leader in automated X-ray systems for electronics manufacturers, currently markets its electronics systems through a network of manufacturers' representatives that covers the United States, Canada, Singapore, and now, through Electronic Instruments, in Europe.

The company's line of CXI systems combine high-quality X-ray imaging with computerized control and analysis to give electronics manufacturers an in-line process monitoring and inspection tool. The systems allow manufacturers to monitor and control the quality of solder connections on so-called surface-mounted circuit boards, where solder integrity is critical since it alone maintains the position and connection of components on a board. IRT's systems are used in high-volume production environments for in-line process monitoring and in quality and product development laboratories for off-line research, development, and inspection applications.

IRT's X-ray systems for electronics now include the CXI-1100 series, which provides high-quality inspection of electronic components or assemblies at a low price; the CXI-4100 series, which offers flexible, five-axis object manipulation for off-line engineering and quality control requirements; and the CXI-5400, for the demanding requirements of high-volume production process monitoring and inspection in printed-wiring assembly facilities.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability.

CONTACT: Thomas Stroebel, 619-450-4343, ext. 429, or Michael Green, 619-450-4343, ext. 560, both of IRT Corp.

LANDOVER, MD. (JAN. 15) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECH.A, HECH.B) has announced plans to enter the Greater Cincinnati, Ohio, market with its Home Quarters Warehouse subsidiary.

While exact locations for the stores have not been announced, several outlets are planned for the market. Plans call for the opening of at least two stores by the end of 1990.

Hechinger, a chain of 107 do-it-yourself retail home centers, recently announced plans to open approximately 30 Home Quarters Warehouse stores over the next three years. A significant portion of these new warehouse stores will be in the Boston metropolitan area, with the first four stores planned for 1990. Plans have also been announced to enter the Birmingham and Montgomery, Ala., markets.

Home Quarters currently operates 15 stores in six Southeastern states. Home Quarters operates as an independent subsidiary of Hechinger Company and sells a wide assortment of lumber and building materials and home improvement products for both the do-it-yourself and professional home repair and remodeling customers.

Hechinger Company plans to open approximately 18 stores during 1990, 14 of which will be Home Quarters Warehouse stores and four Hechinger stores.

DALLAS (JAN. 15) PR NEWSWIRE - Recognition Equipment Inc. (NYSE: REC) announced today that it had amended its agreement with The Prospect Group Inc. (NASDAQ: PROS) to delay commencement of a proposed self-tender offer for up to 120 days after closing of an investment by Prospect in Recognition.

In October, Recognition and Prospect entered into an agreement that provided for, among other things, an additional $15 million cash investment by Prospect in Recognition and a self-tender offer by Recognition for $15 million to $20 million of its common stock. The self-tender offer is subject to a number of conditions, including stockholder approval, consummation of Prospect's $15 million investment and the lack of any material adverse change in Recognition.

The agreement originally called for consummation of the self-tender and

the Prospect investment to occur substantially simultaneously. The amendment delaying the self-tender offer was approved today by Recognition and Prospect.

In making the announcement, Robert Vanourek, co-chief executive officer of Recognition, said the company had proposed the delay to assure that adequate working capital would be available during the short term to implement the company's strategic operating plan.

"The strategic plan calls for the company to focus on the growing imaging market," said Vanourek. "As part of this plan, we intend to sell certain non-image related assets, including long-term receivables, to provide working capital and retire our bank debt. The delay of the self-tender offer makes available the $15 million Prospect investment, a portion of which may be used for working capital should the asset sales take longer than anticipated, and allows the company to continue making investments in the image processing market."

HIGH POINT, N.C. (JAN. 15) PR NEWSWIRE - LADD Furniture, Inc. (NASDAQ-NMS: LADF) chairman and chief executive officer Don A. Hunziker announced today that LADD's directors have elected Frederick L. Schuermann Jr. to the position of senior vice president, treasurer and chief financial officer of LADD Furniture, Inc. As chief financial officer, reporting to Hunziker, Fred Schuermann will be filling the position vacated by Richard R. Allen when Allen was promoted to vice chairman of LADD on January 9, 1990. Hunziker said Schuermann will be replaced as president of LADD's American of Martinsville contract furniture business unit by Robert J. Maricich, who will report to Allen. Both promotions are effective today.

"Fred Schuermann is uniquely qualified for his new assignment as LADD's chief financial officer," Hunziker said. "We are delighted that Fred has

accepted this important corporate management position, and feel that his talents and experience will add depth to the LADD senior management team as we move into the 1990's."

Commenting on the promotion of Maricich, LADD vice chairman Richard R. Allen said, "Bob Maricich's strong sales and management experience in the contract furniture industry makes him an outstanding choice to succeed Fred Schuermann. Allen added, "The American of Martinsville contract furniture business enjoyed a very strong year in 1989, and the prospects for 1990 and beyond look equally promising. I am confident that under Bob's leadership, American of Martinsville will capitalize fully on these opportunities."

Prior to being named president of the American of Martinsville contract furniture business in 1987, Fred Schuermann served for ten years as chief financial officer of American Furniture Company, Inc., a major publicly-owned corporation which was acquired by LADD in October 1986. He was also promoted to the additional positions of vice president, operations and executive vice president of American Furniture Company before being named president. Before joining American in 1977, Schuermann worked in various financial and business planning positions for a number of major public corporations, having begun his career in 1968. A Certified Public Accountant and Chartered Financial Analyst, he earned his B.S. and M.S. degrees from Purdue University and has also completed course requirements for his Masters degree in industrial engineering at N.C. State University.

Bob Maricich joined American of Martinsville in August 1989 as senior vice president -- contract sales and marketing from Flexsteel Industries of Dubuque, IA, where he served as vice president of Flexteel's contract furniture division. After joining Flexsteel in 1983 as a product manager, he was named Midwest residential division sales manager in 1984 and was promoted to national sales and marketing manager of Flexsteel's contract division in 1986. Before joining Flexsteel, Maricich worked for nine years for R.S. Bacon Veneer Company, Chicago, IL, in a variety of manufacturing management positions, including plant engineer, plant manager and vice president. He is a 1972 civil engineering graduate of Montana State University.

A subsidiary of High Point, NC-based LADD Furniture, Inc., American of Martinsville is the leading U.S. manufacturer and marketer of guest room furniture for the hotel/motel industry. Headquartered in Martinsville, VA the company operates five manufacturing plants, all located in the state of Virginia. In addition to American of Martinsville, LADD's other major brand names incude American Drew, Barclay, Brown Jordan, Clayton-Marcus, Daystrom, Design Horizons, Kittinger, Lea Industries and Pennsylvania House. LADD also owns and operates Lea Lumber & Plywood Co. and LADD Transporation, Inc., and its stock is traded on the over-the-counter

National Market System under the NASDAQ symbol LADF.

ST. PAUL, MN (JAN. 15) PR NEWSWIRE - Northwest Airlines today selected a 33-year airline veteran to run airport operations at its Memphis hub.

Jesse L. Murray will immediately assume the post of director of station operations-Memphis.

Murray will oversee a staff of approximately 800 employees involved in customer service, aircraft cleaning, baggage handling and ramp operations for Northwest's 150 daily Memphis flights.

Murray began his airline career in 1957 as a ramp agent for Southern Airways, one of Northwest's predecessor airlines. During the next 33 years, he was station manager at four airports -- Chattanooga, Huntsville, Atlanta and Tampa. When Southern and North Central airlines merged to become Republic Airlines, Murray was named assistant regional manager in Chicago, then regional ground services manager in Phoenix and later director of ground service at Republic's Twin Cities headquarters.

Since Republic's merger with Northwest in 1986, he has been a senior director of ground services.

#90015p0252 01/15/1990 ~PR Newswire

SANTA BARBARA, CA (JAN. 15) PR NEWSWIRE - Inamed Corp. (NASDAQ: IMDC; PSE: INA), headquartered here, today said that its subsidiary, Cox-Uphoff Corp. (now CUI Corp.), Carpinteria, Calif., has filed for protection and reorganization under Chapter 11. The filing was precipitated by the entry of a judgment against Cox-Uphoff on Jan. 4, 1990, which re-instated a jury award to Mentor Corp., (NASDAQ: MNTR) Goleta, Calif., relating to alleged patent infringements by Cox-Uphoff.

Judge Jesse W. Curtis of the U.S. District Court, Central District of California, who presided over the jury patent case, had reversed the

jury's decision in January 1989, granting J.N.O.V. in favor of Cox-Uphoff.
In his opinion, Judge Curtis stated, as published in the Feb. 6, 1989, issue of the "Medical Device, Diagnostics & Instrumentation (MDDI) Reports" ("The Gray Sheet"), that "... Mentor's patent for the Becker Expander mammary reconstructive prothesis is invalid and therefore could not be infringed by Cox-Uphoff ..." and that "... the patent is invalid because the device was in use for more than one year prior to the application, which is not allowed under patent law."

Regarding the other alleged patent infringement, Judge Curtis found the Mentor patent to be valid, but not infringed upon by Cox-Uphoff, stating, "A physical examination of the two devices demonstrates clearly the rigidity of the base of the Radovan device ... whereas the base of a Versafil expander base is not substantially stiffer than the flexible cover of the stretching chamber and does not produce the result that the Radovan patent claims."

In its Jan. 4, 1990, judgment, the United States Court of Appeals for the Federal Circuit overturned Judge Curtis' J.N.O.V in favor of Cox-Uphoff, stating in its opinion that Judge Curtis had not relied upon facts presented to the jury for his reversal of the jury decision.

Cox-Uphoff President Clark L. Pool stated, "Our only concern is to protect our customers, employees and vendors. The company was informed last week that Mentor intended to collect, by writ, an amount of approximately $850,000, which included interest and additional damages. We need time to prepare appeals on certain damages awarded and to organize a fair and equitable payment which will not impair Cox-Uphoff's future." Pool further stated that Cox-Uphoff has ceased production and distribution of the products involved, which constitute approximately 15 percent of the company's annual sales.

Mentor Corp., which lost a patent infringement brought by the Medical Engineering Corp. subsidiary of Bristol-Meyers in May 1988, has annual sales of approximately $50 million. Cox-Uphoff Corp. has annual sales of approximately $5 million.

DRYDEN, MI (JAN. 15) PR NEWSWIRE - For its third quarter ended Dec. 1, 1989, Champion Enterprises, Inc. (AMEX: CHB), headquartered in Dryden, reported a 22-percent decrease in sales to $80,858,000 from $103,077,000 for the prior year (the current year's quarter consisted of 13 weeks vs. 14 weeks in the prior year's quarter). The company recorded a net loss of $2,690,000 ($.38 per share) for the current quarter compared to a net loss of $364,000 ($.05 per share) last year.

Manufactured housing sales, representing 75 percent of sales and revenues, decreased 24 percent for the quarter to $60,619,000 from $79,278,000 last year. Factory unit shipments decreased 24 percent to 3,016 homes from 3,953 homes shipped in the year-ago quarter. Sales volume declines were a result of the sale and liquidation of Global Homes, Inc., the company's previously owned retail subsidiary, one less week in this year's reporting period and an overall industry unit- shipment decline of 15 percent in the quarter.

Recreation vehicle and bus sales for the current quarter, representing 24 percent of total sales and revenues, decreased 13 percent to $19,049,000 from $21,910,000 for last year's quarter. Motor home shipments were down 38 percent to 275 units from 446 units shipped in the year-ago quarter, while bus shipments increased 2 percent to 186 units from 182. Industry sales of motor homes were off over 20 percent during the quarter.

Champion's President, Joseph J. Morris, said: "During the third quarter, we continued the consolidation of housing operations in the southeastern region by discontinuing production at a Georgia facility. One of our Florida housing facilities was closed at the end of the first quarter. Current consolidation efforts and cost reductions have been implemented to improve efficiency in response to a shrinking manufactured housing industry. To improve market penetration, we have recently introduced dealer incentives and extensive product improvements."

"Motor home shipments and profits were off as a result of the overall industry decline and start-up costs incurred at the newly built Class-A

facility," Morris continued. "The current year introduction of two new Class-A models will allow us to offer a complete product line within the Class-A market."

Champion Enterprises, Inc. is a holding company whose principal subsidiaries are leading producers of manufactured homes, motor homes and medium-duty buses with production operations at 25 plants in 15 states and British Columbia, Canada.

HOUSTON (JAN. 15) PR NEWSWIRE - A Texas state court has dismissed a $60-million lawsuit brought by 273 former Continental Airlines pilots against Texas Air Corp. (AMEX: TEX).

The ex-pilots, in a suit filed in Houston, claimed that Texas Air had guaranteed Continental's performance of a collective bargaining agreement which was terminated after Continental's 1983 Chapter 11 filing.

The court granted Texas Air's motion for summary judgment on all the pilot's claims.

The Texas case was the largest of three suits brought by former pilots seeking to hold Texas Air responsible for damages under a side letter to the pilot's 1982 labor agreement.

One case, involving 48 ex-pilots, is pending in a Colorado state court, where the judge has reserved decision on the same legal issues resolved in Texas Air's favor in the Houston case. Another suit was dismissed last year by the U.S. District Court in Houston and is presently on appeal.

Continental emerged from Chapter 11 in 1986, and has largely completed payments under its plan of reorganization.

BINGHAMTON, N.Y. (JAN. 15) PR NEWSWIRE - Resource Recycling Technologies Inc. (AMEX: RRT), a vertically integrated recycling organization, has entered into an agreement, through its recently created RRT Plastics Corp. subsidiary, to purchase certain assets of the Ricard Group, a privately held plastics processor based in Roosevelt, Long Island, N.Y., for an undisclosed amount, it was announced today by Lawrence J. Schorr,

president of RRT.

The Ricard Group includes: Ricard Plastic Products Inc., Sabre Recycling Corp., Sabre Recycling of New Jersey and PET Polymers Inc. Finalization of the transaction is subject to a number of contingencies. The Ricard Group management team will remain with the RRT organization.

Commenting on the agreement, Schorr said, "The Ricard Group is an experienced resin recycler which will enhance the possibility for RRT to directly process and re-manufacture the post-consumer plastic wastes which we now procure from curbside collection programs and sell to recyclers such as the Ricard Group. We will also have the ability to extrude and trade post-industrial virgin, off grade and compounded thermoplastic resins. This acquisition will substantially close the plastics loop for us and makes RRT a full-service plastic recycler. We are very excited by this development because RRT will now contribute directly to solving the growing plastics problem, one of our major corporate goals." The executive said the transaction was expected to close within 60 to 90 days.

Schorr also disclosed that RRT intends to file a registration statement for up to 1 million shares of newly issued RRT common stock. The offering is expected to be completed within the next 90 days in a firm commitment underwriting. "When completed, this offering will strengthen our capital base and accelerate our continuing growth in the areas of designing, building and operating Material Recycling Facilities (MRFs) for municipalities. The funds will also be used to facilitate our diversification program through acquisitions and internal expansion," Schorr said.

Resource Recycling Technologies Inc. is a vertically integrated organization dedicated to the advancement of recycling programs and technologies, and the development of new markets for secondary materials.

#90015p0271 01/15/1990 ~PR Newswire

ANN ARBOR, MI (JAN. 15) PR NEWSWIRE - Republic Bancorp Inc. (NASDAQ-NMS: RBNC) today announced record results for the year ended Dec. 31, 1989. Net income for the fourth quarter and current year were $336,000 and $915,000, an increase of 33 percent and 14 percent, respectively, over the $253,000 and $804,000 reported for similar periods in the prior year.

The company's total assets as of the current year end were $463 million, compared to $403 million in total assets as of Dec. 31, 1988. Net interest income increased from $3,020,000 in the fourth quarter of 1988 and

$7,719,000 for all of 1988 to $3,798,000 in the fourth quarter of 1989 and $13,382,000 for 1989. The company added $610,000 to its total loan loss reserves during the fourth quarter of 1989. The fourth quarter 1989 provision was primarily attributed to similarly structured personal investment loans made by the company's Lansing, Mich., subsidiary, Republic Bank - Central. The aggregate principal amount of these loans represents approximately 1 percent of consolidated aggregate loans. The company's loan loss provision for 1989 was $1,346,000 compared to $566,000 for 1988. The additions to loan loss reserves brought total loan loss reserves for the company as of Dec. 31, 1989, to $3,622,000, compared to $2,932,000 in total reserves as of Dec. 31, 1988.

The company also announced C. Howard Haas, a commercial banker with 25 years' experience, has been appointed as the new president and CEO of Republic Bank - Central in Lansing. Dana M. Cluckey has been promoted to the position of chief financial officer, treasurer and controller, Barry J. Eckhold to secretary of the corporation, and Mary Lou Scriba to assistant secretary.

Republic Bancorp Inc. is a registered bank holding company with headquarters in Ann Arbor. The company owns seven subsidiaries: Republic Bank with offices in Flint Township and Owosso; Republic Bank Ann Arbor; Republic Bank - Central with four offices in the Lansing area; Republic Bank-North with four offices in the Traverse City area; Republic Bank S.E. in Bloomfield Hills and Grosse Pointe Farms; Premier Bancorporation, Inc., with eight offices in the Jackson area; and Republic Bancorp Mortgage Inc. of Plymouth, Mich. Republic Bancorp Mortgage Inc. has seven offices in Michigan and originates and services residential mortgage loans, primarily within the State of Michigan.

Republic Bancorp Inc. common stock is traded in the over-the-counter market and quoted on the NASDAQ National Market System under the symbol RBNC.

AUSTIN, TX (JAN. 15) PR NEWSWIRE - Communications Transmission Inc. (CTI) (NASDAQ: CTIA) announced today that the net loss for its second fiscal quarter of 1990 (ended Nov. 30, 1989) was $15.1 million or $1.52 per common share on revenues of $96.9 million, bringing the total loss for the fiscal year to $26.5 million or $2.69 per common share on revenues of $196.5 million. This compares to losses of $6.7 million (71 cents per common share) and $8.6 million (96 cents per common share) on revenues of $107.9 million and $220.3 million, respectively for the comparable prior year periods.

CTI's consolidated losses for fiscal 1990 include 100 percent of the loss reported by the company's subsidiary, ALC Communications Corp. (ALC). CTI is required to report 100 percent of ALC's losses rather than the company's approximately 55 percent equivalent common stock ownership percentage in accordance with accounting rules in ARB 51, paragraph 15. In the prior year period, CTI was not required to report all of ALC's losses. However, for comparative purposes, if 100 percent of ALC's results had been included, the company's second quarter and six month fiscal 1989 losses would have been increased by $8.3 million and $13.3 million, respectively.

On Jan. 8, 1990, CTI announced that ALC and Telecom USA had entered into a letter of intent for a business combination of ALC into Telecom USA. Under the letter of intent, all outstanding capital stock of ALC would be

converted into units of Telecom USA common stock and cash at a total value of $3 per share. CTI's ownership interest in ALC through its Series B and C preferred stock is convertible into approximately 17 million shares of ALC.

If a definitive agreement is reached and the required regulatory and shareholder approvals are obtained, the transaction could result in a substantial gain for CTI. Also, CTI would continue to supply ALC with the transmission capacity currently provided under long term contracts.

WASHINGTON (JAN. 15) PR NEWSWIRE - The Air Line Pilots Association's ballot certification committee has announced the results of the member ballot on whether to continue paying support benefits to Eastern Airlines pilots, who ended their nine-month-long strike against Eastern in December 1989. Results of the ballot were affirmative.

The reaffirmation means the continuation of support benefits for Eastern pilots through the end of February 1990. "Eastern pilots are grateful for the continued support of their ALPA brothers and sisters," said Capt. Skip Copeland, chairman of the Eastern pilots' ALPA Master Executive Council. "This vote will enable the real Eastern pilots to carry through with their efforts to effect an override of the president's 11-hour veto of HR1231 -- a move that demonstrated full support for Frank Lorenzo and flew in the face of the overwhelming support for Eastern employees by members of the House of Representatives and the Senate.

"The benefit vote is a show of support for the Eastern pilots' cause, in appreciation for the gallant war they waged against Frank Lorenzo. Even though the picket line is down, we believe that the fatal blow has been dealt to Lorenzo and that he will soon be extricated from the airline industry.

"All along, our goal has been to ensure the continued viability of our airline," Copeland continued. "To date, not one striking Eastern pilot has been returned to the cockpit of an Eastern plane, even though it has been nearly two months since the picket line came down. We are ready to go back -- to revitalize Eastern, to get back to the task of making Eastern fly proudly again."

No further details of the ballot were available from ALPA. A simple majority of the returned ballots was needed to continue the assessment and benefits.

TORONTO (JAN. 15) PR NEWSWIRE - Wharf Resources Ltd. has completed the purchase of a $2.1 million note (series 2) from United Coin Mines Limited as the final installment of tranche 2 of its commitment to acquire up to $9.6 million of United Coin's 11 per cent notes. The notes are convertible into common shares of United Coin Mines Limited at $2.92 per share and on conversion would represent 3,359,556 (21 percent) of the common shares of the corporation.

Wharf Resources Ltd. has also completed the purchase by private transaction of 1,382,270 common shares of United Coin Mines Limited from the Helmsman Group Ltd. of Sydney, Australia. Aggregated with the shares that would be issued to it on conversion of the 11 percent notes, Wharf's total would represent 4,741,826 (30 percent) of the common shares of the corporation.

The notes and the shares were acquired for investment purposes and Wharf Resources Ltd. may acquire common shares or other securities of United Coin Mines Limited depending on market conditions and other factors.

SAN DIEGO (JAN. 15) PR NEWSWIRE - Omni USA Inc., (OTC "Pink Sheets"), a resource for and distributor of gearboxes, heavy duty truck and trailer parts, light trailer components and agricultural replacement parts, today announced that it has reached an agreement in principle to acquire City Machinery Ltd., a Winnipeg, Manitoba based distributor of industrial and agricultural components and Simplex Cycle Ltd., a motorcycle replacement parts company. Payment will be made by a combination of cash, notes, and securities in exchange for all outstanding stock of City Machinery and Simplex Cycle. The terms of the agreement will be disclosed in the company's Form 8-K which is to be filed with the Securities and Exchange Commission in the near future.

For the fiscal year ended Oct. 31, 1989, City Machinery and Simplex Cycle reported a combined loss of $47,458 (Canadian) on revenues of $22,809,600 (Canadian). For the year ended June 30, 1989, Omni USA reported earnings of $403,350 on sales of $12,934,563.

Edward L. Daniel, president of Omni USA, stated, "These acquisitions will provide several new product lines and significant additional sales volume in Omni USA's existing product lines. This increased volume significantly improves prices at which Omni USA can acquire products for sale while at the same time provide significant additional distribution throughout Canada through City Machinery's seven branches." Omni USA was advised on the transaction by a New York Stock Exchange member firm which has committed to provide financing to consummate the acquisition.

City Machinery was founded in 1921 and Simplex Cycle was founded in 1973. After the acquisition, management of City Machinery and Simplex Cycle will remain in place for the foreseeable future and operate these companies as subsidiaries of Omni USA.

SAN FRANCISCO (JAN. 15) PR NEWSWIRE - Polaris Aircraft Leasing Corp., a subsidiary of GE Capital, announced it has delivered the first two of five new McDonnell-Douglas jet aircraft to be leased by Chicago- based Midway Airlines Inc. The three remaining planes in the $150 million transaction will be delivered over the next 12 months, according to Polaris.

The two aircraft already delivered are MD-88s, which will go into service March 1, 1990. Two MD-83s will be delivered in October 1990 and the final delivery, also an MD-83, will take place in December 1990. All the planes are on long-term leases.

This is Polaris' second leasing transaction with Midway, which just completed 10 years of operations. Midway Airlines and its wholly-owned subsidiary, Midway Commuter, provide scheduled air transportation service to 60 destinations in the United States, the U.S. Virgin Islands, and the Bahamas from hubs at Chicago's Midway Airport and Philadelphia International Airport. In 1989, the airline carried 5.2 million passengers to major cities in the East and the South/Atlantic, as well as a number of destination west of Chicago. Midway Commuter serves a total of 20 regional cities located in Illinois, Indiana, Michigan and Wisconsin, all within 250 miles of Chicago.

"We're delighted to be able to support Midway's continued fleet expansion with creative, flexible financing," said Marc Desautels, president of Polaris. "Midway's management has proven the airline's ability to be highly effective in this market."

Midway has steadily expanded its service during the past decade, more than doubling the number of destinations it serves. The key to the airline's strategy has been using under-utilized Midway Airport as an alternative to Chicago's primary airport, O'Hare. Its recent acquisition of Eastern's routes and equipment at Philadelphia International, giving it a second hub has substantially increased the airline's expansion opportunities.

While Midway emphasizes low cost operations, the carrier recently inaugurated first-class service on all its flights, as well as a number of innovative new services which have gained it considerable industry recognition.

Polaris manages more leased aircraft than any other leasing company in the world. Its more than 390 commercial jet aircraft, valued at over $5.9 billion, include approximately 248 of its own jetliners and about 142 aircraft for GE Capital. Polaris generates in excess of $432 million in lease revenues from 27 operators and the fleet it manages represents

almost 5 percent of the commercial jet aircraft in current use throughout the world.

The 15-year-old company is also the leading sponsor of aircraft leasing limited partnerships, having raised nearly $1.3 billion in investor capital and sponsored 42 publicly and privately registered programs with over 85,000 investors.

#90015p0301 01/15/1990 ~PR Newswire

ATLANTA (JAN. 15) PR NEWSWIRE - Bank South (NASDAQ: BKSO) today announced 1989 net income of a record $48.1 million, an 11 percent increase compared to $43.4 million earned during 1988.

Earnings per share also increased 11 percent, to $1.42 during 1989 from $1.28 during 1988.

Return on average assets was .98 percent for 1989, compared to .95 percent during 1988. Return on average equity was 15.90 percent during 1989, compared to 15.80 percent during 1988.

"Our performance during 1989 is gratifying, especially in the environment

of a slowing economy and increasing competition," said Robert P. Guyton, president and chief executive officer. "The year was extraordinary for Bank South as we restructured the company to create the greater efficiences and innovative new management approaches that are needed in this environment. Bank South is well-positioned as we enter the 1990's to compete with a leaner cost structure, advanced technology, and an aggressive focus on sales and service."

Guyton added that credit quality is a major focus at Bank South as it is at other financial institutions due to the slower economy, which is contributing to an increase in non-performing assets. At year-end 1989, Bank South's non-performing assets totaled $62.7 million, or 1.88 percent of total loans and other real estate owned, compared to $48.0 million, or 1.47 percent last year. Net charge-offs as a percent of average loans outstanding during 1989 were .55 percent, compared to .42 percent during 1988. At year-end, the loan loss reserve represented 1.18 percent ot total loans, compared to 1.15 percent a year earlier.

In recognition of the slower economy, as well as a fiercely competitive environment within the financial services industry, Bank South announced a major restructuring in September of 1989. To date under the restructuring 300 positions have been eliminated, an agreement has been reached with IBM whereby IBM is designing, building and will operate a data center for Bank South at the Bank South Operations Center, and Bank South's $43 million credit card portfolio has been sold to another bank at a premium. The premium was largely offset by restructuring expenses.

The restructuring contributed to strong performance during the fourth quarter of 1989, when record earnings were achieved of $14.6 million, or 43 cents per share. Both earnings and earnings per share increased by 16 percent over 1988. Return on average assets was 1.15 percent, and return on average equity was 18.46 percent during the fourth quarter of 1989.

Among other financial highlights from 1989, total assets were $5.1 billion at year-end 1989, compared to $4.9 billion a year ago. Book value per share of Bank South common stock stood at $9.48 at year-end 1989, compared to $8.54 a year earlier.

Bank South Corp. is a $5.1 billion asset multi-bank holding company with 135 offices throughout Georgia and Pensacola, Fla.

WINSTON-SALEM, NC (JAN. 15) PR NEWSWIRE - Angell Real Estate Company (NYSE: ACR) reports the results of operations for the fourth quarter ending December 31, 1989. Revenues for the quarter were $4,643,404 compared to $4,849,045 for the same period of 1988. The change is attributed to the company's sale of three properties during 1989.

Net loss for quarter ended Dec. 31, 1989 was $218,379, compared to net loss of $428,010, for the same period of 1988. The increase in income is attributed to the profit on the sale of three properties and scheduled rent increases on certain properties in the company's portfolio.

Net cash flow from operations for the fourth quarter ended Dec. 31, 1989 was $1,520,270 (or 42 cents per common share), compared to $1,702,969 (or 47 cents per common share) for the same period of 1988. The change in net cash flow from operations is due to an increase in professional and banking fees related to the company's refinancing of debt, fees and expenses associated with the sale of two properties, and a decrease of 1 percent in lease payments on two of the company's 77 facilities. Net cash flow from operations for the year ended Dec. 31, 1989 was $6,194,385 or 1.71 cents per share which was on target with the company's projections.

As a real estate investment trust (REIT), Angell Real Estate Company's funds, available for expenditures, such as dividend payments and portfolio reinvestment are determined by cash flow levels not net income. The companies primary business is to acquire depreciable assets which, as a result, cause large non-cash deductions from income. Accordingly, the company's commitment to its shareholders is to provide maximum after-tax cash flow.

Based in Winston-Salem, N.C., Angell Real Estate Company currently owns 77 nursing home facilities in 6 states with a total of 5,152 beds.

#90015p0305 01/15/1990 ~PR Newswire

SAN JOSE, CA (JAN. 15) PR NEWSWIRE - Trace Products (NASDAQ: TRCE) today announced operating results for the third quarter, ended Nov. 30, 1989.

For the third quarter, Trace announced sales of $6,137,000 and net income of $468,000, or $.05 per share, compared to sales of $5,667,000 and net income of $83,000, or $.01 per share, for the three months ended Nov. 30, 1988. For the nine months ended Nov. 30, 1989, sales were $18,730,000 and net income of $1,029,000, or $.11 per share, compared to sales of $18,006,000 and net income of $2,212,000, or $.23 per share for the like period a year ago.

Dennis P. McDonnell, president and CEO of Trace said, "Due to overall flat market demand, our sales for the quarter have increased only slightly in comparison to the same quarter of last year." McDonnell further comments that, "In the second quarter Fiscal Year '90, the company announced that it had entered into a non-binding letter of intent which provides for an initial proposed buyout of the company, subject to Trace Products' shareholder approval, by a private group (which consists of employees, management and major shareholders of Trace Products and Mountain Computer) and a subsequent proposed merger with the Media Products division of Mountain Computer of Scotts Valley, Calif. Negotiations are continuing in an effort to complete this proposed merger."

Trace Products is the industry leader in the design and manufacture of diskette duplication technologies and products for software publishers and other corporations distributing information on diskettes.

BISHOP, Calif. (JAN. 15) UPI - A moderate earthquake rippled through parts of California's Mono and Inyo Counties along the eastern slope of the Sierra Nevada mountain range Sunday night. No damage or injuries were reported.

The quake, measuring 4.5 on the Richter scale, was centered about 34 miles north of Bishop in an area that has frequent seismic activity, the U.S. Geological Survey in Menlo Park, Calif., reported.

The quake at 9:29 p.m. was felt by residents of Bishop, Mammoth Lakes and elsewhere in the sparsely populated area near the Nevada border, according to Pat Jorgenson of the USGS.

No damage or injuries were reported, according to the sheriffs' departments in the two counties.

The last big quake in the region was a 6.5 temblor in July 1986.

#90015u0361 01/15/1990 ~United Press International

HONG KONG (JAN. 15) UPI - British Foreign Secretary Douglas Hurd said Monday that Hong Kong's citizens must face up to the reality that the colony reverts to Chinese rule in 1997.

''We (Britain) must do what we can to ensure the final chapter in our long administration of Hong Kong is an honorable one and one which ends successfully,'' Hurd told businessmen in a speech.

''The basis of the future is not independence. But the basis of the future is one country, two systems,'' he said, referring to communist China's pledge to continue Hong Kong's capitalist system for at least 50 years after 1997. ''We have to make it work.''

Hurd, in an upbeat speech to Chamber of Commerce members, called for a continued dialogue between Britain and China, glossing over recent political friction between the two nations over Hong Kong.

Hurd said democratic reform in Hong Kong before 1997 was a matter for Britain and Hong Kong to decide - not China.

The direct election of lawmakers to Hong Kong's legislature has been of particular concern to Beijing, which wants to limit the number to 18 in 1991, while the colony's 60-member Legislative Council seeks 20 elected seats next year and a majority by 1997.

''This thing that we establish before 1997 should be part of a process which would continue in the years thereafter,'' Hurd said. ''That would be

the best plan. We are frankly not interested in scoring debating points about this.

''We want to start a process of democracy in Hong Kong which will attract sensible people in here to play a full role in political life.''

Hurd's four-day visit to Hong Kong, which began Saturday, is his first since taking office. His trip followed China's condemnation of plan to grant British citizenship to as many as 225,000 Hong Kong people in a bid to restore public confidence shattered by China's brutal crackdown on democracy forces in June.

''We had to balance our wish to be as generous as possible against our ability to accept people for settlement in Britain should that ever be necessary,'' he said, defending London's decision not to grant right of abode to all 3.25 million British overseas passport holders in the colony.

China charged the plan was subversive and accused Britain of violating the 1984 Sino-British Joint Declaration on Hong Kong by allowing much of the colony's top talent to leave.

Hurd described current Sino-British relations as ''difficult'' but said Britain needed and wanted to rebuild ties with Beijing.

Hurd defended the Joint Declaration, which set out the ground rules for China to resume sovereignty of Hong Kong and its 5.7 million people in 1997 at the end of Britain's 99-year lease, saying it was the best possible deal for the colony despite complaints that it was weighted heavily in favor of China.

''The Joint Declaration is the best framework.'' Hurd said. ''It requires a continuous discussion on equal terms with the Chinese government and it is, frankly, frivolous to pretend otherwise. What we have to do is to turn the Joint Declaration into reality.''

Hurd also defended Britain's move to begin forcibly repatriating Vietnamese boat people from the colony's crowded detention centers.

The first 51 boat people sent back to Vietnam Dec. 12 sparked widespread international criticism but Britain and Hong Kong have pledged to continue the policy.

''Hong Kong can't be expected to cope with an endless stream of immigrants from Vietnam who have no prospects of ever finding resettlement and a new home in the West,'' Hurd said.

''I look for greater and more practical understanding of this truth from the international community when we have the next meeting in Geneva of the

(U.N.) steering committee (on refugees) later this month.''

(JAN. 15) UPI - Around the World... Around the Clock... The Latest News from UPI...

Soviet television reports at least 22 people dead in the Soviet republic of Azerbaijan, where Moslems are fighting a race-based war to rid the republic of Christian Armenians. Government leaders have reportedly been abducted and their wherabouts are UNknown.

The Soviet government has rushed in more troops... but an Azerbaijani airport blockade has prevented some of them from being deployed. Soviet T-V reports that Azerbaijanis used anti-aircraft weapons to attack two military helicopters carrying Interior Ministry troops. They wounded a navigator and damaged one of the planes.

Filipino aurthorities say they have captured one of the leaders of last month's failed coup attempt. Retired police officer Billy Bibit allegedly led soldiers on a raid of the Customs Bureau armory at the outset of the raid. He is the second of 15 bountied rebel leaders to be captured.

Cuban diplomats in Panama say U-S troops confiscated their passports yesterday when they refused to let soldiers search their car. U-S military officials woN'T comment on the incident... which reportedly took place outside the Cuban Embassy. The Cubans are housing Manuel Noriega's wife and daughters.

Washington Governor Booth Gardner says he will ask President Bush to declare a major disaster area for 13 Washington counties and provide immediate assistance to Lewis County. Flooding last week in the county killed four people... forced the evacuation of 35-hundred people... and did more than one-Million dollars damage to homes and businesses.

#90015u0387 01/15/1990 ~United Press International

(JAN. 15) UPI - A Pacific storm front dumped snow and rain across California and left one youngster dead from exposure Monday while freezing temperatures returned to the mid-Atlantic Coast, coating lawns with snow and turning roads slick.

Up to 2 feet of snow fell over the weekend in the Sierra Nevada range in California and nearly 2 inches of rain drenched parts of the wine country north of San Francisco in the third day of heavy precipitation.

The National Weather Service predicted more rain was on the way, with another Pacific storm expected ashore Tuesday.

In Southern California, Ruben Allred, 12, died of exposure Sunday after becoming separated from a church group and spending a night in the San Gabriel Mountains during the season's first major storm.

To the south, a waterspout struck the San Diego Yacht Club and damaged several boats and a dock as a line of storms moved through the San Diego area. Rain also sent 4 feet of mud cascading onto a road near Lancaster and flooded a few homes. Stormy weather knocked out power to 7,000 homes in Los Angeles earlier in the weekend.

Washington Gov. Booth Gardner said he would ask President Bush to declare a major disaster area for 13 counties where millions of dollars in flood and wind damage was caused by last week's storms that also claimed four lives.

Floods forced evacuation of 3,500 people in hardest-hit Lewis County, destroying or damaging nearly 400 homes and 80 businesses. Storms beginning Jan. 6 packed winds to 130 mph and melted mountain snowpack that sent rivers surging over their banks.

A high-pressure system over the eastern half of the nation brought a warm, southerly flow of air into Texas, Louisiana, Arkansas, and Oklahoma, but also increased fire danger in the region.

A new high-pressure system in New Mexico Monday morning produced a few rain showers and snow above the 6,000-foot level.

High pressure kept the weather fair to partly cloudy over much of the South, where mild temperatures prevailed.

Temperatures in the Midwest warmed up to as high as the mid-40s at a time of year when highs usually range in the upper-20s, the weather service said.

Eau Claire in northwestern Wisconsin warmed to 22 degrees, and temperatures climbed to the south, with readings of 37 at Springfield, Ill., and 44 in St. Louis.

Complementing the unseasonably mild temperatures was a continued absence of snowfall. Skies were varied, from clear to mostly cloudy. Winds around the region were calm or light from the south and southwest.

A storm system slowly moved eastward from western Pennsylvania overnight, bringing with it snow mixed with freezing rain over the state. Up to 2 inches of new snow fell in southwestern Pennsylvania and in the northern

panhandle of West Virginia, while 4 inches coated higher elevations of the Laurel Mountains.

Occasional snow, sometimes mixed with freezing rain, fell after midnight in Harrisburg, Pa., and was moving east toward the Philadelphia area. The lows were from the mid 20s to mid 30s.

Light snow fell over most of Maryland, Delaware and south New Jersey, with snow mixed with sleet in the western parts Maryland and Delaware.

A high-pressure system brought clouds and cold temperatures to most of New England. Light snow fell over parts of Vermont, where the mercury dropped to the low single digits. Central New Hampshire also reported light snow and fog and temperatures in the low teens.

#90015u0390 01/15/1990 ~United Press International
(JAN. 15) UPI - TV Highlights:

Tuesday, January 16

6:30 p.m.
PBS, "Nightly Business Report."

7 p.m.
(Editors: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details).
ABC, "ABC's World News Tonight with Peter Jennings."
CBS, "CBS Evening News with Dan Rather."
NBC, "NBC Nightly News with Tom Brokaw."

8 p.m.
ABC, "Who's the Boss."
CBS, "Rescue 911."
NBC, "Matlock."

8:30 p.m.
ABC, "The Wonder Years" - Kevin is torn between his nice lab partner, who invites him to go to the school dance with her, and high hopes for a romantic date with a dream girl.

9 p.m.
ABC, "Roseanne" - Roseanne can't quite accept the prospect of an upcoming separation from her sister, Jackie; Becky takes Darlene to a party for older kids.
CBS, "CBS Tuesday Movie: 'Someone to Watch Over Me"' - Tom Berringer, Mimi

Rogers, Lorraine Bracco, Jerry Orbach, and John Rubinstein star in a romantic thriller about a New York City detective's affair with a lovely socialite he is assigned to protect.
NBC, "In the Heat of the Night."

9:30 p.m.
ABC, "Coach."

10 p.m.
ABC, "thirtysomething" - Nancy is anxious as her book, "Whose Forest is This?" is finally published.
NBC, "Midnight Caller."

11:30 p.m.
ABC, "ABC News Nightline."
CBS, "The Pat Sajak Show."
NBC, "The Tonight Show Starring Johnny Carson."

12:30 a.m.
CBS, "Night Heat" - A young woman is hit by a car and killed; O'Brien and Giambone are helped in their investigation by an unexpected ally, the local priest Father O'Malley.
NBC, "Late Night With David Letterman."

1:30 a.m.
CBS, "Nightwatch."
NBC, "Later With Bob Costas."
PBS, "Today's Japan."

NEW YORK (JAN. 15) UPI - All you need to know about current Broadway attractions, theaters, leading players and ticket situations (opening dates in brackets):

Credit card holders can order tickets by telephone as indicated. Orchestra seats for musicals run $45, $47.50 and $50 and for plays $37.50 to $40. Tele-Charge and Ticketron add a booking fee, and Ticketmaster adds a service charge. There are no additional fees for theater charge phones. Tele-Charge: 212 239-6200; Ticketron: regional offices or 212 399-4444; Ticketmaster: 212 307-7171.

"Black and Blue" - Minskoff; an all star cast pays tribute to jazz and blues in a dazzling new musical by the creators of "Tango Argentino"; available (1-26-89) (Teletron).

"Cats" - Winter Garden; one of the most fantastically staged shows in

Broadway history, a knockout musical based on a T.S. Eliot fable with Andrew Lloyd-Webber music; capacity (10-7-82) (Tele-Charge).

"A Chorus Line" - Shubert; longest-running show in Broadway history, an absorbing musical about Broadway chorus "gypsies"; available (7-25-75) (Tele-Charge).

"The Circle" - Ambassador; Rex Harrison, Glynis Johns and Stewart Granger make this fluffy 1921 Somerset Maugham drawing room comedy sparkle again; available (11-14-89) (Tele-Charge).

"City of Angels" - Virginia; a new smash hit musical thriller by Larry Gelbart with music by Cy Coleman about the detective novel writer in Hollywood; available (12-7-89) (Ticketron).

"A Few Good Men" - Music Box; Tom Hulce and Roxanne Hart score in a stunning new play about a military court martial that pits duty against conscience; available (11-15-89) (Ticketron).

"Grand Hotel" - Martin Beck; Tommy Tune's eye-filling new musical is a generally effective adaptation of Vicky Baum's novel about 1920s Berlin; available (11-12-89) (Ticketron).

"Gypsy" - St. James; Tyne Daly is a searingly obsessive Mamma Rose in this effective 30th anniversary revival of the Styne-Sondheim musical; available (11-16-89) (Ticketron).

"The Heidi Chronicles" - Plymouth; Brooke Adams gives a fine performance as a woman comes of age in the feminist era in this new, Pulitzer and Tony prize-winning Wendy Wasserstein comedy; near capacity (3-8-89) (Tele-Charge).

"Jerome Robbins' Broadway" - Imperial; an electric Tony Award-winning musical smash with emphasis on dancing wrought from the hit shows choreographed by Robbins; capacity (2-26-89) (Tele-Charge).

"Lend Me a Tenor" - Royale; a hilarious new comedy set in the 1930s with a powerhouse cast headed by Philip Bosco, Victor Garber and Tovah Feldshuh; available (2-2-89) (Tele-Charge).

"Les Miserables" - Broadway; the spectacularly staged Tony Award-winning pop opera from London based on Victor Hugo's novel, directed by Trevor Nunn; capacity (3-12-87) (Tele-Charge).

"M. Butterfly" - O'Neill; a totally fascinating production about a French diplomat (Tony Randall) in love with a Chinese spy in drag; available (3-20-88) (Ticketron).

"Meet Me in St. Louis" - Gershwin; a lavishly staged musical version of the 1944 MGM film with ten new songs and a powerhouse cast; available (11-2-88) (Ticketron).

"The Merchant of Venice" - 46th Street; Peter Hall's production of Shakespeare's drama notable for Dustin Hoffman's Shylock; available (12-19-89) (Ticketron).

Phantom of the Opera" - Majestic; Andrew Lloyd-Weber's enchanting, excitingly staged operatic treatment of the beauty and the beast story set at the Paris Opera; capacity (1-26-88) (Tele-Charge).

"Rumors" - Broadhurst; Neil Simon hits the jackpot again with a mostly wonderful farce about the coverup of a possible suicide attempt; available (11-17-88) (Teletron).

"Sweeney Todd" - Circle In The Square; an intimate revival of the Stephen Sondheim's sprawling prmusical about a murderous London barber, starring Bob Gunton and Beth Fowler; available (9-14-89) (Tele-Charge, Ticketron).

"Tru" - Booth; Robert Morse recreates Truman Capote in a one-man play set in 1975; available (12-14-89) (Tele-Charge).

Opening: Nil.

Closed: "The Tenth Man" (1-14-90) (41 performances).

#90015u0393 01/15/1990 ~United Press International

(JAN. 15) UPI - The soviet newspaper Pravda reports that the Soviets have executed a Soviet agent of the C-I-A. The agent... identified only by his code-name ''Donald,'' was reportedly working for the Soviet government and transmitting secrets to American authorities for two decades before he was caught.

The Chicago Police Department is investigating why two of its officers allowed a released mental patient to return to a home with her nine-year-old daughter. The daughter was found stabbed to death with a message written in blood over her body signed by her mother. The message mentioned ''Satan.'' The mother is charged with murder.

Typhoon Koryn lashed Guam with 90 mile an hour winds for 15 hours yesterday and this morning. 60 percent of U-S military facilities and 30 percent of civilians are without power after the storm. The typhoon struck so fast yesterday... there was NO time to move several U-S B-52 bombers at Anderson Air Force Base. The planes survived the storm.

The British Labor Party, The Irish government, and Northern Irish parties are demanding to know if British forces have adopted a shoot-to-kill policy in Northern Ireland. British officials shot dead two robbers running from a betting shop with phony guns and a third man waiting for them in a car. NONE of the three had any I-R-A connections.

A legally blind Chicago woman says it was the smell of cologne that led her to identify the man she says raped her. The woman told police she was attacked in the laundry room of her apartment. She remembered the smell of the cologne that her rapist was wearing and she has identified a 14-year-old as the attacker.

#90015u0467 01/15/1990 ~United Press International

(JAN. 15) UPI - The nation observes Martin Luther King Day... technicians are looking at a problem aboard the space shuttle... reports of pre-Noreiga corruption in Panama... and more UNrest in the Soviet Union. Those stories and more, next from U-P-I.

The Reverend Martin Luther King Junior would celebrate his 61st birthday if he were alive today.

Instead, the civil rights leader was shot to death 22 years ago and today is a national holiday in his honor. It's the fifth national observance... but the first to actually fall on Martin Luther King's birthday.

A parade expected to draw as many as one-half-Million people in Atlanta will be televised nationally. A Chinese student dissident will be the grand marshal. A statue of the civil rights leader will be unveiled in Asheville, North Carolina. And the Liberty Bell will ring in Philadelphia at half-past noon, Eastern Time to honor King.

But despite the passing of time, the holiday is NOT totally accepted across the country.

A popular black preacher who is in Atlanta for the holiday... the Reverend Cecil Williams of the Glide Memorial Methodist Church in San Francisco... says his home has been plastered with swatiskas and racially threatening messages. Wiliams says this has NEVER happened before.

Although schools and government offices will be closed, many businesses and banks will be open. In Buffalo, New York, civil rights and civic groups threaten to picket a bank in protest of the bank's policy to remain open on Martin Luther King Day.

In Boston, minority group activists plan to picket Mayor Raymond Flynn's appearance at a breakfast honoring King. They also called for a week-long

boycott of Boston's two major newspapers because of the mayor's and media's initial response to a racially tinged murder case.

#90015u0482 01/15/1990 ~United Press International

WASHINGTON (JAN. 15) UPI - Americans are giving President Bush better grades, but not as good as his wife, according to a poll published Monday, which also showed continued low ratings for Vice President Dan Quayle.

Bush recieved a grade of A or B from 63 percent, up 12 percentage points since a similar poll in October in the USA Today poll. Sixty-two percent feel better about Bush because of the way he handled the Panama crisis, up 12 points from right after the December invasion.

On the domestic front, 45 percent think Bush has ''taken charge'' in Washington instead of reacting to events, up 16 percentage points from April.

However, Bush gets better marks for his foreign policy than he does for his domestic affairs with 74 percent approving of his dealings with the Soviets and only 25 percent approving of his handling of the nation's deficit.

First lady Barbara Bush received an A or B from 76 percent, up 5 percentage points from October, with 48 percent of the women and 37 percent of the men giving her an A.

Quayle rated an A or a B from only 23 percent, down from 24 percent in April and up from 21 percent in October.

His spokesman, Dave Beckwith, told USA Today, ''The important thing to the vice president is how well the president is doing.''

The USA Today survey of 810 adults was conducted by telephone last Wednesday and Thursday by the Gordon S. Black Corp. and has a margin of error of 3.5 percent.

-30- 1663

#90015u0495 01/15/1990 ~United Press International

(JAN. 15) UPI - Space shuttle Columbia astronauts have passed the half-way point of their 10-day mission with few major problems, except an apparent malfunction in one of three critical on-board measurement devices.

The so-called ''I-M-U-1'' is supposed to tell the shuttle's computers where the ship is in space. Instead, I-M-U-1 generated incorrect data three times overnight and triggered an alarm at one point that woke up the

astronauts.

But later... engineers decided the device was working properly and it was put back on line.

The astronauts are spending the day taking more pictures of the earth's surface for an environmental documentary. They're also conducting medical experiments on themselves to gather data for more long-term missions.

Two astronauts are using a ''lower body negative pressure'' device that uses pressure to draw fluids from the upper body... where they tend to pool in weightlessness... to the lower body. The experiment is designed to keep astronauts' bodies in Earth-shape so they woN'T have long re-adjustment periods after they land.

There are new disclosures about top-level official corruption in the Panamanian governments controlled by General Manuel Noriega and his predecessors.

Panama's general accountant, Ruben Dario Carlos, says in two newspapers that several former presidents maintained ''secret state funds'' from which money could be withdrawn without providing receipts. Carlos reportedly says Panamanian presidents spent more than 36-Million dollars from public funds between 1972 and 1989.

And that does NOT include Noriega himself. Noriega is believed to have kept tens of Millions of dollars in secret bank accounts abroad.

Noriega's wife, Felicidad, his three daughters, a son-in-law and a grandson are still being given refuge in the Cuban Embassy in Panama City. That caused a diplomatic confrontation between U-S troops and Cuban diplomats yesterday afternoon.

A Cuban official says troops detained Cuba's ambassador and three other Cuban diplomats for two hours... confiscating their passports when the envoy refused a search of their car. The passports were returned and the diplomats were allowed to return to their compound.

Officials at the U-S Embassy and the U-S Southern Command would NOT comment- NOT even to confirm the incident.

The Cuban Embassy has been surrounded by U-S soldiers and armored cars since the first days after the U-S invasion.

-30- 2645
#90015u0520 01/15/1990 ~United Press International
(JAN. 15) UPI - Soviet T-V reports chaos in the republic of Azerbaijan

... where a Moslem crusade against Christian Armenians has killed at least 22 people and injured 26 in the capital of Baku

Government leaders apparently have been abducted in one Azerbaijani region and their whereabouts are UNknown.

The Soviet government has rushed in more troops.

Azerbaijanis armed with anti-aircraft weapons and machine guns attacked two military helicopters carrying Interior Ministry troops... wounding a navigator and damaging one of the planes. The Azerbaijanis blockaded an airport just as re-inforcement troops were landing... preventing the soldiers' deployment. Gunfire rang out and one soldier was killed in the airport battle.

About 150-thousand Azerbaijanis gathered at Baku's central square... where activists from the Azerbaijani Popular Front demanded that all Armenians be driven from the city of one-point-seven-Million people on the Caspian Sea.

In the Armenian capital of Yerevan... 300-thuosand people rallied to protest the violence in Azerbaijan.

The five permanent members of the United Nations Security Council meet today in Paris to discuss the latest diplomatic efforts to end the fighting in Cambodia following the withdrawal of Vietnamese troops.

Representatives of the United States, China, France, the Soviet Union and Britain will discuss a proposal by Australia that would let the United Nations itself administer Cambodia for a year until free elections can be held.

The proposal has conditional approval from all the interested parties except the Khmer Rouge and its prime ally... China. The Khmer Rouge is blamed for one-Million deaths when it ran Cambodia. Vietnamese-backed communists overthrew the Khmer Rouge in 1978.

The U-N is available for such a role... but members are being warned it would be expensive.

-30- 2047

#90015u0526 01/15/1990 ~United Press International

(JAN. 15) UPI - Senator Paul Simon says a new class of young people is on the streets... homeless ones. Simon, an Illinois Democrat, says the homeless young people doN'T choose to leave home, as runaways do.

A government study of homeless young people presents what Simon calls a

''troubling picture.''

The General Accounting Office study indicates that the population of homeless young is growing in both urban and rural areas. The overall number of homeless youths in the United States is estimated to be as high as one-Million.

The study found that although homeless youths receive some assistance under the Runaway and Homeless Youth Act... federally funded shelters are better prepared to help runaways, whose profiles and needs differ from the homeless.

The study focused on the relatively small percentage of homeless youths living in federal shelters. Because residence at federal shelters is limited to 15 days, the report says long-term problems of homeless youth... such as illiteracy and drug abuse... generally are left unsolved.

Simon sponsored legislation passed by Congress late last year that authorizes 10-Million dollars to operate transitional living programs for older teens in the homeless youth population.

As Simon put it... ''This is the last chance to reach them before they become adults.''

-30- 1505

#90015u0572 01/15/1990 ~United Press International

PARIS (JAN. 15) UPI - The five permanent members of the U.N. Security Council met Monday to examine the latest diplomatic efforts to end the fighting in Cambodia amid new signs the warring factions in the conflict remained far apart.

The two-day meeting opened Monday morning at the Kleber conference center, the site of last summer's international conference on Cambodia, which failed to reconcile the nation's four warring factions before the withdrawal of Vietnamese troops last fall.

The Security Council meeting opened amid a Khmer Rouge guerrilla offensive against the Vietnam-backed Cambodian government and a new Australian diplomatic initiative calling for an enhanced U.N. role in Cambodia.

The proposal would allow the United Nations to administer the country for at least a year until free elections can be held to select a new government.

It would also set up an international peacekeeping force and a control mechanism to monitor a cease-fire.

But Prince Norodom Ranariddh, commander of a Cambodian resistance group, Monday rejected proposals for a peace settlement that would maintain both resistance and pro-Vietnamese governments under U.N. trusteeship.

''The ... proposal is tantamount to dividing Cambodia into two zones,'' said a press statement signed by Ranariddh, the commander of the faction loyal to his father, Prince Norodom Sihanouk.

''As Cambodians we categorically reject all schemes of partition of Cambodia,'' he said.

Ranariddh also rejected a call for the United Nations to verify the withdrawal of Vietnamese troops from Cambodia, saying the U.N would have ''too limited power to effectively verify the Vietnamese pullout.''

The Khmer Rouge radio reported that thousands of people were fleeing the western city of Battambang after a series of Khmer Rouge attacks last week.

Government officials, however, have denied the attack was serious.

The five permanent Security Council members - the United States, China, France, the Soviet Union and Britain - represented at the vice foreign minister or assistant undersecretary level, were also expected to examine neighboring Thailand's proposal for expanding talks in Jakarta, Indonesia, and a Soviet proposal for a moratorium on arms shipments to Cambodia, diplomats said.

The Australian plan, based on an idea of Rep. Stephen Solarz, D-N.Y., has received at least conditional approval by most of the parties involved in the conflict, with the exception of the Khmer Rouge and its prime ally, China.

Beijing has backed the idea of an interim coaliton government in Cambodia involving all four warring factions, including the Khmer Rouge.

But Cambodian Prime Minister Hun Sen, installed by the Vietnamese 11 years ago, has refused to allow the Khmer Rouge any role in government.

The Australian plan would avoid that stumbling block by allowing the United Nations to administer Cambodia instead.

U.N. Secretary-General Javier Perez de Cuellar has said the United Nations is available for such a role, but it would require careful study and would be expensive.

Hun Sen and Vietnamese Deputy Prime Minister Nguyen Co Thach began talks in Ho Chi Minh City on proposals to settle the Cambodian conflict, the Vietnam News Agency said.

Hun Sen arrived in Ho Chi Minh City, formerly Saigon, Saturday where he met with Thach, the agency said.

Vietnam invaded Cambodia in 1978, ousting the Khmer Rouge, who were blamed for the deaths of more than 1 million people and for bloody attacks on Vietnamese border villages.

Vietnam said it had completed its troop withdrawal last September, although accusations occasionally surface that Vietnamese soldiers still operate in Cambodia.

-30- 3949

#90015u0574 01/15/1990 ~United Press International

MOSCOW (JAN. 15) UPI - Lithuanian Communist Party leader Algirdas Brazauskas, who declared his party independent of Moscow, was selected Monday president of the Baltic republic, which is trying to secede from the Soviet Union.

Brazauskas, who last week faced down Soviet leader Mikhail Gorbachev by refusing to rescind his party's independence, replaced the unpopular Vytautas Astrauskas, who abruptly resigned the presidency of the republic.

Brazauskas, 57, was selected president by the Lithuania Supreme Soviet, the republic's parliament, the official Soviet news agency Tass said. Technically, he was elected to the post of chairman of the Lithuanian Supreme Soviet, which is the republic's titular presidency.

By gaining the presidency, Brazauskas consolidated his hold on power, increasing his chances of leading the Baltic republic out of the Soviet Union in what would be the first break-up of the Soviet Union since it was constituted in 1924.

Lithuania was annexed to the Soviet Union in 1940, ending a brief independence between the first and second world wars but under Gorbachev's perestroika reforms, the Lithuanians have regained much sovereignty.

They have won economic autonomy from Moscow's central planning system and last year they passed a referendum law that would allow them to call a plebiscite on the possible political independence of the republic.

In his three-day visit to Lithuania last week, Gorbachev implored Brazauskas to reconsider his party's split from Moscow of Dec. 20 but the silver-haired Brazauskas said only an independent Communist Party could remain a political force in the republic.

Brazauskas was overwhelmingly elected president. Tass said 228 deputies

voted for him, with four opposed and 19 abstaining.

Brazauskas, who Gorbachev has expressed great respect for despite their political differences, is eminently fit to supervise the republic's grappling with economic independence. He is a doctoral candidate in economics and was one of the architects of Lithuania's regional economic autonomy.

#90015u0717 01/15/1990 ~United Press International

(JAN. 15) UPI - A Chinese student who led protests in Tiananmen Square last spring will lead a parade of civil rights leaders in Atlanta today honoring the memory of Martin Luther King Junior. All but four of the 50 states are giving employees the day off to honor the slain civil rights leader. Activists complain that only 18 percent of the country's businesses are recognizing the holiday.

Police in Italy say at least 29 people were injured today when bandits holding up a post office on the outskirts of Bologna let a bomb they were carrying go off pre-maturely. Most of those injured were elderly people lining up to collect their pensions. The robbers fled with several thousand dollars and their guns blazing.

Soviet television reports say that well-armed Moslem Azerbaijanis are dragging the Soviet Azerbaijan Republic into anarchy as they fight to rid the republic of its Christian Armenian minority. At least 22 people have been killed... most of them Armenians. Next-door in Soviet Armenia... 300-thousand people are rallying against the violence in Azerbaijan. Soviet troops caN'T bring the situation under control.

British Foreign Secretary Douglas Hurd told the Hong Kong Chamber of Commerce today that independence is NOT in Hong Kong's future. Hurd told citizens of Hong Kong worried about hard-line Chinese communism that they'd better get used to the idea that China will be taking over in 1997 and try to make the system work. China today named a new envoy to Hong Kong. He's an ally of hard-line Premier Li Peng.

-30- 1709

#90015u0728 01/15/1990 ~United Press International

(JAN. 15) UPI - The government of Guatemala says it was death squads from another country who came in and killed two leftist leaders as they headed to Guatemala's airport. The bodies of two leaders of liberal parties in Guatemala and El Salvador were found shot through the temples on a country road. The government does NOT say which country the death squads were from... but notes that activists have infiltrated Guatemala's refugee camps.

The United Nations Security Council meets in Paris today to discuss a proposal to have the U-N take over Cambodia. The Australian proposal to end Cambodia's civil war would have the U-N administer the country for at least a year until free elections can be held. The plan has conditional approval from most interested parties. One of the country's four factions... the Chinese-backed Khmer Rouge... objects.

A mental patient described as having a split personality has been arrested by Chicago police for allegedly stabbing her nine-year-old daughter to death and leaving her in an abandoned building. The girl was found next to a message written in blood mentioning ''Satan'' and signed by her mother. The police department is investigating why its officers allowed the recently-released patient to return to her daughter's home.

Polish Solidarity leader Lech Walesa told two-thousand Sunday worshippers outside a Polish church yesterday that there will be NO return to the mistakes of Poland's communist past. He asked people to bear with the country's harsh austerity program. Food prices have gone up 50 percent since the first of the year and the government announced an 80 percent hike in the price of Vodka yesterday.

-30- 1842

#90015u0752 01/15/1990 ~United Press International

LONDON (JAN. 15) UPI - After almost a year in hiding from Moslem threats to his life, author Salman Rushdie gave his first interview Monday and said he wished those trying to kill him would read the book they regard as blasphemous.

In a telephone interview from a secret location, the 42-year-old author of ''The Satanic Verses'' told The Guardian newspaper of his feelings about the 11 months he has spent under police protection since the novel's publication drew a sentence of death last Valentine's Day from the late Iranian spiritual leader Ayatollah Khomeini.

''One would wish the thing to come to an end,'' Rushdie said in the interview. ''But I'm not the maker of the problem. I think if some of the people who protested about the book took the trouble to read it, they would see that it is not unsympathetic to them.

''The main characters are British Moslems and they are not treated unsympathetically,'' he said.

As Moslems from Yorkshire to Lahore burned Rushdie's book, and rioters protesting the novel were shot dead in Pakistan and India, Indian-born Rushdie took up an offer of protection last Feb. 14 from Britain's Special Branch.

His whereabouts have been a secret ever since.

''The Satanic Verses'' is about two Indian immigrants who fit into neither British nor Indian culture. Moslem fundamentalists believe the novel is blasphemous and object to its suggestion that the Koran was written by the prophet Mohammed, and is not God's word.

The novel has been banned in Pakistan, India, Saudi Arabia, Egypt, Malaysia, South Africa and Iran.

''One of the things this has shown is that the world is very small,'' Rushdie said. He said he did not think moving to another country would make him any safer from attack.

The author, who won the Booker Prize for fiction in 1981 for the novel ''Midnight's Children,'' said he was writing another book - for children - which he hoped to finish in March.

''I can't say I'm working in quite my normal way,'' he said. ''But it's easier when I'm working.''

There is no apparent end in sight to Rushdie's ordeal of secrecy, and the author said it was taking its toll on him.

''It would be impossible not to be affected by this degree of hostility, which is totally misplaced. I am not the enemy of my own people. I do not feel like the enemy of my people,'' he said.

He made no apologies for his book. ''The paperback should be published,'' he said, commenting on calls for the paperback edition to be withheld to avoid further Islamic protest.

#90015u0763 01/15/1990 ~United Press International

(JAN. 15) UPI - Prices on the Singapore Stock Exchange plummeted in active trading Monday as investors worried over Friday's heavy losses in Tokyo and on Wall Street.

The key Straits Times Industrial Index, which fell 6.9 points Friday, tumbled 33.63 points to 1525.54. The narrower All Singapore Index dropped 9.32 points to 421.46.

Turnover was just over 155 million shares, compared with 146 million traded Friday.

Analysts said investors threw out their scripts from the opening bell

sending the Straits Times Industrial Index plunging 34.6 points by midday. Traders cited worries over Friday's 71.46 point decline in New York and the 653.36 point plunge in Tokyo.

However, some late bargain hunting helped to stop the drop. Analysts said investors took profits now fearing another major crash.

Khong Guan Flour led the declining issues, followed by Jurong Shipyard, Singapore Airlines (domestic shares), Singapore Bus, Singapore Airlines (foreign shares) and Fraser and Neave ordinary.

Among the day's few gainers were Sembawang Marinetime, Singapore Building Society, Lum Chang Loan, Eu Yan Sen Loan and Sembawang Shipyard.

Elsewhere in Asia, the Tokyo Stock Exchange was closed Monday for the national holiday of Adults' Day. Trading will resume of Tuesday.

In Hong Kong, stocks closed sharply lower in line with other markets after the dramatic drops Friday in Tokyo and New York.

The Hang Seng Index, which lost 19.58 points on Friday, fell 49.25 points to 2786.69. Utilities fell 37.47 points, financials shed 30.47, industrials lost 48.74 and properties closed down 106.04 points.

Turnover amounted to 541 million shares, slightly below the 550 million shares traded Friday.

Analysts noted the market found some support at the 2780 level in the Hang Seng Index.

Brokers said local share prices will be a captive of overseas markets for the next few days, as investors ponder the significance of Wall Street's 71-point decline Friday after the release of higher-than-expected inflation data.

Ferris Bye, a broker with Crosby Securities said, "it was an orderly retreat."

In Australia, stocks closed lower in light trading on the Sydney Sharemarket following the losses on other world markets.

The All Ordinaries Index, which climbed 17.8 points Friday, tumbled 31.9 points to 1681.7.

Selling was widespread as the All Resources Index lost 20.4 points to 962.5 and the All Industrials Index dropped 46.7 points to 2624.5.

Volume amounted to 83.4 million shares, well below the 107 million shares

changing hands Friday. Declines overwhelmed advances 294 to 90.

Most of the selling was focussed on the top stocks. BHP lost 18 cents to $9.80, CRA lost 25 cents to $12.25, Brambles lost 35 cents to $14.15 and Adelaide Steam fell 16 cents to $6.40.

The banks also came under pressure with Westpac Bank off ten cents to $5.66, ANZ Bank down eight cents to $6.04 and NAB Bank dropping 18 cents to $6.56.

In the mining sector, Woodside Mines lost 20 cents to $3, WMC Mines eased 14 cents to $6.48 and MIM lost ten cents to $2.40.

#90015u0873 01/15/1990 ~United Press International

(JAN. 15) UPI - The Soviet news media reports that two-days of anti-minority violence is over in the capital of Azerbaijan. Moslems rioted in Christian neighborhoods of Baku the last two days. But... there's NO report of an end to nationalist strife in the Moslem republic. Nationalists control Lenkoran, and nationalists fought with Soviet troops flown into the city of Kirovabad.

Moscow reports a new president in Lithuania. The Soviet news media said today that Lithuanian Communist Pary leader Algirdas Brazauskas was selected president of the Baltic republic. He declared his party independent of Moscow. Brazauskas replaces an UNpopular president who resigned abruptly.

Bulgaria's new leaders have ended the Communist Party's 43-year-old monopoly on power. The Bulgarian National Assembly today approved constitutional changes that open the path to free elections. The constitution now declares Bulgaria a socialist country.

A bomb that robbers took to a post office in Italy exploded during their hold-up today. Police say at least 29 people were hurt during the bombing and robbery in Bologna. The robbers fled with an estimated several hundred thousand dollars. Witnesses say five or six bandits were involved.

Columbia's astronauts are working on experiments and taking photographs of the Earth again today. Officials say a problem with one of three devices that tells the shuttle's computers the ship's location in space is NOT interfering with the crew's work. Engineers at Mission Control in Houston are studying the problem.

For the first time, Dr. Martin Luther King Junior Day falls on the actual birthday of the slain civil rights leader. King would have been 61 years old today. It's a national holiday and a state one, too... except in

Arizona, Montana, Idaho and New Hampshire.

(JAN. 15) UPI - A California storm is blamed for one death, deep snow and drenching rain. A 12-year-old boy died from exposure while lost in the snow in the San Gabriel Mountains. The Sierra Nevada received up to two feet of snow during the weekend. The wine country north of San Francisco received nearly two inches of rain.

Washington Governor Booth Gardner says he will ask President Bush to declare 13 counties major disaster areas. The area suffered Millions of dollars in damage from flooding and high winds in storms last week. Four people died.

Boston police have sent to the F-B-I crime lab in Washington a .38 caliber revolver implicated in the Carol Stuart murder case. The gun was recovered from a river on a tip from Charles Stuart's brother last week. The white furrier killed himself after saying a black man killed his wife.

Police in Des Moines, Iowa, say a quarrel of some kind led to the shootings of four men in the parking lot of an apartment complex. Three of the men shot were brothers. Two died. Two guns were recovered.

Two minor injuries are reported in Guam from Typhoon Koryn. The typhoon knocked out electricity and damaged crops when it struck Guam during the weekend. Koryn is reported near Saipan today.

NO damage NOR injuries are reported in the California Sierra Nevada, where an earthquake was reported last night. The quake measured four-point-five on the Richter scale. It was centered about 34 miles north of Bishop.

A freight train hit an overloaded bus trying to race it through a crossing in Mexico yesterday. At least 35 people were killed and 30 others wounded. The crash was in the state capital of Leon, 185 miles northwest of Mexico City.

The Nevada Highway Patrol says 30 people on a Greyhound bus were taken to hospitals for examination after the bus skidded out of control and overturned. The accident was on rain-slick Interstate 15 just outside Las Vegas yesterday.

An Amtrak train pulled into Chicago late yesterday afternoon... six hours later but in good shape. A bomb threat caused a six-hour delay in Rockwood Pennsylvania. NO bomb was found.

''It's Gary Shandling's Show'' took the Cable Excellence Award for comedy

series last night at the presentation in Los Angeles. ''The Ray Bradbury Theater'' took honors for cable t-v dramatic series.

Analysis By: Steve Gerstel

WASHINGTON (JAN. 15) UPI - Sens. James McClure, 65, William Armstrong, R-Colo., 52, and Gordon Humphrey, R-N.H., 49, are walking off the job at the end of this year.

Given their ages, their salaries and the success they have enjoyed in their chosen work, the retirements would be unusual even in the real or the private world.

That they are leaving the Senate, a highly coveted position open only to 100 at any given time, makes it almost astounding. Senators normally cling to the office until death or the voters remove them.

Of course, there are retirements every election year: Two years ago, it was Sens. William Proxmire, D-Wis., Robert Stafford, R-Vt., Daniel Evans, R-Wash., and Paul Trible, R-Va. But Stafford and Proxmire were well into their 70s; Trible decided to run for governor; and Evans never was happy in Washington.

Much more common is the penchant among senators to go after still one more term, no matter what age, no matter what infirmity. In the coming election there are a number of senators seeking re-election who, in age, dwarf the three retirees.

Going to the post again are Sens. Strom Thurmond, R-S.C., 87, Claiborne Pell, D-R.I., 71, James Exon, D-Neb., 68, Howell Heflin, D-Ala., 68, Jesse Helms, R-N.C., 68, and Mark Hatfield, 67.

Those ages for senators seeking re-election are not unusual, even though a six-year term will carry Thurmond into his 90s, Pell close to 80 and the others well into their 70s.

Sen. Dan Nickles, R-Okla., chairman of the Republican Senatorial Campaign Committee, although not happy, said he could understand McClure's decision saying the Idaho senator has been in "elected office since 1950 and that's a long time for public service."

But Nickles also conceded it is "unusual" that Armstrong and Humphrey are leaving after two terms, a time when senators are moving into positions of power in the tradition-steeped Senate.

No matter, the decision by the three will make it even harder for the GOP's probably impossible mission of recapturing control of the Senate in the fall elections. McClure, Armstrong and Humphrey are all proven statewide vote-getters who won their last elections with big majorities.

Nickles expresses confidence in the three Republicans, all members of the House, who will probably be the nominees in the states with vacant seats - Rep. Hank Brown in Colorado, Larry Craig in Idaho, and Rep. Bob Smith in New Hampshire. But Nickles is quick to acknowledge that "any open seat is going to be seriously challenged - there aren't that many open seats."

Nickles prefers to look ahead to 1992 and 1994 when he anticipates that Democrats - who will be putting up more seats in those years - will be the ones retiring. "I see a lot of Democrats retiring ... more than Republicans," Nickles says. That, however, is a political long way off and doesn't help Republicans this year.

#90015u1009 01/15/1990 ~United Press International

(JAN. 15) UPI - The five world powers that make up the United Nations Security Council have opened a meeting in Paris to discuss putting Cambodia under the control of the U-N. Australia has proposed that the Vietnamese-backed communist government of the war-torn country be replaced by a U-N force while the country prepares for elections.

Armed robbers in Italy made off with hundreds of thousands of dollars today after wounding at least 29 people in a post office on the outskirts of Bologna. The bandits apparently had a bomb that went off pre-maturely... injuring elderly people who had lined up at the post office to collect their pensions.

Seven members of the outlawed African National Congress who have been released from jail leave today for Zambia to talk with exiled A-N-C leaders. The talks will center on prospects for opening negotiations with the South African government. The meeting heralds a significant step toward negotiations between the A-N-C and the minority white government.

A 14-year-old Chicago boy is charged with raping a blind woman. The legally blind woman... who sees only hazy images... was able to identify the accused rapist by the smell of his cologne. She told police she recognized the cologne... and the size and roughness of the boy's hands.

Cuban diplomats in Panama are accusing U-S troops of taking their passports because the diplomats wouldN'T let soldiers search their car. The Cubans told soldiers they could see into the car through the windows. The U-S Southern Command won't comment on the incident... which reportedly took place outside the Cuban embassy gates.

#90015u1041 01/15/1990 ~United Press International

BOLOGNA, ITALY (JAN. 15) UPI - Bandits used an explosive charge to blow a hole in the internal wall of a post office and steal several hundred thousand dollars Monday, injuring 44 people, police said.

Most of the injured were elderly pensioners who were released from city hospitals after treatment for minor injuries. But one man had his right foot amputated and another was in serious condition with a big wood splinter in his leg, hospital doctors said.

Doctors said 44 people were treated for injuries, mostly caused by flying glass. Some were treated for severe shock and ear damage caused by the explosion.

Police Chief Luciano Cannarozzo said three bandits rushed into the post office shortly after 9 a.m. They fired two pistol shots into the ceiling and ordered the 18 post office employees and about 70 customers to lie on the floor.

Most of the customers were lined up at the post office counters to collect their monthly state pensions.

The bandits fixed the explosive charge to a wall of the cashier's office, where sacks of money to pay the pensions had been delivered by an armored van a few minutes before the bandits went into action, the police chief said.

The explosion blew a hole in the wall of the office and the bandits grabbed several sacks, estimated to contain several thousand dollars.

The bandits escaped with the money bags in two stolen cars waiting outside the post office with accomplices. Police later found the cars abandoned nearby in a suburban district of Bologna.

Police said there were blood stains on the sidewalk, indicating one of the bandits was injured in the explosion.

''The scene that met my eyes after the explosion was devastating,'' chief cashier Pietro Montalti told reporters. ''I saw the head of one of the post office employees emerge from a pile of rubble.''

Montalti said some of the money bags were covered with debris from the explosion and thus were saved from the bandits.

The blast shattered the metal shutters and windows of the post office on

the ground floor of a seven-story building.

As the bandits fled, they fired several shots in the street to cover their getaway, and police found bullet holes in the windows of a nearby bar and a Fiat auto salesroom across the street.

Five or six bandits drove up to the post office in a white Volkswagen station wagon, said Mauro Bianchini, 27, who saw the raid from his office in the Fiat auto salesroom.

While the other bandits remained in the car, at least two ran into the bank, their faces masked with hoods and carrying a pistol and a pump-action shotgun, police said.

#90015u1090 01/15/1990 ~United Press International

Analysis By: Jan A. Zverina

DETROIT (JAN. 15) UPI - With several automakers already turning the calendar ahead by showing their 1991 models, it's time once again to pick the best buys in cars and light trucks for 1990. There is no single "Car of the Year," as some magazines might have one believe. That's because there is no single type of buyer.

That may be why offerings from automakers have grown from 149 nameplates in 1980 to no less than 275 nameplates at the close of 1989, providing an array of more than 600 models to choose from.

Let it be said up front that every permutation of every domestic and import model could not possibly be driven. Otherwise it would not be before the next century that these envelopes were opened, so to speak.

But news of a good car travels fast, so just about everything worth driving has been driven, each for about one week and a minimum of 250 miles on a variety of roads and under a variety of conditions.

Selections are categorized according to both vehicle size and value. In some cases, choices apply to 1989 models as well if they have not significantly been changed for 1990. Again, any 1991 models to bow later this year do not count.

These are only the top picks from one writer, and hard picks they were. Personal preference and tastes figure heavily in any new vehicle purchase, so buyers should evaluate any competing models before making their best deal.

- Best small sports coupe: Chevrolet's Geo Storm GSi. This little pocket

rocket, built by Japanese carmaker Isuzu, starts at $11,650 but costs under $13,000 even when fully equipped. Powered by a 16-valve 1.6 liter four, the Storm's styling smacks of the shape of things to come from GM, and is affordably priced.

- Best small sedan: Mazda Protege. Larger for 1990, Mazda's former 323 sedan is blessed with a shape reminiscent of another entry-level sedan, but one in a higher price range: the Mercedes 190E. Starting $10,549 for the fancier LX version, the Protege has the same underpinnings to be seen in Ford's 1991 Escort this spring.

- Best sports coupe: Eagle Talon TSi and Mitsubishi Eclipse GSX. These Diamond-Star twins, built domestically under a Chrysler/Mitsubishi joint venture, prove one does not have to spend $30,000 or more to get a purebred sports coupe. From $14,000 to about $20,000 for a fully trimmed version.

- Best compact sedan: Last year it was the Dodge Aries and Plymouth Reliant sedans, which at $7,500 were real bargains. They have been discontinued, but there may still be a few out there.

- Best midsize sedan: Replacing the Aries/Reliant are the pricier Dodge Spirit and Plymouth Acclaim sedans offered with V6 power. Still good value these cars are more large compacts then true mid-sized sedans. From $10,400 to $14,700.

Also stretching this size category a bit is the perennial benchmark of sedans, the Honda Accord. The best selling car in 1989, the Accord has been redesigned for 1990. Still powered by a four-cylinder engine, but one that is a 16-valve 2.2 liter affair that negates the need for a V6. Priced from $14,895 to $16,595.

- Best large car: Still the Ford Crown Victoria/Mercury Grand Marquis. True six-passenger seating, cavernous trunk, rear-drive and V8 power. From $17,300 to $18,500 - or $10,000 to $15,000 less than the new Lincoln Town Car.

- Best two-seater: Mazda MX-5 Miata. Mazda has come up with a 1990s version of a 1960s sports car. Small, nimble, stylish and affordable. From $13,800 to about $17,000 for those who insist on air conditioning and a compact disc player.

- Best minivan: Despite attempts by General Motors with its stylish trio of plastic-bodied minivans, Chrysler's Dodge Grand Caravan and Plymouth Grand Voyager still top the list as they have since first introduced in 1987. From $15,400 to $18,500.

- Best 4WD sport utility vehicle: Mitsubishi Montero LS 4dr. Rugged construction with a beefy 3.0 liter V6 engine, 95 cubic feet of cargo

space, and one of the smoothest rides in its class. From $18,000 to $20,000.

- Best large truck: Chevrolet/GMC Suburban. Although in its swan song, it is still the only game in town when it comes to a full-sized station wagon and a truck all between one set of bumpers. A V8 engine, football field interior and able to pull the largest boat or trailer. From $16,200 to $21,000.

- Best "Deep Pockets" convertible: Mercedes 500 SL. Mercedes' first new roadster since 1972, powered by a 322-horsepower 5.0 liter V8 and loaded with the latest in technology and safety, including a pop-up roll bar. Buyers are lining up despite its $83,500 price.

- Best "Deep Pockets" coupe: Nissan 300ZX, 300ZX Turbo. A near-perfect blend of styling, balance and power. The turbocharged version is a true Corvette killer. From $28,000 to $35,000.

- Best "Deep Pockets" sedan: Lexus LS 400. The Germans are still wondering how Toyota can offer this almost perfect luxury sedan with a 32-valve V8 engine and just about every amenity imaginable. From $35,000 to $44,000.

-30- 5295
#90015u1102 01/15/1990 ~United Press International
Analysis By: Joe Fasbinder

(JAN. 15) UPI - Pick your desktop publishing program carefully, because the decision is a lot like marriage. Once you become accustomed to one of these complicated programs, it's emotionally straining to change. And like marriage, a good working knowledge of what you're getting into is essential.

Ventura Publisher is probably the best known of the desktop publishing programs for IBM compatibles, carrying a pricetag of about $500. If that's a little rich for your blood, you should consider some of the new kids on the block - desktop publishing programs that go for about $100 to $200.

First Publisher is probably the best known among the lower cost desktop publishing programs for IBM machines. It works well, is easy to use and is well-supported. It is even possible to download fonts and pictures free from computer bulletin boards and incorporate them into First Publisher pages.

The program carries a suggested retail price of $129, though it's often found at deep discounts - sometimes as low as $79 - in computer specialty magazines.

And the folks at Software Publishing Corp. in Mountain View, Calif., have constructed First Publisher so that it can be used with only 512 kilobytes of memory.

The average IBM compatible in a home setting can run First Publisher, even without a hard disk. A mouse makes First Publisher about 1,000 times easier to use, but you can manage without one.

An average adult can learn to produce a professional-looking document in a half hour with First Publisher, but the program is not overly easy. It can take weeks to learn all the features and nuances of the program. First Publisher does a lot for a little cash.

Springboard Publisher, from Springboard Software of Minneapolis, does even more. But it needs 640k of memory a hard disk and a mouse. Springboard, however, allows users to create as many as nine columns on a single page, compared to First Publisher's four. Legal-size pages are a menu option, as well as outline shadows for art that you incorporate into your documents.

With Springboard Publisher, you get 500 pieces of clip art and simple means to draw ovals, circles and curves, as well as paintbrush and spray-can tools for filling in graphics on the screen before they are printed. The suggested price for Springboard is virtually the same as for First Publisher - $129.95 - and you can find discount.

The other main contender in the arena of low-end DTP is Finesse, from Logitech Inc. of Fremont, Calif., that also makes the Logitech Mouse, the Scanman hand-held scanner and the Paintshow Plus drawing program, all of which are compatible with Finesse.

Finesse needs 640 kilobytes of memory, a mouse, and hard disk and has a suggested retail price of $179. But it offers a lot of high-end functionality for that price. Finesse allows users to link text frames in order to jump a story from page to page.

You can have a many columns per page as you like, because columns function merely merely as guides for the text frames. Varying the column widths is as simple as extending a text frame across column guides. You can have Finesse automatically hyphenate copy to match column width.

And you can count on well-established Logitech supporting Finesse forever. First Publisher already is taking aim at Finesse by including Bitstream high-resolution, scalable fonts for text printed using laser-type printers. Finesse had it first. First Publisher is including it now, and it probably won't be long before Bitstream Fontware turns up in Springboard Publisher.

The latest addition to the DTP lineup for IBM compatibles is Express Publisher by Power Up Software Corp. of San Mateo, Calif. Express

Publisher is a high-end product but its price is decidedly low-end - less than $150, offering a raft of top-end features not found on First Publisher and more flexibility than most low-priced DTP systems.

It supports importation of graphics from a variety of programs, including graphs produced with spreadsheets, and provides print-out resolution of up to 300 dots per inch with a laser printer. It requires 640k RAM, a mouse, a hard disk, CGA, EGA, VGA or Hercules graphics capability, and a laser, inkjet or dot matrix graphics printer.

Documentation is superior, written in plain English with little "computerese" to confuse the user. The pulldown menus of the Microsoft variety help you to intuitively power through any project with success in very little time.

Although it does use considerable hard disk memory, up to four Megabytes with 300 dpi quality graphics installed, it is a winner at its price.

#90015u1114 01/15/1990 ~United Press International

(JAN. 15) UPI - A nation-wide poll indicates that President Bush is getting good grades from the American people. But Barbara Bush scores even better. Bush recieved a grade of A or B from 63 percent of the people polled... up 12 percentage points since a similar poll in October. The poll indicates 62 percent feel better about Bush because of the way he handled Panama. Mrs. Bush received an A or B from 76 percent, up five percentage points from October.

Vice President Quayle rated an A or a B from 23 percent of the Americans polled... up from 21 percent in October.

Author Salman Rushdie gave his first interview today after almost one year in hiding because of a price on his head. Rushdie said he wishes the Moslems trying to kill him would read ''The Satanic Verses,'' the book they consider blasphemous. He says he's writing a book for children now. Rushdie gave the interview by telephone interview from a secret location to a British newspaper.

''The Satanic Verses'' drew a Valentine's Day death sentence for Rushdie from Iran's Ayatollah Khomeini, who died since then.

East German Prime Minister Hans Modrow made an appeal to opposition leaders today. Modrow asked them to use their influence to prevent strikes and violence and also to halt the immigration to West Gerlaby. The new East German leader expressed concern over the disintegration of law and order in the country. He made the appeal during a surprise visit to a conference of representatives of 16 opposition groups and government

officials.

Virginia's new governor, L-Douglas Wilder, says he's being looked at as a possible contender for the 1992 national Democratic ticket. The nation's first elected black governor took office Saturday. Wilder said today he will face additional scrutiny because of his unique position. He said people will be examining his record in 1992. He said he has to concentrate on his new job between now and then... so he can be ready for whatever happens.

#90015u1116 01/15/1990 ~United Press International

(JAN. 15) UPI - The actor who was renowned for portraying the butler Hudson in the television series ''Upstairs Downstairs'' is dead. Gordon Jackson died yesterday in London after a brief illness at the age of 66. Jackson appeared in such films as ''Mutiny on the Bounty,'' ''Tunes of Glory'' and ''The Prime of Miss Jean Brodie.'' He also acted with Britain's top stage companies. He NEVER considered himself a star... and once said his is ''just a well-known face.''

Police in Fort Lauderdale are searching for two robbers who held up the casino on the cruise ship Discovery One. Masked thieves burst into the shipboard casino, threatened employees with a shotgun and stole more than 81-thousand dollars yesterday morning after the ship returned from an evening cruise. NO one was hurt.

A report says drug users are increasingly turning to bank robbery. Bank heists across the nation increased from 66-hundred 86 in 1987 to 68-hundred 24 last year. Bank robberies in Boston almost tripled between 1987 and 1989, with 285 last year. An F-B-I agent says drug addicts do one-teller robberies to get just enough money to keep their habit alive.

The 400 unionized employees of Pennsylvania's Washington County are staging a one-day strike today because contract talks bogged down. Members of Local 585 of the Service Employees International union voted last night to strike and demonstrate. They say they will return to work tomorrow. The union says the strike affects all departments of Washington County government.

Bets were pouring in for yesterday's two championship football games when police in Pompano Beach, Florida, raided a gambling ring in a baseball card shop. Police estimated that the ring handled one-Million dollars a month. Two suspects were arrested. Afterward, undercover officers answered the phones. They say 18-thousand dollars in bets were called in during 10 minutes.

#90015u1151 01/15/1990 ~United Press International
LOS ANGELES (JAN. 15) UPI - Laurence Peter, whose 1969 book ''The Peter Principle'' satirized society's incompetents and sold more than 8 million copies, has died at age 70.

A psychologist and professor of education, Peter's runaway best-seller theorized that, ''In a hierarchy, individuals tend to rise to their level of incompetence.''

In other words, Peter wrote, if you do your job satisfactorily, you will be promoted until you reach a job you cannot do and you will remain there ''bungling the job and eroding the competence of society.''

Peter's wife, Irene, told the Los Angeles Times that her husband died in his sleep Friday. He had suffered a stroke two years ago.

Peter wrote ''The Peter Principle'' with free-lance writer Raymond Hull several years before its publication, but 13 publishers rejected the manuscript - proving the book's central point.

The book earned its author enough to retire in 1970 to devote all of his time to exploring ways to improve teaching.

Its publication made Peter an international celebrity as the Peter Principle took its place alongside Murphy's Law - ''Whatever can go wrong will go wrong'' - and Parkinson's Law - ''Work expands to fill the time available for its completion - as penetrating aphorisms for the technological age.

Peter had taken to writing satire for relief for his complex research on training teachers. After a slew of rejection slips from publishers, he had submitted an article on the principle to the Times.

Applying the Peter Principle to California, Peter cited Ronald Reagan taking the oath of office as governor three days before Gov. Pat Brown's term expired and Los Angeles Mayor Sam Yorty being out of town when Watts exploded into rioting.

The Times article, Peter said, had publishers ''almost lining up at my door. So I just dusted off the manuscript and handed it to the one I decided was the best.''

Before becoming a best-selling author, Peter had long been preoccupied with the study of teacher competence and had initiated reforms in the way teachers were prepared at the University of British Columbia in 1963.

''The lack of sequential, cumulative step-learning continued to amaze me

'' he said in a 1975 interview. ''Student teachers were told to observe children, given time to observe children - but never, never shown how to observe children.''

In 1966 he had accepted a job at USC as professor of education where he completed a four-volume study on teacher competency.

Peter is survived by his wife, two sons, and two daughters. No services wereplanned.

#90015u1155 01/15/1990 ~United Press International

GENEVA, SWITZERLAND (JAN. 15) UPI - Representatives of 15 developing nations began a three-day meeting Monday to fix the date and venue of the first economic summit among the developing countries.

The Group of 15 was established at the non-aligned summit in Belgrade last September on the lines of the Group of Seven industrial democracies whose leaders meet every year.

The current second round of preparatory talks was expected to agree on holding the first Group of 15 summit in May. Officials said Indonesia and Malaysia had offered to host the initial conference which would center on setting up several development projects.

Group of 15 countries are Algeria, Argentina, Brazil, Egypt, India, Indonesia, Jamaica, Malaysia, Mexico, Nigeria, Peru, Senegal, Venezuela, Yugoslavia, and Zimbabwe.

#90015u1161 01/15/1990 ~United Press International

WEST BERLIN (JAN. 15) UPI - East German Prosecutor Hans-Juergen Joseph announced Monday former leader Erich Honecker and one-time secret police chief Erich Mielke are being investigated for high treason and actions hostile to the constitution.

Joseph told the weekly ''round-table'' meeting of opposition leaders and government officials that the allegations against the pair no longer were confined to corruption and misuse of power.

He said the investigation now had been expanded to cover alleged violations of paragraphs 96 and 107 of the penal code which cover high treason and acts hostile to the constitution.

If tried and convicted on such charges they could get sentences from 10 years to life.

Mielke, 81, the former interior minister and head of the State Security Service (Stasi), was arrested late last year. Honecker was placed under house arrest, but not in jail because of his health.

Honecker, 77, who was forced Oct. 18 to resign as Communist Party leader and East German chief of state, was operated on for a malignant kidney tumor last Wednesday. The operation was said to be successful.

Manfred Sauer, deputy head of the cabinet's administrative department, told the round-table meeting that in the 1980s Honecker and Mielke doubled the number of secret police full-time employees to 85,000. In addition, he said, the Stasi had 109,000 part-time spies.

They intensified the campaign against dissidents with about 1,000 employees tapping telephones and 2,000 examining mail, Sauer reported.

He said the State Security Service now is being dissolved and 30,000 of its 85,000 employees already have been released. Another 20,000 are going to be released and 22,500 will be transfered to jobs in industry, the health service, the army and police, Sauer said. The remaining 12,500 will be kept on until the complete dissolution.

Sauer said all activity against dissidents along with phone tapping and mail censorship had been abolished. Prime Minister Hans Modrow told the meeting the dissolved internal security service would not be replaced.

WARSAW, POLAND (JAN. 15) UPI - The crew of a Polish freighter who were captured in an attack by Eritrean guerrillas off the Ethiopian coast have been released and are in Port Sudan, the official Polish news agency PAP said Monday.

The agency said the 29 crewmen and one woman passenger were expected to leave for Poland Tuesday.

Their ship - the 11,000-ton Boleslaw Krzywousty - was found abandoned, ablaze and aground in the Dahlak Islands off the Ethiopian port of Massawa Jan. 4 by a second Polish ship.

It had apparently been attacked by gunboats of the Eritrean People's Liberation Front. The same group also attacked and boarded a Yugoslav vessel in the same area a few days later but released it after searching it for weapons.

The Polish government and Solidarity Chairman Lech Walesa appealed for the return of the crew and the woman, said to be the wife of a crewman.

The Eritreans have been fighting the Ethiopian government demanding independence for the northern province of Eritrea for 23 years.

BRUSSELS, BELGIUM (JAN. 15) UPI - The unemployment rate in the 12-nation European Community declined in November to 8.9 percent, falling below 9 percent for the first time since 1982, officials said Monday.

The seasonally adjusted jobless rate 12 months ago was 9.7 percent.

Only Denmark and West Germany registered slight increases in unemployment between October and November, from 7.9 to 8.0 percent and from 5.6 to 5.7 percent, respectively.

Analysts attributed the West German jobless rise to migration of workers from East Germany and other Eastern European countries. The Danish unemployment rate has been rising steadily, from 6.9 percent a year ago.

The EC jobless rate among people under age 25 fell slightly in November, from 17.2 to 17.1 percent, but was as high as 19.1 percent a year ago.

The latest figures and the 12-month trend ''shows that the investment and growth-oriented policies of the Community are working, within the framework of the internal market before the end of 1992,'' said Henning Christophersen, EC commissioner for economic and financial affairs.

''The aim of full employment is still far out but I am particularly happy that youth unemployment is falling even faster,'' he said.

Christophersen said the unemployment trend would be beneficial to EC officials in upcoming talks on economic and monetary union.

WASHINGTON (JAN. 15) UPI - Mutual funds reached more than $1 trillion in assets for the first time, a tenfold increase from asset levels ten years ago, the Investment Company Institute said Monday.

The assets, held by more than 30 million investors, were spread among more than 3,000 stock, bond, and money market funds. Stock and bond funds accounted for $557 billion of the assets, $447 billion were in money market funds. The institute said the total amount represented a more than tenfold increase from the $95 billion in mutual funds on Jan. 1, 1980.

Institute President David Silver attributed the growth in mutual funds assets to the increased participation of small investors and larger institutions, which now hold nearly one-third of all mutual fund assets.

The growth of mutual funds as an investment tool was fueled by the passage of the Investment Company Act of 1940. At that time, fund assets totaled less than $500 million in about 300,000 accounts in 68 funds.

By 1945 assets grew beyond the $1 billion mark, reaching $10 billion in 1958 and eventually $45.9 billion in more than 9.5 million accounts in 390 funds by 1975, when money market funds were introduced.

Within five years, the popularity of money market funds among the investing public boosted mutual fund assets to $134.7 billion. Mutual fund assets reached the $500 million level in 1985.

Two years later, the number of households investing in mutual funds doubled to 20 million, attracted by favorable returns and a diversity of funds. Mutual fund assets raced on a fast growth track to reach a high of $848 billion in August 1987.

That growth rate was derailed by higher interest rates and the stock market crash of October 1987, which stunned the funds market and caused growth to stall. The growth slowdown was only temporary as investors returned to the mutual funds market.

#90015u1312 01/15/1990 ~United Press International

WASHINGTON (JAN. 15) UPI - National security adviser Brent Scowcroft is pushing for a mutual U.S.-Soviet ban on mobile land-based missiles carrying multiple warheads, but has encountered opposition from Defense Secretary Richard Cheney, an administration official confirmed Monday.

The official said Scowcroft is in favor of presenting the proposal for eliminating the two major U.S. and Soviet missile systems when Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze meet in Moscow Feb. 6 and 7.

The Baker-Shevardnadze meeting is designed to pave the way for the summit meeting between President Bush and Soviet leader Mikhail Gorbachev in Washington in late June. The superpowers are negotiating a new arms agreement, with a 50 percent cut in the superpower strategic nuclear arsensals, for signing by the time of the early summer summit.

The official said Cheney has ''a difference of opinion'' with Scowcroft in seeking to ban the multiple warhead missiles, and indicated that Bush is leaning in Cheney's direction, although no decision has been made.

The Washington Post said that Scowcroft's proposal, ''which has attracted support from key congressional leaders,'' would bar future deployment of 50 U.S. MX missiles carrying 10 warheads apiece aboard railroad cars to be moved from site to site to avoid a Soviet pre-emptive attack.

The Soviets would have to eliminate about 20 SS-24 missiles already deployed on rail cars and pledge not to deploy any more of the multi-warheaded weapons.

The Post said that Scowcroft and Cheney clashed over the proposal, but the administration official said that the two men, who had both served in the Ford administration, were not feuding. ''They have different points of view,'' he said.

Scowcroft, the Post said, has contended that wiping out both rail-based missile systems would limit risks associated with a future U.S.-Soviet accord on strategic missiles by eliminating powerful weapons that potentially escape detection by either side.

The president's chief security adviser and others in the administration also have argued that the United States would save billions of dollars if the proposal became a part of an arms accord at a time when there is increasing pressure to cut Pentagon spending.

The newspaper said that none of the major administration players rallied to Scowcroft's side, which makes it improbable that the proposal will be put on the negotiating table in Geneva.

Scowcroft does have the support of Sen. Sam Nunn, D-Ga., chairman of the Armed Services Committee, however. Nunn has warned that Congress will likely vote to kill the preliminary construction of the rail-mobile MX system if it does not become a bargaining chip in the arms negotiations. Both Nunn and Scowcroft favor eliminating the MX and SS-24 missiles as a first step toward banning all multiple-warhead missiles.

The Post said that in a meeting attended by Scowcroft, Baker and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, Cheney contended that dropping the rail car plan would be strategically risky because silo-based missiles are easier targets for enemy weapons. He also argued that the multiple-warhead MX would give ''more bang for the buck'' over the single warhead Midgetman, which Scowcroft has long favored.

The newspaper also said that although some State Department officials go along with Scowcroft, Baker failed to convey their view at a recent meeting.

NASHVILLE, TN (JAN. 16) UPI - Jann Browne worked the California honky tonk circuit for 11 years without a game plan to follow and people like that go nowhere.

Then she started playing with Steve Fishell, the steel man in Emmylou Harris' Hot Band.

Now, a few years later, Fishell is the producer of Browne's new Curb album ''Tell Me Why,'' and Fishell's wife, Tracy Gershon, is her manager.

''I was working a little honky tonk in San Juan Capistrano when I started playing with Steve,'' recalled Browne. ''Through Steve I met Tracy. They kind of took me under their wing and introduced me to a lot of people in LA. They invited some people from the record label to showcases and I got signed with Curb Records.''

Curb, which opened an office in Nashville last year, has a country roster which includes The Judds, Lyle Lovett, The Desert Rose Band and Moe Bandy.

Her first single, ''You Ain't Down Home,'' is a hard-driving Yuppie putdown and it rocked into the top 20 behind Brown's power-packed vocal.

Her second single, ''Tell Me Why,'' another upbeat tune, is also doing well on the charts.

Browne, a native of Anderson, Ind., headed to Southern California in 1977 to make her mark. Instead she found herself drifting.

''Certainly at this point, I have no regrets about my earlier career. If I had been asked that question five years ago I would probably have sounded pretty impatient about the whole thing. I got discouraged a lot,'' Browne said.

''There would be some times where I would have to take some time off and get away from the clubs and re-evaluate on whether I was doing the right

thing. I never gave up, but I was certainly discouraged and just wondered if I would ever get a record deal or anything beyond.''

''I walked around and sang in honky tonks for 11 years without really knowing which direction to go. I think it's very important to have the people that can take you to the right people help you to get to the places you need to be. I don't know how it can be done alone.''

Browne was asked if she would do anything different.

''It's hard to say because I see what's happened now and I'm pretty happy with the way things have gone. I'm a bit more knowledgeable now. I was able to hold my craft and I feel good about that. I'm more secure, I'm a little older and hopefully a little wiser.''

Browne's attitude about how well her album will do goes like this:

''I feel like it's a great achievement just to have done it, having a product. I'm not going to try to be optimistic or pessimistic. I'm just going to wait and see what happens. I hope it does well and can lead to other things like writing better songs.''

Browne may be one of the few country singers who can say she did now always want to be one.

''I always wanted to be a singer. I always loved country music but there was always a part of me that was timid and shy about the whole thing. I can remember about the age of 16 sitting and thinking that this is something I would love to do but I would never do it in front of an audience. I had to overcome a lot of fears and being intimidated by the whole thing.

''I think that just comes from getting out there and singing. I joined a group in high school called Show Group and that helped me get over a lot of my fears. I had a lot of family support and people encouraging me to do it. Finally I got the nerve to get my band and give it a shot. I put my first band together in 1974.

Browne said for the time being she will keep her home in California, but is already finding that she's doing a lot of commuting to Nashville.

''I'm undecided about moving right now. It depends on how much I have to be away from home. It seems more logical to be here in the long run because of all the commutting I have to do back and forth.''

#90015u1322 01/15/1990 ~United Press International

HOLLYWOOD (JAN. 15) UPI - John Schneider, the blond, brawny co-star of the defunct "Dukes of Hazzard" TV series returns to network television this month in a new weekly adventure series.

Schneider and Paul Rodriquez will star in "Grand Slam," the ongoing story of a pair of contemporary bounty hounters, professional rivals who find themselves involved in the same cases.

The premiere episode of "Grand Slam" will be broadcast Sunday, Jan. 28, following the Superbowl on CBS.

ANDREWS RETURNS

Julie Andrews returns to the movie cameras to star with Macello Mastroianni in "Tchin-Tchin" on locations in Paris.

The romantic drama is based on the Broadway and international stage hit by playwright Francois Billetdoux as adapted by British screenwriter Ronald Harwood.

The story deals with the unlikely pairing of a prim and proper British lady and a successful and amorous Italian architect who try to repair their unhappy marriages by engaging in a not-so-secret love affair.

WRITERS SIGNED

The Academy of Motion Picture Arts and Sciences announced that Melville Shavelson, Ernest Lehman and Marty Farrell have been appointed writers for the 62nd annual Academy Award presentations to be held March 26. It is the 11th such assignment for Shavelson, the third for Lehman and the second for Farrell.

The academy already has announced that Billy Crystal will be master of ceremonies, Paula Abdul will be choreographer and Ray Aghayan costume designer, his sixth such assignment.

DISNEY-SPIELBERG AGAIN

Walt Disney Studios and Steven Spielberg's Amblin Entertainment, which produced "Who Framed Rogert Rabbit" in 1988, are joining forces again to film "Arachnophobia."

"Arachnophobia" will star Jeff Daniels, John Goodman, Harley Kozak and Julian Sands in a movie produced by Frank Marshall, whose films include "E.T. The Extra-Terrertrial," "Back to the Future," "Who Framed Roger Rabbit" and the "Indian Jones" series.

"Arachnophobia" is a thriller tracing the accidental shipment of a single

unique and venomous South American spider to a small California town where it produces spiderlets that threaten to destroy the community.

BRADYS BACK

Like it or not, "The Brady Bunch" is returning to prime-time television as "The Bradys," a one-hour comedy series for CBS.

The new series will reunite eight of the original cast members, including Robert Reed, Florence Henderson, Barry Williams, Eve Plumb, Christopher Knight, Susan Olsen, Mike Lookinland and Ann B. Davis. Joining the cast will be Leah Ayres.

The original Brady clan has grown as some of the six children have become parents, providing three generations of the family to manufacture laughs under the production hand of Sherwood Schwartz, creator of the original show.

#90015u1362 01/15/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 15) UPI - Swedish Prime Minister Ingvar Carlsson Monday proposed a timetable for a new institutional framework for closer cooperation between the six-nation European Free Trade Association and the 12-nation European Community, officials said.

Carlsson, who on Jan. 1 took over the revolving presidency of EFTA, proposed to the EC executive Commission that the basic outlines of their future relationship should be agreed upon in the first half of this year, with further details to be worked out in the second half.

The agreement would go into effect at the end of 1992 when the EC is due to institute a single integrated market with a free flow of goods, services, persons and capital between its member states.

EFTA, which also includes Finland, Norway, Iceland, Switzerland and Austria, fears it may lose some trade advantages when the EC single market is set up and wants institutional links between the two groups to be strengthened. The EC and EFTA agreed in April 1984 to strive for a "single economic space" including the 18 countries with 360 million consumers.

EFTA would like to have a voice in the EC decision-making process leading up to the establishment of the single market, fearing its members' exports might suffer because of harmonized standards and rules agreed upon by the 12 EC countries.

EFTA and EC also want to cooperate more closely in such areas as research, environment, education, working conditions and social protection,

transport, consumer protection, promotion of small and medium-sized enterprises, and tourism. EC-EFTA trade in 1988 amounted to $220 billion. EFTA took 27 percent of EC exports and supplied 24 percent of EC imports from non-member states.

EC officials said the Commission did not want to commit itself to a strict timetable for working out a new institutional relationship as afterwards it might prove unrealistic. A clear distinction has to be made between decision-shaping and decision-making, they said.

They indicated the EC was quite willing to hear EFTA views when new regulations are being prepared. "But we would like to remain masters of our own decisions," an official said.

#90015u1392 01/15/1990 ~United Press International

(JAN. 15) UPI - Campeau Corporation, which owns such upscale stores as Bloomingdale's and Burdine's, showed up in federal court in Cincinnati today seeking protection under Chapter 11 of the federal bankruptcy law. Campeau's debt-loaded U-S retail units want time to reorganize to save some of the nation's most popular stores. The filing comes after UNsuccessful efforts to restructure the combined seven-BILLION-dollar debt of Federated Department Stores and Allied Stores.

President Bush received better marks in a nationwide poll, but he still has to go some distance to beat his wife in the public's eyes. A poll shows Bush recieved a grade of A or B from 63 percent of those asked... up 12 percent from a similar poll conducted last October. First lady Barbara Bush got an A or B from 76 percent, up five percent. Most of those polled say they felt better about the president because of the way he handled the invasion of Panama last month.

China today criticized the United States for the invasion of Panama and in a sharply worded editorial lashed out at the Voice of America network for what it called distorted human rights propoganda. A official Chinese daily newspaper carried the editorial criticizing Washington for defending the invasion of Panama as ''just action,'' while continuing to criticize China over last June's crackdown on the Chinese democracy movement.

The chief Soviet negotiator at the U-S-Soviet talks to limit the size of underground nuclear explosions says he's confident the sixth round of talks will lead to a threshold ban. He adds that he hopes the Geneva talks will lead to a signed agreement between the two country's leaders. A proposed ceiling equal to 150-thousand tons of T-N-T was reached in 1974, but NEVER verified by the U-S Senate.

#90015u1393 01/15/1990 ~United Press International
CAPE CANAVERAL, FL (JAN. 15) UPI - The Navy secretly launched an unarmed Trident 2 missile from a submerged nuclear submarine Monday, pressing ahead with an accelerated test program to clear the way for operational deployment in March.

The 126,000-pound, three-stage missile, carrying a load of dummy warheads, was fired from the USS Tennessee at 11:45 a.m. EST while the Ohio-class submarine was cruising submerged about 50 miles east of Cape Canaveral.

Propelled to the ocean surface by a powerful charge of compressed gas, the solid-fuel missile was fired toward an undisclosed target in the South Atlantic or Indian oceans.

''It was successful,'' an Air Force spokeswoman said.

media pool normally activated to cover such launches was not informed of the test ahead of time and no other details were provided.

It was the 26th test flight of a Trident 2, the Navy's most powerful weapon system, the seventh from a submarine and the first this year for the crew of the Tennessee, which conducted the most recent test firing Dec. 15.

The environmental group Greenpeace has protested recent launchings and staged demonstrations on the high seas, including a clash with the Navy Dec. 4 in which one of the activists' ships was rammed and damaged.

The Air Force spokeswoman said no one attempted to interfere with the launching Monday.

Including 19 test firings from a ground pad at the Cape Canaveral Air Force Station, the Trident 2 record now stands at 21 successes and five failures.

Deployment aboard Ohio-class nuclear subs is scheduled to begin in March pending completion of a test program that was delayed last year when the first and third submarine firings in March and August ended in spectacular explosions.

An investigation showed the forces acting on the big rockets as they are propelled to the surface by compressed gas were greater than anticipated. The missile's nozzle system was redesigned as a result and the most recent tests have been successful.

The 44-foot Trident 2 is thought to have a maximum range of up to 6,900 miles, depending on how many warheads are carried, and it is believed to

be so accurate it can deliver an independently targetable nuclear bomb to within about 400 feet of a target.

#90015u1396 01/15/1990 ~United Press International

KUWAIT (JAN. 15) UPI - Kuwait's government indicated through a commentary broadcast over state-run radio Monday that it was ready to move the autocratic oil-rich emirate toward democratic reform.

But the commentary offered no specific plan for democracy, other than to say the Kuwaiti government wanted to avert the repetition of past rifts that led to the dissolution of the country's elected national assembly twice in a decade.

''The democracy we need in Kuwait is that type of democracy which ensures the collaboration of all parties and efforts to contain (any) crisis that may erupt,'' the commentary on Radio Kuwait said.

The state-run radio said the form of democracy the government had in mind was one which, ''closes ranks and consolidates national unity ... the democracy of consultation, as provided for in our Islamic religion.''

The dramatic move toward democracy in Eastern Europe has sparked calls in many Gulf Arab states for greater representation.

The Kuwaiti daily Arab Times recently even warned Middle East ''despots'' to mend their ways or face the possibility of suffering the same fate as Romania's late dictator Nicolae Ceausescu, who was executed by firing squad on Christmas day.

The Radio Kuwait commentary followed remarks made in Cairo last Thursday by Kuwait's crown prince and premier, Sheikh Saad al Abdullah al Sabah, who said at the end of an official visit to Egypt that he favored greater public representation in government.

''We in Kuwait believe in the feasibility of the public participation in control and legislation, and out of this belief we will work toward a formula that will avert a crisis,'' Sheikh Saad said. But he did not elaborate or offer specific plans.

Radio Kuwait's commentary did not indicate whether a possible consultative body would be appointed or elected, as Kuwait's previous parliaments had been.

The radio also did not comment on reports that several thousand intellectuals and other acvocates of democracy had been meeting regularly in Kuwait city demanding a parliament.

The emir of Kuwait, Sheikh Jaber al Ahmad al Sabah, dissolved the country's previous national assembly on July 3, 1986, at the height of the 8-year-long Iran-Iraq war.

But Sheikh Jaber said at the time that dissolving the parliament did not mean, ''the end of parliamentary life in Kuwait.''

Kuwait was the only Gulf Arab state to have a functioning elected parliament.

(JAN. 15) UPI - The latest notable to suffer the aches and pains of the flu is Pope John Paul. A spokesman for the pontiff says John Paul will NOT receive any audiences until he recovers. The 69-year-old head of the Roman

Catholic Church announced he was under the weather yesterday, saying he was suffering from an epidemic of ''Chinese influenza.'' There's NO word when the pope will be back on his feet.

There are mixed emotions in Atlanta three days into a two-month crackdown in the city's rough-and tumble housing projects. Many people in the 27 low-income residences say they feel safer after police made more than 150 arrests during the weekend. But they wonder if the increased security will end when police complete the 60-day sweep. Police also question whether they are adequately equipped to confront automatic weapons-toting drug dealers in the projects.

#90015u1432 01/15/1990 ~United Press International

LONDON (JAN. 15) UPI - Stock prices closed lower in fairly active trading Monday on the London International stock exchange.

The key Financial Times 100-stock index, which tumbled 37.8 points Friday, closed down 13.9 points at 2,366.2. The narrower top 30 industrial average lost 12.2 points to 1,896.9.

Volume amounted to around 360 million shares compared with 406 million traded Friday.

The Central Statistical Office reported Britain'sretail sales volume rose a provisional, seasonally adjusted 2.2 percent in December from November and rose 2.3 percent from December 1988.

Market forecasters were expecting an 0.5 percent increase in retail sales for December.

In a seperate report, the Central Statistical Office said producer output prices, or prices of manufactured goods, rose 0.2 percent in December from November, while producer input prices, prices of raw materials and fuels purchased by the manufacturing industry, rose an unadjusted 1.7 percent in December.

Analysts said investors were worried that the government's anti-inflation strategy will fall apart without another increase in local interest rates.

Adding to the worries, maintenance workers at British Ford began an unofficial strike at two plants ahead of Wednesday's talks with unions. The unions rejected Ford's improved offer last week, but agreed to hold talks Wednesday.

Analysts said investors showed growing concern that British wage pressures were developing at a worrisome rate.

Among the most widely traded stocks, KLP Group soared $1.17 to $3.73 after the French group RSCG annnounced plans to buy the advertising agency for $53.1 million.

WH Smith Group, the retail stores chain, slipped 20 cents to $5.34 on investor worries over the outlook for retailers.

Also in the retail sector, Marks & Spencer lost 10 cents to $3.13 amid speculation the retailer may have to write off $30 million because of its dealings with Campeau Corp.

Eurotunnel fell 24 cents to $10.20 following an unfavorable comment on the Channel Tunnel's refinancing deal.

Among the day's other active issues, Body Shop fell 24 cents to $9.36, Eurodisney dropped 29 cents to $15.28 and TVS Entertainment lost 11 cents to $2.60.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed lower in active trading.

The German Stock Index lost 14.05 points to 1,841.61.

Traders said the market was depressed by the unrest in the Soviet Union which they felt could undermine President Mikhail Gorbachev, viewed as a key figure in further expansion of relations with Eastern Europe.

In recent weeks, share prices have risen on speculation that West German companies would benefit from investments in the East.

DURHAM, N.C. (JAN. 15) UPI - Municipal officials said Monday they are preparing to change local codes banning pigs within the city limits.

Neighboring Raleigh also has statutes banning pigs. A committee of the Raleigh City Council has recommended the board remove the ban from the animal control laws.

''We want to get the upper hand on it now,'' said Durham zoning administrator Henry Faucette. ''There's been a lot of publicity. We want to be ready and have something in place that will fit.''

The pigs - 80 pounds when fully grown - are fast becoming the upscale pet of choice among some young people.

The issue arose last month when Vicki Adams, a Durham County pot-bellied pig breeder, convinced a pet store owner at a Raleigh shopping mall to take one of the pigs for display and sale.

A rival pet store owner called the city and complained, citing the ordinance banning pigs within the city limits.

''It is offbeat,'' said Tom McCormick, the Raleigh city attorney. He said that possession of an alligator was legal as long as it was not causing a problem ''but you couldn't have a pig.''

The Raleigh City Council meets Tuesday to decide the issue.

#90015u1477 01/15/1990 ~United Press International

DETROIT (JAN. 15) UPI - U.S. automakers are reporting a nine-year high in the inventories of unsold cars as of Dec. 31, with some transplant carmakers beginning to feel the effects of the slow sales market, Ward's Automotive Reports said Monday.

The nation's eight U.S. automakers reported combined inventories equal to 91 days, up from 88 days as of Nov. 30, and 66 days at the end of 1988, Ward's said. This marks the highest level for late December since the recession of 1981, when stockpiles totaled 107 days, the publication added.

Industry leader General Motors Corp. and third-ranked Chrysler both reported inventories equal to a 100-day supply, while second-ranked Ford Motor Co. checked in with a 96-day level, the statistical newsletter said in its latest weekly report.

Stockpiles of 70 to 75 days are considered normal this time of year.

The rising inventories come despite widespread plant idlings and generous customer rebate programs, Ward's said, noting the industry has already slashed its output for the first quarter of 1990 by 20 percent.

Both industry analysts and planners at the Big Three carmakers say further temporary plant closings would be needed next month beyond the ones already posted to get production in line with slow consumer demand for new vehicles since October, the start of the 1990-model year.

Ford and Chrysler announced last week they would idle nearly 30,000 U.S workers for weeks both this month and next because of slow sales. Nine of GM's 31 U.S. assembly plants are closed this week, idling about 25,500 hourly workers.

Transplant producers, Japanese automakers with U.S. assembly plants, are

beginning to feel inventory pressure as they increase their share of the market, Ward's said.

Together, Honda, Nissan, Toyota, Mazda and Mitsubishi reported total inventories equal to 124,000 cars as of Dec. 31, up from 44,000 cars a year earlier, Ward's noted.

Both Mazda Motor Manufacturing USA and Diamond-Star Motors, the joint car building venture between Chrysler and Mitsubishi, announced production cuts at their plants last week to trim inventories.

#90015u1480 01/15/1990 ~United Press International

BUCHAREST, ROMANIA (JAN. 15) UPI - West German Foreign Minister Hans-Dietrich Genscher said Monday he would urge the European Community to provide emergency aid to Romania as it struggles to emerge from 22 years of dictatorial rule.

Genscher said he and his French counterpart, Roland Dumas, would press for a strong commitment of support from the EC at an extraordinary session of foreign ministers in Dublin Saturday.

The meeting was advanced from February to address the shortage of food and medical supplies in Romania, and questions raised by the democratization of East Germany, including possible reunification, a West German spokesman said.

Neither Genscher nor Dumas, who visited Bucharest last week, specified the content of an aid package.

France already has committed to helping Romania rebuild its economy since the popular uprising that ended the dictatorship and life of Nicolae Ceausescu and decades of isolation.

Frans Andriessen, the European Community's foreign affairs commissioner, said on returning to Brussels from Bucharest Sunday, the EC should move quickly to provide food aid to Romania because ''there is a great need and the people expect something from us.''

Andriessen left some aides in Romania to study the scope of the country's food needs after the ouster and execution Ceausescu. A decision on emergency food aid from the EC could come within a week, he said.

Andriessen said community aid to Eastern European countries hinges on their continuing efforts toward democracy.

''We have to show the solidarity of the community for those who fight for

the respect of human rights, for democracy and for equal opportunities for everybody,'' he said. ''Everything that's going on there is not only a matter for these countries but a matter for Europe in which the Community has to play an important role.''

Genscher expressed admiration for ''the victims of freedom and struggle'' in Romania.

He also planned to visit Sibiu and Timisoara, where most of Romania's estimated 220,000 Germans live.

The German minority was treated harshly by the Ceausescu regime, and Genscher said he wanted to ensure their welfare.

A U.S. congressman, reflecting on six days of travel, said Romania presents the world with ''laboratory of democracy'' as the socialist republic moves beyond a history of oppression.

''As an American, this has just been an incredibly moving experience for me,'' said Rep. Chet Atkins, D-Mass.

''The sense of people's willingness to struggle and try and build a democratic society is one which, I think for all Americans, is our fondest dream for those in the world who live under oppression.''

''The revolution perhaps presents the most exciting opportunity in the lasp 10 years or even fur it be a laboratory of democracy, and represents an exciting opportunity for the United States to share our democratic experiences with other people.''

Initially, the member of the House Appropriations Committee said he would advocate technical support to Romania.

''Romania in many ways will be a case study in our ability to respond and respond successfully,'' Atkins said.

The Massachusetts Democratic Party chairman was pessimistic about the ability of the National Salvation Front, the interim government, to hold elections in April.

The National Peasant and Liberal parties have protested that they need more time to prepare for the ballot.

Atkins said Dumitru Mazilu, vice president of the NSF council, was ''very open'' to delaying the election.

Government spokesman Aurel Dragos Munteaunu said no firm decision had been made regarding the election date, and an agreement would be reached during

discussions with other parties of the as-yet unwritten electoral law.

Atkins, whose trip was arranged in June, traveled with two leaders of the Unitarian Church, of which he is a member.

He considered the government's willingness to allow religious freedom one of its most important tests.

But others have different ideas of the meaning of freedom.

One person Atkins said he met on a train thought freedom meant ''not having to show up at work on time,'' while his friend warned that under a free-market system latecomers would be fired.

#90015u1496 01/15/1990 ~United Press International

CAIRO, EGYPT (JAN. 15) UPI - Egypt's foreign minister will visit with officials in Washington Tuesday in an effort to revive stalled plans to hold U.S.-backed talks between Israel and Palestinians, a Foreign Ministry source said Monday.

Foreign Minister Esmate Abdel-Meguid had spent the weekend consulting with Palestine Liberation Organization leader Yasser Arafat and Egyptian President Hosni Mubarak.

Details of Mubarak's talks with Arafat were not immediately known. But the foreign ministry source said Egypt was working avidly to ensure plans for a Mideast dialogue were not overshadowed by events in Eastern Europe.

Abdel-Meguid's Washington visit was also intended to assure the Bush administration that both the PLO and Egypt were still very interested in holding Israeli-Palestinian talks.

On Sunday, Abdel-Meguid said he had no information on Secretary of State James Baker's reported intention to withdraw his five-point plan for the talks, in frustration over lack of progress on the proposal.

In an interview with a Kuwaiti daily, the Egyptian foreign minister said the Baker plan had successfully passed the first stage, with both Israel and the PLO agreeing in principle to the proposed dialogue.

#90015u1506 01/15/1990 ~United Press International

SIMSBURY, CT (JAN. 15) UPI - Kollmorgen Corp., which has been fending off a hostile takeover by Vernitron Corp., Monday announced it planned to sell its interest in Additive Products Co. and other assets for about $50

million.

Kollmorgen said it has signed a letter of intent with Akzo N.V. and AMP Inc. under which the latter would acquire through a joint venture Kollmorgen's interest in Additive Products, a partnership owned jointly by Kollmorgen and Akzo.

The $50 million agreement, subject to adjustments, also included all of the assets of the graphics part of Kollmorgen's PCK Technology Division but did not include Kollmorgen's Discrete Wiring Systems business, executives said.

Kollmorgen also announced it was concluding its other joint venture with Akzo, Akzo Electronic Materials Co. of Schaumburg, Ill., and that Akzo would independently remain in the gallium arsenide substrate business through Crystal Specialties International of Colorado Springs, Colo. The Additive Products Co., PCK Graphics and AEMC were part of Kollmorgen's Electronic Interconnections segment, officers said.

"These transactions represent a significant step in Kollmorgen's previously announced plan to sell our Electronic Interconnections segment " said Kollmorgen Chief Executive Officer James E. Swiggett.

Kollmorgen said the completion of the sale was subject to the negotiation and execution of a definitive asset purchase agreement and related agreements, government and regulatory approvals and the expiration of any required waiting periods.

Kollmorgen, which has continuing operations in two business segments specializing in servo-motors and controls, and electro-optical instruments anticipated closing the sale within about 30 days, officers said.

Last week, Stamford Superior Court Judge Nicholas A. Cioffi continued an order enjoining Vernitron of Deer Park, N.Y., from making any bid to take over Kollmorgen before April 30.

But in continuing the temporary injunction, Cioffi also imposed conditions prohibiting Kollmorgen from restructuring or taking any action to entrench its management by ordering the creation of a special masters' committee of three experts to review any restructuring.

Vernitron halted its $320 million, or $25-a-share, merger with Kollmorgen on Sept. 21, 1989, claiming the company had failed to reveal certain financial information. Vernitron has said it would consider making a lesser offer for Kollmorgen. The two companies have since been trading charges and lawsuits against each other seeking unspecified damages.

#90015u1543 01/15/1990 ~United Press International
BRIDGEPORT, CT (JAN. 15) UPI - The Thomson Corp. began merging its morning and afternoon newspapers Monday with an experimental morning edition called The Bridgeport Post, published for readers in the nearby city of Milford.

"Beginning today, readers in Milford of both the morning Telegram and afternoon Bridgeport Post will receive the new paper as part of the Post-Telegram's conversion of its two dailies into a single morning newspaper," the newspaper said in its Milford edition.

"Milford is the first geographic area to receive the new paper," the newspaper said. "Complete conversion to a morning newspaper in all Post-Telegram coverage areas is expected by spring."

The newspapers, which were owned by Lincoln Publishing Inc. of Des Plaines Ill., an affiliate of Thomson Corp. of Toronto, announced in early December they planned to merge in the spring. Officers said the new paper would focus on local news but would continue all the comics and columnists that appeared in the Telegram and the Post.

Officers said the first press run of the Milford edition was about 6,300 newspapers. The edition carried the same color photograph and the same stories as did the morning Telegram Monday with the exception of a boxed story about the new paper for Milford readers. The mastheads of the papers also were different.

Executive Editor John J. Wilpers said the newspapers planned to convert other geographic areas to a single morning edition before the switchover was completed in the spring, "though I can't tell you when or where yet."

"We think it's unique way to go about it," Wilpers said of the gradual switchover to a merged morning newspaper. "This way we can deal with

problems as they develop rather than all at once."

The Telegram has a daily circulation of about 22,000. The Bridgeport Post has a circulation of about 54,000 and a combined Sunday paper has a circulation of about 90,000. The Thomson newspaper group purchased the Bridgeport newspapers in the spring of 1988 for an undisclosed price.

The newspapers underwent a major reshuffling of editorial positions at the end of 1989, with about 80 percent of the 115-member editorial staff being reassigned. Wilpers said the moves were all designed to improve local coverage.

The Bridgeport newspapers also recently began publishing several weekly "Life" magazines for towns within its circulation area, including Trumbull and Stratford. The weeklies were inserted inside the daily newspaper on Wednesdays.

#90015u1572 01/15/1990 ~United Press International

BRUSSELS, BELGIUM (JAN. 15) UPI - Increased competition stemming from Europe's 1992 program prompted Belgium to form a new Sabena airline with investment from two other European carriers, executives said Monday.

Shares in Sabena World Airlines, operational since Jan. 1 as a subsidiary of the Belgian company Sabena S.A., are owned 20 percent each by British Airways and KLM Royal Dutch Airlines. Sabena, whose majority stockholder is the Belgian government, owns the other 60 percent of the new company.

Deregulation of European air transport is a central element of Europe's 1992 open-market program to remove all remaining trade barriers between the 12 European Community nations.

The process could shift market shares, putting the larger carriers "at a distinct advantage, possessing as they do strong financial structures and benefiting from their economics of scale," said Sabena Chairman Carlos Van Rafelghem. "This would enable them to elbow out competitors of more modest size which are slower to adjust to the changing market conditions," he said.

Sabena has streamlined operations in recent years in efforts to stem nagging losses. The company chairman said he hoped to make the new carrier "as flourishing as possible."

Details of the agreement between Sabena and the other carriers, announced last month, were unveiled at a news conference near EC headquarters. The new company's capital was raised Dec. 28 to $280 million, with $56 million each coming from British Airways and KLM. The ten-member board of

directors, headed by Van Rafelghem, includes two each from the British and Dutch carriers.

Sabena's other interests include financial services, hotels, real estate, and tourism, including wildlife tours of Zaire, the former Belgian Congo.

The new Sabena, based at Brussels' Zaventem Airport, hoped to make Brussels a new Euro-Hub by 1995 linked to 75 European cities, including airports in Central and Eastern Europe. Links via Manchester, England, to Los Angeles, and via London's Gatwick Airport to Houston, were in the planning stage.

Jean-Luc Dehaene, Belgium's transport minister, announced an ambitious program to upgrade and expand the Brussels airport. He said Sabena's agreement with the other carriers would allow the Belgian airline to improve its position in the intercontinental market, where it has had "all too low a profile to square up to competition from European and American megacarriers."

Officials said they hoped to increase Sabena's European fleet from 24 aircraft to 66, and boost the number of wide-bodied planes for long-haul flights from 11 to 19. Van Rafelghem said all aircraft would be leased from the parent firm Sabena to Sabena World Airlines.

The Sabena chief said the agreement with British Airways and KLM will "in no way affect the commercial independence of the three companies, which shall remain entirely independent competitors." He said competing flights on the same routes were possible.

EC antitrust officials said it was too early to determine whether the agreement may run afoul of the Community's competition rules. "We have to study the details, because sometimes the fine print is of the most concern to us," an EC spokesman said.

#90015u1596 01/15/1990 ~United Press International
(JAN. 15) UPI - TODAY'S PEOPLE:

FONDA'S SON NABBED: Jane Fonda's 16-year-old was nabbed spray-painting gang-style graffiti in a Los Angeles parking lot at 2 a.m. Monday. Troy Hayden was cited for vandalism and violating a juvenile curfew and then released into the custody of his father, Assemblyman Tom Hayden. Young Hayden, who was wearing a Save the Bay T-shirt when he was caught, and seven other kids with a bounteous supply of spray paint were spotted by California Highway Patrol officers painting graffiti on a telephone booth, several posts and a wall at the parking lot. A police spokesman described the graffiti as ''logos, obviously gang-type or community names - white

gang stuff.'' A first offense in such cases requires one or both parents to discuss the matter with police and make restitution. Fonda and Hayden have filed for divorce, although they share custody of Troy.

DOLLY AND CARL: A catfish dinner turned into a new project for Dolly Parton and Carl Perkins. Parton was in Jackson, Tenn., recently for a visit to Perkins' catfish restaurant and the two showed each other some new material they were working on. Parton canceled a trip to California, returned to Jackson the next day and stayed the weekend to write five songs. Now she says she wants Perkins on her next album. Perkins said his wife did the cooking during the weekend and Parton appreciated the fare. ''Valda fixed some beans and cornbread and fried some taters,'' said Perkins, the man who wrote ''Blue Suede Shoes.'' ''And I never saw a mega-star enjoy herself more.'' Perkins also says he's expecting a call from former Beatle George Harrison to go to England for some recording with Harrison and Jeff Lynne, formerly of the Electric Light Orchestra.

RUSHDIE SPEAKS FROM HIDING: Salman Rushdie has been working on a children's book while in hiding from fundamentalist Moslems who want to kill him because they think his last book, ''The Satanic Verses,'' blasphemes their religion. Rushdie hopes to have the book finished in March but there's no telling when he will be able to come out of hiding. ''I can't say I'm working in quite my normal way,'' Rushdie said from his hiding place in a telephone interview with a British newspaper. ''But it's easier when I'm working. It would be impossible not to be affected by this degree of hostility, which is totally misplaced. I am not the enemy of my own people. I do not feel like the enemy of my people.'' Rushdie had to go underground 11 months ago after Iran's Ayatollah Khomeini said he should be killed because of ''The Satanic Verses.''

NEWMAN'S GIFTS: Paul Newman is donating about $7 million from his food company to various worthy causes with more than $600,000 going to AIDS-fighting groups across the country. Newman issued a statement saying: ''What I particularly like about this unpredictable company of mine is that we furnish people with wholesome food that they enjoy which enables us to take the profits we make and give them to the unfortunate people of the country who, because of poverty, sickness, old age or illiteracy, desperately need help. That's what makes this business such a kick - this mutually beneficial recycling from the 'haves' to the 'have-nots.''' Also benefiting from Newman's largesse were the homeless, children, the elderly and environmental groups. The Newman's Own food company, which makes spaghetti sauce, lemonade, popcorn and salad dressing, has given away more

than $26 million since the company was founded in 1982. Newman and his partner, writer A.E. Hotchner and Hotchner's wife, Ursula, decide which causes get the money.

GLIMPSES: Pope John Paul II has a case of the Chinese flu. Because of it, he didn't give the children hugs and kisses when visited a Rome church Sunday ... Kathleen Turner opens a three-week pre-Broadway run at the Shubert Theater in Boston Feb. 6 in the role of Maggie, in Tennessee Williams's classic ''Cat on a Hot Tin Roof.'' Turner, star of the hit movie ''War of the Roses,'' will appear with Charles Durning as Big Daddy, Polly Holliday as Big Mama and Daniel Hugh Kelly as Brick.

#90015u1615 01/15/1990 ~United Press International

(JAN. 15) UPI - Retail units owned by Campeau Corporation went to federal court in Cincinnati today seeking Chapter 11 bankruptcy protection to keep the stores operating. Campeau tried UNsuccessfully to restructure the seven-BILLION-dollar debt of Federated Department Stores and Allied Stores. Stores owned by the firms, including Bloomingdale's and Burdine's, will stay open in restructuring.

First lady Barbara Bush received higher marks than the president in a poll that shows President Bush gained popularity after the invasion of Panama. The first lady got favorable marks from 76 percent of those surveyed, compared with the president's high marks from 63 percent.

Schools, banks and government offices around the country are closed to mark what would have been the 61st birthday of civil rights leader Martin Luther King Junior, who was assassinated in 1968. King led marches in the South and parts of the North during the 1950's and '60's to end discrimination against blacks. He won the Nobel Peace Prize for his NON-violent civil rights movement.

Police in Chapel Hill, North Carolina, are spending the King holiday searching for the person who sent a letter threatening ''to make an example'' of people at a celebration of Martin Luther King Junior's birthday. NO incidents occurred at yesterday's observance.

Minority activists in Boston are using the birthday of slain civil rights leader to launch a one-week boycott of the city's two major newspapers. The Boston Boycott Committee says the move stems from the- quote- ''racist attitudes'' in the investigation into the October 23rd murder of a pregnant lawyer.

#90015u1616 01/15/1990 ~United Press International
UNITED NATIONS (JAN. 15) UPI - Secretary-General Javier Perez de Cuellar has invited leaders of the Greek and Turkish communities in Cyprus for direct negotiations in New York next month aimed at resolving their conflict, a U.N. spokesman said Monday.

The talks will begin Feb. 12 and may last two weeks, spokesman Alexander Taukatch said.

He said Perez de Cuellar, ''after reviewing the current situation with regard to the Cyprus situation, came to the conclusion that the most appropriate way of proceeding with the on-going effort was through direct talks.''

Perez de Cuellar sent letters last week to Cyprus President George Vassiliou, leader of Greek Cypriots, and Rauf Denktash, leader of Turkish Cypriots, inviting to meet at U.N. headquarters in New York for ''sustained'' talks, Taukatch said.

Vassiliou and Denktash agreed in their last meeting in June 1989, that the two sides should work out an framework that would provide the basis for negotiations for a comprehensive agreement.

The two communities fought a bloody war in 1963, three years after gaining independence from Britain, prompting the United Nations to send in 1964 a peacekeeping force to separate the two parts.

Turkey, which backs the minority Turkish Cypriots in the northern part of the island, sent more than 20,000 troops to the island in 1974 after an aborted coup d'etat led by Greek Cypriots who demanded a union with Greece.

As negotiations failed to settle the conflict, Turkish Cypriots declared an independent state in November 1983, which was not recognized by the United Nations.

#90015u1620 01/15/1990 ~United Press International

LONDON (JAN. 15) UPI - The British government Monday defended the shooting deaths of three unarmed robbers by security forces in Northern Ireland Saturday saying the soldiers believed they were in danger.

But Irish President Charles Haughey and other politicians expressed concern at the killings, while relatives and friends held protests in Belfast where the shootings took place.

Britain's Northern Ireland minister Peter Brooke said in a statement the plainclothes soldiers stumbled on the post office robbery by accident and acted on the basis that the true-to-life replicas of machineguns carried by the robbers were real.

''It is clearly the responsibility of members of the security forces to take immediate action to respond to any situation which appears to pose immediate danger to life,'' Brooke said, in explaning the death of the three robbers, Peter Thompson, Edward Hale and John McNeill who have not been linked to any terrorist group.

Announcing a full Royal Ulster Constabulary investigation into the shootings, Brooke defended the role of the armed forces in Northern Ireland.

''There exists in Northern Ireland a serious terrorist problem which requires the continuous deployment of armed forces in support of the RUC. No one regrets that more than I do,'' he said.

''I particularly regret any deaths which directly or indirectly have been caused by terrorism. Terrorism has encouraged other types of violent crime such as armed robbery,'' he said.

There was strong criticism of Brooke in the British Parliament from opposition politicians.

''The killings will increase the conviction that soldiers and the security forces are running rampage,'' said Labor Party politician Tony Benn. ''This is the impression which will be widely shared. You have made no expression of regret and you give the impression that anything the security service does, with or without the law, carries the endorsement of the government.''

In Dublin, President Haughey said the shootings were cause for ''serious disquiet and misgivings'' about British security forces' policy in Northern Ireland.

In Belfast, a crowd of 24 people gathered on the sidewalk where the three men were shot dead.

Some of the protesters carried black flags and others displayed placards carrying the words ''Murdered by the British'' and ''End the Shoot to Kill Policy.''

(JAN. 15) UPI - Police in Bologna, Italy, report gunmen blew a hole in the inside wall of a post office to steal several hundred thousand dollars. Authorities say 44 people were injured by flying debris. The gunmen fired two shots into the air before ordering 18 post office workers and 70 customers to lie on the floor while they carried out the robbery.

Earth-bound NASA technicians are trying to figure out why one of the shuttle Columbia's navigation units is on the blink. One of three ''inertial measurement units'' generated incorrect data five times last night and triggered an alarm that woke up the astronauts. NASA's tough new safety rules call for an early landing if the glitch canNOT be fixed.

Bulgarian lawmakers have opened the way for free elections in the East Bloc country by abolishing the Communist Party's 43-year monopoly on power. The 400-member National Assembly today unanimously voted to remove two paragraphs from Article One of the constitution that guaranteed communists the leading roles in political and social life.

It doesN'T appear Soviet President Gorbachev's three-day visit to Lithuania last week will slow the defiant republic's drive toward independence. In a rebuke of Gorbachev's call for unity, the Soviet news agency Tass reports the head of Lithuania's maverick Communist Party has been named the republic's president.

Novelist Salman Rushdie thinks some of the furor surrounding his book ''The Satanic Verses'' would die down if his Islamic critics would take time to read the book they regard as blasphemous. In his first public comments since he went into hiding last February, Rushdie says his book is NOT unsympathetic to Moslems.

#90015u1688 01/15/1990 ~United Press International

WEST BERLIN (JAN. 15) UPI - More than 10,000 demonstrators stormed the East Berlin headquarters of the hated Stasi secret police Monday, hurling furniture from the windows and hanging a skeleton outside the building bearing the slogan, ''Against a revival of the Stasi.''

The protesters, ignoring appeals to refrain from violence, rampaged through the security police headquarters for an hour as an estimated 100,000 people demonstrated outside in a rally called by the New Forum opposition group, East German television said.

The opposition New Forum called the rally to demand a quicker dismantling of the state security police, which is being dissolved by the new government but still employs 55,000 of its original 85,000 full-time workers.

East German Premier Hans Modrow, who warned earlier that violence, strikes and the mass flight of refugees could cause East Germany to ''disintegrate '' rushed to the headquarters to appeal for calm.

Opposition leaders interrupted their weekly ''round-table'' meeting with government officials and raced to the building in an effort to bring the protest under control. An opposition leader issued an appeal by television for the demonstrators to halt their action.

The demonstrators, some carrying West German flags, forced their way into the building, threw furniture from the windows and threatened employees of the secret police, the official East German news agency ADN reported. They hung a skeleton outside with the slogan ''Against a revival of the Stasi.''

Witnesses said the building had been plundered and damaged.

East German television interrupted its programming to read a government statement that said the country's young democracy was in ''great danger.''

''Irresponsible elements under cover of darkness stormed and wrecked the former headquarters of the Office for National Security,'' the statement said. ''Citizens should preserve calm and caution and show their civic consciousness.''

The occupation of the building, whose entrance had been bricked closed by workmen earlier in the day, ended after an hour. Witnesses said the secret police headquarters had been plundered and damaged during the rampage.

The protesters said they were unable to find members of the secret police inside. ''The Stasi people all had disappeared as we entered,'' one demonstrator said as he left the building.

Crowds congregated outside the building as the occupation ended. Opposition leaders used loudspeakers to urge the crowd not to enter the building again, and members of opposition groups formed a human chain around the structure.

''We must avoid all violence,'' said Konrad Weiss of the Democracy Now Party.

The protest came shortly after Modrow expressed ''great concern'' over the situation in the country and appealed to opposition leaders to use their influence to prevent strikes and violence and halt the mass flight of refugees to West Germany.

Modrow made his remarks in a surprise visit to the weekly ''round table'' conference of representatives of 16 opposition groups and government officials. Shortly after his visit to the conference, the ADN news agency reported that brief warning strikes were held in several cities to demand more political and economic reforms and restrictions on Communist power.

Modrow had not been scheduled to go to the ''round table'' meeting in East Berlin's Niederschoenhausen Palace because he was representing East Germany at a government reception for the diplomatic corps. But he told the opposition leaders he came for an hour to show his goodwill ''and as a sign of my great concern over the domestic political situation.''

''A sense of proportion and reasonableness is necessary so that the German Democratic Republic will not disintegrate,'' he said.

To prevent ''a black day'' for Germany and the world, Modrow said he was asking the opposition leaders to use their influence to prevent strikes, violence and the flight of refugees.

Appealing to East Germans to stay, he said. ''No one can expect miracles after about eight weeks of government work. However, I assure the citizens of the GDR that our country through its own efforts and aid from outside has a realistic chance to bring about a stabilization of production and supply this year which will lead to a period of prosperity.''

East German Prosecutor Hans-Juergen Joseph also attended the ''round-table'' meeting Monday, announcing that former leader Erich Honecker and one-time secret police chief Erich Mielke are being investigated for high treason and actions hostile to the constitution.

Joseph said allegations against the pair no longer were confined to corruption and misuse of power. He said the investigation now had been expanded to cover alleged violations of paragraphs 96 and 107 of the penal code, which cover high treason and acts hostile to the constitution.

#90015u1712 01/15/1990 ~United Press International

WINDHOEK, NAMIBIA (JAN. 15) UPI - Angola denied Monday that one of its jetfighters had bombed northern Namibia during operations against

U.S.-backed Unita guerrillas - an incident that drew a strong protest from Namibia's South African-appointed administration.

''This (report) is a lie. We have no fighter planes in that region at this moment,'' an Angolan air force officer in Luanda told the Portuguese news agency Lusa following reports of Sunday's incident.

The officer, who was not identified, said Unita was ''suffocating'' under an military offensive by Luanda government and seeking ''any kind of pretext to justify a South African military intervention'' in its favor,'' according to the Lusa report monitored in Lisbon.

South African-appointed Administrator General Louis Pienaar summoned the Charge d'Affairs of the Angolan observer mission in Windhoek Monday to receive a protest over the incident, Namibian officials said.

Pienaar called it a ''serious violation'' of Namibian airspace which could have resulted in the loss of life and damage to property.

Namibian officials said the Angolan MiG jetfighter dropped the bomb in an unihabited area near the town of Bagani, about 4 miles from the Angolan frontier, leaving a hole 2 yards deep and 4 yards wide but causing no injuries.

Police spokesman Kierie du Rand said the aircraft had apparently been involved in an attack against Unita, which occupies the region of Angola closes to Bagani.

An Angolan observer mission is based in Windhoek as part of the international accord in which South Africa agreed to independence of Namibia in exchange for a withdrawal of some 50,000 Cuban troops supporting Luanda in the 15-year civil war.

PARIS (JAN. 15) UPI - The quantity of illicit drugs seized by French police and customs officials rose dramatically last year, jumping 56 percent for cocaine and 33 percent for heroin, the government said Monday.

The Interior Ministry said officials seized 2,039 pounds of cocaine in 1989, a 56 percent jump over the 1,304 pounds seized in 1988. Heroin seizures rose by 33 percent from 486 pounds in 1988 to 646 pounds last year.

Officials said the quantity of LSD seized rose 61 percent to 11,884 doses in 1989, compared with 7,350 the previous year.

The statistics reflect both an increase in drug trafficking and the results of efforts to crack down on the drug trade by beefing up anti-narcotics forces, officials said.

The number of drug-related arrests rose 5.7 percent to 33,000 in 1989 from 31,213 in 1988, the ministry said.

#90015u1769 01/15/1990 ~United Press International
NEW YORK (JAN. 15) UPI - The bankruptcy filing Monday by Federated Stores Inc. and Allied Stores Corp. - two of the most presitigious names in merchandising - set the sister companies on a restructuring course that analysts believed would alter the landscape of U.S. retailing.

Analysts said the joint Chapter 11 filing in U.S. Bankruptcy Court for the Southern District of Ohio in Cincinnati, where the retailers are based, would force the refinancing of a crushing debt totaling $7 billion, and would likely result in the sale of several of the ten department store chains in the Federated-Allied fold and the closure of some individual stores.

The two retail divisions, which operate Bloomingdale's, Burdine's, Abraham & Straus, Lazarus, Rich's, Goldsmith's, The Bon Marche, Jordan Marsh, Maas Brothers and Stern's, were forced to seek bankruptcy protection from creditors after failing to renegotiate the terms of their obligations to banks and bondholders.

The filing virtually eliminated the risk that vendors, many of whom had been frightened to ship merchandise to the stores, would be stiffed on future merchandise shipments and should allow the stores to operate competitively, analysts said.

The department stores themselves were fundamentally sound businesses that

have been crippled by Toronto-based Campeau Corp.'s use of debt to acquire Federated in 1987 for $6.6 billion and Allied a year earlier for $3.6 billion, analysts said. Chairman Robert Campeau gained prominence in the Canadian real estate business before striking out in U.S. retailing.

Under Chapter 11, Federated and Allied would remain in business while restructuring, but analysts said it was likely that the weakest among the retailers's 258 store outlets - including a poor-performing Bloomingdale's operation in Texas - would be closed.

"What will happen now is the breakup of Federated and Allied with a gradual selloff of the the various operating divisions," said Kurt Barnard publisher of the trade newsletter Barnard's Retail Marketing Report. "Over the short term, you will find that some of the stores that have underperformed will be closed."

Last September, shortly after Campeau first disclosed the retail units' cash crunch, Bloomingdale's was put on the auction block in what analysts said was an effort to raise money to stave off bankruptcy.

Campeau, which hoped to fetch more than $1 billion for its retail crown jewel, said Monday efforts to sell Bloomingdale's would continue under the supervision of the bankruptcy court.

Analysts, however, said Burdine's in Florida, Lazarus in Ohio and Rich's in Georgia also were likely candidates for divestiture in bankrutpcy proceedings focused on reducing the retailers' debt.

"Those three in particular would make an interesting fit with some existing retailers - and I'm talking about legitimate players as opposed to real estate people who think they can make a go of it" said Barbara J. Wedelstaedt, a securities analyst with Dugg & Phelps Inc. in Chicago.

Cash-rich May Department Stores Co., based in St. Louis, has already expressed an interest in some Federated and Allied properties. Now that a bankruptcy filing has been made, analysts expected other retailers to test the waters.

Also, there was a good chance that Jordan Marsh, situated in New England where the economy has been weak, and The Bon Marche in Washington state would be sold for their real estate value and not as going concerns, Wedelstaedt said.

While asset sales would help reduce the retailers' overall debt, payments to bondholders were another critical issue, said Monroe Greenstein, of Bear Stearns & Co.

Interest on Federated junk bonds, which have plunged in value since

September, were reported to be costing hundreds of millions of dollars a year, consuming operating revenues and contributing to the retailers' debt crisis.

Before the filing, bondholders were not interested in Campeau's offer to swap bonds for equity, but bankruptcy proceedings now would force some kind of restructuring. "There is pain and that pain is going to have to be shared," said Wilbur Ross, an attorney who represents Federated bondholders.

#90015u1774 01/15/1990 ~United Press International

DALLAS (JAN. 15) UPI - Triton Energy Corp. Monday reported net loss of $6.1 million for fiscal second quarter ended Nov. 30, compared with a loss of $13.2 million in the same period of the previous year.

Revenues for the quarter totaled $70 million, up 64 percent from $42.6 million the previous year.

For the six months, the independent oil and gas company lost $10.8 million compared with a loss of $18.2 million in the same period of the previous fiscal year.

Revenues were $135.1 million, up 40 percent from $96 million in the previous year.

The losses were blamed on lower than expected operating results and start-up costs from recent acquisitions in the aviation sales and services segment. Losses in the prior year resulted principally from writedowns of assets.

Triton has interests in 13 countries. The company also designs seismic data acquisition systems and provides aviation-related services and produtcs.

Analysis By: Vernon Scott

HOLLYWOOD (JAN. 15) UPI - "Nerds of a Feather" is the title of a new comedy flick and a pretty fair description of its producer.

Filmmaker Mario Milano wrote, produced, helped direct, and starred in "Nerds of a Feather," which cost him his house when he put it up as collateral to help finance the picture.

"Nerds of a Feather" has not found a distributor, so it will be released in a city or two at a time to allow Milano to recoup his investment. Milano, whose first name used to be Romeo (his parents were opera singers) has not always been an unqualified success in life.

At an early age he fell in love with the daughter of a multimillionaire, but daddy didn't think Milano could afford his daughter and told him to earn his fortune before bothering her anymore.

The love-struck cash-starved Milano plunged into real estate, scrimped and saved. He traded his house for a 40-foot yacht and sailed it to daddy's dock - just in time to learn it was the girl's wedding day, but not his.

Still a bachelor, Milano became an actor and appeared in "Beyond Evil" with Linda Day George and "Force of Five." He formed his own production company, Milano Film International, which produced "Nerds of a Feather."

Asked why he starred himself in the film, Milano said "Somebody had to do it, and I couldn't find a nerd. I was the only one who could afford to work in it. Everybody else wanted more money."

"The guy I play is a bedpan handler in an old folks rest home," he explained. "He falls madly in love with Jennifer (played by Kathleen Kichita) who also works in the rest home."

Lest anyone think "Nerds of a Feather" is without excitement, Milano boasts of some pretty extraordinary stuff. "There is a 104-foot limousine, which doubles as a submarine," he said. "It arrives in this country to deliver the invincible Russian army, which consists of a dozen midgets.

"The limo has 12 bedrooms, a bowling alley, an outdoor restaurant and a baby limo that goes out the back. It really drives like any other car, but it's too long to turn corners. Pat McCormick plays a mad professor who creates a secret formula for life extension. He escapes from Russia disguised as a cow."

For the record, Milano's comedy is not related to "Revenge of the Nerds" or "Nerds in Paradise," which achieved some measure of box-office success in the past few years.

"My budget was $3 million," Milano said, "but a lot of it was wasted. I had three different crews. The first robbed me blind and the last crew did a worse job than the first two.

"But I learned a lot. I was line producer all the way through. On my first picture, 'Beyond Evil,' I was executive producer. I would describe this picture as being a cross between 'Brazil' and 'Airplane,' or maybe the Monty Python movies. It's off the wall.

"The plot is fairly complicated because the guy I play, Peter Lawson, and his girlfriend Jennifer are constantly being chased by Russian spies."

Audiences should have no problem identifying the spies. One of them is Peter Risch, arguably the world's smallest actor at 29 inches. The other is played by Polish model Anya Karin, a statuesque blonde.

"Kids love this picture," Milano said. "The cast includes an incredible little dog who wears sunglasses and a headset. His name is Lampshade and he is able to speak.

"Making a nice contrast, we have the world's most beautiful tall woman in a scene with the smallest midget. She is an unknown from Sweden. In one scene, Peter Risch helps her out of the limo and kisses her on the knee, which is level with his head."

"Nerds of a Feather" will open in eight or ten theaters later this month in Phoenix. Thereafter the picture will make its appearance in a succession of cities a few theaters at a time.

Milano is optimistic about the success of his picture even though it may take some time for him to get his investment back. "It was two and a half year's work," he lamented. "Unfortunately, the people who took my house as

collateral couldn't wait. So I lost it." A thing like that shouldn't happen to a nerd.

(JAN. 15) UPI - The Soviet Union says military force will be needed to prevent a full-scale civil war in Azerbaijan. That after two days of anti-Armenian rioting in the capital of Baku left at least 34 people dead. Soviet Premier Nikolai Ryzhkov has NOT spelled out his plans. But he says-quote- ''The conflict must be solved with the help of military power.''

East German Prime Minister Hans Modrow wants opposition leaders to use their influence to prevent strikes and end the mass flight of refugees to the West. Modrow made a surprise visit to a meeting of 16 opposition groups in East Berlin, telling them he's concerned ''over the domestic political situation.'' He spoke against a backdrop of nationwide protests against Communist rule and the exodus of East Germans to the West.

A top East German prosecutor says former leader Erich Honecker and the former chief of the secret police may face charges of high treason. The prosecutor told opposition leaders that an investigation of the pair has expanded from corruption and misuse of power to include high treason and actions against the constitution. Honecker was forced to resign as Communist Party leader and East German chief of state amid calls for government reform.

The Columbia astronauts are trying to make up lost time on medical and scientific projects while ground crews work to determine the cause of problems with the ship's navigational gear. The glitch appeared overnight in one of three units that tell the ship's computers how fast the craft is moving and how it is oriented in space. Later, the device appeared to be working properly. Flight director Granvil Pennington says he does NOT

expect any more problems.

Analysis By: Vernon Scott

HOLLYWOOD (JAN. 15) UPI - Producer-director Eric Karson aims to capture on film the inherent tragedy of Los Angeles street gang warfare. There is nothing of "West Side Story" here, none of the nonsense about chivalry and romance.

Karson is filming a deadly way of life that turns the streets of Los Angeles barrios into a nightmare of drive-by shootings, sniper fire and lethal rumbles every night of the week.

"We've been filming on locations where our soundtracks at night are marred by nearby gunshots," Karson said, a bit shell-shocked by his own

misadventures in the battle zone.

"There were a couple of close calls. We had to stop production one night for half an hour while a police SWAT team arrested five people in the back yard of the house we were shooting in. A helicopter took part in the bust. We shot footage of the chopper and it will be seen in the picture - at no cost to the production.

"Another day we were shooting a scene between Hispanic and black gangs when we broke for dinner. During the break a man was shot and killed on the corner where we had set up our cameras. It was pretty close on several occasions. It wasn't uncommon for the pop of guns to be heard at any time of day.

"The concept of the picture is street real, to show what is actually happening in this time and place. The conflict and drama are always there. Americans need a raised awareness if we're going to do anything about it. "The Chicano gangs we deal with have a history dating back to the 1920s, to a time when present-day members' grandfathers were part of the gangs."

Karson said Hispanic gangs do most of their killing within their own communities, seldom straying off to confront black, Asian or other gangs. "Nor are Latino gangs involved much in drug traffic, like the blacks who are much more profit-motivated," he said. "It is a matter of turf.

"In Mexico and other Latin countries turf is historically based in villages. The feuds were long distance. But in Los Angeles it's compressed into streets and blocks where each gang has staked out its territory. Members of rival gangs are not allowed to invade each other's areas. It's all about honor, neighborhood, family - and cars, which are symbols of affluence. It's a village mentality, deep-seated machismo culture.

"There must be 5,000 gangs and subgangs. Guns are everywhere, including automatic weapons. Almost everybody in the barrio has to belong to a gang. Even women, who are treated like property, like cattle.

"A gang's turf may be a square mile or maybe just three city blocks. Gang member ages range from young teenagers to men in their 50s. There's even a new group of Latinos who call themselves 'Stoners.' They disavow anything Hispanic. They won't speak Spanish, they wear blue contact lenses and they're into drugs.

"The number of murders is very high. Killings get worse on weekends because that's when gangs try to crash parties or go into another gang's turf or settle feuds that build up over the week.

"Ten to 15 people are shot on weekends. The violence has gotten so heavy that it's not newsworthy anymore. It's the same story week after week. The

horrible part of it is that most of the people killed - about two a night on average - are innocent victims.

Police and social organizations are helpless to deal with the gangs because of the great differences in the Hispanic cultures, Karson said. "The concept of reasoning with them simply doesn't hold up," he said.

In order to work in the barrios, Karson found it necessary to align himself with a couple of gangs, The Harpies and Dead End 13s. Otherwise he would have been unable to work on their turf. "We positioned it for the gangs' leaders in a way that they believed 'Angel Town' was their movie, but we really weren't welcomed by anyone.

"The local gangs did all the graffiti for us and looked out for the show. One of our graffiti artists showed up on a crutch one day and explained he'd been shot the night before. He thought it was hysterically funny. That's their mentality. We had six or seven policemen on the set at all times. It was a prudent precaution."

SANTA CLARA, CA (JAN. 15) UPI - The U.S. Memories consortium that hoped to revive American production of vital computer chips announced Monday that it was dissolving because it was unable to attract investors or sales.

"We saw an unwillingness to provide a commitment in terms of financing and

orders," Sanford L. Kane, chief executive officer of the venture, told a news conference. The enterprise was formed last May by seven top U.S. chip and computer firms as the first cooperative manufacturing venture in the United States.

"The problem is our inability to work together and cooperate," Wilfred J. Corrigan, chairman of U.S. Memories and chief executive officer of LSI Logic Corp., said. "We are like an all-star team ... We don't work together very well. Others keep winning while we keep getting knocked off, one by one."

The aim was to create a $1 billion consortium to restore a full U.S. supply of the most common type of memory chips - four-megabit dynamic random access memories, or DRAMs - the building blocks for storage of data in numerous types of electronic products, including computers, home appliances and military hardware.

Japanese companies now make 75 percent of all DRAM sales. Most American chip makers fled the $9 billion market in the mid-1980s because of the agressive Japanese competition. "By 1993, we would have been cost competitive with the Japanese," said Kane.

But during a meeting Wednesday in Dallas with principal investors and potential chip buyers, it became apparent none were willing to make a commitment, he said.

"We could have gotten along with as little as $150 million in orders, but had hoped to get $500 million. Unfortunately, they did not come to the meeting prepared to take the risks that are necessary," Kane said. "Why would an industrialist invest in a semiconductor company with no firm sales for its product?"

U.S. Memories began with seven investor firms. They included chip makers Advanced Micro Devices Inc., Intel Corp., National Semiconductor Corp. and LSI Logic Corp. and computer makers IBM Corp., Digital Equipment Corp. and Hewlett-Packard Corp.

The plan was for the seven companies to contribute $500 million in capital to start the venture, with the other half financed by loans. But it failed to attract investors, partly because prices of DRAMs are at an all-time low because of a flood of surplus chips that have hit the market.

Kane gave the start-up until the end of the year to sign enough sales commitments and investor companies. Among the possible firms who rejected joining the venture were Apple Computer Inc. of Cupertino and Sun Microsystems Inc. of Mountain View.

Corrigan said the goal had been to provide 40 percent of the DRAMS orders

for U.S. companies. "However, they were not willing to be committed," he said. "The industrial reality is we are in an economic war environment," Corrigan added. But, "The U.S. has a national industrial policy vacuum, while the Japanese forge ahead with their united worldwide strategy."

The Japanese "can now do what they want with their technology in a strategic sense to control our (computer) markets," Michael Borrus, deputy director of the Berkedey Roundtable on the International Economy, warned in response to the demise of U.S. Memories.

He said the venture's collapse "will send a strong signal to the Japanese that the U.S. is incapable of looking out for its best interests in the long-term future of the industry."

J. Richard Iverson, president of the American Electronics Association, issued a statement from Washington expressing disappointment that the U.S. Memories effort had been called off.

"Although DRAM availability and pricing is not currently a problem, our almost total dependence for this vital building block of both commerical and military electgronics rests with foreign sources," Ivereson said. "I feel certain that U.S. DRAM re-entry efforts will not end here."

#90015u2036 01/15/1990 ~United Press International

(JAN. 15) UPI - Americans marked slain civil rights leader Martin Luther King Jr.'s birthday Monday with bittersweet memories of his dreams for racial harmony, parades to celebrate his life and tolling bells to mourn his premature death.

Schools, banks and government offices closed on the nation's newest holiday, first observed nationwide in 1986. This year, the observance fell on King's actual birthday, when he would have been 61.

But the holiday remained controversial, unrecognized by Arizona, Montana, Idaho and New Hampshire and generating criticism of businesses that refused to close in other states.

''It is ironic that the birthday of one so respected around the world is often seen - here in his home - as somehow a holiday for African-Americans only,'' said Democratic National Chairman Ron Brown, the first black to lead a national political party. ''The birthday of Martin Luther King is a day for all Americans to pause and remember one who gave his life for the American ideal.''

In Phoenix, 15,000 people rallied at the Arizona Capitol to protest a the lack of a state holiday honoring King. The holiday was to have been

celebrated in Arizona for the first time Monday, but opponents succeeded in getting enough petitions to require a referendum on the proposal in November.

The petition drive, which garnered more than 43,000 signatures, received a big boost from the Italian-American community because of the repeal of state's Columbus Day holiday.

King, a Baptist minister, led marches through the South during the 1950s and 1960s to end discrimination against blacks. He was gunned down April 4 1968, by James Earl Ray at a motel in Memphis, Tenn.

Sen. Howard Metzenbaum, D-Ohio, said he would introduce legislation this month ''to restore the rights of minorities and women'' that have been eroded by recent Supreme Court decisions.

''Our march toward a better America will be turned back unless Congress and the president step up the pace for justice and equality for all Americans,'' he said.

In King's native city of Atlanta, thousands of people lined Peachtree Street for a nationally televised parade in his honor.

Chinese student dissident Shen Tong, a leader of last year's pro-democracy protests in Beijing's Tiananmen Square, was grand marshal in place of entertainer Sammy Davis Jr., who canceled because of illness.

The parade was preceded by an ecumenical service honoring King at the Ebenezer Baptist Church, where King served as co-pastor with his father and where his mother was slain in 1974 as she played the organ.

In the wake of recent mail bombs sent through the Southeast, officials took extra security precautions for the service at Ebenezer, forcing the congregation of 700 to pass through metal detectors. Outside the red-bricked church, police guarded the streets.

Civil rights activist Hosea Williams marked the holiday with a news conference to ''apologize'' for urging former President Reagan to make the day a national observance.

''If Dr. King were living today, he would condemn black leaders all across America who are misusing his birthday to raise large sums of money under the disguise of helping the poor, when in fact that money will mainly be used to further the cause of the black middle class,'' said Williams, a former Atlanta city councilman and close associate of King.

Across the country, church bells rang and moments of silence were observed. The New York Stock Exchange stopped trading briefly.

But the celebration was marred by complaints that few businesses observed the holiday. One survey showed only 18 percent of 317 companies polled would give employees the day off with pay.

''It's an insult, really,'' said Steve Klein, a research associate with the Martin Luther King Jr. Center for Non-violent Social Change in Atlanta. ''The private sector has really not kept the faith with the holiday.''

In Boston, minority activists linked King's fight for racial justice with the wrongful blaming of a black man for a pregnant white woman's murder and began a weeklong boycott of the city's newspapers.

In Detroit, members of the Newspaper Guild maintained vigils outside the Detroit News and Detroit Free Press buildings to protest the newspapers' refusal to recognize King's birthday as a paid holiday in their contracts.

WASHINGTON (JAN. 15) UPI - The United States spends a smaller percentage of its national wealth on educating students in preschool through 12th grade than Japan, West Germany and many other industrial countries, a study said Monday.

The liberal Economic Policy Institute said its findings contradict claims by the Bush administration that the American educational system is well funded. Administration officials said the report's statistical methods were flawed.

The EPI study compared the percentage of gross national product - the total value of goods and services - spent on education in 16 countries, using U.N. and Education Department figures. The figures in the report were from 1985, the last year complete statistics were available.

The EPI study found that when public and private spending on all levels of education - including higher education - were compared, the United States was tied for second place with Canada and the Netherlands, trailing only Sweden.

But when spending on preschool through 12th grade was considered, the United States tied for 12th. When adjustments were made to reflect the comparatively larger U.S. school-age population, America ranked 14th, the report said.

Sweden was first in enrollment-adjusted spending followed by Austria, then Switzerland, Norway, Belgium, Denmark, Japan, Canada, West Germany, France the Netherlands, Great Britain and Italy. Only Australia and Ireland trailed the United States, the study said.

Charles Kolb, undersecretary of education, called the report ''irrelevant'' because of its use of GNP, saying America spends more per student in preschool through 12th grade than any industrial country other than Switzerland.

Kolb said GNP comparisons can be deceptive, pointing out that Minnesota spends a smaller percentage of its wealth on education than Mississippi, but that actual spending per student in Minnesota is nearly twice as great.

''Statistics can be made to do weird things,'' Kolb said. ''This report underlines the need in this country for better mathematics education.''

The study said it used GNP ''to avoid distortions caused by fluctuating exchange rates.'' It said, for example, that when the dollar is strong, as it was in 1985, other countries' per-pupil spending would appear to be lower.

The report said the United States spends more on higher education than the

other countries because many more Americans attend college. But it said focusing on spending at all levels ignores that ''the current crisis of American schools ... is in the primary and secondary school systems.''

The study calculated that for the United States to match the average expenditures on preschool through 12th grade in the other 15 countries, spending would have to be increased by $20 billion a year.

''Spending more money is not, of course, the only answer to the difficult problem of revitalizing primary and secondary education. But ... in education, as in every other service, we may 'get what we pay for,''' the study said.

''Given the level of investment in our pre-primary, primary and secondary schools, it is not surprising that we are slipping behind in comparative measures of performance as well.''

(JAN. 15) UPI - Tensions remain high in the Soviet republic of Azerbaijan as Moslem fundamentalists press their campaign to purge the capital of Baku of Christian Armenians. Soviet news reports say- quote- ''The local authorities are helpless.'' An Armenian appeal for military intervention appears to have been heard. The Kremlin announced today it will use military force to prevent a civil war.

The companies that own such upscale stores as Bloomingdale's and Burdine's filed for bankruptcy protection today... but top executives say the stores will remain open during reorganization. Campeau Corporation's retail units... Federated Department Stores and Allied Stores... are seeking Chapter 11 bankruptcy protection from creditors. The U-S retail units of Toronto-based Campeau Corporation are saddled with combined debt of seven-BILLION dollars.

A Bush administration official says National Security adviser Brent Scowcroft and Defense Secretary Cheny are at odds on the idea of a U-S-Soviet ban on land-based missiles with multiple warheads. The official

says Scowcroft wants the plan to be offered next month when Secretary of State Baker meets his Soviet counterpart in Moscow. The official says Cheney has ''a difference of opinion'' on the issue and that President Bush may be siding with Cheney.

At least one civil rights activist close to the late Martin Luther King is displeased with how the nation is observing today's commemoration of King's birthday. Hosea Williams accuses black leaders of misusing King's birthdate for their own ends and NOT those of America's disenfranchised. Williams says the money raised by black leaders under the auspices of helping the poor will- quote- ''mainly be used to further the cause of the black middle class.''

(JAN. 15) UPI - A Luxembourg banking firm with ties to Panama's former leader Manuel Noriega may face trial this week in Tampa, Florida, charged with helping to launder 32-Million dollars in drug money. Jury selection is expected later this week in the federal court trial of the Bank of Credit and Commerce International and nine of its officers, one of whom was Noriega's personal banker. The Luxembourg-based firm was run by Pakistanis and backed by funds from Saudi Arabia.

Former East German leader Erich Honecker and the man who once headed East German's secret police may face charges of high treason. An East German prosecutor told a conference of opposition leaders that the probe of government corruption under Honecker has widened. The ailing Honecker resigned last October as Communist Party leader and East German chief of state.

The Bulgarian National Assembly has followed up reform promises made last month with concrete action. The 400-member legislative body today unanimously approved opening the nation's political process to NON-communist parties by striking two paragraphs from the constitution, which gave communists the leading role in political and social life. Some 100-thousand demonstrators gathered yesterday to demand the action.

The U-N Security Council has opened a two-day meeting in Paris aimed at settling the conflict in Cambodia. The main proposal before the five permanent members of the council calls for the world body to administer Cambodia for one year until free elections can be held to select a new government. The head of the resistance movement has rejected the plan, arguing it would divide Cambodia into communist and NON-communist zones.

#90015u2264 01/15/1990 ~United Press International

CAMDEN, NJ (JAN. 15) UPI - On his first day on the job, Campbell Soup Co. Chief Executive Officer David Johnson pledged Monday to keep the food giant an independent company and expressed confidence he could convince some minority shareholders to drop plans for a sale of the company.

Johnson also cast some doubt about the company's proposed new $100 million headquarters on the Camden waterfront, "because we are talking about big dollars."

Australian-born Johnson, 57, who led a turnaround at Michigan's Gerber Products Co., where he increased profits almost threefold in two years, began the whirlwind day by meeting with Campbell's 1,500 corporate employees at the company cafeteria.

At a media briefing, Johnson warned that the company, whose ability to generate profits has significantly decreased in the past years, might have to change its strategy through the sale of units or the acquisitions of new lines of business.

"I don't think that with David Johnson around, there's a hope in hell of that being the way the future will unfold," he said. "I know there will inevitably be divestitures ... and along the line I hope that there will

be acquisitions."

But Johnson's first priority will likely be to soothe the warring factions of the Dorrance family. Heirs of John Dorrance, the inventor of condensed soup, own about 59 percent of the company.

Some family members, unhappy with the poor return on equity at Campbell, which had revenues of $5.7 billion last year, want to sell the company. Others want to keep Campbell independent, as does Johnson.

When asked whether the only way to maintain Campbell's independence was through continued control by the Dorrance family, Johnson replied: "I believe that at this time. There is never an only way but I think that's the obvious and preferred way at this time," he said.

Regarding the dissident Dorrances, Johnson said, "My line of approach would be to listen. I don't think there is anything wrong with a family having some disagreements. I want the opportunity to talk with them."

Johnson said the company's "troubled times" may have spawned the disagreements and suggested that the Dorrances who want to sell their shares may feel otherwise if the company's bottom line is improved, something he predicted would occur within a year.

Johnson discarded the notion that Campbell's nearly $6 billion in annual revenues was too little. Campbell, which owns an impressive array of brands, including Pepperidge Farm, Vlasic pickles, Swanson and Godiva chocolates, ranks 13th among U.S. food companies, down from seventh only two years ago.

"The underlying assumption that we've got to be bigger than what we are is a fallacy," he said. "I don't buy it. I think we can go forward with strength, with independence and delivering incredibly strong results" without the benefit of a major merger or acquisition.

To earn the "cheers" of all Campbell shareholders and Wall Street, the company must focus and build on its "bottom line performance, earnings performance, returns performance and profitability performance," he said. "This is a powerhouse opportunity."

Campbell's planned new building is considered key to the $500 million waterfront development project that city and state officials are hoping will spark a revitalization of the state's most depressed city. "I regard it as a very important subject that I have set as a priority for myself to be involved in," Johnson said.

#90015u2286 01/15/1990 ~United Press International

WASHINGTON (JAN. 15) UPI - President Bush played 18 holes of golf Monday with his key foreign policy advisers, winding up a three-day holiday weekend.

Cutting short his weekend stay at Camp David, the president played golf at nearby Andrews Air Force Base with Secretary of State James Baker, national security adviser Brent Scowcroft and Ambassador Fred Zader, head of the Overseas Private Investment Corporation.

On his return to the White House, Bush waved and smiled but ignored shouted questions about the strife in the Soviet republic of Azerbaijan.

When Baker was asked whether a state of emergency had been declared in Azerbaijan, he replied, ''That's what I hear.''

Bush had no public appointments on his schedule Tuesday with most of his official time allotted to meetings with staff workers.

He was expected to spend some time this week reviewing drafts of his State of the Union address to be delivered before a joint session of Congress on Jan. 31. His budget for the 1991 fiscal year has been prepared for public release on Jan. 29.

This is an anniversary week for Bush, who celebrates his first year in office on Jan. 20. Bush plans to approach the anniversary with a pep talk Thursday to all of his top federal appointees and a reunion gala for the Bush-Quayle campaign.

A poll published Monday indicates Bush is ending his first year as president with favorable ratings.

In a USA Today poll of 810 adults conducted last Wednesday and Thursday the president received a grade of A or B from 63 percent, up 12 percentage points since a similar poll in October.

Sixty-two percent feel better about Bush because of the way he handled the Panama crisis, up 12 points from a similar poll taken right after the December invasion.

On the domestic front, 45 percent think Bush has ''taken charge'' in Washington instead of reacting to events, up 16 percentage points from April.

But Bush gets better marks for his foreign policy than he does for his domestic affairs, with 74 percent approving of his dealings with the Soviets and only 25 percent approving of his handling of the nation's deficit.

The president was expected to meet with visiting Egyptian Foreign Minister Esmate Abdel-Meguid on Tuesday or Wednesday to relay the results of weekend consultations with Palestine Liberation Organization leader Yasser Arafat and Egyptian President Hosni Mubarak.

The talks with the Egyptian official were expected to center on how to revive the stalled U.S.-backed peace talks between Israel and the Palestinians.

Abdel-Meguid's Washington visit was also intended to assure the Bush administration that both the PLO and Egypt are still very interested in holding Israeli-Palestinian talks.

#90015u2307 01/15/1990 ~United Press International

BOSTON (JAN. 15) UPI - Minority activists Monday used the Martin Luther King Jr. holiday to fuel a growing racial dispute over the wrongful blaming of a black man for the murder of a pregnant white woman.

As the state's political leaders gathered with minority leaders and business officials for an annual breakfast to mark the 61st anniversary of King's birth, a grassroots group of blacks and other minorities protested outside.

The Boston Boycott Committee urged a seven-day boycott of The Boston Globe and the Boston Herald newspapers - the city's two major dailies - to protest the media's handling of the slaying of Carol Stuart.

A small group passed out flyers outside the breakfast at the posh Marriott Hotel in Boston's Copley Square. Activists called for a demonstration held later in the day at Washington Park to demand an end to racist practices by police and calling for fair, unbiased treatment by the news media.

Racial tensions began to mount in Boston when Stuart, a pregnant white lawyer, was murdered in the racially mixed Mission Hill section of Boston last Oct. 23.

Police now believe Stuart's husband, Charles Stuart, shot his wife, wounded himself and blamed a black robber for the crime. When Stuart committed suicide Jan. 4 as police sought to arrest him, Boston's black community exploded in anger.

Initial media reports had quoted police sources as saying William Bennett, a black Boston resident with a long criminal record, was the prime suspect in the case.

Since Charles Stuart's suicide, minority activists have held protests, criticized the media and called for investigations of police handling of the case.

''Our boycott campaign is a vehicle for the grassroots community to show and express their support for the Bennett family and other families victimized by police, exploited in the media, and insulted by the mayor and district attorney,'' Boston Boycott Committee spokesman Tony Van Der Meer said Monday outside the annual King breakfast.

Both the Globe and the Herald have denied their coverage was racially tinged.

State political leaders, including Gov. Michael Dukakis and Lt. Gov. Evelyn Murphy and Boston Mayor Raymond Flynn, avoided the Stuart issue at the King memorial breakfast.

Flynn, who has been under intense pressure from black leaders since the revelations, said nothing about the controversy during brief remarks.

SAN DIEGO (JAN. 15) UPI - The wife of a cult leader charged in the ritualistic slayings of an Ohio family has decided to agree to be extradited, her lawyer said Monday.

Alice Lundgren, arrested Jan. 7 along with her husband, Jeffrey Lundren, and 19-year-old son, Damon, has denied any role in the slayings and will appear before a judge Tuesday to waive extradition, said Kay Sunday, her court-appointed lawyer.

Mrs. Lundgren, 38, had told authorities she wanted to return to Ohio but declined waive extradition after her husband and son refused. But Sunday said her client decided late last week to strike out on her own and return to Lake County, Ohio, where she faces five counts of conspiracy to commit murder.

''I'm hopeful (Ohio authorities) come and get her within 10 days,'' Sunday said. ''I'd like to see her get back there as soon as possible so she can begin the process of clearing her name.''

Jeffrey Lundgren, 39, a defrocked preacher in the Reorganized Church of Jesus Christ of Latter Day Saints, and 12 of his followers have been charged in the shooting deaths of Dennis Avery, 49; his wife, Cheryl, 42; and their three daughters, Trina, 15, Rebecca, 13, and Karen, 6.

At least one of the defendants said he saw Lundgren shoot a member of the Avery family. Other followers said Lundgren admitted killing the Averys

and had members of his group help bury the victims.

The Averys were allegedly shot execution-style in a barn on a Kirtland farm on or about April 16, 1989. The next day, Lundgren led his flock from the Cleveland area to West Virginia and later Missouri.

Four days after the victims' bodies were discovered Jan. 3, the three Lundgrens were arrested at a motel near the Mexican border. Two other followers, Kathryn Johnson, 36, and Daniel Kraft, 25, were arrested last week in a remote part of eastern San Diego County.

(JAN. 15) UPI - 44 people- most of them elderly pensioners- were injured today when gunmen stormed into a post office in Bologna, Italy, and set off an explosive charge to get at several sacks of pension funds delivered minutes earlier. The bandits escaped with more than 100-thousand dollars.

Soviet and Czech officials are meeting in Prague for three days of talks on the proposed withdrawal of 80-thousand Red Army troops from Czechoslovakia. Soviet soldiers have been in Czechoslovakia since the 1968 Warsaw Pact invasion, but Prague now says their presence is illegal.

Eastern Europe's steps toward freedom have been noticed in various Gulf Arab states. State-run radio in Kuwait reports the autocratic oil-rich emirate is ready to move toward democratic reform. This word comes after the country's crown prince and premier said last week that greater public representation- quote- ''will avert a crisis.''

Former African National Congress leader Walter Sisulu led a group of eight A-N-C veterans to Zambia today for an emotional reunion with the movement's exiled leaders. The formerly imprisoned activists arrived to a joyous welcome that included Sisulu embracing his exiled son, Max, for the first time in 27 years.

Pennsylvania state police say a Maryland veterinarian is undergoing surgery in a Pittsburgh hospital after being attacked and severely bitten by a 200-pound chimpanzee this morning in Ligonier. Police say the 20-year-old male chimp mauled the vet after he broke loose while being transferred. The animal was destroyed.

NEW YORK (JAN. 15) UPI - American Telephone & Telegraph Co.'s long-distance service was disrupted Monday by a nationwide computer software problem that prevented many customers from phoning out of their local calling areas.

Service was crippled about 2:50 p.m. EST, when callers began receiving recorded messages saying the company's network, the largest in the nation, was overloaded, said Bob Reynolds, an AT&T spokesman.

Reynolds said the service outage was caused by a problem with the company's computer software and was not related to a mechanical difficulty.

''At this moment, we are still investigating what is the root cause,'' he said. ''We believe it has to do with software, which is restricting the number of calls to the network.''

He said it was unclear exactly how much of the system was out of service or how many customers were affected, explaining that he had been unable to call out of New York City to other AT&T offices around the nation.

AT&T computer specialists were examining the software in an attempt to fix the problem, Reynolds said.

He said the system was beginning to let a few more calls through late in the afternoon.

The problem was first reported by users of 800 toll-free numbers who

complained they were unable to complete calls.

Since the court-ordered breakup of the Bell System, AT&T has been one of the companies customers can choose to carry calls to numbers outside their regional dialing area. Local telephone companies provide service within those areas.

Other long-distance telephone companies apparently were not affected by Monday's problems.

#90015u2441 01/15/1990 ~United Press International

CHICAGO (JAN. 16) UPI - Leaders of United Airlines' pilots union, in a letter released Monday, pledged to mount a last-ditch campaign for a new employee-led buyout of parent UAL Corp. and avert a recapitalization demanded by an investor group.

The letter by Fred Dubinsky and other officers of the United Master Executive Council of the Air Line Pilots Association echoed a call by UAL Chairman Stephen Wolf urging employees to get together on an employee-led buyout.

Wolf, ordered to remove himself from negotiations with employee unions on a new buyout offer last week because of growing differences between him and union leaders, sent a letter to all employees last week urging them to work toward a buyout.

''We have had, and continue to have, differences with Mr. Wolf on several significant issues but we agree with his current letter from start to finish,'' Dubinsky and fellow union leaders J.S. Smith and F.C. Isherwood said in the letter to ALPA members.

''Coniston Partners' assault on our company has finally fixed every employee's attention on the problem,'' they wrote.

''Even those who were most skeptical of employee ownership are opening their eyes to what we prophesied would be the real threat to United's long-term corporate health and the career security of all employees,'' they said. ''Empty debt, the result of a 'recapitalization,' could in fact ruin this airline and every employee's dream of a profitable and secure future.''

Pilots took the lead in a $6.75 billion, $300 a share employee-led buyout bid last fall but the deal collapsed in October for lack of financing.

Condor Partners, a New York group headed by Coniston Partners, moved in following the collapse of that deal to force action to maximize

shareholder value.

Condor, which controls 11.8 percent of UAL stock, threatened to mount a bid to seize control of the UAL board if directors failed to find a buyer or begin pursuing a recapitalization by Jan. 8.

With no bid on the table by Jan. 8, UAL directors instructed the board's financial advisors to draft a recapitalization plan to be considered by the board Jan. 25.

Directors, however, also said they would consider new bids for the company.

In the letter to pilots, the ALPA leaders said the union's executive council would meet Jan. 24 ''to determine if we can develop a viable proposal for employee ownership to present to the (UAL) board the next day.''

They said directors have indicated they will proceed with a recapitalization as demanded by Condor if no new buyout bid is on the table at next Thursday's meeting.

Analysis By: Joan Hanauer

NEW YORK (JAN. 15) UPI - The citizens of "Grand' treat sex the same way Mark Twain categorized weather - everybody talks about it but nobody does anything about it.

"Grand,' the zany new NBC sitcom that will premiere Thursday, Jan. 18, 9:30-10 p.m. Eastern time, takes its title from the mythical small town of Grand, Pa., where the folks are obsessed with sex, money, and power. Since money and power are hard to come by in a town where the main employer is the financially troubled Weldon Piano Works, sex takes first place.

You don't have to hide the show from the little ones - nobody ever actually does any sex. But the characters talk about it endlessly, from the woman who hasn't experienced any since her husband left her to the old man who would like to oblige her to the bride who keeps trying to drag her reluctant husband into bed.

Three families form the centerpiece of "Grand.' The first family you'll meet consists of Janice Pasetti (Pamela Reed) and her teenage daughter, Edda (Sara Rue).

Janice, a former homecoming queen whose husband went out for cigarettes three years ago and never came back, lives in a trailer park, smokes like

a chimney and works as a maid for the two other families in the show.

She cleans house for the Smithsons - Carol Anne (Bonnie Hunt), the sex-starved, ever-ovulating wife of Tom (Michael McKean), a woman who quivers with jealousy when she discovers that during his first marriage, Tom actually went to bed with his wife.

Tom, who has the intelligence and tact of a lima bean, wants to be an executive at the Weldon Piano Works, owned by Carol Anne's uncle. He thinks the firm should drop pianos and make golf clubs because more people play golf than piano.

That does not impress Carol Anne's uncle, Harris Weldon (John Randolph, who sometimes plays "Roseanne's' father on ABC), a 70-year-old with an idiot slug of a son, Norris (Joel Murray) and an acerbic butler, Desmond (John Neville).

He knows that the secret of staying young is not having a young child around - it's having young women. Janice cleans for him, also, and he has bought her a new maid's outfit, a black lace merry widow corselet. She puts it on over her jeans.

The first episodes of "Grand' are reminiscent of "Soap,' ABC's outrageous spoof of sitcoms. "Grand' in its first few episodes doesn't go to the extremes of "Soap,' but there are similarities.

"Soap' told the parallel stories of the rich Tates and the blue-collar Campbells. "Grand' breaks it down into three groups. There's the blue-collar Pasetti family - Janice's would-be boyfriend is a younger motorcycle cop ("Guess what I've had chromed?' "Does it have anything to do with the way you're walking?'). Then there are the aspiring middle class Smithsons, and the rich Weldons.

Harris Weldon even has a sharp-tongued butler - he's not black like Benson on "Soap;' he's an elderly Brit who tells Janice that even the mention of her husband's name leaves an oil slick.

When Weldon's son Norris complains to Desmond that he has to find himself, that he doesn't know who he is, Desmond promptly responds, "You're a lazy, pampered rich boy.'

Norris, incidentally, has decided the solution to his problem is not to think at all and when Weldon finds out he replies philosphically, "Well, at least he's not in a tower with a rifle.' There's no danger of that - he'd never climb the stairs.

"Grand' was created by executive producers Marcy Carsey and Tom Werner, those wonderful folks who brought you "The Cosby Show,' "A Different

World' and "Roseanne.' Bill Cosby is an executive consultant for "Grand.'

There are plenty of amusingly despicable people in "Grand,' but Carsey-Werner are too smart not to give the audience characters to root for. Janice and her overweight daughter are real folks, old man Weldon isn't a bad guy despite his roving eye and Desmond, the butler, deserves a spin-off of his own.

John Neville, who plays Desmond, is best-known as a Shakespearean actor. He is the artistic director of the prestigious Stratford Shakespeare Festival of Canada, he created the role of "Alfie' on the London stage and once alternated with Richard Burton in the roles of Othello and Iago.

In "Grand,' he has some of the best lines, and he makes the most of them. He is asked, "Have you ever been intimate (with someone) when the two of you knew you weren't in love?' Desmond looks properly nostalgic and recalls, "I've been intimate when the three of us knew we weren't in love.'

#90015u2461 01/15/1990 ~United Press International

HARRISBURG, PA (JAN. 15) UPI - With its key provisions put on hold by a federal judge, Pennsylvania's restrictive new abortion law will have little immediate impact when it takes effect Tuesday, abortion providers said.

But abortion opponents said the Abortion Control Act of 1989 - the toughest passed in the nation since the U.S. Supreme Court permitted states to approve stricter limits on the procedure - would prevent at least some Pennsylvania abortions.

''It won't have a major impact on the overall number of abortions,'' said Denise Neary, director of the Pennsylvania Pro-Life Federation. ''But for the very first time in 17 years (since abortion was legalized) a law is on the books that stops some abortions.''

Sylvia Stengle, executive director of the Allentown Women's Center, disagreed.

''It will have zip impact,'' Stengle said. ''I do not believe this law will affect any of our patients.''

U.S. District Judge Daniel Huyett III last week issued a temporary injunction against requirements in the law that women notify their spouses before obtaining an abortion and that they wait 24 hours before undergoing the procedure.

The judge also blocked provisions requiring clinics to follow certain

informed consent procedures.

Left intact were provisions banning sex-selection abortions and abortions after 24 weeks unless the woman risked death or irreversible damage to bodily functions.

Claire Keyes, executive director of the Allegheny Reproductive Health Center in Pittsburgh, said the law's impact will be negligible.

''I've worked here 11 years and I've never heard of an abortion that was done for sex selection, and none of the clinics do abortions over 24 weeks. We only go up to 17 weeks,'' Keyes said.

Neary contended that sex-selection abortions are taking place in the state but she acknowledged there was little way to determine where or when.

''If (the clinics) don't ask women why they're having abortions, then no sex-selection provision will have any teeth in it,'' Neary said.

But the sex-selection language would still serve as a deterrent to women who were considering abortions because they were dissatisfied with the sex of the child, Neary added.

Health Department statistics showed that 127 abortions were performed in the state in 1988 between the 23rd and 27th week. Department officials have said there is no way to determine how many of those abortions were done before the 24th week.

Peggy Ross, director of education for the Hillcrest Womens' Medical Center in Harrisburg, said a widespread misunderstanding about the law's requirements has discouraged some women from seeking abortions.

''We're getting fewer calls from women who are between 10 weeks and 16 weeks pregnant,'' Ross said. ''And those we do hear from are confused because they think abortion is illegal during that time. There has been no massive media campaign to let the public know that abortions are still available.''

#90015u2476 01/15/1990 ~United Press International

(JAN. 15) UPI - World oil prices plunged Monday, led by U.S. heating oil which plummeted more than 5 cents a gallon with prospects of rising imports and temperatures in the Northeast.

''There's a significant amount of heating oil coming in from Europe,'' said James Steel, energy analyst with Refco Inc. in New York. The European supplies were helping drive down the market for crude oil, he said.

Weather in the Northeast, where most of the nation's heating oil is used, was not helping support heating oil prices, he added. Refco's meteorologist was forecasting warmer weather ''at least up until the end of the month,'' he said.

Heating oil for February delivery ended the day on the New York Mercantile Exchange down 5.05 cents at 64.60 cents a gallon, near its low on the day of 64.50 cents.

Also, heating oil contracts for March, April and May delivery dropped the 2 cent limit allowed by the Merc.

On the New York Harbor cash market, heating oil was being quoted at 71.85 cents a gallon, down 5.8 cents.

Last Tuesday, the oil industry's American Petroleum Institute reported that imports for the previous week rocketed 110,000 barrels over the prior week to 429,000 barrels a day in as exporters chased higher U.S. prices.

This week's API report is expected to show an even greater surge in imports.

Following the lead of heating oil, the benchmark West Texas Intermediate crude for February delivery fell 77 cents to $22.36 a barrel.

WTI on the U.S. Gulf Coast cash market plunged 80 cents to $22.30 a barrel.

''There's already a lot of crude around. If there isn't a strong heating oil market, there's no reason to hold crude,'' Steel said.

Crude tried to rally several times at the $22.50 support level, ''but it didn't have a chance,'' said Greg Dreis, a trader with Merrill Lynch Energy Futures in New York.

Unleaded gasoline finished the day on the Merc down 1.5 cents at 63.59 cents a gallon.

It also lost 1.5 cents on the New York Harbor cash market to 65.60 cents a gallon.

Dreis said gasoline gained some support from an afternoon report of a strike by refinery workers at Brazil's state-owned oil company Petrobras that supplies gasoline to the U.S. market.

''A lot of people were buying gasoline and selling crude and heating oil '' he said.

Gasoline may have found a new support level around 63.50 cents a gallon, the analyst said.

On the European spot market, the United Arab Emirates' Dubai light - the key OPEC crude from the Middle East - dropped 50 cents to $17.05. Britain's widely traded North Sea Brent fell 63 cents to $20.59 a barrel.

Marathon Oil Co., the Findlay, Ohio, subsidary of USX Corp., cut the wellhead price it will pay for crude as it is pumped out of the ground by 50 cents for most blends to $21.50 a barrel for WTI.

#90015u2492 01/15/1990 ~United Press International

MINNEAPOLIS (JAN. 15) UPI - International Multifoods Corp. announced Monday it has signed definitive agreements to sell its Mister Donut franchising operations in the United States and Canada.

Under the agreements, the U.S. operation will be sold to Dunkin' Donuts Inc., a wholly owned subsidiary of Allied-Lyons PLC of London. The Canadian operation will be sold to Allied-Lyons Canada Limited, Toronto.

The transaction is scheduled to close by the end of February, subject to regulatory approval.

Terms of the agreements were not released.

Mister Donut has 475 franchised shops in the United States and 83 in Canada. Estimated franchisee sales for the combined U.S. and Canadian Mister Donut businesses in fiscal 1989 were about $156 million.

''Over the past several years, we have concentrated our development in food service on food processing and specialty distribution,'' said Tony Luiso, chairman, president and chief executive officer of Multifoods. ''Although the Mister Donut system is strong and the business is profitable, franchising is not part of our long-term strategic position.''

#90015u2525 01/15/1990 ~United Press International

SAVANNAH, GA (JAN. 15) UPI - NAACP Executive Director Benjamin Hooks said Monday that Martin Luther King Jr. was a ''gifted prophet'' whose followers must not be deterred in their fight for racial justice by ''wild demented and stupid people.''

Hooks, speaking to about 1,500 people at the Martin Luther King Jr. Arena in the Savannah Civic Center, said those responsible for the recent mail bomb slayings of Savannah Alderman Robert Robinson and Alabama federal

appeals court Judge Robert Vance will not diminish the effort to keep alive King's dream of racial equality.

''I'm afraid that there are wild, demented and stupid people out there determined to set the clock back,'' he said.

Hooks exhorted the predominantly black crowd to continue King's mission by becoming politically active and economically savvy. He told them they must work to ensure the rhetoric espoused on the King birthday holiday - celebrated nationwide Monday - is more than just empty words.

''This gifted prophet ... as soon as he was dead people ran out and bought his picture. Isn't it a strange country where we kill living prophets and worship dead prophets?'' he said.

Hooks, citing Douglas Wilder's victory in last year's Virginia governor's race and David Dinkins' election as New York's mayor, said blacks have become a potent political force in America. To continue that success, he said black Americans must look beyond their traditional ties to the Democrat Party and build coalitions wherever other groups are willing.

''If the Republicans have something worthwhile, let us reach out to them '' he said. ''We must reach out and build coalitions.

''This business of hating white people is so stupid. If you go about hating people because they're white, they can hate you because you're black,'' he said.

-30- 2027

#90015u2544 01/15/1990 ~United Press International

BOISE, ID (JAN. 15) UPI - Several hundred people marched to the Capitol Monday demanding that Idaho join the ranks of the 46 states that recognize the birthday of slain civil rights leader Martin Luther King Jr. as a holiday.

Only Idaho, Montana, Arizona and New Hampshire have not established a state holiday to match the federal observance, held this year on Monday.

Eric Love, a black student activist at Boise State University, led the march.

Using a megaphone on the Capitol steps, Love led chants of ''Martin Luther King Day Now,'' ''Peace and Equality in Idaho,'' and ''Let freedom ring.''

Love said official recognition of the day is critical given the national attention the state has received from past racist and criminal activities of the Aryan Nations Church, headquartered in northern Idaho's Kootenai

County.

''Our reputation is bad enough with all the Aryan activity,'' Love said. ''It's time to make a positive affirmation for human rights and it's time for the Legislature to stop hiding behind the budget.''

#90015u2552 01/15/1990 ~United Press International

SAN FRANCISCO (JAN. 15) UPI - About 25 black truckers blockaded San Francsico City Hall with their rigs Monday to protest what they described as lax enforcement of minority contract laws.

Belching smoke and with airhorns blaring, tractor-trailers lined up three lanes deep below the mayor's balcony at noon. The truckers demanded that the city crack down on contractors who violate laws requiring that a portion of government jobs go to minorities.

Traffic on surrounding streets backed up for blocks. Across Civic Center Plaza, about 6,000 marchers filed into Civic Center Auditorium for a rally to commemorate Martin Luther King Jr.'s birthday.

The mayor's office was closed for the holiday, and Mayor Art Agnos did not meet with the truckers. The truckers charged that Agnos, who marched with King in Alabama in the 1960s, had forgotten his past.

''Today is Martin Luther King's birthday. It's for equality,'' trucker Herman Thorn said. ''We want equality.''

#90015u2568 01/15/1990 ~United Press International

SMYRNA, GA (JAN. 15) UPI - A man shot and killed his 3 1/2-month-old daughter, the baby's mother and the infant's aunt before taking his own life Monday ''so they could all be together,'' police said.

Witnesses said Donald Whigham, 28, went to the Heritage Point apartments where the three victims lived with at least two other relatives to discuss child support payments around 11 a.m.

''Basically, from what we can determine, Donald went there to kill Tara and Destiny and himself,'' Smryna Police Chief Stanley Hook said. ''That was his intention when he went there. We have information that he told someone he was going to kill them so they could all be together.''

Hook said investigators learned that Whigham bought the .38-caliber revolver used in the killings early Monday morning at a pawnshop.

He said the witnesses reported that an argument ensued between Whigham, his estranged girlfriend and her sister, then the gunman cornered one of the other apartment occupants, Dennis Curry, 19, in a back bedroom.

''Dennis jumped back into another bedroom and called 911 and we responded '' Hook said. ''When he was calling 911, he heard several more shots.''

When police arrived at the home, they found Tara Gossett, 18, her sister, Tracy Gossett, 20, and the baby, Destiny Amber, dead in one of the bedrooms, Hook said. The baby was born in September.

''We checked the car he arrived in, and he was lying in it dead from a self-inflicted gunshot wound,'' Hook said. Whigham lived at a different address.

Hook said Whigham began dating Tara Gossett two years ago and the two had what witnesses described as an on-again off-again relationship. They were separated at the time of the slayings, Hook said.

''They had been having problems for a long time,'' said family friend, Charity Handly. ''(Tara Gossett) said she didn't want him to see the baby anymore. They were havng serious problems.''

#90015u2574 01/15/1990 ~United Press International

ANCHORAGE, AK (JAN. 15) UPI - Alaska crude oil operations in the shadow of Redoubt Volcano were grinding to an indefinite halt in what an industry official said Monday was a ''severe action.''

''We're shut down now,'' Cook Inlet Pipe Line Co. President Jerry Durbin said of the Drift River oil storage facility. ''It is in imminent danger.''

A permanent shutdown of the 30,000 barrel per day operation would be ''a very severe action,'' Durbin said. But he said oil operations have been indefinitely curtailed. The last oil is to be pumped out of Drift River storage tanks later this week.

Durbin said the company was even examining the possibility of rerouting the Drift River, which lefts its channel and sent mud, rocks, ice and floodwaters to invade the pipeline company grounds following eruptions.

The slurry of muck created by volcanic eruptions was kept away from oil tanks by dikes, but 2 1/2 feet of muddy floodwaters knocked out power, damaged buildings and sent shivers of fear throughout the region that a major oil spill could occur.

Redoubt Volcano, a 10,197-foot mountain 110 miles southwest of Anchorage,

continued to release a vigorous plume of steam and gas to 14,000 feet, the Alaska Volcano Observatory said.

Geologists shied away from making predictions, but the observatory said Monday, ''As long as the volcano remains active, dome-building episodes and explosive activity are likely.''

Redoubt has been erupting off and on since Dec. 14, resulting in millions of dollars in losses and disruptions, according to Anchorage Chamber of Commerce speakers discussing the economic impact of eruptions over the last four weeks.

Anchorage International Airport lost $471,000 in various landing fees during the last two weeks in December when ash clouds wreaked havoc on holiday air traffic, airport manager Ken Burdette said.

Schools closed last week in Kenai Peninsula towns south of Anchorage when volcanic ashfall turned day to night and turned the snow gray.

Although the ash has been more of a nuisance and a threat than a disaster, officials were preparing for the worst, including possible widespread power blackouts if heavy ash fell on electrical generating plants near Redoubt. In the case of the oil storage terminal, industry officials were still too busy pumping out oil and making contingency plans to add up damages.

Fears have been voiced that the closing off of nine oil platforms in Cook Inlet could harm field production, with major financial implications. Kenai Peninsula Borough Mayor Don Gilman estimated the annual impact at about a quarter of a billion dollars in lost state revenue, local taxes and 1,300 jobs jeopardized by a Cook Inlet oil shutdown, if it lasts.

Alaska is the country's biggest oil-producing state, but most oil comes from Prudhoe Bay in northern Alaska, which is unaffected by the volcano.

Redoubt posed a potential for catastrophe at the Drift River oil facility, said Bill Lamoreaux, regional supervisor for the state Department of Environmental Conservation. Storage tanks 20 miles from Redoubt held 38 million gallons of oil, 3 1/2 times more than the Exxon Valdez spilled in Alaska waters last March.

Tankers are picking up the oil under an agreement between DEC and Cook Inlet Pipe Line.

The last 9 million gallons of oil is expected to be pumped out this weekend, Durbin said. He said the company has oil spill fighters on alert, but he said an eruption powerful to break the facility's dikes and cause a spill would likely impede any attempt to fight the spill.

Cook Inlet Pipe Line is examining the possibility of returning the Drift River to a channel it left farther from the tank farm, Durbin said.

Durbin could not explain how a large oil facility came to be built so close to an active volcano, but said there was no immediate plan to relocate it. The facility was built in 1966, during Redoubt's previous but less violent activity and before the state DEC was created.

While the public, and especially the fishing community, have begun to question the wisdom of maintaining oil operations near an erupting volcano and in a floodplain, the state is not forcing the company to close or relocate, DEC officials said.

#90015u2603 01/15/1990 ~United Press International

SAN JOSE, CA (JAN. 15) UPI - Maxtor Corp. reported a six-fold jump in third-quarter earnings Monday, boosted by payments from a supplier under a product discontinuance agreement.

Maxtor said net income in the quarter ended Dec. 24, 1989, rose 618 percent to $5.5 million, or 26 cents a share, from $767,000, or 4 cents a share, in the same period of 1988.

Revenue rose to $123.9 million from $91.4 million in the year-earlier quarter.

Pre-tax income was augmented by a $2 million supplier payment, the company said.

For the first three quarters of its current fiscal year, Maxtor said net income jumped 226 percent to $12.5 million, or 60 cents a share, from $3.8 million, or 19 cents a share, in the same period of the prior year.

Revenue rose to $349.5 million from $253.3 million in the year-earlier period.

#90015u2681 01/15/1990 ~United Press International

(JAN. 15) UPI - From violence-torn Azerbaijan... to Martin Luther King's native city of Atlanta... to Columbia's mission in space... U-P-I has details on all the latest news, next.

Three days of bloody ethnic rioting in the Soviet republic of Azerbaijan have prompted the Soviet parliament to declare a state of emergency in the Nagorno-Karabakh enclave and other parts of the region.

The official Soviet news agency Tass is NOT releasing details of the declaration. But, earlier today, Premier Nikolai Ryzhkov said military force would be used to prevent civil war between Christian Armenians and Moslem Azerbaijanis.

Soviet television says more than 30 people have died in the fighting. And Tass is quoting a reporter in the capital of Baku as saying bodies were being burned at the train station.

Tass also reports government soldiers are trying to curb the ethnic strife without weapons in order to limit the number of casualties.

A Soviet newspaper says a total of 660 Armenian women and children have been evacuated from Baku by boat. Armenians have appealed to the Kremlin to intervene to prevent a bloodbath.

Faced with massive debts, the Campeau Corporation today filed for bankruptcy protection to save some of America's most popular stores, including Bloomingdale's, from creditors.

The Chapter 11 filing was widely anticipated by industry analysts when Campeau failed to refinance a combined seven-BILLION-dollar debt last week for its two U-S retail divisions- Federated Department Stores and Allied Stores.

Security analysts applaud the move as- quote- ''the best thing under the circumstances.''

Today's action stems from Campeau's purchase in 1987 of Allied Stores for three-point-six-BILLION dollars and the 1988 purchase of Federated Department Stores for six-point-six-BILLION dollars.

Campeau- a Toronto-based real estate development company- was NEVER able to operate under the huge mountain of debt it created.

Besides Bloomingdale's, some of the other notable stores given a new lease on life from today's action in the federal bankruptcy court in Cincinnati are Burdine's, Abraham and Strauss and Jordan Marsh.

LANDOVER, MD (JAN. 16) UPI - Saying the struggling Washington Capitals needed ''a change for change's sake,'' General Manager David Poile Monday fired nine-year coach Bryan Murray and hired his younger brother, Terry Murray, as his replacement.

Bryan Murray, 47, a defensive-minded coach who transformed the Capitals from doormat to contender but failed to guide the team to playoff success, had been the NHL coach with the longest continuous service with his club.

Terry Murray, 39, has been head coach of the team's American Hockey League affiliate, the Baltimore Skipjacks, for the past two seasons after serving as an assistant under his brother for six seasons.

The firing comes as the Capitals, 18-24-4, are mired in an eight-game losing streak, the team's longest since a 13-game slide ending Nov. 11, 1981 - Bryan Murray's first night as coach - and stand in last place in the Patrick Division with the NHL's fourth worst record.

Just last season, Bryan Murray guided the Capitals to their first-ever regular season Patrick Division championship.

Poile struggled to explain his decision to oust one brother and hire another.

''I'm as big a believer in Bryan Murray as anybody can possibly be in hockey,'' Poile said. ''We didn't get rid of a bad person for this. We didn't get rid of a lousy coach. We have made a change. We're going in a different direction. It's a change for change's sake. Things weren't going that well this year.''

Since being hired on Nov. 11, 1981, Bryan Murray has amassed a coaching record of 343-247-83. Entering this season, he possessed the NHL's seventh all-time best coaching winning percentage and had accounted for more than 70 percent of the victories in Capitals history. Washington had never posted a winning season until Murray was hired.

Bryan Murray signed a new two-year contract last May. Poile said Terry Murray was awarded a two-year contract.

Terry Murray was en route to Washington from Ontario, where the Skipjacks were to play, and neither Murray brother was available for comment.

''If you were trying to make comparisons between Bryan and Terry Murray because they are brothers, I think you would be very remiss in thinking that they are very much alike at all, starting with their mannerisms to their coaching philosophies. I think there are some substantial differences,'' Poile said.

Poile announced the firing in an early evening news conference after making the decision to fire Bryan Murray Monday morning following consultations with owner Abe Pollin and team president Dick Patrick. Just last week, Pollin had given Bryan Murray a public vote of confidence, saying he did not blame the coach for the team's current troubles.

''It's not fair,'' Poile admitted of the firing. ''(But) it's not fair that we have injuries (top defensemen Rod Langway and Scott Stevens are both injured). It's not fair that we've lost eight games in a row, that we're the fourth worst team in the National Hockey League. There's a lot of things that aren't fair right now.''

Poile said that the team's postseason failures under Bryan Murray were a factor in the decision. While the Capitals have the third best regular season record in the NHL over the past half-decade and have reached the Stanley Cup playoffs for seven consecutive seasons, they have never advanced past the second round of the playoffs and have repeatedly been victimized by team's with poorer regular season records in the playoffs.

Terry Murray took over as the Skipjacks coach in June 1988 and has guided the AHL team to a 56-63-5 record, including 26-17-1 this season. He played 302 games in the NHL with four different clubs, including the Capitals, before becoming a coach.

Terry Murray will hold his first practice Tuesday morning and will coach his first NHL game Tuesday night against the New Jersey Devils at home.

Poile said he believes Terry Murray was ambivalent about accepting the job.

''Obviously, there must be some mixed emotions here when you have somebody like Terry Murray who has been aspiring and training to become a coach in the National Hockey League,'' Poile said. ''I'm sure he's excited for himself getting an opportunity, yet this is his brother he's replacing.''

(JAN. 15) UPI - With less than half of its scheduled 10-day mission remaining, the Columbia has developed a technical glitch that might force the space shuttle to end its flight early.

The problem confronting the space agency and Columbia's five-member crew stems from a faulty ''inertial measurement unit'' that is used for guidance and navigation.

Although the device- one of three- appears to be functioning properly now, last night it generated incorrect data five times. Earth-bound technicians have yet to pin-point the source of the problem.

If the faulty I-M-U spits out more wrong information and canNOT be fixed, NASA flight rules call for the shuttle to land.

But Columbia's lead flight director does NOT anticipate the veteran space

plane will suffer further mishaps.

Columbia's crew is busy performing experiments.

President Bush decided to shorten his holiday weekend at Camp David, Maryland, in order to squeeze in a round of golf at Andrews Air Force Base outside Washington.

Prior to making his foray onto the links, word came that Bush is faring quite well in the eyes of the American public.

Of 810 people polled, 63 percent grade the president in the A or B range. But NOT all the news is good for Bush nearly one year after assuming office.

75 percent of those surveyed say the president has NOT responded responsibly to the nation's deficit. And less than half of those asked think he has ''taken charge'' in Washington rather than letting his actions be determined by external events.

While Bush received positive marks overall, his popularity was overshadowed by that of his wife, Barbara. The first lady received an A or B rating from 76 percent of the respondents.

(JAN. 15) UPI - Tempers are flaring in East Germany.

Thousands of demonstrators ignored pleas for NON-violence and stormed the East Berlin headquarters of the hated secret police, the Stasi.

The rampaging crowd occupied the building for about one hour, hurling furniture out windows, threatening employees and hanging a skeleton bearing the slogan- ''Against a revival of the Stasi.''

The temporary takeover came as an estimated 100-thousand demonstrators gathered outside in a rally called by the New Forum opposition group to demand a quicker dismantling of the state security police.

The interim government has promised to disband the force, but so far it has only dismissed 30-thousand of Stasi's 85-thousand full-time workers.
